My hat's off the the young man. Think for yourself and don't let the ramblings of some malcontent ruin the things that you enjoy. It is a very different experience and each is enjoyable in their own domain.

Actually it's often hundreds of miles using a two meter handheld in my Baron.
I've never seen any interaction with flight or navigation instruments at all.
However, if I were carrying unknowns as passengers, they turn it off!

Well said.
I'm thinking of one area where I use Morse outside of ham radio: flying. Navigation aids identify in Morse, but a 5 WPM proficiency suffices. Good. I like your idea.

No, I'm saying that if you want the same license I have, pass comparable tests.
Is CW relevant? The Navy thinks not. It's still valid and satisfying.
I'm no 35 WPM Extra, just an Advanced. I took my last code test at the Dallas
FCC office in April of 1964, 13 WPM. The damn government already stole my First
Phone, I don't want it to redefine my ham license, too. Just create a new
ticket? Been done.
The service does need to evolve with technology, no one uses spark much.
I have no simple solution.

That, of course, begs the question: how do you define "working knowledge of the code"? One definition might be fast enough to communicate effectively. That threshold is right around 15 wpm. Thirteen is a pretty close approximation, and is the current requirement for General and Advanced classes.

Michael.

Agreed. You're describing the Novice and Technician Plus classes. There
is also the Technician class, which requires no Morse code. Pick one.

Michael.

I'm looking for: Motorola STX model 821 or MTS 2000 Flashport series radios. They must be 800mhz and Smartnet ii capable. These are for a small dept. here in the Indy area that is looking for a way to get around paying the enormous price of new ones from the local radio authority. If they have extra batteries or chargers or public safety mics that would be great also but not needed. Anybody that has these in good to fair condition can e-mail me at paramike@indy.net with prices and terms, I will forward the info to the chief of the dept. inquiring about the radios. Thanks for your help, Mike

Really hard to talk to the ones that aren't there... unless you kept a database of all the tickets you sold the years before, and then compare, and then spend thousands of bucks on phone calls, and then reduce the data to something meaningful, its gonna be tough to know what the "not theres" really have on their minds.

Talking to the ones that do come can tell you what THEY like about the Hamvention, and what they don't. Some that still come anyway don't like the beanie babies in the flea market, either - I'd be one of those. The clothing vendor in the tent shoulda been tossed, too. Whadda they think this is, a rummage sale?

About the best way to talk to some of the people that didn't come is probably this thread.

The law requires your TIN - Taxpayer Identification Number.
The default TIN is your SSN, but anyone who does not want to
give out their SSN can request a different TIN from the IRS and
use that one.

The only ones who could rail against that are anti-government
nuts.

>Who is KV4FZ?

Subject: KV4FZ - American Hero
From: N0VFP
To: rec.radio.amateur.misc
Date: 5/4/99

KV4FZ has been an active amateur radio operator since 1954 when he was first licensed in the Midwest as W0VXO. While working his way through college (1960-64), he spent summers teaching at several camps for the physically handicapped. He was highly successful in teaching seriously disabled campers about the potential of amateur radio. Many of these campers went on to fully qualify for their amateur radio licenses.

His father, W.B. Schoenbohm, was the founder of Courage Center in Minneapolis. Herb was a major force in pushing for the initiation of the Handi-Ham program, which is now widely recognized as the premier service organization for disabled radio amateurs. After college, Herb worked as a international sales representative for Gates Radio, Harris Corp, and Collins Radio. He sold and distributed broadcast equipment to the international market, primarily Latin America. In 1968, he moved to the U.S. Virgin Islands with the intent of better serving his customers. His wife Monika was, at that time. a service representative for Pan AmericanAirways. KV4FZ was very active in DX work and, as a frequent traveler, put many new countries on 160 meters. He was instrumental in getting Stew Perry, W1BB, the necessary countries to be the first ham ever to get DXCC on 160 meters. He also gave G3IOR the last country he need (VP2EFZ, Anguilla) for the first ever DXCC via satellite (Oscar 7).

During the 1970's, KV4FZ was able to set CQ World Wide records 160-10 in almost ever category except 40 meters. He was also very active in supporting the IARU Intruder Watch after encountering frequent yachts in the area that had acquired licenses of convenience for a fee. At that time, FCC Commissioner Margita White appointed KV4FZ as the Virgin Islands SECC. The SECC has responsibility to plan and manage the operation of radio communications resources during island emergencies. Herb fulfilled that role magnificently and was named a Virgin Island "Hero" after Hurricane Hugo destroyed most of St. Croix in 1989. Herb received this award for keeping vital communications circuits open during the crisis.) Herb also took a detailed interest in how most of these "pirates" has a close association with the so-called "service nets" on the top end of 20 meters. He joined the net and attended several of the hamfest functions. Only then did he learn how deliberate and sordid was the manner in which net members misused the amateur spectrum as a means to provide an international telephone toll by-pass service. One of the most flagrant of all these operations was the "INTERCON" network

operating, for the most part, on 14.313 MHz. Herb began detailed monitoring of their operation and intercepted many communications that were appalling to say the least. In 1979, KV4FZ listening to what appeared to be a "business connection" between WB6MID/8R1 in Jonestown, Guyana and WB6MID in Ukia, California.
Herb broke in and informed the net personnel that this type of operation on an amateur frequency was illegal. Furthermore, Herb stated that their communication constituted international business communications related to funds transfers and the procurement of equipment and supplies. The net hierarchy reacted by excoriating him for his "embarrassing comments" and ignoring the violations. The net bluntly told him that the Jonestown Operation was a missionary group and that they had special permission from the Carter administration to use ham radio to further their "worthy cause". Herb persisted with his concern and was quickly declared 'PERSONNA NON GRATA" by Robert Sternberg, AA4EE, a tax attorney who claimed to be the nets legal advisor. Herb expressed his concerns to other net operators participating in the companion "Maritime Mobile Net" such as Dick Eastman, N5FX and Mike Galego, KA4MUJ. Several Maritime Net members agreed that some of the more criminal practices, such as one ringers and "maintenance charges" for providing long distance toll free connections practically anywhere in the world, must be curtailed.

Some of the net cabal hierarchy rebuffed all attempts to institute reform and a nasty power struggle ensued. Eastman and Galego were "ex-communicated" by Ruth Hoffman N4LMC, Eddie Ricca K4PT and Art Candell N4PCK. The latter began a propaganda campaign, replete with false stories and personal attacks, that promised to destroy any net opposition that
sought reform. The net members objected to the lively participation of KV4FZ, KA4MUJ, and N5FX (a former net director) who frequently brought to the attention of net participants certain stations whose conduct violated the FCC and International Rules.

During the 1980's, net members began a campaign of coordinated complaints to the FCC claiming that the aforementioned three were causing willful and malicious interference to the net. N5FX and KV4FZ both received prefabricated FCC citations at the behest of the net command. Both were able to get the FCC to nullify their actions based on the fact that their constructive comments did not constitute "malicious interference" and that certain members of the net themselves were engaged in a premeditated campaign of harassment and interference.

Several members of the net were subsequently caught interfering with the communications of KV4FZ and KA4MUJ. They include K2BFI and AA5LY. AA5LY later gave the FCC, and supporters of KV4FZ and KA4MUJ, a complete and accurate accounting of the plot by disgruntled net members to "settle the score". That plan included a vigorous campaign of letter writing to politicians in Washington in an attempt to pressure them into punishing the net detractors.

N4PCK had his own reason to get even. He had known Herb while he was operating in Haiti as HH2A and was very active on the INTERCON net. Herb had learned, through his contacts in Haiti, that Candell had a serious

problem. He would solicit young pre-teen boys and pay them a quarter to perform sex acts on him. A prominent Haitian administrator was told, by his son, that the young boy had been abused and sodomized by Candell. There was no arrest or trial. But the arrival of the outraged local citizenry at Candell's hillside villa dictated that Candell receive an armed escort to the airport. Candell then appeared in the Orlando, Fl area, illegally using the call HH2A/W4 and actively engaging in net activities. The net watchdogs, now known as the B.A.R.F. (The Better Amateur Radio Federation), pointed out that Candell was not eligible to use a Haitian call sign in the United States unless he was a Haitian citizen and had been granted a proper permit from the FCC.

Again the net members supported Candell and sought to silence Herb. However, the FCC ruled that Candell could no longer operate from Florida unless he obtained a valid U.S. amateur radio license. Candell later paid off a VEC in Silver Springs, Fl to fraudulently give him a passing grade on a General Class license examination. The VEC was later sanctioned but Candell was neither removed from the air nor required to be re-examined. In 1989 Candell was finally arrested and convicted of multiple incidents of child molestation. He was given a suspended sentence that was partially based upon INTERCON's assertion that he had been rehabilitated by amateur radio service in their net. (Candell was arrested and convicted again in 1994 for carnal assault on several boys between 8 and 10 years of age whom he had invited into home under the pretense of showing them his ham station. He has been institutionalized for several years but his ham license was, nonetheless, renewed in 1996 for another ten years.)
In 1990, Candell continued with his plot to destroy and discredit KV4FZ in retaliation for Herb's alleged "interference" with the net's "business". Candell actively leagued with other enemies of KV4FZ such as Pat Miller, KP2J in St. Thomas, and Richard Whiten, WB2OTK. Miller supplied Whiten the so-called "proof" of a crime by playing a recorded tape on both 20 and 75 meters. Miller introduced Candell to the operator of a long distance resale service that KV4FZ briefly subscribed to in 1987. Some of the users of the CALLS (Caribbean Automated Long Line Service) system (a six digit access code system on which half the possible combinations of digits gained the caller access to a WATTS line) had been illegally abusing the CALLS scheme. Malcolm Ford had claimed losses to the tune of $200,000 and needed a scapegoat. Thereupon, it was decided that a criminal case should be manufactured against Herb, KV4FZ.

Ford needed this falsification to support his ludicrous claim that the impending bankruptcy of CALLS was not due to his inept management. Instead, it proffered that somehow Herb had caused his business to fail. This was vital to Ford because he was still salaried as the GM of CALLS even though they were in receivership. Ford's efforts failed and he was physically removed from the operation after the Federal Bankruptcy judge found him raiding the treasury and assets of CALLS.

However, all during this time, Ford was fabricating evidence in an attempt to establish a connection between CALLS financial failure and KV4FZ. Yet the Department of Justice continually refused to prosecute Herb. This

resulted in even more acrimonious letters to officials and politicians in a further attempt to implicate Herb as the culprit.

Malcolm Ford, the previous owner of CALLS, was then under investigation for bankruptcy fraud. In an attempt to escape indictment, Ford hired John Ackley, KP2A, to fabricate various reports that would designate Vitelco(a local phone service), STSJ Long Lines, ITT and Herb as coconspirators who were attempting run him out of business. While this was going on, Ackley was attempting to buy the nearly defunct company for ten cents on the dollar. (Ackley failed but STSJ was able to get the company back on its feet.) Miller, Hoffman, Candell and others intensified their letter writing campaign to hundreds of politicians in Washington urging them to investigate. They even began writing letters to newspapers, claiming that politicians were shielding KV4FZ from prosecution. In these hate letters to public officials, Herb was equated with organized crime, drug trafficking, and high level political corruption. In 1991, KV4FZ was writing a hard-hitting column for the St. Croix Avis newspaper. Herb frequently attacked political corruption so it stood to reason that he might have some enemies in government. Herb had articles published about the check kiting and House Banking fraud perpetrated by the Virgin Island Delegate to Congress, Ron Delugo. Outraged and distraught, Delugo (who had designs upon becoming the next governor of the Virgin Islands) assigned a full time staff attorney (Sylvester Julian) to explore methods of pressuring the FCC, the Secret Service, and the Department of Justice into investigating Herb and "putting a 'severe hurting' on him".

However an obstacle remained in the path of their plan to annihilate KV4FZ. Some at the FCC supported Herbs activities on behalf of the amateur radio service. Additionally he was elected as Vice Chairman of the Virgin Islands Republican Committee, which made him a frequent delegate to the GOP Conventions. Furthermore, Herb was personally acquainted with President Bush. Herb's father had served on the President's Commission for the Handicapped.

Initially, each and every involved agency claimed there was not enough evidence to support a charge against Herb. Subsequent to this, John Ackley, KP2A, manufactured a list of 660 telephone calls that were prearranged to add up to $1,047 in value. This was exactly forty-seven dollars over the amount needed to achieve the threshold of prosecution. Delugo wrote threatening letters to various government agencies threatening that he would see to it that their funding was severely curtailed if he did not receive figuratively receive Herb's head on a silver platter. Ruth Hoffman constantly badgered the acting U.S. Attorney for the Virgin Islands, Terri Halpern. This continued to the point that Hoffman was finally ordered to stop harassing Halpern. However, as a Congressman to the VI, Delugo was in a position convince colleagues not to block Halpern's confirmation. Delugo reportedly told Halpirn that, unless she prosecuted Herb Schoenbohm, she would never become U.S. Attorney. (Halprin was fired in 1992 by the DOJ for ethical lapses after the Office of Professional Responsibility investigated the severe criticism, from the 3rd Circuit Court of Appeals, that Halpern received for the "knowing use of false evidence" to secure a conviction. Nevertheless, the trial prosecutor was cleared by OPR because they were unable to prove that the prosecutor actually knew the evidence used was false.)

Herb's trial took place in April 1991 (four months past the five-year statute of limitations). Both Ackley and Miller testified, under oath, as to the veracity and accuracy of the incriminating evidence they had assisted in concocting. (Miller offered his so-called "caught in the act" tape of Herb dialing "illegal access codes". Ackley presented his list of random numbers that he verified, as a government expert witness, were all telephone numbers dialed by defendant Schoenbohm.

The puzzled and confused jury convicted Herb on all three counts of Title 18, SS 1029(a): 1,2 and 3, which is, in reality, an illegal credit card statute. This statute has been used infrequently to curb the illegal use of cloned cellular telephones. After trial, Schoenbohm with the help of Bob Sheron, W4ASX, closely scrutinized the evidence and began tracking down the parties that Ackley had claimed, under oath, that Herb had illegally called. A most amazing discovery unfolded: most of the persons contacted did not know Herb Schoenbohm or had never had a telephone conversation with him. Amazingly, they had already given statements confirming this fact to the Secret Service investigators. Most had even identified persons, other than Schoenbohm, whom had called them from the Virgin Islands during the timeframe in question (1987). Interestingly, the court refused to allow Schoenbohm to verify the numbers before trial.

The court incredibly claimed that it needed to protect the potential witnesses from pre-trial disclosure! After trial, armed with affidavits from the persons alleged to have received Herb's "illegal" calls, Herb moved for a Judgment of Acquittal not withstanding the jury verdict. The court granted the motion on all counts but one (Possession or Use of a Counterfeit Access Device). The court maintained that the Miller tape proved that something was amiss and the jury could correctly deduce from this that the law had been broken. This court decision differs from the previous decision in that the device is similar to, but not exactly the same as, a valid device and does not require the threshold of over $1000 in use. (The irony in this entire matter is that Herb freely admitted to using the service briefly in 1987. He was a bona fide customer and the total actual use amounted to $106. CALLS finally was required by the court to produce Herb's check for $104 that they had received in1987. They admitted that they did not cash the check but, instead, held it as an aid in the plot to entrap KV4FZ.) When the court vacated the judgment requiring two months prison time, Herb's detractors were enraged and, once again, began the political letter writing campaign. Now the claim was that Herb had used amateur radio in the commission of a crime and should be taken off the air. They sent the highly doctored Miller Tapes to the FCC in an attempt to prove their incredible theory. Their letters were full of outrage over the fact that Herb had once more cheated Madam Guillotine and he still on the air making waves. Some were furious due to the fact that they had given financial support to certain political candidates and nothing permanent had been done to rid the airwaves of this "pest", KV4FZ. (Ruth Hoffman even conveyed gifts to officials at the FCC in attempt to bribe public servants. One such official, William Cross, was investigated for leaking internal information to Ruth Hoffman in the KV4FZ matter. Hoffman then disseminated this information for use in the hate campaign against Herb.)

KV4FZ then was subsequently forced to embark upon a long and costly struggle for justice. He has had to fight the refusal to renew his amateur license by demanding a hearing before the FCC. (The refusal to renew is rarely used as a procedure and has been given the title: "The FCC Death Penalty" because the entire burden of proof is placed upon the licensee.) At the first FCC hearing, Administrative Law Judge Luton ruled against KV4FZ. However, upon higher review, the FCC General Counsel refused to accept Judge Luton's findings and remanded the matter for reconsideration. The principle issue is whether or not KV4FZ had used amateur radio in the furtherance of the commission of a crime. This time the ALJ ruled that there was nothing in the evidence (The Miller Tape) that was illegal in any way. The concluded that Schoenbohm actually was dialing ordinary and valid Virgin Islands telephone numbers. He was not entering illicit access codes to make long distance calls.

The ALJ did, however, agree with the Wireless Telecommunications Bureau (WTB) assertion that, by giving out the telephone number, in 1994, of Herb's future boss, Congressman Frazer (whom, incidentally ran Delugo out of office), Herb was violating a solicitation restriction of ex-parte rules. This was despite the fact that WTB had conceded that no actual ex-parte violation had taken place. The ALJ ruled that, by attempting to explain his conviction as a De Minimus violation rather than a crime of major impact, he was trying to mislead the trial of fact. (In administrative law, the assertion of innocence is a crime even if the accused is actually innocent! It is akin to Hobson's Choice or the Salem witch trials whereupon, if the tied woman is thrown into the pond, and she does not drown, then she must surely be a witch and, thus, must be burned to death.

Herb had been fighting the remaining count through the Federal Courts and has even succeeded in convincing the courts to severely criticize the DOJ for their handling of the case. Nevertheless, they refused to reverse the remaining conviction because of the nearly impossible to define "standard of harmless error". The appellate court ruled that the motion for Judgment of Acquittal had been filed too late even though the trial judge had granted an extension based on the emergence of irrefutable proof that the prosecution had used false evidence. As a result they were barred from considering the sufficiency of evidence matter at this late date under the rigorous standards of Habeas Corpus review. However, a positive revelation in the latest FCC decision is that it clearly vindicates Herb on the original charge of using ham radio in the commission of a crime. It also conclusively proves that his detractors engaged in perjury before a Federal Grand Jury and Petit Jury trial.

Many on the local scene recognized the truth. The Trial Judge, The Honorable Ann Thompson, wrote a letter of support and praise on Herb's behalf. The Governor of the Virgin Islands did not simply restore Herb's government career. He elevated Herb to a position of higher authority with more responsibility to the island and a significantly higher salary. He was also employed, as a part-time field representative, on the congressional staff of newly elected Congressman Frazer.

The FCC WTB attorneys characterized these as "political jobs", unworthy of consideration as a mitigating factor in Herb's "rehabilitation"!) Although Herb

had a Congressional Floor Pass, granting him direct access to the ears of the politicians, there is no evidence that he ever abused his position to lobby House members against the FCC. This is in spite of the fact that the bureaucrats inside the FCC are very much afraid that Herb might just whisper in the ear of someone who controls their finances. Because of this, Herb is not allowed to take his case to the very people who would be horrified to learn the truth about how he has been treated. These are the people who could finally put a stop to this travesty of justice. Yet, Herb's detractors are on the phone daily, pushing those in power to get him off the air, one way or another. When will the voice of reason and justice be heard?

Some of us do not like the odds and are willing to help end this fiasco. Herb's legal bills are soaring but he continues the fight. His attorney, Larry Colby (a licensed ham), has stated that when this issue gets into the proper arena, Herb will be totally vindicated. But this can only happen if Herb is allowed to fight on and get his case into the proper arena. Right now, it is still in a forum where all the rules are stacked against the licensee. When the matter gets out of the FCC, and into the D.C. Circuit Court, then the playing field is closer to being balanced. There, the Feds don't have the automatic upper hand that allows them to do what their political puppet-masters demand.

A small donation of $25, $50 or $100 will go a long way in continuing the fight for justice. There is an underlying principle that must be preserved. It is not keeping Herb on the air that drives his supporters. It is the realization that if they can deprive KV4FZ of justice then they can deprive any of us of justice. Today they are persecuting KV4FZ. Tomorrow it could be you. You could be railroaded just because somebody doesn't agree with your position on the nets, phone patching, or apple pie. Herb is working vigorously to get the funds together for his appeal. His attorney Larry Colby is attempting to get an extension of time to file exceptions. If you can help in anyway, please contact John Dillenger, K4GFM, who is the custodian of the Defense Fund.

at least it keeps the cb'ers off the hf ham bands, and wish the
truck drivers would get off the 2 meter band, that's where the
fcc made a mistake, with the nocode ticket.

Last week while slumming on shortwave,I listened to the screaming egocentric maniac,Brother Stair,.proclaiming to the world that he is the last day prophet of God or some crap like that. I also logged onto his website and he looked like an unshaven bum ready to accept any "offering" including some disposable Bic shavers. As a Jew I found his behavior rather puzzling but then again, as long as he keeps hammering away at the Pope,he's going to leave my brethern alone. Candidly if I were a Christian, I'd find that man a total embarrassment because he's not acting in the name of Christ but rather in a manner to spite it. It seems that he's positive that Catholics aren't going to heaven because they follow a Pope whom, according to Stair, is in cahoots with the devil. Devils? We got a whole bunch of them in New Jersey who play pro hockey! The way I sum up the obnoxious Brother is that he's just another Elmer Gantry, out to hoodwink the gullible in order to steal their funds. Another"give me your cash or you'll never get into heaven" charlatan who's based in South Carolina. And that leads me to this question: why is it that so many of these thieves waving a cross, work out of the South?. Are you Johnny Rebs all that gullible,stupid,naive or just plain frightened? There must be fertile ground down South to reap in the big bucks while screaming Jesus taught that poverty is no sin and to give it away,especially to a fraudulent man of the cloth like Stair in order to enter heaven. Too bad I'm not of the same Christian persuasion as is Stair because if I were, I'd call myself Brother Escalator and laugh all the way to the bank. Doc, AF2Y

4199. Off the hook??

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-18 00:00:00 UTC
From: Oris <oris@dirtball.com>
Message-ID: <3742329F.6E85@dirtball.com>
Source record: 142560

What has the FCC gone blind to fact that its let one of the worst jammers off the hook? Have they been totally blind to the fact that this jammer does and has always used foul language over the radio? What's this has the FCC chickened out again? The first real chance on the betterment of ham radio and the government washouts go yellow? Is this another example of how our FCC is going to handle the true troublemakers on the amateur radio service? The service is truly going to die now! I will make a prediction that the airwaves will be worse now then ever. Has Hollingsworth lost his backbone? Did the FCC stop enforcing the rules? I mean I know for a fact that this jammer DID LIE to Hollingworth about the homebrew 8877 amplifier being under construction. I have heard it on the air more then once, and ran up to full power. I also know for fact that the station in question did go down on 3.8945 MHz and cause willful interference on many occasions. I also know when things started to calm down, the station in question would stir the crap back up and laugh about it. I also know that this guy did sell worthless filters over the radio and when people complained and wanted their money back all of a sudden there was something wrong with their radios. WHAT IS THIS!? Has the FCC lost their minds? What kind of farce is this I say? Well Mr.Riley Hollingsworth you have handed out the wrong message to both groups and the amateur radio community as a whole. You can bet the airwaves will be full of PORKBUT SONGS 10 5 with his squeaky voice going off about NALs and others just going off the deep end. I can surly see the death of amateur radio is right around the corner. What has Mr. Hollingsworth done now? It looks to me that Mr. Hollingsworth has handed a license to jam to one of the king jammers on the radio today. What is the world of amateur radio come to? We all where in high hopes that you Mr. Hollingsworth where going to be the new sheriff in town. It appears that you're another Washington quitter! You can bet that 20-meters for the next here on end will be crazy! You can bet that 75 will be completely nuts as it was before this so-called FCC crackdown (again I say WHAT CRACKDOWN? I have talked about this in previous commentary.). As for par for the course the FCC cowards at the most perfect time to save the service form its own self-destruction. What is wrong here? I pulled the strong anti-FCC web pages down at your request Mr. Hollingsworth. You assured me that something was going to be done! Just like in the past and just like Washington allot of hot air and nothing gets done!
Well for those of you in the Banana Republics that want the low end of the spectrum for your banana work. Just stick it out for a few more years. The FCC has sent the wrong message to all the white trash on amateur radio today. Start getting your bids ready because it will be just a matter of time before this trash embarrasses the USA to the point of Congress yanking the whole service from us. Darn CBers are better

operators then the trash that the FCC has decided to let off the hook. For the rest of us, you can bet that this is the long-term plan of the FCC and this administration to give the trashy amateur radio operators the chance to destroy the whole service. Take away more freedoms and gain more control over the American people. You can bet that the FCC will give the policing of the airwaves to the local police and when that happens WE WILL ALL LOSE! You can take that to the bank! Then it's just a matter of time. Banana republics GET YOUR BIDS READY! The spectrum will soon be for sale to the highest bidder.
WAY TO GO HOLLINGSWORTH! Perfect opportunity for the FCC to show that they mean business. The perfect opportunity to show that the FCC isn't a paper tiger and that it has real teeth. Typical of our government in this country of ours always start a good job but rarely finish. Aw what do you expect from Washington? They send a lawyer to do the work of an enforcer what a bunch of quitters. Hollingsworth if you read this way to go! Don't worry boys Hollingsworth will read this because I'm sending it to him. I guess time will tell.
Best Regards and May amateur radio R.I.P.
Oris Grim

I have three CB radios. As soon as they were given to me (one was found in
a dumpster) they were immediately converted to 10 meter CW.
Jeff KH6O

P.S. I've never found a ham radio in a dumpster. I guess that points to
a pretty big distinction between the CRS and the ARS, eh?

How many, Bill? If someone is not interested in digital comms,
satellites, RTTY, component data, and SSTV, can they skip all those
questions and still pass, or will they be "forced" to learn those
subjects which they'll never use?

>Not so
>for CW testing which is given, graded and must be
>passed as a totally separate test element.

Only at the 70% level; that's less than what's needed to pass the
written exams.

4213. Re: Dayton Hamvention - Where Was Everybody???

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-18 00:00:00 UTC
From: shephed@aol.com
Message-ID: <19990517232059.16504.00002049@ng43.aol.com>
Source record: 142574

The big problem with Hamvention is:

1: They keep down sizing the buses, this year there were only two free parking spots. One of the major sights (Forrest Park Plaza) was shut down due to redoing the parking lot, most likely it will not be open next year. Also the buses were not running at the Air Force Museum, another major parking area.

2: The price of admission is getting too high.
The committee should look into offering a one-day pass, a lot of people are complaining about this one. I think they only think about the Hams who come from far away who make a weekend of it, but a good deal of people come to Dayton for only a day.

3: WAY TOO MANY COMPUTER VENDORS.
This year looked more like the Computerfest that is held here every month. Also anyone catch the great deals on Beanie Babies?
Give me a break.

I think a major shift should be made from making Hamvention a profit generating event to what it used to be, a place for Hams to gather and share their love for the Hobby, and a place for Ham Radio vendors to show off their latest toys, not a haven for Computers Nerds, and Beanie Baby Buffs.

4216. FCC Illegally Requires SSN

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-18 00:00:00 UTC
From: mf_luder@my-dejanews.com
Message-ID: <7hshs3nvg1@nnrp1.deja.com>
Source record: 142651
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

As part of the ULS, used to file electronically (a feature in itself discriminatory to those without internet access), FCC has dictated you give them your SSN.

Do not be hoodwinked !

Neither your DMV, FCC or any other state, local or federal agency other than the SSA has a right to this number. They will claim they do ! THEY DO NOT. YOU NEED TO UNDERSTAND THE LAW AS ENACTED BY CONGRESS, NOT AS INTERPRETED BY AN AGENCY BUREACRAT !

Additionally, government claims of secure servers at the civilian level are bogus ! These servers and their data are regularly intercepted in transit,decoded and also hacked at the server itself.

Instead, provide a random PIN number you have chosen and record it for your dealings with this system.
==========

Now, for the editorial. It's discriminatory, like I said. Government has no right to demand anyone access an electronic system. Both that demand and the collection of these numbers is tantamount to modern chattel slavery. The SSN is used for serious, private matters such as income reporting, benefits, etc. With it anyone at FCC or along the internet can find out anything about you, and since this is ham radio, not a vital safety or security issue like a pilot's license, it's a ridiculous request.

FS Kenwood TS-440S-AT "MINT CONDITION" +Filters +PowerSupply +Speaker

Kenwood TS-440S-AT
+PowerSupply
+Speaker
+ 2 Filters

~ Mint Condition
~ Single Owner
~ Low Use

Package includes the following:

TS-440S-AT - With Built-In Antenna Tuner
PS-50 - Kenwood Power Supply
SP-430 - Kenwood Matching Speaker
YK-88SN - Kenwood 1.8KHZ SSB Filter
YK-88C - Kenwood 500 HRZ CW Filter
SM-TS-440S - Kenwood Service Manual
OM-TS-440S - Kenwood Operating Manual
Receipts - All HRO original purchase receipts encluded.

This rig is in factory new condition. It
is complete as listed above and includes
all original Kenwood equipment boxes.
Soon after the purchase of the above rig,
It was replaced with a Kenwood TS-950D
resulting in very low usage.

If you are seriously interested in purchasing
a top quality rig, this is it. $850.

Includes ground UPS shipping in USA

I think it must be earlier than 1965. I had an RCA Carfone 150, actually
I still have it around, back in 1972 and it was surplus at that point. It
had vibrators in the power supply.

I can't imagine them going to a later model and adding a dynamotor. And I
imgaine the next step after the one I had was probably transistors.
Certainly in the power supply, if not partially or completely in the RF
circuitry.

Have you opened it up? Posting the tube lineup might give an idea of
vintage. The Carfone 150 has a filter in the 455KHz IF and if yours has
one, there might be a date or information about bandwidth. Since bandwidth
kept getting reduced with time, it would be an indicator of age.

4224. Death of Ham radio?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-18 00:00:00 UTC
From: vpaul@nmia.com
Message-ID: <7hsc71$b3i$1@hume.nmia.com>
Source record: 142659

On Mon, 17 May 1999 NCC-1701B@Mindspring.com (CRT&#65533;) wrote:

>Ham Radio is on it's deathbed. I'm an Extra and I sold all my
>equipment because of the garbage on the bands. RIP amateur radio.

Why did you bother in the first place? Not a criticism,
just asking why anyone would go to all the trouble and $$$.
I am a ham because I enjoy the technical challenges involved.
The garbage on the bands isn't relevant. Prohibitive and
oppressive FCC regulations are all that could keep me out of
ham radio. I'm no outlaw. Ham radio is a right and a
privilege. If ham radio truly dies, we have other means of
communicating. For now. We just won't have any control over
them.

I come from the school of "Guard all your rights jealously,
because they are easier to lose than to gain." If ham radio
dies out, the ham bands will be reassigned to commercial use.
A precious freedom will be lost. Do you truly want to tell
your grandchildren that YOU used to be able to communicate
with the shuttle in orbit, but you lost interest in it, the
whole thing was eventually scrapped, and now no one is allowed
to use the radio waves unless they bought the bandwidth at an
FCC auction?

Ham radio must be kept popular, even if the entry level
license is a "gimme" that any citizen may have, even if the
airwaves are flooded with crap. Higher level licenses are
where you separate the chaff from the wheat. Keep morse
code. Add a soldering skill test. Make the exams harder
to memorize and more comprehensive. If we close off
access to the entry level licenses, ham radio will die.

Maybe you will be able to talk to the space station via an
online chat site, if that happens. Maybe your cell phone
will reach the moon by then. If so, your freedom to
communicate will be in the hands of those who control the
means to communicate.

Again, not everyone has or will have a computer, that is a Klinton NWO assumption.

Such numbers are legitimate only for revenue purposes.

FCC has no cause to collect a TIN/SSN from a ham who owes no fees. A random individual number or callsign can be used.

It's part of an interagency attempt to catalog all angles of our lives.

The RS WX radio I had used a single crystal, and different trimmer capacitors were switched in and out while changing channels. I suggest you open the radio's case, look for one of the trimmers, and, with the channel selector selected for that trimmer, adjust it with a plastic tuning tool, until you hit that frequency.

Really: Try a little experiment for me then. Just stand at a gas station whilst somebody is refuelling and induce just a small spark! If you have never seen a gasoline vapor explosion and the resulting skin burns then maybe you'll think again. Any transmitter is dangerous under those conditions, and a cell phone is still a transceiver with operating keys. Then again you are justly entitled to your opinion as I am and I prefer to play along the lines of common sense and public safety. No doubt you are quite happy to smoke a cigarette whilst refuelling your car!

Well Phil have you ever seen the results of a gasoline vapor explosion?
No of course you have not! But I have. And the resultant skin burns are
not pretty to see. Any electronic device is capable of producing short
circuits and sparks. Activating cellphone keypads may or may not induce
an electrical connection, however small, but you can bet your bottom
dollar that if there was such a fault produced then you would be the
poor schmuck standing there pumping unleaded gas into your car! We here
in the UK do not have vapor vacuums fitted to the gas pumps, so the
whole area around a busy market gas station is full of gas fumes.
All I am considering is the personal safety of my family and myself, and
if you don't like it Phil you can go and stuff yourself!

Sounds highly probable, Dave. I've been wondering why Riley has (and has not) been doing the things he's been doing. There has been no real punishment of any kind. This gives the miscreants a "license" to disrupt the bands even more. Just listen to 3.950 after nothing was done to David Castle or Art Vissar, even after they DARED the FCC to come and get 'em! Last Saturday was the WORST I've heard the frequency IN YEARS. Another good example is Pork Butt. When he came back on the air yesterday and announced he was "off the hook" with the FCC, his suck-up boys went crazy on 14.313. That frequency has been quite for weeks since Porky's been gone. No longer!

All this is being done by Riley to make it "look" like he's doing something. And the ARRL is Riley's PR agent. In actuality, Riley is startegically creating MORE chaos in order to eventually have it used against us hams. And the FCC will come out looking clean as a whistle as they blame the loss of frequencies to the 14.313 and 3.950 trouble makers.

If Riley TRULY meant business, he'd take WA9KJI, W9ART, K5BLB, AF2Y, WB2OTK, and a few others off the air for a while, or hand out some NAL's. But we're not seeing that because the end result would be well behaved ham bands. And the FCC doesn't want that. They want chaos.

So I say.....let's NOT give it to 'em!!

Eugene

Your scenario fits in with what the CEO where I work
has been talking about.

The Clinton inner circle is always thinking
"globalization" and that include communications. They
are considering a couple five-year phase out plans for
the FCC. In other words, the FCC is history! Some of
its functions will cease, others will transfer to the Committee
on Telecommunications & Information Technology which is
part of the ICCWBO organization and is based out of
Paris, France.

For you doubters, look up the ICCWBO web site
at: http://www.iccwbo.org and then look for the above
mentioned committee.

<<<WORD HAS IT THAT THE FCC WILL BEGIN AUCTIONING OFF OUR FREQUENCIES TO CENTRAL AMERICAN COUNTRIES ON eBay.Doc,AF2Y>>>>>>>>>>
What has the FCC gone blind to fact that its let one of the worst jammers off the hook? Have they been totally blind to the fact that this jammer does and has always used foul language over the radio? What's this has the FCC chickened out again? The first real chance on the betterment of ham radio and the government washouts go yellow? Is this another example of how our FCC is going to handle the true troublemakers on the amateur radio service? The service is truly going to die now! I will make a prediction that the airwaves will be worse now then ever. Has Hollingsworth lost his backbone? Did the FCC stop enforcing the rules? I mean I know for a fact that this jammer DID LIE to Hollingworth about the homebrew 8877 amplifier being under construction. I have heard it on the air more then once, and ran up to full power. I also know for fact that the station in question did go down on 3.8945 MHz and cause willful interference on many occasions. I also know when things started to calm down, the station in question would stir the crap back up and laugh about it. I also know that this guy did sell worthless filters over the radio and when people complained and wanted their money back all of a sudden there was something wrong with their radios. WHAT IS THIS!? Has the FCC lost their minds? What kind of farce is this I say? Well Mr.Riley Hollingsworth you have handed out the wrong message to both groups and the amateur radio community as a whole. You can bet the airwaves will be full of PORKBUT SONGS 10 5 with his squeaky voice going off about NALs and others just going off the deep end. I can surly see the death of amateur radio is right around the corner. What has Mr. Hollingsworth done now? It looks to me that Mr. Hollingsworth has handed a license to jam to one of the king jammers on the radio today. What is the world of amateur radio come to? We all where in high hopes that you Mr. Hollingsworth where going to be the new sheriff in town. It appears that you're another Washington quitter! You can bet that 20-meters for the next here on end will be crazy! You can bet that 75 will be completely nuts as it was before this so-called FCC crackdown (again I say WHAT CRACKDOWN? I have talked about this in previous commentary.). As for par for the course the FCC cowards at the most perfect time to save the service form its own self-destruction. What is wrong here? I pulled the strong anti-FCC web pages down at your request Mr. Hollingsworth. You assured me that something was going to be done! Just like in the past and just like Washington allot of hot air and nothing gets done!

Well for those of you in the Banana Republics that want the low end
of the spectrum for your banana work. Just stick it out for a few more
years. The FCC has sent the wrong message to all the white trash on
amateur radio today. Start getting your bids ready because it will be
just a matter of time before this trash embarrasses the USA to the point
of Congress yanking the whole service from us. Darn CBers are better
operators then the trash that the FCC has decided to let off the hook.
For the rest of us, you can bet that this is the long-term plan of the
FCC and this administration to give the trashy amateur radio operators
the chance to destroy the whole service. Take away more freedoms and
gain more control over the American people. You can bet that the FCC
will give the policing of the airwaves to the local police and when that
happens WE WILL ALL LOSE! You can take that to the bank! Then it's just
a matter of time. Banana republics GET YOUR BIDS READY! The spectrum
will soon be for sale to the highest bidder.
WAY TO GO HOLLINGSWORTH! Perfect opportunity for the FCC to show
that they mean business. The perfect opportunity to show that the FCC
isn't a paper tiger and that it has real teeth. Typical of our
government in this country of ours always start a good job but rarely
finish. Aw what do you expect from Washington? They send a lawyer to do
the work of an enforcer what a bunch of quitters. Hollingsworth if you
read this way to go! Don't worry boys Hollingsworth will read this
because I'm sending it to him. I guess time will tell.
Best Regards and May amateur radio R.I.P.
Oris Grim

What a boast . . . That the ADL works with those other champions of
liberty, the FBI and the ATF!

In fact, the Anti-Defamation League of B'nai Brith is a Jewish
organization. The Jewish tradition is virulently opposed to the
American Bill of Rights and principle of "equal justice under law."

According to the Talmud, non-Jews are sub-human and can be slaughtered
like cattle.

* The intent to kill a non-Jew is so laudable that even if a Jew is
accidently killed in an attempt to kill a non-Jew, the murderous Jew
suffers no liability.

* But if a Jew intends to kill another Jew and does so, he is liable.

(Babylonian Talmud, Soncino Edition, London, 1935. Sanhedrin 78b 79a;
pg. 529-30.)

* If a Jew murders a Gentile, the Jew suffers no death penalty.
(Sanhedrin 57a., pg. 388)

* if a Gentile strikes a Jew in the jaw, the Gentile, having stricken
the "Divine Presence" (that is, a Jew) suffers the death penalty.
(Sanhedrin 58b, pg.388).

And what does the Talmud say about the obligation to tell the truth?
Why, the Talmud sanctifies and institutionalizes false swearing, or
lying.

"And he who desires that none of his vows made during the year shall be valid, let him stand at the beginning of the year and declare, 'Every vow which I may make in the future shall be null.' HIS VOWS ARE THEN INVALID, PROVIDING THAT HE REMEMBERS THIS AT THE TIME OF THE VOW. " (Caps in original.) A footnote describes the "Kol Nidre," a formal dispensation of vows prior to the Evening Service of the Day of Atonement. (Nedarim, 23a; pg. 68 of Soncino Press 1936 edition.)

<<<READERS....LOOK BELOW. ANYONE SPELLING "CHAOS", KAOS, IS AN IGNORANT SCHMUCK WHO IS SITTING AT HIS COMPUTER SUCKING ON A PACIFIER. AF2Y. Doc>>>>>>>>
In Honor of the opening Wed May, 19th of "Star Wars Episode 1: Phonton Menace"
Our staff has worked hard to produce a 6 episode set of movies of our own!

"It is a period of kaos on the Ham Bands, There are jammers and Nets to be jammed. Only a dedicated group of people who have beaten the odds can defeat the kaos, The StupmJumpers!"

Episode 1 begins around 1960:

We will take a look at the lives of:

A young Doc Hate, facing many problems, hence why he is today.

A young PorkButt, the only diference is that he is about 285 pounds lighter.

KV4FZ at the courage center, helping young handicaped kids get a ham license and make a future for themeselves.

We will also look at the some others: K5BLB, WA9KJI working on old Silvertone radios.

Other movies:

Episode 2: "Hate rising"
Episode 3: "Jonestown or Bust"
Episode 4: "A new Courage"
Episode 5: "Hollingsworth Strikes Back!"
Episode 6: "Return of the NAL!"

From all of us, Enjoy these Movies, they'll bring many tears to your eyes and open your eyes to the truth!

DX302MAN, Washington DC HQ >>

4251. Riley EXTREMELY angry with Porky??

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: Megahertz-mania@webtv.net
Message-ID: <20042-37431AF8-73@newsd-133.iap.bryant.webtv.net>

Rumor has it that W. Riley is VERY upset with Pork Butt. It seems that the "spin" Porky is putting on the air and over Usenet isn't true by any means. And it's really angering Mr. Hollingsworth. Seems quite a few phone calls asking why Porky has been let off the hook, have made their way to the FCC and ARRL. But it looks as if Porky hasn't been let off the hook after all. We'll just have to stay tuned...

<< <Strom,you're a scheming lowlife hunk of refuse. NO PROUD JEW would ever side with you or your Nazi buddies. Any Jew who does,is a traitor to his faith and his people. Hell, one of the prerequisites for becoming a SPOTLIGHT shill on 3.950 is based on one's anti-Semitic predilection for which you and your toilet bowl lickers are noted. The names you bring up are garbage in the Jewish community. Scabs, ashamed of their heritage. Cowards who are afraid of being called kikes and dirty Jews. To them it's easier to kiss your ass than to kick it,hence they have sold out. Liberty Net my tuchus! You bums are rotten to the core and I hope you try turning your words of hate into action because you'll meet up with what you deserve-law enforcement bullets. AF2Y, Doc>>>>>>>

Lest people get the wrong impression from some of the posts here, it is worthwhile to note that Harrison Perl, K4GAR, who is probably the most consistent and long-standing participant in the weekly patriotic, perfectly legal, and above-board Liberty Net on 3950, is himself Jewish.

Like other Jewish truth-tellers Alfred Lilienthal, Benjamin Freedman, and Israel Shahak, Harrison is not afraid to criticize the Jewish establishment when it do >>

4253. Free Amateur Radio Logging Software

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: SRC Software <SRC_Software@hotmail.com>
Message-ID: <37432817.E4D15B9A@hotmail.com>
Source record: 142435

SRC Software's Amateur Radio Utility v1 Release 1.100
==========

Tired with the standard old logging applications... un-user-friendly interfaces etc?

Well, your time of searching may be over!

The long awaited next release of SRC Software's Amateur Radio Utility v1 is now available (1.100). It uses the windows interface, which allows quick and easy logging. Many features are included such as automatic frequency identification, contact information, full locator support with distance mapping, shortcut and custom keys, full QSL label printing support, import/export partial logs, the list goes on!

Major additions to this new version since version 1.001
==========

Added customised QSL label printing support
New database added which stores information about your amateur radio setups
Now allowed to export selected contacts, as well as exporting the whole logbook
Import wizard allows a selection of contacts to import
On click information displayed when users clicks on a log entry
QSL label grabber wizard to help you to collect contacts for QSL labels
More pages added to help file
Extended contact information for more details about stations
UTC time offset feature

This programme uses database files which allow data to be entered in any order and format. It is designed mainly for home day to day logging and also after contest logging and general sorting out. It supports import/export to and from RSGB LOG format, a commonly used computer logging format, and you can choose the contacts you want to import, rather than doing the whole file. The programme will re-index your log into date/time order, meaning that contacts can be imported how you like. There are hundreds of other features which you will be able to see when you start using this newly developed application.

AND THE BEST PART OF IT IS THAT IT IS COMPLETELY FREE!!!!!!!!!

YES : It is... all you have to do is download it, enter a few details into the page and click on register. As soon as possible I will send you the registration details, no costs or catches apply!!!

If you already have a previous version installed (1.001) you can get the update patch from my website. You will not have to register your new copy again, as you will automatically have the full version.

Background Info

This programme has recently been produced, and is available to anyone. It was programmed, designed, written and debugged by me, Simon Chudley, a student in the UK. I am a qualified amateur, M1BWT, and have been operating for about two years ish. Please distribute this programme as you wish, as long as all the files are exactly as I distributed them, and EVERY USER THAT INSTALLS A COPY REGISTERS - REMEMBER, REGISTRATION IS FREE!

How?

Simply go to the following website and click on Products. Then select Amateur Radio Utility v1. You will be able to see more detailed informaiton on that page, and to download it, scroll down to the bottom of the page. You will then have to select E-Mail, and click on Register AMV1. Enter your details along with the programme details (you can find these out from General Preferences) and click on submit. I will send you the registration code via e-mail asap. View the readme.txt file for installation details after unzipping the zip file.

Any problems please contact SRC_Software@hotmail.com

>Totally impossible!!
Not impossible, but not very easy either. The average power on a hand held is limited to a few tenths of a watt. IIt takes a combination of vapor/air mixture in the explosion range (Depending upon weather conditions that varies from nearly impossible, to well within the realm of possiblity), and a source of ignition with sufficient energy (very hard with a hand held).

Cell phones are designed for several reason NOT to have make/break contacts that handle more than microwatts. (Turn on/off is actually done by software, you hit the off key, and the software will begin the sequence to put the phone into hibernation (essentially only the NV RAM, internal clock is reduced to a very low fequency, and the clock (if you have one) are left running, but that is about all.

I would be much more concerned about a vehicle mounted phone, whose power levels can be MUCH higher.

> subjects which they'll never use?

The difference to cw is: By every digi mode, rtty, sstv et al you have only to learn, how to use your software. Extremely, i could set my better half on the keyboard, give her a listing of the function or action keys and thats it.

Not so by cw: here you have to show the communitiy, that you are ready to spend a bit of your time with a necessary continuity over a langer period. So you show me (your qso partner) also, that you are one of the (lets say) ham community, and not one of the kewl boyz with inline skaters, which found it very kewl, to have a "right" radio, not even the simple cb radio as the other guys from your class...

Exacty this is the situation, which i can often see at mondays, when here in Munich are the Ham Radio Exams, after that the Boys comin' to our shop, in the Ham radio dept., a whole gang of nonlicensed guys and a few girls around, and the new Op is _the_ kewl guy...

;-)

If you passed a cw test, you say to me: I am one of yours.

And i think, that's a damned good feeling!

Sorry for my not soooo perfect english, i hope i can explain my position in a reasonable way... :-)

I think we can all turn off the paranoia generator. Riley is not a Clinton appointee. He is a staff professional administrator at the FCC, that has been there for the past three presidents. Is it possible that he is being directed by some undisclosed Clinton appointee to do all this? Yes, or course possible, but knowing Riley, I don't think he would do that as a person of conscience.

Actually, it is not Clinton so much trying to get rid of the FCC, but Billy Tauzin, R-LA, who is frothing at the mouth to disband the FCC so that the entire spectrum can be sold off. Truth is, he's the real danger to amateur radio.

I don't see any groups listed where the Morse Code issue would not be appropriate.

All but two are amateur radio related, and shortwave and scanner listeners have to listen to (or try to avoid) Morse Code too.

> apply and take it off soc.penpals.

Let me try to explain. When people reply to a post on a newsgroup, they don't usually read what newsgroups are all listed and delete the ones they THINK are not appropriate. They just hit send, and it goes to all the newsgroups the original post was on. Blaming the person who replied to the post is silly, he did not choose the newsgroups listed.

And to delete any of the groups would be just as silly, because you are sending a reply to the post and don't know which of the groups he will be checking back to read your reply, so it makes sense to leave everything as is.

Why do people hate logic and common sense so much?

Two of my friends are pilots and say this is a bunch of bullshit.
Neither of them had to learn morse code to get their pilot's license and
don't know of anything used in flying their planes that would need to
recieve morse code for any reason.

There is no such thing. If someone is sending you at 13 WPM and you can
only understand 5 WPM, you do not have working knowledge of that code.

That would be like telling a person who wants to go fishing to get a
hunting license because he doesn't want to learn Russian first.

I wish we would be just as concerned on making people pass an English
speaking test before they were allowed to live in the USA, and were told
all of the things that Morse Code loving Hams say to people who don't
like morse code... You people are LAZY! If you want to join the
country then learn the friggin language! You immigrants all want
everything for nothing and handed to you for free! There are OTHER
countries to go to, pick one! Stop trying to force people from using
English and try to take it away as a language! Stop turning this
country into another CB band! We need SOMETHING to get rid of
undesireable immigrants!

What a boast . . . That the ADL works with those other champions of liberty, the FBI and the ATF!

In fact, the Anti-Defamation League of B'nai Brith is a Jewish organization. The Jewish tradition is virulently opposed to the American Bill of Rights and principle of "equal justice under law."

According to the Talmud, non-Jews are sub-human and can be slaughtered like cattle.

* The intent to kill a non-Jew is so laudable that even if a Jew is accidently killed in an attempt to kill a non-Jew, the murderous Jew suffers no liability.

* But if a Jew intends to kill another Jew and does so, he is liable.

(Babylonian Talmud, Soncino Edition, London, 1935. Sanhedrin 78b 79a; pg. 529-30.)

* If a Jew murders a Gentile, the Jew suffers no death penalty. (Sanhedrin 57a., pg. 388)

* if a Gentile strikes a Jew in the jaw, the Gentile, having stricken the "Divine Presence" (that is, a Jew) suffers the death penalty. (Sanhedrin 58b, pg.388).

And what does the Talmud say about the obligation to tell the truth? Why, the Talmud sanctifies and institutionalizes false swearing, or lying.

"And he who desires that none of his vows made during the year shall be valid, let him stand at the beginning of the year and declare, 'Every vow which I may make in the future shall be null.' HIS VOWS ARE THEN INVALID, PROVIDING THAT HE REMEMBERS THIS AT THE TIME OF THE VOW. " (Caps in original.) A footnote describes the "Kol Nidre," a formal dispensation of vows prior to the Evening Service of the Day of Atonement. (Nedarim, 23a; pg. 68 of Soncino Press 1936 edition.)

4278. Lower 60KHz of 80 Meters re-allocated??

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: Jim <jvpoll@dallas.net>
Message-ID: <37436D65.73F4BFDD@dallas.net>
Source record: 142460

In my search for a source of interfering signals in the AM broadcst band - I discovered
a series of moderate to strong carriers in the 80 Meter band.

These are grouped in the range from 3.500 through about 3.560 MHz.

I have found, in driving around, that these are strongest around 3.530 MHz.

When these signal sources are found - the meter on the HR receiver is against
the peg ...

These 'carriers' can be heard as far as .8 miles form the source ... sometimes
'ringing' can be heard - and sometimes 1/2 of a phone conversation ...

Driving south through Allen, Plano, Richardson into Dallas - MANY of these
carriers can be heard?

What are they?

Have we lost that part of the band to an un-named user?

That's right, you heard a baby monitor. They operate around 49 MHz and, if you have a decent six mater antenna, you can received them from miles away.

Older models of cordless phones operate in that freq range to and can be received on your ICOM.

Actor Tom Cruise is not one to turn the other cheek
snipped

For example, I have an Icom 756. This rig has 6 meters and a general coverage receiver that covers frequencies outside the ham bands. Recently I was tuning across the bands, and I heard what sounded like a conversation between a husband and wife. This was not any type of normal radio conversation, but just sounded like a couple discussing the days activites between themselves. I could also hear the sounds of a baby in the background. I finally figured out what I was listening to was one of those baby monitors that people place near their baby's bed to be able to hear what the child is doing, without being with the baby every second.

snipped

Aren't there some of those "cordless phone jacks" that operate in that neighborhood? Seems I recall an articl in QST in recent months dealing with the interference those things were causing. (Though they're supposed to be low power)

NOT harmonics.

What would produce a 60 dB over S9 signal in the 80 Meter band in a
standard household?

.... let alone *harmonics* at these levels ...

Please pay attention and read the original post again - the *several*
different
sources (each on a different frequency) of these signals were tracked down
.... I
have not knocked on any doors as of yet however ...

As one travels with the HF receiver in the car the signal strengths of all
these
different carriers can be seen to change - until you find the source as
indicated
by the "60 dB over S9" s-meter reading when parked out front ...

Again - these signals can be heard/measured from over 1/2 to 3/4 of a
mile away from "the source".

Been there, done that (tracking spurious sigs) for a living ...

.... these are NOT harmonics ...

Wow!

That would make sense - with what is occasionally heard (voice/ringing).

And - what range!

If you could see in person the "range" these things have ... - you'd
be shocked as I was!!!

I am amazed driving up and down US-75 in Dallas how many of these
things there are ... and can be heard!

4283. For Sale: Kenwood DSP-100 (rare!)

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: Steve <steve.w3sy@erols.com>
Message-ID: <7hvu34$33n$1@autumn.news.rcn.net>
Source record: 142465
Cross-posted to: alt.ham-radio.marketplace,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.swap

For Sale: Kenwood DSP-100 in excellent, like-new condition. Cables, manual included. Plugs directly into your TS-450, TS-850, etc. Gives you ability to vary the sound of your SSB signal from "broadcast quality" to a sharp, narrow signal for contests and pileups.

Also adds carrier suppression and unwanted-sideband suppression.

Can set CW rise and decay (fast vs. slow).

Sell for $400 and will split shipping cost anywhere in continental USA.

73,
Steve W3SY
Steve.W3SY@EROLS.COM

Interesting -

The *real* complaint I've got is: intermittant carriers in the AM
broadcast that interfere with a local 50,000 watter (WBAP) ...

I began a 'sweep' of all the band - by using a High-Pass filter
coming off my AC line into my HF receiver.

I discovered the 3.xxx MHz carriers on the AC line and
also off it (using just a few feet of wire) - so I explored further.

I bolted the active antenna to my "option 55A Taurus" and
started to 'survey' that way.

The rest is history ...

WOW, WHAT A NEAT IDEA.
Now here is another one. If the person in the car, next to you, is
using a freaking cell phone and the windows are rolled down; roll down
your music and crank up the volume on your audio system. Now the only
problem is are they talking about a medical emergency. Would that get
you in trouble then?

Hello Doc. I had a short conversation with Riley at about 3:00pm on Friday, at the Dayton hamvention. Was impressed with him. He is sincere about making some changes in the ham radio hobby. He is well educated , possibily a law degree from a well known southern university. He has a degree of humility and is not an arrogant know it all. I think he will give the violators one chance to redeem themselves , and thats all.
Dayton was just not a social visit for him and his Fcc associates. I think there was some cleanup work done on some amateurs who liked to jam repeaters . Might read about it soon in the ARRL web site.

4297. Introducing "Ham Radio Wars" Episode 1 "A Radio menace!"

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: dx302man@aol.com
Message-ID: <19990518210636.03520.00002099@ng-fb1.aol.com>
Source record: 142519

In Honor of the opening Wed May, 19th of "Star Wars Episode 1: Phonton Menace"
Our staff has worked hard to produce a 6 episode set of movies of our own!

"It is a period of kaos on the Ham Bands, There are jammers and Nets to be
jammed. Only a dedicated group of people who have beaten the odds can defeat
the kaos, The StupmJumpers!"

Episode 1 begins around 1960:

We will take a look at the lives of:

A young Doc Hate, facing many problems, hence why he is today.

A young PorkButt, the only diference is that he is about 285 pounds lighter.

KV4FZ at the courage center, helping young handicaped kids get a ham license
and make a future for themeselves.

We will also look at the some others: K5BLB, WA9KJI working on old Silvertone
radios.

Other movies:

Episode 2: "Hate rising"
Episode 3: "Jonestown or Bust"
Episode 4: "A new Courage"
Episode 5: "Hollingsworth Strikes Back!"
Episode 6: "Return of the NAL!"

From all of us, Enjoy these Movies, they'll bring many tears to your eyes and
open your eyes to the truth!

DX302MAN, Washington DC HQ

<Mass snippage>

Hey Lloyd, could we get the Reader's Digest condensed version of Herbie's story the next time you post it? The text is a yawn after the third paragraph.

"Where's all the RADIO CRYBABIES?"
"I wanna hear 'em TALK TOUGH!"

>love
>with the Boys From Brazil on 3.950 is a know-nothing codeless Tech Plus who
>doesn't know a watt from a what? Can anyone confirm or deny?
>Doc, AF2Y

Why don't you address me directly, or are you afraid of the truth! You have labeled me a rasicst, anti-semite, anti-government and lots of the other untruths.

First of all,

I am not racist. I have tolerence for other races and religions, including yours! I generally don't have problems with Jews, but you are so flaming stupid, it's not funny anymore, I have heard you for a long time, while on that noisey treadmill on 20 meters in the morning spew out the most dreaded things I have ever heard! And you call the Great Liberty Net a hate group! You are a one-man hate group if there was ever one!

I have been a SWL since around 1988 or so, and have listened to many hams on SW as well. One night I ran into 3950 back in about 1996 or so. I thought they had some good ideas. Then this jamming by K5BLB and others kinda drove me off of 3950 and did not go back to 3950 till early last year. I have listened to Bro Stair since about 1993 or so. Do I agree with everything Stair says? No.

Also, don't judge a person by his license class. I think some of Extras are so full of it myself.

Feel free to reply in your normal way.....

The ball is in your court Docktor!

Point well taken.
The bottom line is, they need to TALK with Hams period. I think they have just decided what they feel is best, and it is not.

>And you call the Great Liberty Net a hate group!

Lloyd you were doin just fine until this. Now you've fell off yourhorse. The, and I want to know why you think they are so "great" if you do, "liberytnet IS a Listed Hate Group." Make no bones about it. You can spin it away as they try to do but they "are" recognized as such (nationally).

>Then this jamming by K5BLB and others kinda drove
>me off of 3950 and did not go back to 3950 till early last year.

Here you go again, I suppose the the "So called" net never moved in on Sid's Qso's constantly, never jammed him, never heckled or harrases him Huh?? Can you not admit to it, that the "so called" net instigated this mess, and that's not even mentioning the fact that they want 3950 for "their private shortwave broadcast frequency", and you know it.

Are you now defending (spinning) the "So Called" net's activities?????

So N0VFP loves everyone because he was an SWL for years and all the rest of that nonsense. And he even hears me in the morning on 20 but says nothing because the dunce is a Codeless Tech Plus who works his best stuff while just listening. Listen, Lloyd. Why the hell have you come here to make trouble? This forum's for HAMS,not SHAMS! We learned the code; we didn't sneak in the back door. A man with your lack of credentials ought to shut up because you're nothing but a ham radio CHILD and children should be heard,and not seen and in your case IGNORED and not RECOGNIZED. Damn, how can a know-nothing Tech Plus have the nerve to come on a forum with REAL HONEST TO GOODNESS HAMS? And now I can understand why you're a Stump Jumper...YOU'RE AS STUPID SIZING UP HUMAN NATURE AND VALUES AND MORALS AS YOU ARE TRYING TO BECOME A REAL HAM! Yep, you're nothing but a phony....an amateur licensed SWL. A guy with a sissy license, a puny mind and a big MOUTH. No wonder why you never went word for word for me on the bands-YOU CAN'T. Instead of sitting your fat can on this net, why don't you use your fat head to study to become a real ham. Man oh man..what a stomach turner you are. Doc,AF2Y

I do have to say kevin that your removal of my name and call in association with, and reference to, whatever episode your speaking of is noticed. Whomever the LIAR was, or is, is also being duly noticed.
Now can you tell us a little more about the "aryan" buddie that lives in a barn in OH that got busted for illegal firearms possesion. I know AA8DP (Steve) was doing a lot of complaining about the BATF taking him to jail. Steve knows that convicted felons can't possese firearms. He admitted that his aryan buddie had a felony conviction, and, that he had possesion of firearms. What the hell, bitch about them "doing their job," and then bitch about them "not doing their job" HYPOCRISY AT WORK there somewhere.

4312. another cellular phone bust

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: w4th@webtv.net
Message-ID: <15062-37425D17-139@newsd-101.iap.bryant.webtv.net>
Source record: 142584

Actor Tom Cruise is not one to turn the other cheek when celebrity journalists pry too far into his private life. He's developed a reputation for suing...and winning.
Yesterday, the man who intercepted a cellular phone call between Cruise and his wife Nicole Kidman - then sold the information to two tabloids - was sentenced in Los Angeles. Eric Ford got three years probation, including six months in a half-way house, plus a 3-thousand dollar fine.
And, just for good measure, 150 hours of community service.

I got this from the Water Cooler Report, and thought some of you might be interested. The courts are really serious about this monitoring of cellular phone calls, and especially when the monitored conversation is used in a manner that would cause the contents of the conversation to be made public.
I worry about where this may be leading in the future.
For example, I have an Icom 756. This rig has 6 meters and a general coverage receiver that covers frequencies outside the ham bands.
Recently I was tuning across the bands, and I heard what sounded like a conversation between a husband and wife. This was not any type of normal radio conversation, but just sounded like a couple discussing the days activites between themselves. I could also hear the sounds of a baby in the background. I finally figured out what I was listening to was one of those baby monitors that people place near their baby's bed to be able to hear what the child is doing, without being with the baby every second.
But this thing was so sensitive, I was hearing things all through the house, things like toilets flushing, pots and pans rattling, all the sounds of a normal household. As soon as I figured out what I was hearing, I moved on. I do not like to listen in on other peoples private lives. I dont know, but it just makes me feel like a "listening Tom" I know I would not like to have people listening in on my private life.
I have used this to bring up a question. What if I had heard a violent domestic confrontation, or say a child being beaten.
If I called the police to report what I had heard, and possibly save a persons life, would I be guilty of the same crime as the person in the article? I mean I would not for one second hesitate in calling the authorities if something like that did happen, damn the consequences if it would save someones life.
I guess you all can see what I am getting at. I mean is the accidental reception of a transmission that is ment only for a particular household a violation on my part. Even if I was not specifically looking to

receive that transmission.
I can see this whole thing is a big can of worms. I really liked the way things used to be, when the prevailing thought about broadcast transmissions could be easly stated. "The airways belong to the people, and any signal of any kind that entered your space could be received without any consequences.
But now you have to be careful what you hear. Sounds like the old days when the communist would come and take away a persons radio for listening to VOA.
I dont know where this is going to stop, but I am afraid things can only get worse.
Sorry about the long post.

Yeah. I found this really interesting. But what has all this got to do
with Soc Penpals? I don't really care anything about radio
communications of any sort. So why not just keep this on the boards that
apply and take it off soc.penpals. As far as I am concerned amateur
radio is atrocious, even worse than CB used to be here. I have never
heard of so much crap on any wavebands before. How these people get
operating licenses is beyond me.

Whilst getting some diesel fuel at the filling station yesterday I
noticed this guy at another pump who was filling with petrol (gas) and
was happily chatting on a cell phone at the same time.
I went over to him and politely asked him to stop using the phone.
He asked me why and I said that with the amount of gasoline vapour about
he could probably activate an explosion! He decided to quit using the
phone!!

Dayton used to be the showcase for all the new gear to be seen and drooled on - now its a WWW click.

Dayton used to be the flea market where you could get all the parts you'd need to build something cool - now its a WWW click.

Dayton used to be the fraternal event where you could chat with your radio friends in person - now its an Email and maybe a chat room.

Ham radio is the world's first wireless internet. Lets get the data rates up and see what services we can create via clever links and software. Thats our future. Cable modems are the current performance bar. Double or triple the speed with amateur wireless and watch the lines form.

Then our emergency services, etc. will be relevant.

Dear hams,

Lithuanian Amateur Radio Society (LRMD) invites you to LY HAMFEST'99. Over 300 radio amateurs will meet in Giruliai (near Klaipeda, on the Baltic see coast) on July 24-25, 1999. There will be: LY99RMD station, market, auctions, mini HF, VHF, ARDF and other contests, beer drinking competition, fireworks, etc.
We will start to arrive on Friday (July 23) and stay until Monday (July 26).
On the same time See Festival will take place in Klaipeda (concerts, parade, carnival, etc.), so, good program for ladies.
As usually, we will spend the night around big table near campfire and sleep in tents. However, hotel "Pajuris" will be available ~100m from hamfest place. Of course, shops, restaurant, cafes will be in hamfest place too.

We will publish complete information with program and maps in LRMD website:
http://www.qsl.net/lrmd/

Therefore, mark July 23-26 in your calendar and let me know about your intention to visit LY HAMFEST'99. I will be happy to welcome you and provide all necessary information.

Best 73!
Antanas LY1DL
Secretary of LRMD
antanasz@carlbro.lt

>2: The price of admission is getting too high.

From conversations with DARA Hamvention Committee volunteer members, it's clear to me that Hara Arena has DARA by the short hairs. As much as they might wish for same; they have nowhere else to move the Hamvention that is viable.

I've not missed one since 1970, and I won't miss next year, but that does not mean I'm any happier with the facilities.

Take the market paving -- it looks like a runway in a war zone, yet if a tailgater drives a ten penny nail in, they get ...nailed... for a $50 fine. (Does Hara charge its own food vending arm for THOSE rebar spikes? Yeh sure...)

Or the bathrooms -- sure there are lots of folks there but how come Hara will not keep soap & towels in them, all day?

If only Wright-Pat had the needed building space, and was available for renting...

ps: recall the entire event runs on volunteers; last I asked there was but one paid secretary year round, period... THAT is one impressive benchmark.

>year. He was blamed for almost everything. If these accusations are true,
>well he works for someone too. The proper authorities should be addressed
>and I am sure that something can be worked out that will work for
>everyone.

Well, are YOU going to take him on ;-?

My understanding is the Marshall is a major problem. He/she insists
the aisles be clear to the lines before opening, and the people
not drive off until after closing. I watched them delay the Sunday
opening until a tow truck removed the U-Haul down the row with its
nose 6' into the aisle.

To be fair, it's his job to ensure no one dies because a
fire-truck/EMS can not reach an incident.

But vendors who plan ahead have no cause to gripe. The packet
clearly said what the rules would be, and you are the master of
your schedule. We unloaded Thursday, set up Friday, locked up
things in the trailer overnight and left Sunday after the drawing.

Sure, outside parking was $5.00 but it was not a major hassle.

1999 was my first trip to Dayton, and I must admit to
being a bit underwhelmed.

The flea market was obviously picked clean Friday: when
I got there Saturday all that remained was just plain junk,
that I didn't want at any price. After a couple of hours
I had a photocopy manual for a radio, and a couple of
cheap laser pointers that I want to try using for
communication. Big deal.

I'm baffled at what many of the stands had to do with
ham radio. Knives? Really?

The Clique Factor was very clear: if people didn't
already know you, they ignored you.

Even the commercial exhibitors, some of whom seemed
more interested in chatting among themselves than paying
attention to punters. I've even dealt with some of
them, but only over the phone/Internet, so they didn't
know that the woman (185 cm, shoulder-length brown hair,
white "Leela" tank top, blue floral print shirt -
ring any bells?) they were ignoring was in fact a
customer. If my money is no good in person, perhaps
I shouldn't be a customer at all.

The only exhibitor who didn't already know me but who
seemed pleased to see me anyway was the RSGB. Staffed
by two women (one of whom was G4JKS herself). Hmmm...

Hi,

I just picked up a pair of Datong filters, an FL2 Multi-Mode
and an ATF Auto-Notch filter, but they didn't come with any
manuals or other info.

The ATF is pretty simple and the controls are fairly obvious,
but the FL2 is a bit more cryptic.

If anyone has, or can provide pointers to, manuals for either
or both of these, I'd be very appreciative.

Replies via email to KC4YYY@ARRL.NET would be appreciated, as
I only get to browse the newsgroups on the weekends...

Thanks,

Patrick

Bill, passed away a little over a year ago now.

As for the "pin diode mod". It does reduce the
overall background noise level, but as to if it is
cost effective is debateable. Also, pin diodes are
at greater risk to electrical storm damage. If
you live in a area prone to lightning storms, I
would not recommend it.

HI:

The pin diode mod was made famous by Bill R., who is a silent Key.

The mod does reduce the noise floor, but not that much, it is the other mods, promarily the PLL caps in ICOM that quiet down the PLL output that help as much or more.

Pin diodes also have one major draw back. They will not handle large energy surges as well as "the generic" diodes will. If you live in a lightning prone area, premature failure tends to result.

I tested the mod both on the air and with bench equipment, yes there is a noise reduction. The mod itself reduces the Rx noise by 2-3 Db, typical costs to do the mod is in the $100 area. If you use CW narrow, it may be worth it, otherwise it is debateable.

4335. Morse Music

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: Con Daly <radioman27@hotmail.com>
Message-ID: <4ez03.5967$xa.54347@c01read02-admin.service.talkway.com>
Source record: 142607

Hello everyone,

I don't read the posts from this group much and am'nt as active as much
I would like to be on the air. However I see a lot of debate going on
about morse. It seems to be the most passionate issue among amateur
and professional radio operators these days. I sailed as a merchant
marine radio officer from 1991-1997. I found morse to be absolutely
invaluable at that time (not terribly long ago). There were times
when I really could not have managed without it. This was not just
a matter of equipment on board as I often sailed with Inmarsat
terminals, both A and C systems which were supposed to be well
established at that time.
I have countless stories about satellite null zones along the equator
and many other areas, extremely weak signals on SSB etc, where the
only option available was to use morse. Indeed on one particular voyage
on board an Inmarsat-C equipped vessel I was using CW 90% of the time.
When the first changes started to appear with the introduction of the
new maritime radio system (GMDSS), there was any
number of mishaps occuring with ships normally having no communication
problems suddenly "dissapearing" from the air for days on end.
The ones which still had radio officers had no problems, as with the
ones with electronics officers who were former radio officers.
Having come close to shipwreck on 2 occasions I expressed great concern
about the changes taking place, as they seemed to be rather
premature and rushed and there was a desperate drive to get it all into
place before the millenium.
Now don't get me wrong, I'm no old salt and am always
keeping up to date with electronics and the latest innovations, but
morse should not be seen as simply old technology, it is just another
method of communication, proved itself very reliable again and again up
to the present day, I can vouch for that. Certainly
new communications technology should be introduced to all fields,
amateur or commercial. Especially when the high traffic needs of todays
industry are demanding it, but it seems that certain people
are just determined to get rid of something that they never embraced
because they never saw it in the right way. Morse is not a code, it
is a language. That is the first mistake a lot of people make in the
way they approach it. Certainly those people more musically inclined
will tend to like it more than others (I play 5 string Banjo), but
like learning an instrument, it takes a lot of time and effort and
can be frustrating.
Ok, so I'm obviously an advocate of CW but you may
be surprised to hear that I'm not in favour of keeping the requirement
for a proficiency test, if thats what people want. I just wish that

those against the code requirement would take a long hard look at what they are really campaigning against. It seems like it is really based on an irrational belief that it's too old fashioned, but really fashion shouldn't come into it. It certainly didn't matter for me in the Mid atlantic when we were taking on water faster than the pumps could get rid of it down in the engine room. That was in 1992 and there were other less urgent incidents right up to the time I left in 1997.

Certainly the amateur service is'nt as important as a shipboard radio installation or a coastal station but all you anti code people out there, please, take a good look at what you are starting. Because there will be no going back and it will be dead within 20-30 years of a no code requirement. The commercial people made a mistake, based on purely financial motives. 12 WPM is not difficult to obtain if it is learned the right way. At least ask yourselves is it really the requirement you are trying to get rid of or is it the whole art form itself. I hope I have at least provided some food for thought and that it will add some new and interesting insights.

4338. Hams Sold Out by FCC, Clintonettes?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: David Stinson <arc5@ix.netcom.com>
Message-ID: <3742CFE2.50AC6DBC@ix.netcom.com>
Source record: 142610
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

A friend of mine in Washington, whom I shall not name,
passed along a provocative story.
He is in a good position to have this information
and I tend to believe him. I find it very disturbing.
I'm just passing along the information--
you decide whether you think it's plausible.

In summary, he is saying that:
1. (mis)managers in the Clinton administration,
who are always looking for ways to "globalize,"
want to accommodate the illegal HF "telephone" systems
in Central and South America by reallocating spectrum in Region 2
to a new "service."

2. The recent FCC "crackdown" is a put-up job.
All this smoke and bluster over a few loonies -who represent
less then one percent of the ham population- is a scam.
The FCC lawyers know there is no way out of the "selective enforcement"
trap which they set for themselves and into which they have fallen.
Nor have they the budget for any large-scale rule enforcement.
This entire "boogieman" charade' is designed to fabricate an excuse
for confiscating Amateur Radio spectrum.
The idea is; "See? We tried to get them in line and they
just kept breaking the law, so we took it away from them."

Here is a partial quote from his email:

>...managers (from the Clinton administration- ed) are talking
>with representatives from several central and south american
>nations about useing the HF ham bands for long-distance
>telephone systems.... The administration is very concerned with
>"globalism" and supports offically sanctioning this system
>and is putting a lot of pressure on the FCC to come up
>with a plan to get it done.... they also make some cash
>setting up the auctions so a few south amnerican
>"companies" with lots of money buy the spectrum
>so they can have a legal HF link into the states.
>
>...there are many ideas in the transmittal
>but the one most in favor at FCC is in teh summary
>just after the cover memo....
>As a first step remove the bottom 100-150 khz
>of 80, 40, 20, and 15 meters and several mhz VHF UHF

>and reallocate it for Region 2 to this new service.
>Hams would receive 100-120 khz near 5 mhz
>and a few khz low frequency on a secondary basis as compensation.
>Time line says some time in the fall...
>
>...they can justify this by making a big
>case out of a few law breakers and thats what
>all this enforcement dog and pony show is about...
>...they know lots of hams will say "see we deserved it
>and its all so and so's fault" and then they can use the
>chaos and infighting to take more, all with the
>support of most hams who will think they must deserve it.
>Its a slick plan.....

I've known this man for many years.
He's in a position to know and this sounds
exactly like what Clinton appointees would do.
I place a lot of stock in his letter.

What are your opinions?
Is there anyone out there who can corroborate this information?

Morse Code is a "turd in a punch bowl". It is the reason that ham radio
will die. It is really unfortunate.

4341. It's not just Dayton that has falling attendance.....

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-19 00:00:00 UTC
From: lreynolds@cyberportal.net
Message-ID: <MPG.11ac9f064420afb0989690@news.giganews.com>
Source record: 142613

The Hosstraders 'fest in Rochester, New Hampshire has been far more poorly attended the last three times as well. Part of this may be due to the fact that it was moved to the Rochester Fairgrounds rather than the considerably more well-liked Deerfield Fairgrounds. (Deerfield is a far more rural setting and attracted far fewer Beanie Baby vendors and shoplifters....)

Pity that (now that we are fewer) we can't return to Deerfield....

Declining *everything* seems to be a universal phenomenon within the hobby.

I would say that it's definitely due to the internet and all that entails. Not the aging of the population, not sunspots, just that people who like to tinker and play with whizzy gadgets now feed their habit at CompUSA rather than AES or HRO.....I do to a fair extent, myself.

And you have to admit, a state of the art PC costs a LOT less to own (and is far more fixable by the owner) than a good HF rig, eh?

(I'm naive - I was waiting for the price for Japanese rigs to go back down when the exchange rate went from 84 Yen to 130 something.....)

Nothing is wrong, if you want to be foolish, it's your option. Although
I suspect they'll have a hard time corraling the other 745,000 of us
they have left to register. Btw, at last check at Dayton, only 5200 had
embraced their "wonderful" new ULS !

Just goes to show that people are mindless sheep that will believe
anything - why else do you think con-men can steal millions from an
unsuspecting public?

If someone told me this supposed explosion theory I would have laughed in
his face.

They still are... just look at earthquakes in California. There are at
least a dozen people out there with internet access, and yet amateur radio
still is a vital link after the bridges start to tumble.

4346. Re: Dayton Hamvention - Where Was Everybody???

(I tried replying before, but Deja[news] appeared to
drop it on the floor...)

This was my first trip to Dayton, and I must say I was a
bit underwhelmed. Quantity, yes. Quality, no.

The flea market was obviously picked clean Friday, so by
the time I arrived Saturday all that remained was just plain
junk that I wouldn't want at any price. Judging by the
amount of money I saw changing hands, I wasn't alone in
this. And what *did* many of the displays (e.g. knives) have
to do with ham radio, anyway? I ended up with a couple
of cheap laser pointers (475 THz, anybody?) and a
photocopy of a manual for a radio. Big deal.

Then there was the Clique Factor. If people didn't know
you, you didn't exist. Even the commercial exhibitors,
many of whom seemed more interested in chatting among them-
selves rather than chatting with punters. I'm a customer
of some of these folks (via the phone and Internet, so
they don't know what I look like), but if my money is no
good in person, I may have to reconsider where I spend it.

The only exhibitor who seemed pleased to see me (and who
didn't already know me) was the RSGB. Staffed by two
women. Hmmm...

Excuse me, Doc. Don't mean to burst your bubble. But that letter to Vic was sent BEFORE Riley fully investigated and found that WA9KJI had LIED to him about who had control of the frequency. THAT is the reason for Castle's stiff sentence.

As far as going to FM micro-broadcasting or the internet, it was just a suggestion to the net, by Mr. Hollingsworth.

This current events discussion group (Liberty Net) has been around for 25 years, and I'm sure will be around for another 25 more years. Your rantings about finding "Nazi's" under your bed are getting very tiresome. If I were you, I'd concern myself with helping your "good friend" Mr. Whiten out. He's gonna need it. ;-)

Correction, Jeff (since, as usual, you're distorting/twisting
the truth to suit your own agenda) ...

I have never said that there is nobody in the world who
might advocate the end of code usage. What I HAVE said
is that that is NOT NCI's goal, either short-term or
long-term.

I have also said that I'd personally oppose any attempt
to ban or restrict the use of Morse on ANY ham frequency
where it's now authorized (which is everything except
219-220 MHz.)

Please try to avoid distortions, falsehoods, and outright
lies ... it'll only make folks confuse you with Dick Carroll.

>Better call a government functionary to check the latest Gallop poll
>and tell me what kind of political views are OK this week.
Only the ones that are expressed in a lawful manner.

You can't shriek the Bill 'O Rights at 3 AM from the top window of
an apartment complex, ya know. Nor can you lawfully broadcast same
on 80 meters or on any other amateur frequency.

It's about time someone recognized the Liberty Net has been using the
Amateur frequencies for a broadcast soapbox of their political opinion.
Their actions such as broadcasting phone numbers and addresses
for political groups only confirm this. They have spent time
detailing thir political opinions in one way transmissions to
hecklers or no one in particular. Not a QSO, but a soapbox and one way
political broadcast.As much as many of us dislike K1MAN and others for
dropping ona frequency for their one-way broadcasts, they at least are
somewhat complyingwith Part 97 by restricting their soapboxing to amateur
radio andrelated communications matters. I'd hope these other broadcasters
get some attention too, they also don't have rights to particular
frequencies.

Kudos to the FCC for calling a spade a spade and courageously
cleaning up the bands in spite of the political heat they mite get.
First a few jammers, now the broadcasters and sapboxers.
Keep the heat on, Riley!

>
> Excuse me, Doc. Don't mean to burst your bubble. But that letter to Vic
> was sent BEFORE Riley fully investigated and found that WA9KJI had LIED
> to him about who had control of the frequency. THAT is the reason for >>
I think what we have here is Doc doesn't approve of what they discuss on
3.950 and sometimes I don't either. BUT that doesn't give me the right
to weather or not they can discuss it. You know what this great USA has
done for me it allows me to mach that choice. It doesn't mandate what I
read or what I talk about, or even who I hang with. That is the bottom
line this great nation in which I live in allows me to be wrong and
allows other people to be wrong to.
What it sounds like to me here Doc is you guilty of the same behaivor
as these guys. You don't like there beliefs and the don't like yours so
your going to call them all kinds of names. What good is that? If they
have broken a part of part 97 so be it they have to put up with the
consinquesis not you. But if you get caught up in the crap the bam your
right in the middle of crap stew. sorry about that. The scary part here

is who has the right to dictate what any of us say on the radio. Does that mean that government can tell me weather or not I can discuss the state of affairs in this great nation over the radio as I see it? Doc thats scary! Come on now. Who has that right. I would say that under the constitution nobody does. Now comes the sticky part you can't stand on a street corner and shout nasty words. How ever a man can stanad on the corner and preach Jesus. Community standards are the main thing here so if these guys what to talk about the state of affairs so be it! NAZI crap so be it. You would what anyone to dictate what you say over the radio would you. All you want to do is pick a fight and be jugdmental of other people. I think you need to keep your side of the street clean. I don't know how many times I have heard you start crap in your round about way and then cry I didn't do anything and lean back in you chair on on your tredmill and laugh at thesae idoits. Copme on DOC lets be honest here!
I think that the content isn't the issue here and I think that you Doc are trying to make it a issue. The issue is did they interfer with on going communications on that Frequency?? That is the issue. Politics has nothing to do with it and I thing that is where Riley has made his mistake on this one.
I know for a fact that the content of what these folks discuss here isn't whats important here. Its weather or not they broke the rules. Content should never be a issue unless the conversation is foul language. Then content should be used the and only then. Also I think that a list of words that are not permented on amateur radio should be included in the rules. Why you say because of words like damn GOD damn is bad but is that damn chain broke is that bad? Or how about the Conawingo dam in Maryland generates 28 megawatts of juce in a hour. see what I'm saying. Also some words in the south arn't allowed and they are ok in the north. Content of communications can be a tricky thing to try and dictate.
Thats just my opinion I could be wrong

From what I understand, Yaesu complied with a federal mandate to make the
radios not to easy to modify: the most recent batch had no quick and easy
way (if any mod existed at all) to be modified for illegal transmissions.

Since Hollingsworthless is too dim witted to devise a suitable legal rationale for terminating this guy's license, let's use this.

The signing of FCC Form 610 or equivalent indicates you have read, understood and intend to comply with the rules of Part 97 which include no guarantee to absolute freedom of speech and indeed, say there is to be no profanity, interference and obscene speech. Thus, as a soldier has signed away his right to leave his base, a ham has signed away bhis right to mouth off.

However, if he was walking down the street,talking like that I wouldn't care less, that's why the First Amendment was enacted.

>be turned away because the clowns who were letting the cars in didn't
>know what they were doing. Quite a number of people left and went home

Well, our packet explained the rules, and we believed them. (I also
don't expect TWA to wait 15 minutes if I show up late; YMMV) As for
the quotes around fire marshall above; are you implying it was NOT
the Trotwood Fire Marshall but the Committee who set the
rules on access?

>No one mentioned the lack of quality food. I don't mind paying $3 for a
>hamburger because the extra $$$ goes for a fund raiser, but at least put
>some meat in that burger. Plus, did anyone notice that the majority of
>water fountains were turned off?? Hamvention officials admitted doing
>this to make the attendees by $2 bottles of water that sell for 79 cents
>at the local 7-11.

Oh? Since the Committee has far too little influence over Hara
Arena in other areas, you expect them to be able to control the
water fountains?? Note that the food monopoly is controlled by
Hara. It might be interesting, though, to see if the Board of
Heath has some regulation about water fountains, and if so, does
Hara meet it?

But more importantly, BOTH the above are fully in your control.
You CAN choose to show up on time. You CAN also choose to bring
your own food and water. I can not recall the last time I spent any
money on Hara's food; there are grocery stores nearby -- one is
even walking distance I think. [Is that IGA to the east still
there?]

>It seems that Hamvention is getting a tad to big for its britches. Maybe

[UPDATE] EASLEY, SC: The FCC has given General licensee Richard L. Whiten, WB2OTK, another two weeks to complete his reply to the FCC following an inquiry in April. Whiten had responded May 10, but via Certified Mail May 19, the FCC's Legal Adviser for Enforcement Riley Hollingsworth said the responses were incomplete. Hollingsworth said that failure to provide the information requested will lead to license revocation. The FCC had sent Whiten tape recordings of his on-the-air operations on November 22 and 26, 1998. Hollingsworth had requested that Whiten "provide a full explanation of these transmissions" by May 20 and said the information would be used to determine "what action to take regarding the renewal of your Amateur Radio license." The FCC said Whiten could keep the tapes. Commission personnel inspected Whiten's station in January and has requested information on the operation of his station and a high-power linear amplifier the FCC noted upon inspection.

OK, now Hollingsworth is being a NWO Nazi. Can't discuss the Fuhrer on the air ? Interference is one thing, but we can criticize the government if we wish. Note the government conspiritorial suggestion that they move to the internet ? That's where Klinton will soon order us all, so they can tag us with SSN and Intel Pentium III serial numbers.

HUDSON, NH: The FCC has asked a net control station of the Liberty Net on 3950 kHz to justify the net's use of Amateur Radio frequencies. Via Certified Mail May 7 to Extra class licensee Victor A. Misek, W1WCR, FCC Legal Adviser for Enforcement Riley Hollingsworth said monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." Hollingsworth said that such operation "is considered deliberate interference and cannot be tolerated on the Amateur frequencies." Hollingsworth pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," Hollingsworth wrote.

>>HOW DOES A CONTEST ?

He suggested The Liberty Net explore operation on the Internet or seek a low-power FM broadcast grant if that service is authorized. Hollingsworth reminded Misek that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services.'" He also pointed out that Part 97 prohibits broadcasting.

>>ARRL and K1MAN on your HIT LIST ??

Please excuse the repost, I heard that some people where having trouble sending to my work address so I am now using my Ham address. Tnx, Dave

For Sale Kenwood TS 850 sat HF radio, covers 100khz to 30mhz. Comes complete with an internal antenna tuner and keyer. I have added additional filter for CW and SSB (500hz and 2.6khz). Just over 2 years old and in great shape. On a scale of 1 to 10
for appearence this would be a 10. I have worked all over the world with this radio and a wire antenna. This radio is able to pull signals out of the mud and received glowing reviews from QST mag.

Price $1100.00 with filters.

This situation quickly reversed itself before the release of this press statement. It seems WA9KJI WAS NOT in QSO on 3.950 and this was confirmed by SEVERAL other hams. Therefore, WA9KJI LIED to Riley....which really pissed Riley off. It's my understanding WA9KJI has now been REMOVED from ham radio for two years.

If this is true....I will break out the champagne tonight!!!!

Hell all,
Could someone email me the first two post of this thread? For some reason my server didn't get them we been having problems with the server for a while now. For what I have read so far this is what I have been saying all along. I also beleive that the so called crackdown by the FCC is smoke and mirrors too. Why has (and I'll name names) K4OKA Al Abernathy been allowed to continue you his jamming practices. Heck this guy even jammed emergency frequencies set aside for communications in and out of Oklahoma. Why has Rich Whiten WB2OTK been allowed to lie to fedral officals and get away with it? Been aloowed to use foul language over the air and cause willful interferance a number of times. These are two people that I have wondered about for a while now.Heck What crackdown? Yesterday on 20 meters they were up to the same playing tapes over the air and everything so where is the so called big and powerful FCC? So in a artical that I published at my web sight you can see where I stand on this issue. http://www.dirtball.com/what.html in this artical I have been very careful about naming names on advice of my attoreny. I also beleive that this is a plan by this adminastation to gain more power over the American people. One of the best ways to do that is get our (the American people)communicating abillity. You want more! Whats these rumors of taxing the Internet. Tax on email. What is the deal there?
I know that the two people that I just pointed out are not even a drop in the bucket but they are high profile people. To shut these people down would send a message to the rest of the amateur community that the FCC still works. But I geuss the FCC dosen't want to clean up the amatuer radio community they just want to give us enough rope to hang ourselves. What all this talk about Riley going to clean up ham radio? Where is the broom? I think its all just hot air!
I have yet to see anyone get a fine or have there license rovoked on the HF part of the spectrum. A bunch of two meter crap in Calfornia. They had to do something there or somebody was going to die. I published on my internet site first hand account of what was going on out there YEARS before the feds did anything. It was real BAD out there! Heck they even caught two guys in the Atlanta GA area in the act of organized jamming where they would set the jamming practice up on two meters and go to the HF part of the spectrum and carry the jamming out. These guys are still on the air. So I do beleive that your right the FCC's so called crackdown is a farse. Its just a matter of time and we will all be off the air or pirates one. Now ain't that a scary thought.
I even took down my anti-FCC pages at request of some of the fedral officals at the FCC. They told me that they where going to crack down on the whole mess on 75-meters. From what I have been told that same crap

is going on 3.950. That was another place that was supposed to get attention from the FCC. Nothing happened there either. I don't agree on what they talk about on 3.950 but I do agree that they have a right to talk there without being jammed. Now what about the unlicensed operator what have the done there? NOTHING Fank Todd is still on the air with no call and nothing is done about him and the feds know about him. SO I have to say I agree with you 100% that the so-called crackdown by the FCC is smoke and mirrors.
So what do we do?

I remember telling people about the FCC dragon frying us all.

You know, I don't care for nazis and racist either.
But I was raised to believe in certain priciples.
Didn't one of people we *used* to think of as American Heros
say something like:
"I may not agree with what you say,
but I will defend your right to say it" ??

Oh... so sorry.... Anyone saying that today is just a
right-wing nut or nazi, right? Yeah... nuts like
Jefferson, Washington, Hamilton, Webster...
terrible things those radicals said. I better watch it.
Better call a government functionary to check the latest Gallop poll
and tell me what kind of political views are OK this week.

You didn't honestly believe that stuff written in the
Bill of Rights, did you? It's been dead since 1860.
Uncle allows his minions the ultimate weapon of
administrative law, so it's just so much toilet paper.
He wipes his bum on it daily and this is just the latest swipe.
The minions will tell you what is and is not acceptable
to think and say and if you don't like it,
you'll get squashed like a bug.

And they're so good at it, your peers will help them!
Watch the majority of hams jump for joy because a
certain group has been denied it's civil rights
and damn those who protest it. Gonna be really
funny when it's their turn. I'm gonna laugh my tail off.

Pitiful.... we deserve exactly what we're going to get.

"Five nine Texas good luck in the contest QRZed??"

I called the FCC and they said if there is one it would be listed under Bureaus->Mass Media. Look for Bureaus on their home page and you will see Mass Media under it. I did not pursue this because they gave me the following too:

http://www.radioinfo.com/

This does have a list by state, city, call letters, etc. When you select database search note the search page comes up with the search button way to the right and you have to scroll to it. A very oddly designed page! Anyway, I tried it for California, and yes it did list something like 704 stations, both AM and FM. At this point I don't know who sponsors the site.

>if you don't like it Phil you can go and stuff yourself!

Keith, there is a difference between being safe and being paranoid. Being safe would be to ask some idiot who is puffing away on a cigarette at the pump to put it out. Paranoid is what you described. There are far better chances of an explosion being set off by a backfiring car then by someone's cell phone. Or do you insist that those around you push their cars away from the pump before starting them? Don't you see how ridiculous you are being?

Or could it be that you are just one of the many weirdlings we get in here who have nothing better to do than pick fights on usenet. I've seen my share of them too. Which are you? Time will tell.

Every color television set in the US has a crystal controlled
oscillator at 3.58 (3.579545) MHz, the NTSC color subcarrier
frequency. A few thousand sets operating simultaneously, or just
a single unshielded set, can cause QRM at that freq.

Although I have no preference of the two radios you listed, they both will
work for packet radio, at least at speeds of 1200bps.

Jim
Great that you are learning to become a nocode operator. I myself fell
from the ranks of CB back in the 1970's I also still enjoy CB radio. Not
many hams will admit to this but I will knowing where I came from. I
have put together a plan that is still a little rough but I do believe
that it would help both the ranks of CB radio as well as the ranks of
amateur radio. If anything I would add to the population of ham radio
and give the CBer a better chance on not only learning more about radio
but also the chance to upgrade the class of people that he or she all
ready know. All though there are quite a few so-called BAD APPLES in the
ranks of amateur radio most of them are good hard working honest people.
I thing that what you are doing will be good for your own self worth.
If you what to know about what I propose then check out
http://www.dirtball.com/band.html
weatherr or not you agree or disagree we can both agree that something
has to be done to take the load of all the illeagal activity on CB and
open the rules up to where maybe some of that crap isn't illeagal and
the FCC can put more into getting the socalled bad apples. Anyway best
of luck and I hope to hear you come on here and say you have you genral
ticket

> the Trotwood Fire Marshall but the Committee who set the
> rules on access?

If I get to the arena an hour before the gates open and because the clowns haven;t a clue what's going on and I finally get to the gate at 8am, I'd expect them to let me in. That's not what I saw or heard. The lines to get into the flea market with your vehicle stretched onto the main highway due to incompetence, plain and simple. It was not a matter of getting their at 7:50 and expecting to get in. I was getting there in what use to be plenty of time and not getting in As to the quotes, you obviously didn't take to any Hamvention officials...they blamed the "fire marshals" for ALL the problems being seen. However, since they was obviously a problem getting in, you'd think some official would have been present at the gate instead of riding around in their pretty new golf carts

> Hara. It might be interesting, though, to see if the Board of
> Heath has some regulation about water fountains, and if so, does
> Hara meet it?

NOTE the food monopoly was controlled by the Hamvention people who made money by renting the spots out to various organizations. (Where do you get your information from anyway????) Obviously as to water fountains, they didn't because the were shut at the insistence of the Hamvention folkes

>
> But more importantly, BOTH the above are fully in your control.
> You CAN choose to show up on time.

Did that, so did a lot of other people and they didn;t get in

You CAN also choose to bring
> your own food and water.

Did that, but I do buy some things and all I wanted was some quality for my $$$.

I can not recall the last time I spent any
> money on Hara's food; there are grocery stores nearby -- one is

Aw jimmy did you get your feelings hurt cause the FCC caught you jamming
and planing to jam with your loser buddy poor poor pig vomit. Did
bellsouth caught you deleting posts and kick you. poor poor pig vomit.
How long is going to be before ATT finds out about you and kicks you
too. And another service bites the dust poor poor pig vomit a known
felon and a lier too! Are you still living in a barn. Its one thing to
be trash its another to be toxic waste and seem to be toxic waste you
ruin everyone that comes close to you. Did you put the blame for you 2
meter activities on you loser buddy? your lower than trailer trash you
can't even afford a trailer.
How long will it be before AT&T kicks your fat loser self.

4400. 3.950 YOU ASKED FOR IT!

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-20 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990520164921.28133.00002751@ng-fu1.aol.com>
Source record: 142362

I have before me a print out of the latest ARRL Web Extra Page for Members Only since I am elite enough to be a member.I definitely am special which is easily discernible
I see the first article deals with a chap named Santini who just lost his Tech license for failure to retake the exam which apparently was enough to convince Mr. Riley Hollingsworth that there was hanky panky involved the first time around. So goodbye Mr.Santini and God speed. Study hard and come back.
The second posting deals with Rich Whiten, WB2OTK, whose letter to Riley left some questions unanswered but I'm sure that Rich will furnish enough to satisfy Riley in the followup. I have faith in both men.
The third deals with David Castle, WA9KJI, whom I used to hear converse nicely in Spanish but got too antsy over the hoodlums on 3.950. And from what I surmise,he got a bit abrupt and snotty with Riley which will make David an SWL for a few years. Davey, you simply can't spit in the eye of authority and expect to walk away unscathed. "The Enforcer" was kind enough to have warned you but you spat!
But it's the fourth item that I find VERY VERY interesting. The one that deals with "Swastika Pus" Misek,W1WCR, the chief goosestepper of the Liberty Net Nazis on 3.950...the Boys from Brazil. It seems that Mr. Hollingsworth got a bit fed up with all that rancid,ugly,demeaning crap that Victor Victoria Misek and his Bundists spew forth on a constant basis. Let's analyze that particular post.
To begin with, Riley took exception to the operating procedure of the N.H. screwball and cohorts. Now mind you, those who are not members of the ARRL and therefore must learn second hand, the hard-hitting epithets are not Riley's. The man's a gentlemen and advocates in the King's English. I. on the other hand, having dealt with swine on 20 and 75,don't mind one bit getting down in the dirt with them muddying up their nicely starched brown shirts, swastika arm bands and shiny black jackboots.
It seems that Riley was offended by the way Misek would come abruptly on that 3.950 cesspool frequency, oblivious to any users, and open up his Heil Hitler stuff right atop them. Riley calls it"deliberate interference" which it most certainly is. And so that's strike one against the Liberty Net devoted to rob us Americans of our liberty.
Now comes the JUICY PART and attention anti-Semites-I said JUICY, not Jewsy so don't get your pills in an uproar.
Riley says, "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of the allocation of frequencies for the Amateur Radio service." That's a nice way of saying,"Hey morons, what the hell are you doing here in the first place-you're certainly not doing ham radio a favor>" Now if you think I'm misinterpreting things, let's go on to the next salient point.
Riley suggests that the Liberty Net explore operating on the Internet or seek a low power FM broadcast grant. In other words,"Hey sheepherders...get the

flock outtta here."
He then reminds Victor Misek that part 97 prohibits communications on the Amateur frequencies that, on a regular basis, could reasonably be furnished alternatively through other services." That's a nice way of saying your net is too rotten for ham radio. Take it to a garbage dump or a landfill or deep six it."
Now there are going to be some of you out there in "cyberville" who'll flip over this attack upon your Fuehrer and his "Parteigenossen" but you gotta face facts, stinkweeds-your time has come. No, Riley is not stomping your First Amendment rights as some will proclaim. His purpose is to secure American ham radio spectra for Americans and that Liberty Net is an eyesore, an earsore and a gigantic electronic hemorrhoid. It does harm to our hobby/service. It's a vile, contemptible, vicious affront to everything we hold dear, everything Americans died for in so many wars.
And targets of the Liberty Net hatred has been directed at certain minorites who have likewise died to preserve and protect this nation, namely Jews, Blacks and Hispanics. And just maybe Mr. Hollingsworth knows it too. In fact; I'm sure of it.
Riley's going to make a lot of enemies due to his crackdown on Misek and his subversives because there are plenty out there who have been deluded into thinking that America is evil, her government is evil and nonsense about one world government and selling out to NATO and more endless puke. However Riley's proving something to everyone. He's out to clean up this hobby and if he feels that if a single person or a group are hurting the image of the USA and hurting our chances of retaining our frequencies before the I.T.U., THEY'RE HISTORY UNLESS THEY COMPLY.
I don't want to hear all this speculation and nonsense about Riley favoring this one or that one and so forth and so on. He's proving such allegations WRONG. Want to save your tickets? LISTEN TO WHAT HE SAYS! DOC, AF2Y

> WRONG. Want to save your tickets? LISTEN TO WHAT HE SAYS! DOC, AF2Y
Boy you seem to have a bias way of looking at thinks you say you have
faith in both men? One is a known lier and who has one more then one
occaision admited to bad checks in Flordia. The other who for all
intensive purposes is a cop HMMMMMMM. Not really a bad thing but to cops
everyone is guilty. Doc I really think you need to rethink what you
have said at that point.
As far as your remarks to that bunch of weirdos on 3.950 I have to
agree with Riley on that one what good are they for the purpose of ham
radio and what gives them the right as any other net or group to take
over a freq that is in use. My OH My Rich Whiten is guilty of that more
than one occasion the frequency in question 3.901 MHz. So right there
you have crossed what you said. So its ok for a man you beleive in to
take over a freq but its not ok for a group you don't agree with I don't
understand that one.
I have mixed emotions over this one, One I'm not a NAZI nor am I a
member of the KKK or any other race group. I am a American so I do have
a problem with the call to disband a net because of there affilation.
That would be just like disbanding a net cause they talk about Jesus. I
fully understand Hitler is no Jesus but to those sickos he is. So I

think that dismembering a group because of the content of the group is wrong. It is against the Bill of rights freedom of speech peaceful assembly and the scrariest part of all freedom of religon. Don't get me wrong I thing that anyform of biggotry is wrong. That goes for the jews as well as the Afro Americans whites as well as asainamericans. How ever if Riley can prove that the net just started up over people that where useing the frequency then that needs to stop. Also alot of other nets are guilty of the same practice.
So this is one that really scares me. So I truly hope that this one doesn't end up before the supreme court. I do hope Riley makes the right choice here.
Of course this is just my opinion I could be wrong!

4406. Nomads Mailing List (new)

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-20 00:00:00 UTC
From: jeff <jeff@jehosophat.com>
Message-ID: <37448E7D.3C32B6A8@jehosophat.com>
Source record: 142368
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment,rec.radio.amateur.antennas

The Nomads mailing list is a group resource for those who spend most of each week away from home due to work or for other reasons. Portable operating challenges such as the best antenna to use from a hotel balcony and operating mobile from a rented car are typical discussion topics.

Feel free to join us and share your own experiences as a radio active "road warrior" .... this list is brand new, just formed this week.

For more information:

4407. Help-QST/QEX articles urgently wanted

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-20 00:00:00 UTC
From: oxf01@ukmax.com
Message-ID: <37450032.2370@ukmax.com>
Source record: 142369

I urgently need a copy of two articles in QST & QEX. The months are QST may 96 and QEX jan 95.

Is there anyone out there who would be able to send me a photocopy (or even fax) of the articles concerned? I will pay all copy and mail charges (I have a US bank account).

Please e-mail me directly to oxf01@ukmax.com.

TIA,

Mike, G4COA

>of them...NOT so for CW.

Oh, I don't know; just like you can skip questions on the written and
still pass, you can also skip questions on the code test and still pass.

Both the written and the code are pass/fail; there is no letter grade
awarded.

>>>Not so
>>>for CW testing which is given, graded and must be
>>>passed as a totally separate test element.

The written is a totally seperate test element -- it is a pass/fail exam,
too.

>>Only at the 70% level; that's less than what's needed to pass the
>>written exams.

>You are comparing apples and oranges again. It is STILL a separate
>element that MUST be passed.

What? The written? Of course the written is a seperate element which
must be passed.

Think of all the license classes which requre one to have passed several
elements; for example, to pass the Extra written 4B element, one must
have passed Element 4A, among all the lower written elements.

> Kenwood TH-D7A(since I may try to operate packet radio). Any suggestion?
> Thanks!!

I'm kinda partial to the VX5-R. I bought one a couple of weeks ago and cannot put it down. The small size and the 5 watt output were big sellers for me. I'm burnt out on packet, so that wasn't an issue. I also like the ability to program the radio as I like it using either ADMS or EVE software. It does a good job even on AM broadcast and the SW bands with a good antenna. It is am amazing little radio given its' size.

<<<Before you read the virulent anti-Semitic crap from the demented mind of a Carol Valentine who's husband probably is the demented neo-Nazi Tom Valentine heard on demented shortwave stations,keep in mind that western civilization was built on JUDAISM. Now if there are Jew hating so called Christians out there, I know it hurts but our way of life here in the west would be chaos if not for a certain man who apparently had an "in" with Jehovah. That man was Moses who received the Ten Commandments, the CORNERSTONE OF WESTERN CIVILIZATION! Furthermore Jesus Christ, much to the dismay of the Valentine crowd, came from the House of David and if you don't know what that means, ask your priest or minister. These neo-Nazi creeps, female and male,try to make you believe that there is no linkage between Yeshua(Jesus) and Judaism. They don't want you to know that he was circumsized, a Bar Mitzvah etc. You are expected to be caught up in lies and slander about those folks who gave you Jesus Christ. Jews comprise one-tenth of one percent of the world's population,yet their contributions to our world have been monumental. Why? Because God didn't give His Ten Commandments to schmucks but only a schmuck like Carol Valentine plays games with such a fact. AF2Y, Doc>>>>>>

What a boast . . . That the ADL works with those other champions of liberty, the FBI and the ATF!

In fact, the Anti-Defamation League of B'nai Brith is a Jewish organization. The Jewish tradition is virulently opposed to the

American Bill of Rights and principle of "equal justice under law."

According to the Talmud, non-Jews are sub-human and can be slaughtered like cattle.

* The intent to kill a non-Jew is so laudable that even if a Jew is accidently killed in an attempt to kill a non-Jew, the murderous Jew suffers no liability.

* But if a Jew intends to kill another Jew and does so, he is liable.

(Babylonian Talmud, Soncino Edition, London, 1935. Sanhedrin 78b 79a; pg. 529-30.)

* If a Jew murders a Gentile, the Jew suffers no death penalty. (Sanhedrin 57a., pg. 388)

* if a Gentile strikes a Jew in the jaw, the Gentile, having stricken the "Divine Presence" (that is, a Jew) suffers the death penalty. (Sanhedrin 58b, pg.388).

And what does the Talmud say about the obligation to tell the truth? Why, the Talmud sanctifies and institutionalizes false swearing, or lying.

"And he who desires that none of his vows made during the year shall be valid, let him stand at the beginning of the year and declare, 'Every vow which I may make in the future shall be null.' HIS VOWS ARE THEN INVALID, PROVIDING THAT HE REMEMBERS THIS AT THE TIME OF THE VOW. " (Caps in original.) A footnote describes the "Kol Nidre," a formal dispensation of vows prior to the Evening Service of the Day of Atonement. (Nedarim, 23a; pg. 68 of Soncino Press 1936 edition.)

Very well said, Ralf! I think you have gone to the core of
the matter. When a newcomer passes a code test, along with
the other required tests, he is saying "I want to join all
you other hams in a great hobby". On the other hand, when he
insists on dumping the code test he may as well say "Hey I
don't want to join you idiots who still believe that code is
important enough to learn, I just want it my way, all the
way". To him the hobby has nothing for him except that which
he tries to take by force, while claiming he is being
"forced".

Pretty much what we've seen here for so long on RRAP.

From: "Tom B." <ab7tu@parg.org>
Message-ID: <37435F2B.A2216631@parg.org>
Source record: 142386

I love CW because of all the intelligent, good natured, happy people I meet on the air. There are some lids who can't catch on to the split, or become impatient in the pileups, but that's about the worst of it. The CW sub bands are a wonderful escape from all the morons with CB attitudes I hear up on the Fone bands. If you don't want to do CW, DON'T! CW isn't ruining anything, but a lot of lazy dysfunctional people are.

4424. About Riley Hollingsworth

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-20 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990519222422.02111.00003506@ng-ca1.aol.com>
Source record: 142389

Hey men,wise up. I'm reading tons of speculation about what Riley's doing and why and for whom etc. NOW HEAR THIS!!! UNDERSTAND THE FOLLOWING!!! NOW HEAR THIS!!!
If you think the man is anybody's patsy, you're NUTS. How difficult is it to understand that he is out to PRESERVE our spectra from foreign takeovers as a result of proven mayhem before the I.T.U. All the man wants is COOPERATION not SPECULATION. Let him do his job without second guessing him, without slandering his efforts on-the-air, without libeling his efforts on the Internet. He is in NO ONE'S CORNER; will you understand that? Concentrate on what he's doing for ham radio instead of what he may or may not be doing to someone you don't like. Leave personal feelings out of an honest to goodness assessment of Riley. How hard is it to see that when he began his job,he was NOT OUT to grab anyone's ticket but instead to confront a problem, to talk matters out with an individual, to reason with an individual and NOT TO FRIGHTEN anyone. This I'll say:had the enforcer been anyone else but him,heads and tickets would have rolled en masse. Those fellows and gals given warnings, stern or friendly, would now be on the outside looking in. Many of these posts make Riley outto be an ogre, an FCC stooge, an underling and so forth and so on. HE IS HIS OWN MAN! Naturally he must report to his employer but I'm willing to bet that it is HE who's the moving force behind the entire cleanup scenario. not his boss. By that I mean, men in top positions move or don't move based on Riley's recommendations. You have it the other way around.
And so before you post more criticism of the man, think about what I'm writing. If you try to understand the situation intelligently rather than listen to rumors,you'll appreciate what he's doing instead of trying to find fault. And I'll go on record by saying that I am no different than any other ham who is under scrutiny. Despite the fact that
this post backs him,I seek no favors from the man and realize that I too must comply the same as you and you and you and that's exactly what I'm doing And if you think otherwise,you have a screw loose. Doc,AF2Y

I am here, Dr. Hate.

First of all, Does it matter what class of license I have? Since when does it matter? My opinions here matter as much as yours. It seems from others that I have more credibility than you do. For example, I was never cited by the FCC's Kingsville, Texas office. I have not spent the last 7 years on 14.313 spreading hate and discontent.

All you seem to care about is to draw attention to yourself. In fact, I think it's funny for you to note that I have never posted anything of relevence on these newsgroups. I have been on USENET for 2 years, you have been on for just a few short weeks, with nothing important but a bunch of hate.

Just rememeber, You can't win a argument by spreading hate and discontent......

BWA HA HA ! They had several large companies in the US default on PCS
licenses !

> What are your opinions?
> Is there anyone out there who can corroborate this information?

Yes, it's true. ARRL, run by leftists hippies who use roach clips for
Product Review purposes, is supporting use of HF for Salsa Net phones.
It's called Intercon and its praises were sung in today's M.O. story on
K1LNC.

If they can't keep CB ers off 12 and 10, they sure as hell would be
unable to keep "new" telephone bands clear of 600,000 hams who they just
kicked in the ass.

Para los vendedores del drugos en el sur de ameruica, quieran nandos
nuvoes, pero si no tienen las policias del radio ahora, no se poder los
radioaficionados al distancio desde los bandos nuevos.

El CCF esta como la pelicula, "Keystone Cops."

>sometimes
>'ringing' can be heard - and sometimes 1/2 of a phone conversation ...

There was an editorial in QST some months ago about this subject. The signals you hear are from cable tv modems, operating on carrier current. They were put out by TCI cable, and they are supposed to replace them.

When I called TCI, Denver, to report interference, I wandered thru their phone system for about 45min and three people before giving up. Despite the assertion in QST that TCI was aware of the problem, and would replace offending modems faster if complained about, I did not find anyone that was aware, or could help.

>Grid: FN03gs a terre..." - Hospital/Shafte

yeah. This is a problem with flea markets in general...too many insiders trading amongst themselves and then there's no market for the folks that are paying to get in.

can you fault someone if a guy walks up and buys your stuff at top dollar before the show "starts"? it's probably not possible to enforce a rule that would prohibit early selling - it only cuts the show's throat (bad selection, empty swap table spaces...) so the seller doesn't really care and the seller has got his bird in the hand and didn't have to stay there all day or more and risk going home with what he brought in.

And if you make more than one show, you see the same guys with the same stuff (you'd think they'd mess up and sell it eventually...)

Typical night of League Bowling (lineage, prize fund, secretary fee) is $10-15/session, so a year's worth (36 weeks) of bowling runs around $400 just for bowling.

OF course that's not the money maker for bowling alleys these days -- Cosmic Bowling pulls down $3.50 or more per game and it's all going to the center...

$20 is like what a $5 used to be...

Apart from the fact that your source is anonymous (to everyone but you) and the fact that this comes completely out of the blue (your source describes a conspiracy of some long standing; how is it possible that the ARRL or some enterprising, conspiracy-minded ham hasn't got even a *whiff* of this before?) Maybe your source believes what he is giving you, but that makes it still (yet another among dozens daily in Washington)

OK, apart from that, what about:

*Customers: who is going to *pay* for LD telephone service with HF quality audio, and other HF variables, in these days of fiber-optics and satellites?

*ITU, CEPT, and the ham world outside of the US: are they going to put up with something like this, HF propagation being what it is?

*US Telcos: how are *they* going to profit from this? You can bet if the Baby Bells and LD providers don't get rich(er) from such a plot, it has no chance.

*3,000,000 hams worldwide: all of them real, real pissed off. The QRM would be absolutely unprecedented, making 3950 sound like a library.

*Commercial and Military (here and abroad) users of HF: ditto all above, and same for manufacturers, ham and otherwise. How does the US FCC auction spectrum that is international, not by act of Congress, but the laws of physics? Why does the US get the $$?

I could sit here and type up another half dozen or 6 more strong reasons not to believe this panic-inspired stuff, but you get the idea. It'll only happen after the UN takes over the US and declares martial law. . .

It is chilling how little privacy any of us have remaining. This is the reason an acquaintance of mine gave me for never having applied for a SSN in the first place, or having a bank account, or paying the IRS. The' guy is not at all paranoid, just prescient (he's about 55 I suppose) and likes his privacy. He is a ceramicist in Bisbee AZ, and makes his living in cash selling very expensive pots (plural, not the herbaceous kind!) to well-to-do private parties and galleries. Nice work if you can get it.

Someone someday will tell me, no doubt, what connection Morse Code has to any technical proficiency. None at all, in my opinion.

I took the Novice, general, and advanced tests back when the FCC administered them in the 60s. Those tests were easier than the ones they give today. The ARRL License Manual pretty much had all the Qs and As ahead of time. Those who say otherwise, in my opinion, are kidding themselves.

Who cares? At the rate our HF activity is declining, soon there won't
be enough activity to scare up an argument on this topic.

The decline in the HF and VHF components of our hobby is sickening.
It is just pathetic. I predicted five years ago that unless we
ditched the Morse Code requirement that the hobby would die. Right
now the hobby is on the critical list, well on the way to the
graveyard. There are so few of us hams now that out here in
California,practically every new house built in the last 10 years is
subject to CC&Rs that absolutely forbid external ham antennas. The HF
bands are dead as doornails most of the time above 20 meters. Even
when the bands are wide open the activity level is sickening low
compared to past sunspot cycle peaks.

But hey, we still got us that neat Morse Code requirement. I guess
that is more important to some people than having a thriving hobby.
RJB.

I find most CW QSOs to be a bore, myself. Hi name is Bob, rig is KW
850 RST 599 CUL 73 QSL sure SK. Gee, two or three of these a decade
is enough for me. Big bore.

CW is ruining our hobby by keeping newcomers from joining. The level
of activity on the bands is just pathetic. The average age has got to
be over 60, and on CW I will bet it is closer to 70.

When the effort has a point, sure. Morse Code is a pointless bore.
All other radio services save ours have abandoned it. Morse Code is
never a significant component of amateur radio during emergencies.
Like it or not, Morse Code does not enrich the nation or the hobby,
except as an amusing anachronism from the past. One thing it has done
though, is kill our hobby. The bands nowadays sound like a party line
from an AARP convention. Managed care, anyone?

While reading the ARRL Web Extra, I discovered that now there is an organization called _Know Code International_. He he. I am almost a CW-only op, but I asm neither a Pro-Coder nor an Anti-Coder. I find the debate endlessly tiresome and think it accomplishes absolutely nothing. FWIW, it should be interesting now to watch and see this new group, K.C.I., and the older-fly-by-nighters of N.C.I. eviscerate each other.

Hell, I can even imagine lawsuits over the organizational name. When will it end? We really should have WRC's only every 10 years or so in order that we don't have to suffer these bi-annual squabbles anymore.

4449. -MORSE- Everyone Please read this!

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-20 00:00:00 UTC
From: Con Daly <radioman27@hotmail.com>
Message-ID: <OwR03.6489$xa.58798@c01read02-admin.service.talkway.com>
Source record: 142414

Hello everyone,

I don't read the posts from this group much and am'nt as active as much
I would like to be on the air. However I see a lot of debate going on
about morse. It seems to be the most passionate issue among amateur
and professional radio operators these days. I sailed as a merchant
marine radio officer from 1991-1997. I found morse to be absolutely
invaluable at that time (not terribly long ago). There were times
when I really could not have managed without it. This was not just
a matter of equipment on board as I often sailed with Inmarsat
terminals, both A and C systems which were supposed to be well
established at that time.
I have countless stories about satellite null zones along the equator
and many other areas, extremely weak signals on SSB etc, where the
only option available was to use morse. Indeed on one particular voyage
on board an Inmarsat-C equipped vessel I was using CW 90% of the time.
When the first changes started to appear with the introduction of the
new maritime radio system (GMDSS), there was any
number of mishaps occuring with ships normally having no communication
problems suddenly "dissapearing" from the air for days on end.
The ones which still had radio officers had no problems, as with the
ones with electronics officers who were former radio officers.
Having come close to shipwreck on 2 occasions I expressed great concern
about the changes taking place, as they seemed to be rather
premature and rushed and there was a desperate drive to get it all into
place before the millenium.
Now don't get me wrong, I'm no old salt and am always
keeping up to date with electronics and the latest innovations, but
morse should not be seen as simply old technology, it is just another
method of communication, proved itself very reliable again and again up
to the present day, I can vouch for that. Certainly
new communications technology should be introduced to all fields,
amateur or commercial. Especially when the high traffic needs of todays
industry are demanding it, but it seems that certain people
are just determined to get rid of something that they never embraced
because they never saw it in the right way. Morse is not a code, it
is a language. That is the first mistake a lot of people make in the
way they approach it. Certainly those people more musically inclined
will tend to like it more than others (I play 5 string Banjo), but
like learning an instrument, it takes a lot of time and effort and
can be frustrating.
Ok, so I'm obviously an advocate of CW but you may
be surprised to hear that I'm not in favour of keeping the requirement
for a proficiency test, if thats what people want. I just wish that

those against the code requirement would take a long hard look at what they are really campaigning against. It seems like it is really based on an irrational belief that it's too old fashioned, but really fashion shouldn't come into it. It certainly didn't matter for me in the Mid atlantic when we were taking on water faster than the pumps could get rid of it down in the engine room. That was in 1992 and there were other less urgent incidents right up to the time I left in 1997.

Certainly the amateur service is'nt as important as a shipboard radio installation or a coastal station but all you anti code people out there, please, take a good look at what you are starting. Because there will be no going back and it will be dead within 20-30 years of a no code requirement. The commercial people made a mistake, based on purely financial motives. 12 WPM is not difficult to obtain if it is learned the right way. At least ask yourselves is it really the requirement you are trying to get rid of or is it the whole art form itself. I hope I have at least provided some food for thought and that it will add some new and interesting insights.

73's

The amount of trading THURSDAY, while vendors set up is staggering.
Cartloads of goods moving out of the flea market to vendors vehicles is a
sight to behold.

Quite a few empty spots were caused by the "fire marshal" who prevented
everyone from entering after the flea market opened. Friday, the wait to
get into your spot was averaging 40 minutes. Imagine driving from the
East Coast, getting to the arena at 7:15 and then having to wait only to
be turned away because the clowns who were letting the cars in didn't
know what they were doing. Quite a number of people left and went home

>
> And if you make more than one show, you see the same guys with the same
> stuff (you'd think they'd mess up and sell it eventually...)

No one mentioned the lack of quality food. I don't mind paying $3 for a
hamburger because the extra $$$ goes for a fund raiser, but at least put
some meat in that burger. Plus, did anyone notice that the majority of
water fountains were turned off?? Hamvention officials admitted doing
this to make the attendees by $2 bottles of water that sell for 79 cents
at the local 7-11

It seems that Hamvention is getting a tad to big for its britches. Maybe
they should move to Dayton, New Jersey

Sorry, Bill. There is one FACT that blows your ridicule propaganda right out of the water. Hollingsworth has been on the air talking about how the amateur spectrum may soon be given to Latin American telecommunications interests if we don't straighten up our act!!

The more I speak to Riley, and the more I see what he's doing, the more I'm beginning to think that he's NOT part of this Clinton agenda, but is trying to give us subliminal warnings to start behaving ourselves! I think his hands are tied by "higher ups". But I think deep down he would love to clean up the mess, but is being restricted. How else would you explain the EXTREMELY lenient punishment to the 14 year old ham who played music on a police frequency for 15 minutes? That was endangering the general public! I would have strung that kid up by his testicles! But Riley just slaps his wrist and says, "naughty. naughty boy."

Jr.

Boy, have I gotten some hot emails.
Hey guys-- remember you don't shoot the messenger.
I've said twice in the post that, while I trust the person who
wrote it, it is not first hand and you should decide for yourselves.
Then I asked if anyone could back it up.
I sure wish more people would *read* the things they pop-off about.

Secondly, on Riley:
He has to implement policy, not make it. Not his fault.
If this nasty little game is indeed truly happening,
I'd bet he hasn't been told a thing about it.

Phil you must really have it in for Jefferson and Washington...

The point isn't the government writ large, it's the presence of bad apples like Miss Mesa who then can use your info, send it to her DC college chums and they can go on a spending spree at Eddie Bauer while your credit rating gets the seven-year itch.

Furthermore, the hackers who regularly attack federal computers can access the real data and do the same, and federal claims of security are bogus.

The truth would cause a panic, lessen e transactions and hurt Bill Gates' future contributions to the DNC.

<SNIPPED LONG EPISTLE>

<<At least ask yourselves is it really the requirement you are trying to get rid of or is it the whole art form itself.>>

No one here has advocated abolition of CW only its removal as a test requirement. If knowledge of Morse Code is needed in critical fields it should be maintained as a criterion. But to keep something like CW only because it's traditional is absurd.

There will be more interest in CW if it is made a proficiency award like WACS, WAS, DXCC, etc.

Source record: 142175

Hi,

I'm using a PCR-1000 and would like to know the difference between WFM and NFM. You can select various filters for both but the results are completely different.

Using the pcr to receive weather satellites only works when set to NFM 50KHz filter so there must be a difference between WFM and NFM apart from the receive bandwidth. Is it something to do with IF response or equalization for instance?

Thanks for any help,
Paul

To answer your question Cecil, ... He has nothing to lose at all.
Hiding behind Deja News and a sudo ID he can say anything he wants.
Of course there is no value placed on those his comments either.
Most of the users posting from Deja News are trouble makers, who live for
any kind of controversy.
Some have even had their Amateur license suspended and are now using this
news group to do the same thing they used to do on the ham bands. At least
here we can pick and choose what items we want to read and leave the rest
for the trash can where they belong. Personaly..... I am just about to the
point of writing off this news group as a waste of time and removing it from
my news reader. I am sure they will flame this but I will never see those
witty replys because I'll just skip them by.

Agreed....I know him personally, see him at a lot of trade shows, and
think he's on a mission to save the ham bands from those that want to
merely trash them for their own amusement. I'm with him!

If anyone would care to exchange emails with
abuse@dejanews.com,
You can get Rich Whitless aka Porkbutt akd Dungboy99's
dejanews posting ID trashed.

Just set your browsers to view all header information,
copy a few of his more abusive posts along with the
headers and send them to support@dejanews.com and
abuse@dejanews.com if you'd like to ruin his day.

He'll probably just get a new one, but it would be fun.

I'm with him too. I also want to save the Amateur radio bands from the Banana Republics. The part that I find interesting is the ones who are in trouble are trying to drag as many down with them as they can. The funny part about it is it ain't going to work. I don't know Riley personally but I have talked with him on many occasion. I do beleive that he is a cop. He is a good cop bent on doing his job that mind you he did Vol.for, for that I do support him. It takes guts to face 250,000 people. Some of them complete idoits. I would say he is getting his 15 mins. of fame. I sure in heck wouldn't want the job. He has also let a few off the hook but they still continue to act like idoits. He has also got one that I know of in the ringer and there have be two that I know of that have been suspended from HF. There is one I can't figuar out how he is getting away with stuff?????? I don't know about that one. I feel that one of the guys on suspension should get help for alcohol. He is only one guy against 250,000 hams including the nocode guys. So he has his work cut out for him.

So now your going to fall to the level of Porkbut and pigvomit? Doc your
not going to get on 3950 and cause QRM are you? I mean I have thought
that you where better then those to cloppers I just mentioned. cum on
now.
Now if you don't want to get anymore spew from them justt tell their
servers on them. Warn them then take it to their servers they will stop.
But please don't get yourself in trouble like porkbut and pigvomit did.

Don't foget Spark Gap. For those of you who do not know what DX is; it
means receiveing a radio/television signal from far away. From far away
as in you usually do not get a signal from this place. DX can also mean
how far your siganl is getting out. From everything that I read; if you
can run just 10 watts, and your siganl is getting out 300 to 400 miles
then that is better DX then somebody running 1000 watts and doing th
same thing.

Since when do TV station broadcast in one colo(u)r as the name
Monochrome would imply. Heck, even Black and White is two colo(u)rs.
By the way, the best Black and White is what is know as a Twistee cone.
That is when they combine Vanilla Ice Cream with Chocolate Ice Crea.

Dr OM/YL

This mail to inform You that I resently have uploaded an updated
beacon list at my website covering a 70 MHz world wide, a 50 MHz
world wide in six continantal splitted listings covering, Africa,
Asia, Europe, North America, Ocean/Pacific and South America.

These lists can either be viewed in html or downloaded as a ZIP
file in band pacages, the ZIPed version contains a bandplan aswell.

These can be found at http://www.qsl.net/oz6om/

I hope You find the listings of use ...

4489. Is it true that Bill Cheek is under arrest of ECPA?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-21 00:00:00 UTC
From: Greg Dean <idean@purdue.edu>
Message-ID: <3745F492.B5BA925@purdue.edu>
Source record: 142204
Cross-posted to: rec.radio.scanner,alt.radio.scanner,rec.radio.amateur.misc,rec.radio.amateur.policy

One of the local scanner hobbist told me that Bill Cheek
was arrested for making a decoder for the Motorola MDT.

Cheek appearantly posted this on his web page which
resulted in his arrest. While this sounds strange,
did it happen?

With the Clinton administration repealing most of the
civil rights gains of the '70s, people are a little
concerned.

4490. Was there anything to be excited about at Dayton?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-21 00:00:00 UTC
From: Greg Dean <idean@purdue.edu>
Message-ID: <3745F600.3BE9489@purdue.edu>
Source record: 142205

Hokay-I've got my asbestos underwear on- so here goes-

to all you no coders like me and to all you pro-coders-

it's very simple-

if us no-coders don't hurry up and upgrade, there ain't gonna BE any
HF bands cause nobody is gonna ues them-

now to you pro-coders-

this is enough. either help us learn, or shut the hell up.

I intend to take and pass a 20WPM test before the end of this year.

the prob with this NG is that most real Hams are talking on the Radio
rather than on the internet- including my Elmer- thank God!!!!!!!!!

First of all I have a commercial pilot's license with airplane single and multiengine land and instrument ratings. I have been flying since 1967. I own and fly a Baron. No I didn't have to learn Morse to identify navigation aids, the CW is printed right on the chart or approach plate. The statement "don't know of anything used in flying their planes that would need to recieve (sic) morse code for any reason" is fascinating. What do your friends fly? Ultralights? What are their license numbers? Mine is 1774847. My Baron's call sign is N502TB. When you tune in an NDB, a VOR, or an ILS you are taught to listen to the CW identification to confirm that you have the correct station. This takes more time if you have to look at the chart or approach plate to see what the CW is rather than just hear the ID.

Actually the only difference between an Israeli and an Israelite, is that the Israelite has 30% fewer calories

However, an Israelite is not necessarily Jewish, by a Jew, by law is considered an Israelite

Try again, thanks for playing

4498. Re: Was there anything to be excited about at Dayton?

Newsgroup: rec.radio.amateur.misc

There was a pretty neat ICOM dual-bander with a full-color LCD readout that also doubled as an NTSC video display. They had a video camera hooked up to it and it produced some pretty nice pictures.

Then there's Kenwood's VC-1 visual communicator that had a video camera and display and I believe fast scan capability as well as slow scan for HF. Think it was out somewhat before Dayton, tho.

Also, the guy doing the packet forum was turning handsprings over Kenwood's handheld (also out before Dayton, I think, but first time for me to get an eyeball on it) that has the built-in packet modem. Am still not sure of the details, but think it's set up for APRS. Cool.

Didn't really search for latest/greatest because it would have been stuff more expensive than I wanted to fool around drooling over. The MFJ line is getting absolutely huge now, and I got their little in-line filter for eliminating the paging transmitters that tears up most 2M receivers nowadays. Haven't got it installed yet. Been dead-run-busy, plus sick, this week. (Still doing better than one of my friends who went to the hospital with appendicitis, however...)

Dave Head
K8DH

PS - Ham Radio _AIN'T_ dyin... Manufacturer's sales keep going thru the roof... look at all the stuff MFJ has come out with... Ham Radio may be CHANGING, but it isn't DYING.

So, what Hamvention did YOU go to? The one I went to had some of the nicest, friendliest, most courteous people I am ever likely to run into, I think. Don't know how many thousand "excuse me"'s I heard (and said) as I was bounced off of and as I bounced off others in the crowd. People would greet you even tho they don't know you, etc. I can't see how you could want much better, actually. Where can you find better people? At church, maybe? But nowhere else outside of the "Sunday Halo Effect" of church, I think.

Well if anyone still wants one I have a nice one for sale too. Peaked up with modulation limiters still intact, Extra channels with channel sheet, Roger beep that you can turn off, Clarifier opened up. No holes drilled in the chassie, channels and roger beep are controled by existing switches. Mobile was never in a vehical, used on a power supply in the house. Brand new mounting bracket and cobra hand mic also brand new power cord with fuse holder. No orginal box or papers included. I will sell it and ship it for a money order sent first for $150. If anyone needs to see a report of my charcter they can click on the link below to see reports from satisfied customers that I have delt with before.....
Thanks,

well Phil, it can happen and it has happened. A young woman turned into a fireball in Sydnay about three years ago from just this very thing. Which is why there are signs up on every gas station around here notifying users to not smoke or use cellphones whilst refuelling.

Brad.

Listen to the theme song at the end of the program; you'll hear
the violins sending M O R S E over and over (in Morse code, of course).

>HUDSON, NH: The FCC has asked a net control station of the Liberty Net
>on 3950 kHz to justify the net's use of Amateur Radio frequencies. Via
>Certified Mail May 7 to Extra class licensee Victor A. Misek, W1WCR, FCC
>Legal Adviser for Enforcement Riley Hollingsworth said monitoring on May
>1 indicated that Misek's station and members of the group for which
>he was acting as net control "began transmitting on top of existing
>Amateur communications that were already in progress."

Hollingsworth is wrong. I heard the whole
incident. There had been a QSO going on
for a while before the Liberty Net started.
WA9KJI began QRMing that QSO. Riley
apparently turned on his receiver shortly
before the net started, and heard WA9KJI
in there talking. The original QSO turned the
frequency over to the Liberty Net, but KJI
continued his "ghost talking" QRMing that he
is so famous for. Riley assumed that the net
had opened up on WA9KJI's "QSO". I
hope W1WCR can get this false accusation
cleared up, because WA9KJI was the real
culprit, not the Liberty Net.

What really angers me about this is that
Riley apparently did absolutely nothing
about the malicious QRMing of the Liberty Net by W9ART and a white-noise jammer
that started shortly after the net started.

Go figure!

The difference is one can skip all the questions on SSB on the written
test and still pass. Try skipping all the questions on Morse code on
a Morse code test and see what happens. Because of that, IMO, Morse
code is presently considered as important as everything else in ham
radio combined. A bunch of us are trying to get that inequity changed.

1, I do not support WB2OTK, AF2Y or W1WCR

2. FCC has gone too far and not far enough. They are criticizing things protected by the First Amendment while allowing acts specifically prohibited to go unpunished.

3. FCC is hypocritcal, ignoring Intercon and K1MAN violations (if other avenues are available for WCR, they certainly are for boaters, missionaries, and tell MAN to take his 1-800 talkshow to AM, where he'd choke) because of these persons' cozy position with a corrupt Democratic administration.

4. If ham radio dried up tomorrow, I'd simply go back to listening.

Interesting you think this. What's the source of this factoid?
See, private chats with Committee members @ the Hamvention have led
me to believe exactly the opposite -- the food concessions are
controlled by Hara; some staffed by volunteer groups for a cut,
others by employees. That, by the way, is the way every other
facility I've seen is handled.

I just looked at http://www.hamvention.org/comms.html and don't see
anyone to run same, but I do not claim that's definitive.

That's because you're not familiar with the rec.radio hierarchy; here's
a reminder:

Subject: List of the rec.radio newsgroups
Followup-To: poster
Approved: news-answers-request@mit.edu,rec.radio.info-moderator@primenet.com
Distribution: world
Expires: 01 June 1999
Summary: This article provides a list of the rec.radio newsgroups; it is
posted alternately with the longer "Guide to the Rec.radio NGs"
Keywords: radio amateur ham cb scanner shortwave netiquette
X-Last-Updated: 1998/03/29
Version: 1.1 created 98/03/05 03:50:23
Posting-Frequency: posted on the 1st of each month

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and the contents of such a thread drift further and further away from being "on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

Jeffrey Herman, KH6O, and your friendly rec.radio.amateur working-group

I think we are all agreed, that as per the rules, we may not transmit without permission of the pilot, on an aircraft. Posession of a radio does not imply use of it, or intent to use it. A licensed ham, by virtue of having a license, is by implication willing to follow the rules. My contention that the airline may refuse to allow an HT aboard, and that the passenger may refuse to fly that airline, and may tell anyone who will listen to do likewise, is based entirely on common sense.

I think we would do better to post those carriers who have a history of non-cooperation with traveling hams, and avoiding, where possible, those airlines, and seeking to educate them to the extent possible. This argument appears to be a dead horse, well beaten.

Excellent post, Con. From a life-long seaman. AB, R/O. Limited Master. And banjo picker too, but not very musically talented, I'm afraid.

Last ship was in the far east. Funny, but still LOTS of CW there on 8 and 12 megs. Still hear a bit in the North Sea, and the Med, too. Even some military traffic in the IO. I guess the death of CW has been somewhat exaggerated.

Before we lost the R/O spot on the Tellus, all our AMVER traffic was sent CW, and the WX OBS, since the CW equipped stations ran the AMVER for free. We had InMarSat A and C. Actually, except for the fact that we had no SITOR, we were already GMDSS compliant long before the '97 thing. Yet, CW was often the practical mode, and saw quite a bit of use. Funny thing was, we never had an R/O inadvertantly send a false autoalarm sig on 500. I don't know HOW many times I have been on a ship since where a mate has triggered an EPIRB, a SART, or auto-alarm via GMDSS VHF. Happens every day, with these "highly trained radio experts" with their 50 hours of training to comply with STCW. No, the move from CW is not per se the cause of all this radio mayhem, but the lack of a skilled operator is, and the only way they could ever have done away with a skilled operator aboard ship WAS to get rid of the Morse requirement.

CW is "dead". Long live CW.

I see you haven't visted Davie ;)

Davie is one of the last So Fla. holdouts with real working cowboys. One
of the last large cattle drives in the U.S. started in Davie (late 1960's)
when the dairy farmers drove their cows several hundred miles up to the
middle of the state.

Now I live in a nice "proper" city and we don't allow horses to be ridden
in town. We don't want all that "pollution" on our streets. In Davie they
call it furtilizer and they -sell- it to us by the pound. :-)

Your Right, Most Hams Are decent operators and a lot of Course are good ops too! We should focus on the positive of both services, for God knows we will one day need both when the next big hurricane, earthquake, tornado, or astroroid strike. so lets work together to make both services the best they can be.

Wow, I never heard os such a thing. Hear in Ohio, one of the suburbs
passed a rule that states that you can only use a cell phone for an
emergency or you will get a ticket

Guess you've never heard of identity theft and other various frauds
that can make your life a total hell. All one needs is your social
security number and you'll be buried so deep in the credit world that
you'll never see the light of day again. And you didn't do anything
but give out your SSN.
IMO, for what it's worth, guard that number and be careful about who
you give it to and why.

That is just as bad as running the car while refueling. I wonder what would happen if everybody had atomic powered cars. Would an explosion result in a atomic chain reaction

Good point and your right. I mean the FCC apears to be working. I still would say that FCC is not working the way that they used to. I think that is the problem. Here on the internet these clown seem to be getting all the attention that they crave. What are you going to do. Its just like on the air these lids to best that they know how to keep the crap going weather its on the internet or on the air.

I happen to like e-skip on ten or even better when the South pacific comes in or when the band is open to the Indian Ocean. If you post something neet like that these same clowns that you talk about or one of there fool will post some crap like SO WHAT no big deal or it you try to work CW in a out of the way place the same ones start their crying. I do beleive that feds are letting this go to hell in a hand basket. I also beleive that it is the FCCs responsablity to take care of amateur radio. One thing that I noticed things are allot quiter I mean quite. I just come back in form the shop. I was scaning the spectrum a little bit and 75 was about dead. The interesting and scary thing is 11-meters was even dead. 11-meters around here is never dead. I found two truckers at the 154 mile stick on 85. They where on on 27.635 of all places other then that the spectrum is pretty darn quite. There where a couple of week signals on 3950 and some activity on 3945 but not much more then that. on 28.445 I have some kind of noise coming out of the north I'll walk the back of my land to see if there is a new electric fence up. My neighbor runs cattle.

Well I have said for some time now that both services should combine as one and make a beginner no test licnese for the average CBer and start from there. Alot of hams start there anyway. Your right with the big one right around the corner we all need to learn to work together. I even wrote up a plan for such a merger and put it on the internet and it got picked apart sometimes I wonder why I bother If you interested check out http://www.dirtball.com/band.html Heck nobody else was doing anything. All I was trying to do is promote peace between the CBers and hams. Like I said it is worth a try.

anyway 73 and thanks for reading.

Haven't you been paying attention? Everything makes gasoline vapors "go kaboom." Anything can cause a public air carrier crash. Get with it, buddy. What does it take to get through to some people?

Michael.

> Why do people hate logic and common sense so much?

That is a silly question since the answer itself is common sense. If people were logical then who would have babies? Betamax video recorders would still be in use in Europe and Jesus may not have been nailed to a tree! If there is a God then perhaps she is sitting up there having a damn good laugh at us all - I am.

To everyone who thinks simply passing a 13 wpm test makes them a member of some elite club, I wish to tell them that this just isn't so. It just makes you the slowest thing on the band.

After several weeks of studying, I passed my General and Advanced tests this evening. For whatever reason, I now feel like an outsider. For sure, I'm gratified to have the new band privileges. However, entry has a price. Until the FCC issues my new license, I tag my callsign with "/AA". Up until I muttered this in public, I thought I might carry it proudly, like some kind of freaking merit badge. Instead, I feel exactly like a freshman candidate at fraternity functions, arm band and all. Did someone do something to make me feel this way? Emphatically, NO. It is entirely me.

Acceptance comes from within. I don't feel I belong. I'm a poseur in a land of mere mortals. I stutter while everyone else sings, and it's plain as day for everyone to see. And who gives a shit? Nobody, aside from myself. Narcissism is its own special hell.

Thanks. I feel much better already.

Michael.

Read this e-mail he sent me privately....

>>>You're a big fat ZERO posing as a big fat ONE MILLION. Your opinions, mainly as an SWL, hold as much water as a glass with a hole at the base. I earned the right to express myself on ham radio matters because I worked for that right. You, on the other hand, crawled in sneakily and quietly to prevent real hams from knowing that a SHAM is on the computer. You have no right being here and I personally will make it so hot for you, you won't be! Keep that in mind! <<<<< End of message...

What does "earn the right" mean? How did he work for that right? Does that mean someone who could not learn code keep him from expressing himself? Sounds like a form of censorship to Dr. Hate.

I also noticed that when I bring up stuff like being cited by the Kingsville, Texas FCC office, he never replied to that. I think Dr. Hate has something to hide, could it be that he cares not for Nets, Anti-Semites, etc? But only to be on this NG to divert us from talking about other issues. He wants to be noticed and that is very sad.....

Is'nt that Kosher of him or what?

Whilst on the same subject a number of traffic accident fatalities have
been caused here by drivers using cell phones, including head on
crashes! Trouble is our road traffic laws are so slow to be changed that
no doubt the carnage will continue.

I have a Motorola Maxar 80 with a "reedless" PL encoder model # TRN4238A.
The PROM on the encoder is a N82S123N with a Motorola sticker ID
of 240PKL4021, which I presume is programmed to operate on 146.2 Hz.

I'm looking to program a PROM for the encoder such that it will operate at
141.3 Hz. Just curious if anyone has the binary information so that I can
accomplish this.

Thanks,

Ron

I'm Roberto IK2RND , I have realized a replacement board for EX-314 MEMORY BOARD installed in these Icom rigs :
IC-745 IC-751 IC-751/A ICR-71A/E IC-271 IC-471 IC-1271.
My board called EPROM/RAMBOARD definitely solve the problem related to the lithium battery fails. When battery fails the rig stop to work and you need to send your radio or EX-314 board to the Icom service center to replace battery and reprogram the board.
Data in the my board are stored in an EPROM chip the RAM is used only to store the 32 memory channels.
I will take 60 US $ including shipping air mail.

73, Roberto IK2RND

I question the validity of any posting that quotes an unidentified source. The anti-Clinton tone doesn't help either, as it reveals the author's bias.

My opinions/questions about the summary:

(1) Who are these "managers" and why would they care about "accomidating" HF telephone systems south of the border?

(2) It's doubtful that government "managers" would waste time, public money and effort to set up an phoney enforcement program. The scheme listed above is far too complex, risky and troublesome for anyone to bother doing. If "the government" wants to yank spectrum from the amateurs, it'll do it. Frankly, our HF bands aren't that valueable. This would all make more sense if we were referring to the amateur microwave allocations.

If the quotes and claims are genuine, then it sounds like they originated from a disgruntled employee.

Thanks for your words, Conor. I know a lot of (seemingly) good
arguements against the requirement of a cw test, but i you look closer,
you will see, that all these args are only spells...for example "i'm a
completly nonmusical", "the commercial radiostations are ceasing cw, why
shouldn't we do so" etc.
Background is, the youngsters are too lazy, and are not really
interested in hamradio. IMHO is hamradio not simply one of a lot of
hobbies, its a way of always learning. And it's a little bit of Zen,
i think, the way is the goal. (At least is that the translation of the
words we say in german, hi, hope u understand...).
But learning is not much popular today, the own activity is not much
popular today and all that is not accepted as "kewl". Cool is, what we
can get without much effort, the best way is simply to buy it.
For example: scubadiving was a sport for a few enthusiasts, known as
very dangerous and the divers are silly people, which are at
temperatures of 4ï¿½C in the water...
Today is scubadiving a part of the tourism industry, PADI (Prof.
Association of Diving Instructors) says diving is easy, like everything
is easy, so we have a mass of divers today, which needs to be guided and
are not responsible for himself.
Running gag here is "Makes diving dependent?" - "I don't know, i will
ask my diving instructor".
Diving is seen as cool today, cause you can buy it. And its similar to
paragliding, snowboarding, etc. And its one of the most important things
to wear the corresponding clothes for snowboarding, you never could
snowboarding the right (cool) way with skiing clothes for example. ;-)

And to be cool is one of the most important things under youngsters...

To learn cw seems not to be cool.... ;-)

> PS, if there are any other musicians on this group I would like to
> hear how much you relate music to CW.

I don't think so, i play bluesharp since abt 20 Years, but i can't see a relation. As a kid i learned drums in the classical music, but also the rhythm of drums is not the same or similar to cw...

The cw requirement meets several functions. One of these functions (not originally by the ITU, but from experiences since a lot of years) seems to be, that a test in a specific field, which requires a bit of effort keeps a lot of lids out of the amateur radio service...
This function makes it worth for the real interested ham, to opt pro cw test. It's not toooooo much effort, everybody can learn it, who is not willing to spend a half year of effort for a long life as a radio amateur, they shouldn't choose another hobby.

> Now I live in a nice "proper" city and we don't allow horses to be
> ridden in town. We don't want all that "pollution" on our streets. In
> Davie they call it furtilizer and they -sell- it to us by the pound.

Simply: I think i would love Davie.

We here in germany, we have to pay much tax for dogs (we have a Hovawart and doin' Schutzhund sports). But the lot of money does not prevent us from a fine, if the dog makes small brown things anywhere, for example in a big park areal with a giant size of xx hectars, the Munich Olympic parc or similar...nono, we just pay, bcause we _have_ that dog. But better would be, we wouldn't have a dog. ;-)
The next step: in germany is a very big histery(?) and discussion about (so called) fighting dogs, american pit bull terrier, bull terrier, american staffordshire terrier, dobermann dogs, rottweiler and others. They seems to be very, very dangerous, degenerated and are only waiting for a chance to kill our kiddies. ;-)
So the city administrations orders a tax for such dogs, which is about ten times the normal tax for non "fighting dogs".

Strange times today...and i would like Smallnicevillagewithlotsofhorsesandcowsanddogsontheroads... :-)

Yeah, those who use CW are usually working at the 15 to 25 WPM level
outside the novice bands. Many of the really vehement advocates of CW
haven't touched a key in years.

>After several weeks of studying, I passed my General and Advanced tests
>this evening. For whatever reason, I now feel like an outsider. For

Relax. I've been an Extra for over 20 years and I feel like an
outsider on HF too.

>Acceptance comes from within. I don't feel I belong. I'm a poseur in a
>land of mere mortals. I stutter while everyone else sings, and it's
>plain as day for everyone to see. And who gives a shit? Nobody, aside
>from myself. Narcissism is its own special hell.

You'll get better with the CW if you work at it. In fact, 13 WPM was
selected as a licensing speed because it is a cognitive barrier. At
that point you have to be receiving unconsciously while you're
writing. Once you've crossed that barrier, speeds up to 20 WPM should
come along pretty quickly.

>Thanks. I feel much better already.

Congratulations Michael. Please keep in mind that you don't have to
use CW any more if you don't want to. There's lots of cool digital
activity taking place at the bottom edges of the band which has
nothing to do with the code. Some of those folks would be glad to
meet you.

>Well, our packet explained the rules, and we believed them. (I also
>don't expect TWA to wait 15 minutes if I show up late; YMMV) As for
>the quotes around fire marshall above; are you implying it was NOT
>the Trotwood Fire Marshall but the Committee who set the
>rules on access?

>You CAN choose to show up on time.

A plane must leave on time so as not to disrupt numerous schedules. It would be highly impractical to try to wait on individuals. Yet I, and I am sure others, have had to wait on passengers from a connecting flight that arrived late. But, according to your rather pious sounding observations, those people were also in full charge of there own schedules. Should we not have had to wait on them? It would have cost the airline money to fly on time, so an adjustment was made. When my money and time are in question, I expect adjustments to made as well.

Of course the difference is no one expects the hamfest to not open without them, just that accommodations be made for those who were delayed in their arrival. You can have a little gold star for arriving on time each day, but you have no idea who, or what, dictates other's schedule.

In a earlier post I was asked, who would take on the Trotwood Fire Marshall. He is just an employee, one with a vital job, but never the less, an employee. The safest way to hold any large event is just not to have it at all. Anytime large groups of people get together, especially with machinery, electricity, and other hazards, there is the potential, even the expectation, of a certain amount of injury. Holding the event at all is a compromise. If the compromise is too one sided, as to be unworkable, then adjustments need to be made. I know what I am talking about, I have handled crowds larger then Dayton more than once in my life. And frankly they were usually composed of people for more raucous than hams.

In closing, when I buy something, like I did those three spaces at Dayton, and all the tickets, fees and expenses involved with attending, I fully expect that every reasonable effort be made to provide me with full value. I do not expect that I will have someone gleefully point to a guideline in a pamphlet, and tell me that I will be penalized needlessly. I do approximately 10-15 shows a year, and can assure you that DARA's problems are hardly unique among hamfests. The only difference is scale, and the service philosophy of the hamfest committee/staff. Most of these shows give me more for my money. At no time did a DARA member ever ask what he could do to HELP me. You have every right to your own expectations. These

are my opinions but I know many that share them. Bill

> to him about who had control of the frequency. THAT is the reason for >>
I think what we have here is Doc doesn't approve of what they discuss on 3.950 and sometimes I don't either. BUT that doesn't give me the right to weather or not they can discuss it. You know what this great USA has done for me it allows me to mach that choice. It doesn't mandate what I read or what I talk about, or even who I hang with. That is the bottom line this great nation in which I live in allows me to be wrong and allows other people to be wrong to.

What it sounds like to me here Doc is you guilty of the same behaivor as these guys. You don't like there beliefs and the don't like yours so your going to call them all kinds of names. What good is that? If they have broken a part of part 97 so be it they have to put up with the consinquesis not you. But if you get caught up in the crap the bam your right in the middle of crap stew. sorry about that. The scary part here is who has the right to dictate what any of us say on the radio. Does that mean that government can tell me weather or not I can discuss the state of affairs in this great nation over the radio as I see it? Doc thats scary! Come on now. Who has that right. I would say that under the constitution nobody does. Now comes the sticky part you can't stand on a street corner and shout nasty words. How ever a man can stanad on the corner and preach Jesus. Community standards are the main thing here so if these guys what to talk about the state of affairs so be it! NAZI crap so be it. You would what anyone to dictate what you say over the radio would you. All you want to do is pick a fight and be jugdmental of other people. I think you need to keep your side of the street clean. I don't know how many times I have heard you start crap in your round about way and then cry I didn't do anything and lean back in you chair on on your tredmill and laugh at thesae idoits. Copme on DOC lets be honest here!

I think that the content isn't the issue here and I think that you Doc are trying to make it a issue. The issue is did they interfer with on going communications on that Frequency?? That is the issue. Politics has nothing to do with it and I thing that is where Riley has made his mistake on this one.

I know for a fact that the content of what these folks discuss here isn't whats important here. Its weather or not they broke the rules. Content should never be a issue unless the conversation is foul language. Then content should be used the and only then. Also I think that a list of words that are not permented on amateur radio should be included in the rules. Why you say because of words like damn GOD damn

is bad but is that damn chain broke is that bad? Or how about the
Conawingo dam in Maryland generates 28 megawatts of juce in a hour. see
what I'm saying. Also some words in the south arn't allowed and they are
ok in the north. Content of communications can be a tricky thing to try
and dictate.
Thats just my opinion I could be wrong

Doc, Doc, Doc. Such hatred you have!

The Liberty Net use to be one of the most interesting groups on ham radio! (Until a certain miscreant from Evansville thought it was his place to censor.) There use to be extremists on "the right" as well as well as left wing commie bastards just like yourself! It truly was a nationwide town forum!

I'm afraid current events and political discussions will continue on 3950 for a long time to come. Now excuse me while I go and pop the cork on my bottle of champagne!

K J I is gone!!!!!!!!!!!!!!!!!!

4567. Any knowledge of a 2M or 440 repeater at Yosemite?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-21 00:00:00 UTC
From: morchar@pacifier.com
Message-ID: <morchar-2105990947450001@ip182.van6.pacifier.com>
Source record: 142297

I am going to be spending 10 days in Yosemite with my family soon. Dose anyone know of an open repeater for Yosemite?

Thanks...please also send a replay to my email if it is not too incovenient. 73's.

Mike Orchard
KB7SUE

(I have a repeater book, about three years old, and often find it to be out of date, or just plain incorrect, even when it was "new".)

As far as HF phone links to the US, AT&T is trying to take their phone
service off the air due to lack of business. There is about to be a
whole lot of freqs and equipment up for grabs, so the idea of taking
over ham radio freqs is beyond idiotic.

Message-ID: <19990521132457.13059.00002896@ng-fh1.aol.com>
Source record: 142305

Now that the use of 3.950 for spreading hate is coming to an end and Vic and company will be holding forth in a rat infested sewer equipped with underground dipoles, we must think of how to better use that frequency. Has anyone thought about a BROTHERHOOD NET? Just imagine how beneficial to ham radio and to America that would be. Instead of that frequency being used as a mouthpeace for THE SPOTLIGHT, we could start a newspaper called THE BEACON dedicated to illuminating our greatness through our diversity. A forum to discuss matters which builds us up instead of tears us down. A forum in which PRIDE in America is exemplified for the world to hear instead of the belittlement, degradation and intolerance preached by the soon-to-be dispossessed hobos.A frequency on which we can learn from each other, appreciate each other and even to disagree but in a polite manner rather than the crass and ugly temperament displayed by bigoted bums who have one thing in common-FAILURE. Yes indeed, a better day is coming to 3.950 and we will all be indebted to a person with authority who loves our hobby/service. AF2Y, Doc

A newcomer, eh? Wonder how many members of the Old Old Timers Club
are newcomers? I was W5DXP from the early 50s until I moved to CA
where the FCC issued me W6RCA in the 70s. I got KG7BK when I moved
from CA to AZ and got my old W6RCA call back under the vanity program.
Check your 1980s callbook for W6RCA and check your 1952 callbook for
W5DXP. I wish you were right that I am a newcomer but you are totally
and absolutely wrong. How you can open your mouth when you risk being
so wrong is beyond comprehension.

That's a lie. Read G8ASO's comment.

>If knowledge of Morse Code is needed in critical fields it
>should be maintained as a criterion.

You need to step back so as to get a global view of why the code require-
ment exists for HF privileges. RF at HF respects no boundaries, and as
communicators first and foremost, hams the world over should have at
least one mode in common. At present, there is only one mode all the
world's HF-licensed amateurs hold in common: CW. Whether one chooses to
use it or not does not matter; if the need arises he has it available to
him (maybe at a slower speed than when he was first licensed!). The phone
modes won't work as an international mode due to differences in languages,
but there are sufficient code pro-signs so that a meaningful QSO can
extend across language barriers. A digital mode could become the
international standard, but until such time that every ham worldwide is so
equipped and/or has the ability to build and self-maintain such
equipment, CW will remain the common mode. The ITU has this global view
while many individuals have only an insular nearsightedness - their own
personal goals out-weigh those of the global amateur community.

(Daily worldwide comms don't normally take place above 50 MHz, so a common
mode in that region can be chosen on a national level; for us it's of
course FM phone.)

Ok I can execpt this you and I both and all ivoled have the right to our
opinion. I also am against Censorship. Who has the right to tell me what
to like as well as what not to like. So we are in agreement here.

> Those bastard subversives are NOT
> out to discuss topical issues intelligently but IRRATIONALLY! When these slobs
> sit on a frequency for the sole purposes of trying to convince themselves and
> others that e.g. Bill Clinton is a Communist.
This I wonder about I think if you wanted peoplr to take what you say
more seriuos I think your choice of adjtives should be better though of
you don't know if these guys are Bastards they might come from fine
American homes you trullt don't expect people to truly think that all of
them are bastards? Come on now.

that Militia Movements are
> necessary to protect oneself against a "fascist" D.C. government; that America
> is subservient to the U.N.,
Well I can honestly disagree with you here. I do beleive that the USA is
subservient to the UN. I also beleive if we don't watch our step we will
no longer be free as we understand freedom. I also think that the
Militia Movements are necessary to keep the govrernment and police
forces in this contry in check. As far as Clinton being a communist, I
don't think so he is a extreem Democrat to the point of Socailizum. The
Government as we no it is becoming more and more socailizum government.
I will say you go to court for speeding now days and you have to prove
your innocents. So the indvidaul rights of this contry are shout and you
can thank the so-called war on drugs for that one. We never used to have
road blocks and thinks like that. The police never used to be able to
search your car and all the people in the vehical. All in the name of
the war on drugs. I have said this before about police to them everyone
is guilty. Keep that in mind innocent till proven guilty? I think you
need to pay attention Doc! It wouldn't suprise me that when the year
2000 strikes and people flip out Clinton will declare marshall law. Y2K
is a problem but it is not the big problem people like Monex and those
groups make it out to be. But the averge Joe blow will try to "stock up
money food and so on that government will be forced to marshall law.

Thats enough on the power hungry Clinton.

and that America is for Christians only and that
> people of color are inferior as are Jews who are not people of color and that
> all emigration must be stopped to keep America pure and so forth and so on with

Well this is bullslop America is for everyone what is the remark on that
great statue of Liberty. That is what that means. And again I have said
this in the past if you are an American then you problem have a mixture
of everything. So we are the Heinz57 of the world.

> all that foul bullslop, the right to occupy a ham radio frequency is FORFEITED.

Doc America is sick and the clowns on 14.313 3.901 3.8945 7.248 28.085
27.185 14.302 the list is endless oh lets not forget 3.950. They are all
so-called bad neighborhoods of Amateur radio. I also want to remind you
and everyone else Riley IS A COP let me repete that RILEY IS A COP! If
he comes to see you about your station or sends you a letter the cops
are watching. Let me remind yoou again to cops we are all guilty! Don't
forget that. Those guys there again your choice of words we don't if
they work at a circus, those guys are doing nothing different then the
guys on 14.313 You can take that to the bank! I think that Riley is
annoyed at all of us. And when I say Us I mean the whole of ham radio.

I don't know Doc I used to check into the Libertynet back in the early
80's and it was a OK place. Since moving to this backwards can't get
anything done state of Georgia. I really haven't been able to hear them
though all the QRMing so I don't know. I will say this that hey did let
me have my say when I was in Maryland and talked with them. I never
agreed with any of it in fact they even help me with the trampaleen
antenna cause I didn't have a amp at that time. I used to love to get
inther and disagree with old vic when ever I got my chance. So either
the redoric has changed or tolerance is less I don't know but I never
had any problems and I would diagree on a nightly basics.

You guys are just being exposed to Doctor Hate as we call him on twenty meters. He has been pulling this Hitler behind every bush BS on twenty for years. The very idea, wanting call signs here on a forum. What a paranoid nincompoop, But I am glad he is here, he can be a crazy go ape, and post stupid replys all day long. Enjoy the rantings of one loony Doctor Hate. Get that horse apple computer cooking Doc not home, Doc not home!!!!!!

Source record: 142316

The argument used by the denizens of the Liberty Net is that attempts to quash their vile language are unconstitutional violations of the freedom of speech. These same folks go on to conclude that anyone who attempts to quiet them is a Nazi or a Communist.

Not so. What separates the US and a few of the Western democracies from the barbarians is NOT unbridled freedom. It is respect for the rights, views, and concerns of others. We do not recognize an unlimited right to swing your fist. We recognize the right to swing your fist until it contacts someone else's nose -- then your rights stop.

The same holds true for speech. Yes, you have a right to speak freely, even if that speech is vulgar, obscene, and degrading to others. But, when you put that speech onto a public broadcast media, then you have agreed to limits. Those limits are in Part 97 of the FCC rules.

The "Hollingsworth and the FCC are Nazis" argument is vacuous.

For those of you who have enjoyed several years of spewing ignorance on 3950: You've been dancing for a long time and now it's time to pay the band.

Interesting and well put ideas, Mr. Daly.

On Thu, 20 May 1999 10:32:14 GMT, "Con Daly" <radioman27@hotmail.com>
wrote:

>I don't read the posts from this group much and am'nt as active as much
>I would like to be on the air. However I see a lot of debate going on
>about morse. It seems to be the most passionate issue among amateur
>and professional radio operators these days. I sailed as a merchant
>marine radio officer from 1991-1997. I found morse to be absolutely
>invaluable at that time (not terribly long ago).

<maritime examples of morse use snipped>

Look, I do similar things flying an airplane. I still have to ID VOR,
ILS and NDB beacons using morse code. But very few aircraft still get
weather using morse, not even the guys who fly across oceans.

If the communications are spotty, maybe one should spend money
improving the communications. Saying that CW gets through when RTTY
or SSB doesn't is sort of silly. Anyone who can afford a RTTY capable
radio can afford a computer to run something like PSK31.

And note that I'm not saying that morse code is useless. Like
horsemanship, it will always have a place even if it is more
recreational than anything else. HOWEVER, I am not one who that in
order to get a driver's license, that one should be able to prove
horsemanship.

>Ok, so I'm obviously an advocate of CW but you may
>be surprised to hear that I'm not in favour of keeping the requirement
>for a proficiency test, if thats what people want. I just wish that
>those against the code requirement would take a long hard look at
>what they are really campaigning against. It seems like it is really
>based on an irrational belief that it's too old fashioned, but really
>fashion shouldn't come into it.

Fashion has nothing to do with it. Technology does. Do you know what
I do when the radios fail in my airplane? We have tight protocols on
exactly what procedures one takes when communications fail,
particularly during an instrument flight plan. So in the event I lose
communications I reach for a handhold aviation radio! Radios are dirt
cheap if you compare prices over the years against any measure of the
Consumer Price Index.

I question the judgement of anyone who goes to sea these days with
comm gear so poor that they have to revert to morse code to get the

message out. I don't leave the ground in my small airplane without multiply redundant and diverse communication or navigation systems. Why would someone cross the oceans with anything less?

>Certainly the amateur service is'nt as important as a shipboard radio
>installation or a coastal station but all you anti code people
>out there, please, take a good look at what you are starting. Because
>there will be no going back and it will be dead within 20-30 years
>of a no code requirement. The commercial people made a mistake, based
>on purely financial motives. 12 WPM is not difficult to obtain if it is
>learned the right way. At least ask yourselves is it really the
>requirement you are trying to get rid of or is it the whole art form
>itself. I hope I have at least provided some food for thought and
>that it will add some new and interesting insights.

You think the Coast Guard didn't know what it was doing when they retired the morse code?

Let's consider the Continental code: It "died" and yet there are still a few folks out there who spend time learning and using it. Interest in Morse code may ebb and flow, but I seriously doubt anyone will forget it entirely. Likewise, there are things such as slide rules which few still use. Yet, some collect them and use them precisely because they are so impractical.

Ham Radio being a hobby, practicality is not the issue. It's fun. So in that light, I still think there will be many folks who will use morse code for fun. I know I will.

However, I firmly believe we need to revitalize this hobby. Look at the recent attendance figures for the Dayton Hamvention if you don't believe there is a problem. Look at the licensing statistics versus operator age. This hobby has aged and young recruits are fewer and fewer. It's not the hot technology it once was. Radio is no longer unusual in an era of portable cell phones which cost less than a pay phone to use.

So lets consider the morse code mystique. "It acts as a filter" say some. Yeah? Then what's that trash on 75 meters all about? Hasn't anyone else noticed that nearly all of the trouble makers in this hobby passed code tests?

We have to sit up and realize that we need to make the radio part of ham radio magic again. Cars are no longer magic. Yet more people than ever go to watch NASCAR races. Airplanes lost their magic too; yet the crowds at air shows are as big as they ever were. Maybe we need to look in to making some magic happen for the radio hobby as well.

This is why insisting ham radio must include morse code ability cuts so many potentially interested people out of the magic. These are capable people. I know. Look at the legions of folks with no code licenses. Their numbers are still increasing. And often these folks

are just as technically capable as you or me, if not more so.

So are we going to let the hobby die because some think morse code has a universally needed magic which the hobby simply cannot do without? I won't. If we follow that line of reasoning, the next thing you know we'll have another bunch asking that we all demonstrate proper use of the circular slide rule while taking the written exams. I've used slide rules for fun. I think they have a nice magic to them too. I think circular slide rules would also separate the kids from adults. Yet I think it would be a hideous mistake to mandate their use for entering this hobby.

And THAT is why I think the arguments for keeping morse code are so feeble.

>PS, if there are any other musicians on this group I would like to hear
>how much you relate music to CW.

I'm not an active musician, but I did spend a few years learning to play piano in my pre-teen and teen years. I'm also proficient with CW (25 WPM typical, 35 in contests). I don't relate music to morse in any conscious manner. At most I use some elements of rhythm recognition to get the feel of characters and words.

> As a ham and a scanner user you should know that.

True.

This was discussed at length on a similar newsgroup about ten years ago...
one followup poster related an incident who as a passenger on a 747, said
he performed a hammerhead stall and several touch-and-goes merely by care-
ful adjustment of the controls on his handheld transceiver.

Seriously, one very popular 2M handy-talkie has its first LO radiation
falling from 122.6 to 126.6 Mhz @ -57dbm at the antenna port. Pretty
weak signal, but I still wouldn't feel comfortable riding in the same
aircraft as this radio.

The Military Collector's Group mailing list,
a major group of internet-connected military radio collectors,
has settled on 6-meter calling frequencies for our
green VHF military radios like the BC-620, BC-659,
PRC-6, PRC-10, RT-70, RT-68 and others.

51.0 MC FM General local use, in the tradition of 3885 KC.
Re-enactment groups, field days, special events etc.

51.6 MC FM DX calling frequency for military rigs.
For the stout-hearted who want to work
across the pond with their PRC-10.

50.6 MC AM VHF mil rigs (there are a few) calling and secondary use.

With the sunspots on the rise, I will be dedicating
a scanner and antenna to guarding these frequencies in
central Texas beginning this summer.

Please relay this information as you see fit.

Back in November, we heard your best radio buddy, WB2OTK, utter some of the filthiest racist remarks many of us have ever heard on amateur radio. The recorded words consisted of such vile names as: nigger, spear chucker, jigger-boo, brillo pad, etc.

Also, on several occasions, we've heard your anti-Liberty Net friends spew bigoted, hateful words. Your good friend WA9KJI....along with K5BLB and K5MVK have used the terms: faggot, queer-bastard and nigger.

Now....you've accused Kevin Strom, WA4AIO of being a bigoted, racist Nazi. But I've NEVER heard ANY of the racist terms spewing forth from the mouth of Mr. Strom.

So what's wrong with this picture, Doc-Boy? Could it be that YOU and your cohorts are the REAL racist Nazi's????

(I'm looking forward to seeing you try and squirm out of this one, Doc!)

Make up your mind. Did that oven cost 2700 as this message states,
or 2500 as your other message states ? When there are conflicting
statements, you loose all your credibility. That is, if you ever had any
in the first place.

So we should just suck all the CB/Freebies into ham radio
to "save it", right?? How are you so sure the cure won't be
worse than the disease, if there even is one-very
questionable, to be sure. If the morass on 27 mHz is any
clue it will be far worse.

Probably true for most people ... the question is who
WANTS to??? (some do, many don't care)

> In fact, 13 WPM was selected as a licensing speed
> because it is a cognitive barrier.

Actually, Morse test speeds for the highest class of
license were increased from 10 wpm to 13 wpm, circa 1936,
at the request of the ARRL president in a letter to the
FCC. The ARRL wanted faster code tests PURELY as a
means of slowing growth in the amateur ranks, contending
that (with about 30,000 hams at the time) "the bands
are approaching saturation" ... clearly a ridiculous
claim, since we have nearly 20x that many hams today.

For the full details, researched from the original
documents in the National Archives by a professional
archivist, see the article at http://www.nocode.org
under the "Articles" button, down towards the bottom
of that page of links.

HOLLINGSWORTH's RULES

1. Riley Hollingsworth is a federal bureaucrat and
his pay check has FCC printed on it.

2. Riley Hollingsworth is a lawyer, and lawyers
are always loyal to each other.

- - - - - - - - - - - - -- - - - - - - - -- - - -

Hollingsworth's loyalty is to the people who put money
in his bank account. He will NEVER offend them and will
do whatever they tell him to do. If in doubt, see rule #1.

Providing he will not break rule#1, Riley Hollingsworth
will ALWAYS be loyal to other lawyers. If in doubt, see
rule#2.

All other discussion is purely academic. If in
doubt, see rule #1 and rule #2.

You people wanted enforcement. You've got it!
And Hollingsworth has gotten out of shuffling papers until
he retires.

What a fucking joke!

<<This moron lists all of the countries which expelled Jews. Is it coincidental that their empires and influence crumbled? Has the United States ever expelled her Jews? No, which explains why we are the greatest and most progressive and democratic nation in the history of the world. Why? Because God blesses those who bless His Chosen and curses those who curse them. And why is it that between all the expulsions,persecutions and mass murders, the Jews have survived and enriched the world with their influence? Because they are God's chosen people. And so people like Carol Valentine and her followers can rant and rave and accuse 'til the cows come home-you will only be able to defy God, never defeat Him. You will always be able to persecute Jews but never be able to eliminate them. As long as man seeks remedy for pain,brilliance in science,creativity in the arts and the inspiration for hope among the hopeless, you'll find the Jew. Long after abominations like Valentine and company are wormfood, the Jew will be in tact and always prepared to enrich this world with great things to come. We are quite a remarkable people if you stop to think of it-if you use your head instead of biased hearts-if you understand some history and philosophy. I really feel sorry for anyone who keeps a chart of the expulsion of Jews. All you're proving is how ignorant and biased historical illiterates can be. Doc,AF2Y and a P.S. Chetley you are all bigfoot and no brain.>>>>>>>>>

Since you've already got a schedule set up for him to listen, I recommend
you find a friendly sailor with a marine SSB rig and contact him directly.
If you don't know anyone, contact your nearest and largest yachting center
and start asking around. Marine chandleries are good contact places as
well.

good luck to you.

4620. OUT OF CONTROL

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-22 00:00:00 UTC
From: ww7@webtv.net
Message-ID: <27075-3746CDAE-30@newsd-133.iap.bryant.webtv.net>
Source record: 142050

Please excuse me but I get these arrl emails all the time and every one now consists of virtually a 100% worship of fcc enforcer hollingworth.The messages get more bazaar all the time. I am in total agreement that in amateur radio with the lack of fcc enforcement over recent years a few 'bad apples' have sprouted up and something should be done.With 1,000,000 amateur radio operators surely there are going to be some nut? cases? Intentional interference..lewd language that is lewd,etc.etc. FINE-CLEAN UP SOME OF THE GARBAGE. What I seem to be hearing now are PERSONAL OPINIONS OF WHAT AMATEUR RADIO SHOULD BE LIKE AND IF YOU DON'T FIT SURRENDER YOUR LICENSE. Now we even have the social security number collecting. But what bothers me is the personal non-democratic opinion of how an amateur is suppossed to be and if your not that way..we're going to boot you out !!!! I can smell alot of people being portrayed as crooks when they are not even in violation of fcc rules. ----- I just got the email about CLUBS. Theres no law saying a person can't have 3000 clubs but my last email says if anybody has more than one they are a crook. WITHOUT KNOWING THE FACTS PEOPLE ARE BEING CALLED CROOKS !!!! Theres some guy that recently has up to 30 clubs and he'd advertised as a fraud prior to his trial. IT ALSO GOES ON TO SAY IF ANYBODY HAS MORE THAN ONE WE-I....THE FCC...IS COMING TO GET YOU. There was a period of time somebody could get any amount of clubs they wanted.They still can except I think theres suppossed to be so many members now vs. 2 to get the club license.Also some minor things like 'papers of organization'. There were a few people that seemed to be abusing the system but was it legal OR in my opinion who really cares ? TOP PRIORITY ? On the internet if somebody has 100 different websites who cares ? Several years ago I got 3 clubs. 3 with totally different themes. I am going to be away for the summer but I should stay here and watch my mail for a notice telling me I might be a crook ??(with so many days to answer)---but whats next ??? I don't even want to be in amateur radio that is a police-state enviorement. Its a hobby to enjoy. YES---CLEAN UP THE FEW BAD APPLES AND CHARACHTERS THAT ARE CAUSING THE COMMUNITY PROBLEMS. I can remember when the arrl begged for a fcc limit on clubs but never got it. I can recall the arrl begging for many things and never got them from fcc. Now it seems the arrl has anything they want if law or no law. I hear amplifiers that can exceed 1.5kw are to be banned now. My AL-82 can go over 1.5 but not with 100 watts driving it. Its becoming banned radio equipment along with everything that can recieve 800mhz?? I wonder what they would say in 1920 if told listening to under 20mhz was illegal ? Excuse the long post but I am beginning to get concerned about this 'running for political office' 'high profile' enforcement..... I am just trying to express a democratic opinion. Am I too radical ? The opinion of what an amateur radio operator is suppossed to be is in 1999 made by amateurs who the average age is

60+.This has nothing to do with the great cw debate.Think theres problems now? Wait to amateur radio is cb-style...it might be sad but is cb style illegal ? I would have had great concerns 30 years ago if the fcc was behaving this way vs. SILENT enforcement of regulations.

How so? Do YOU know the facts? Seems we only hear rumors on this NG.

> > agree about the Clinton bit: for him
> the 70's was staying out of the military.

Yes. many opposed Vietnam. They have been proven correct. No dominos. Not Red or Dead. Ask Bobby MacNamara. Read. Try and learn beyond your brainwashing.

> I guess he's getting even.

Guess you are a Republican that can't face its party sucks worse than the Democrats.

Didn't Bill brag on his WWW page about the ability to receive MDT?
Didn't he send (5 times) software to decode MDT with the data slicers he sold to the Feds?
Why hasn't Opto been attacked by the Feds? Must have paid off Clinton, right?

can you answer real questions?

I seldom ever get here to read or post. I don't believe the people should spew forth unendless racist hatred type mumblings. My bigger concern has always been democracy telling somebody how they can think. Its illegal not to like something or somebody ? Thats democracy ? Personally I ignore the nonsense and people should be jailed for their opinions ?? Many of these groups that get all these racist-hate laws passed and enforced are the biggest racist-hatred groups around !!!!!! Now I'm not going to go the ignorant racist direction but for example DO YOU THINK THE ADL CARES ABOUT YOU ? WHAT DO THEY THINK ABOUT YOU ? I have no problems with any group promoting their ethnic? pride but any group promoting it where THEY are the 'chosen' 'best' 'superior' 'god-chosen' and all that stuff.?? I get along with 'black people' fine... did anybody ever guess that there are some black people that really don't care what happens to a white person? Maybe it would be nice if every race/creed/color/? always got along but is it ever reality? Laws to control how people can think ? In amateur radio theres people that don't like qrp'ers. Theres people that don't like contesters. ILLEGAL to say so ?

4626. Re: Hams Sold Out by FCC, Clintonettes?

Ed:
Your post is reasoned and reasonable, but I disagree on points.
I tend to get a little "passionate" about these issues,
which is both good and bad.
It's a sad soul who doesn't feel passionately about something.

I don't doubt Mr. Hollingsworth's good intentions.
I believe him to be an honorable man. But there are
principles by which we are supposed to live and
he's stepped -or been pushed- over them twice, to my knowledge.

I don't care for WB2OTK's attitudes one bit.
But demanding that he respond to informal OO notices
as though they were official FCC enforcement documents,
and demanding it again with the threat of punitive action
if he does not comply are way out of line.

I neither agree with nor support the views of *most* people
on the Liberty Net. But their rights to hold and voice
those views in a peaceful manner are protected in the
Bill of Rights. The FCC has been "spanked" by the courts
on this issue several times. The idea that your
civil rights can be negated by the simple proclaimation of
a functionary of a licensing federal agency was settled long ago.
His flat statement that our first amendment civil right to freedom
of expression somehow does not extend to amateur radio is outrageous.

One-way broadcasting, "ghost talking" and jamming
on the Liberty Net are obviously not protected speech.
But those charges are irrelevant to my point.
Most thinking people who are not knee-jerk or vested apologists for
Mr. Hollingsworth agree that he is attempting enforcement
action based -in part- on the political content of Liberty Net speech.
That may be "politically correct," but it's also way out of line.

Mr. Hollingsworth is an honorable, intelligent man trained in the law.
He must be aware of these points.
These FCC postions can't possibly be sustained
past the first serious court challenge,
unless the courts really *are* as corrupt as some believe.
Therefore, it is logical to assume that he is receiving
irresistable pressure from above to espouse these positions.

That being the case, it is in our interest to examine
the motives and intentions of those applying that pressure.

I am basically in the same situation you are, except I am just THINKING about upgrading my license. I know that my brother and his friend have downloaded some morse code teaching programs off the internet that are simple to use and seem to be pretty helpful. If I can find the addresses to them, I will send them to you. They let you go at your own pace and once you've learned a few, they let you decide what you need to work on and things like that, whereas, I can't see just a tape doing that. But who knows. If I can find the addresses to the one we use, I will send it to you. Good Luck

If you're going to be pedantic at least check your facts first.
Monochrome - (of, using or being) reproduction or execution in 1 colour,
black and white, or shades of grey.
And technically speaking, black and white, being the absorbtion or reflection
of the whole spectrum, are not colours.

So you're opposed to having a single skill test. Fine. Let's incorporate
skill tests on say, the three most popular modes. Those wishing to
receive an HF license would pass a skill exam on each of SSB, code, and
packet. (Note that code is the second-most popular HF mode, Cecil.)

It seems to me that the above should be entitled "Paula Farnswell's Rules" (if there is a Paul Farnswell). You wrote them; Hollingsworth did not. I'll bet his "paycheck" is an electronic direct deposit. If it came from Uncle Sam, it would say "United States Treasury" and nothing about the FCC.

You mean you aren't loyal to your employer? Do you offend your employer and do you do what your employer tells you to do?

You wrote rule #1.

> Providing he will not break rule#1, Riley Hollingsworth
> will ALWAYS be loyal to other lawyers. If in doubt, see
> rule#2.

Is that we have lawyers battling each other in court?

You wrote rule #2.

> All other discussion is purely academic. If in
> doubt, see rule #1 and rule #2.

You wrote rules #1 and #2.

> You people wanted enforcement. You've got it!
> And Hollingsworth has gotten out of shuffling papers until
> he retires.

Yes, we wanted enforcement. How does stepped up enforcement translate into getting out of shuffling papers? It would seem that an increase in enforcement increases the paperwork flow.

> What a fucking joke!

I don't know how old you are but you type like a 19-year-old fresh from boot camp.

Hello All,

Just a reminder.
The Atlanta HamFest and Computer Show is coming soon.
visit http://www.saf.com/arc/atlfest.htm for more details
This will be the 71st Hamfest for the Atlanta Radio Club,they have
been doing this since about 1928,one of the oldest hamfest in the
Southeast

June 5th and 6th 9:00am-5:00pm Sat and 9:00am-3:00pm Sun.
The location is at the 116 Acre Jim Miller Park, Marietta, GA.
This is on Callaway Rd. This is very near the junction
of I-75 and the I-285 loop around Atlanta.This junction is on the
west side of the I-285 loop .Just north of this junction on I-75 is
exit 110.Take exit 110(Wendy Hill Rd.) and go West.Travel a few miles
to Austell Rd. and turn left on it.Go a short distance to Callaway and
turn right on it.A short distance on Callaway Rd will take you to the
Jim Miller Park on your right.Hope to see you and your friends there.
Tickets are just 5$
The event is being put on by volunteers from the following clubs,and
other sources also.
The Atlanta Radio Club
Gwinnett Amateur Radio Society
Kennehoochee Amateur Radio Club
North Fulton Amateur Radio League

We will offer all of the following:
Large Tail gate area
Lots of free parking
20,000 square feet Indoor Market
37,000 square feet Outside Covered Show Ring for Flea Market
RV Camping full hookup for 44 lucky Hams
Cash Vouchers and other prizes

This is also the ARRL's Georgia State Convention!!
Talk-in will be on 146.82Mhz - offset. Tis repeater is located on the
NationsBank building in downtown Atlanta and has a great coverage of
the Metro Atlanta area.

For additional information contact one of the co-chairmen:
Ben Dasher, KE4YZX, 404-869-6959, bendasher@mindspring.com
Charles Golsen, N4TZM, 404-252-3303, cgolsen@atlanta.com

Be seeing you there,
Dean, KR4IU

<< Subject: RACIST
From: ww7@webtv.net
Date: Sat, May 22, 1999 11:51 AM
Message-id: <27077-3746D28C-24@newsd-133.iap.bryant.webtv.net>

I seldom ever get here to read or post. I don't believe the people should spew forth unendless racist hatred type mumblings. My bigger concern has always been democracy telling somebody how they can think. Its illegal not to like something or somebody ? Thats democracy ? Personally I ignore the nonsense and people should be jailed for their opinions ?? Many of these groups that get all these racist-hate laws passed and enforced are the biggest racist-hatred groups around !!!!!! Now I'm not going to go the ignorant racist direction but for example DO YOU THINK THE ADL CARES ABOUT YOU ? WHAT DO THEY THINK ABOUT YOU ? I <<<The ADL was founded to combat anti-Semitism. The only people to object to it are Jew haters. Doc,AF2Y>>>>>>
have no problems with any group promoting their ethnic? pride but any group promoting it where THEY are the 'chosen' 'best' 'superior' <<<Now the problem with the goyim is that they don't believe what's written in the Old Testament because too many are brainwashed into thinking that there is none. Your priests and ministers are not levelling with you, Genitals. Now all you gotta do is to look in the Old Testament under DEUTERONOMY. Then turn to Chapter 7:6. Then open up your two eyes and read this:"For thou art an holy people unto the Lord thy God;the Lord thy God hath chosen thee to be a special people unto himself,ABOVE ALL PEOPLE THAT ARE ON UPON THE FACE OF THE EARTH." The God of the Jews, the CREATOR OF THE UNIVERSE, not Jesus Christ, was addressing Israel. He was laying down laws that must be followed FOREVER. These laws which you'll read about, coupled to the Ten Commandments, are the CORNERSTONE OF WESTERN CIVILIZATION. They do not set apart Gentile and Jew-they should NOT set apart Gentile and Jew. They should bring us together but all too often, Christians who have been brainwashed by phony men of the cloth who must bolster their faith by denegrating Judaism,are taught to resent and hate the House of David which brought them Jesus. And of course this type of stupidity and bigotry is heard on amateur radio courtesy of Herbert Lucifer Schoenbohm and his band of demented Junior G-Mean in tandem with the 3.950 beasts whom Riley Hollingsworth suggests to find a new habitat, OFF HAM RADIO! Listen up,ww7@webtv.net.... if you want to learn about HATE, quite possibly visit your church and you'll hear fairy tales about Jews yelling to Pilate to crucify one of their own while Jewish law forbade any other type of execution than by stoning. You will hear how a small band of ragtag Hebrews. completely dominated by Rome,suddenly had enough authority to demand anything from Pontius Pilate. But the truth is that these ragtag people were chosen by God Almighty to bring to this world, and to constantly re-inforce the idea of MONOTHEISM-One God ,which has been adopted by our Christian and Moslem brothers. Had Jehovah not

spoken to Abram, who later became Abraham which was a venerated name given by God, and a covenant had never been forged between Abraham and God, we today would be no better than the jerky pre-Christian Greeks who had a God for every occasion. In summation, all the ADL wanted to do, at the outset, was to prevent the persecution of Jewish Americans and then included other factors in American society as well. And for all who are still hateful of Jews, my suggestion is to geh kockin afinyam which is Yiddish for "have a good day." Doc,AF2Y>>>>>>>> 'god-chosen' and all that stuff.?? I get along with 'black people' fine... did anybody ever guess that there are some black people that really don't care what happens to a white person? Maybe it would be nice if every race/creed/color/? always got along but is it ever reality? Laws to control how people can think ? In amateur radio theres people that don't like qrp'ers. Theres people that don't like contesters. >>

Don't tell me you actually believed that KF4DDM was going to keep his promise??! Drew Durigan is a lying sack of shit--always has been, always will be. He's been pulling his stunts in the newsgroups for years now under various AOL screen names. Why do you think all of Drew's posts after 2/16/99 have disappeared from Dejanews? Been learning a few tricks of the trade from your little buddy in Phoenix, Mr. Durigan? Guess there isn't much else for Drew to do with his free time after a "hard day" of deejaying but spam this NG with his moronic drivel. Hey Drew, why don't you get a real job (that is, if there's a radio station in the US which you haven't been fired from) and go back to rec.radio.cb where you belong? I hear your buddy Enrico Oyen has been posting there lately!

"Where's all the RADIO CRYBABIES?"
"I wanna hear 'em TALK TOUGH!"

Today there is much less pressure upon our spectrum from outside services
than anytime in the last 50 years. 40,000 HF-licensed active hams would
be plenty to insure the safety of our below-30MHz frequencies. Leave
protecting V/UHF to the no-code Techs; that was the reason for creating
the license class in the first place.

Ah, but if one were to record amateur radio transmissions and then rebroadcast those transmissions on an amateur band without permission, then one would indeed be guilty of violating part 95 because they would be transmitting false signals.
By the way, "Frog Man," what's up with all the images of fat guys (Rich, Drew, etc.) on the 3950 Jammers Page? Been feeling a bit pudgy lately?

It's all true.

He was arrested, much equipment was confiscated, & he was imprisoned
until he
made bail. He now faces federal charges & possible state charges.
Things look fairly
for him as he has a previous ciminal record (by his own admission) and
he wife may
always volunteer to turn to give evidence & act as a witness against him
to save herself (she
has also been implicated becasue the business was in both names).

My good friend, David Castle--WA9KJI, has got various pieces of HF gear for sale. Several different transceivers and amps. Call him for more details.

He says he'll also consider trading his HF gear for good, quality VHF/UHF gear.

Give him a call at: 1-812-424-5986

When the subject is "access to the HF allocations within
ham radio" it would surely be proper to 'mention' HF.
Unless, of course, it works against one's "Agenda". Then one
does it the Cecilian way, and takes whatever position works
the best.

If you'll indulge an off topic, I've got an even better one.

While I was a college kid, working in a gas station,
I'm watching this guy smoking a fag while
filling his car with petrol. I yell to him
from the booth 'Hey put your cigarette out'.

He does an interesting gesture that involves
flipping the cig into the air with his middle
finger, and allows his bird finger to remain
displayed. The cig (lit) flies up a few feet,
then back down and lands where? IN THE GAS TANK.
Right through the open gas cap door.

Explosion, fire, badly injured guy that flipped
me off, etc. Didn't hurt me but burned up my
motorcycle parked nearby. I got a new Honda.
He got...tons of problems.

What else do you believe in that paranoid little mind of yours Paula ? That the ARRL is now part of the UN and FCC monitoring stations are staffed by foreign troops in khaki uniforms with blue UN flags on their shoulders ?

Tell you what, just keep buying that numismatic gold and red wheat in paint cans from militia-Pete's supply of Montana and you'll be just fine. Just don't scratch those "gold" coins too much or the slag copper underneath will show. xoxo

listen up you anal retard
given wretch by your five-
nosed mama.

One nose each to smell
your ass each day to
make sure you are not
hers.

Anytime Bill Cheek find himself
in need of funds for his
defense all he has to do is come
to us in this and other NG's and
i'm first in line to send him what
I have at that time.

I am sure there will be many
hundreds or more...who will be
on that list to help Bill for
his needs. All he has to do is
ask....that's how fast I'll send
my donation for his defense.

Now you mind-less cripple....

How many of us will send you
funds if you get arrested one
day, hopefully soon?

Answer that you smelly sack
of vomit burgers.

bill will be given help because
he needs our help.

i am sure all of us will send
you a bill for all the shit you
have chunneled out on this NG and
then allow you your due.

the sound of a shit-pie rotting.

bill conduit
etc.

Rich, have you lost a screw or two?
Your posts are sounding more and more shrill.
Still never three+ coherent sentences, though.

Perhaps you need to have your medication adjusted?

Regards,
Dave S.

I have an MT-2000 A4 450-520 that I am trying to program with the full 48 channels and 3 zones..... Right now I have the ABC button programmed each to one zone... I would prefer to program one of the side buttons to cycle through the zones. Is that possible? Is there anyway to program something other than the 16 selector nob and the ABC switch to the Zones?
Thank you for your help.
Marc Schauber

QUOTE
Also one of his buddies claimed to have received the Medal Of
Honor. This bird was WB9BCC.
END QUOTE

According to QRZ.com, WB9BCC is Duane L. Jacobson.

--There is no Jacobson recipient of the Medal of Honor from Vietnam
-- There is no Jacobson recipient of the Medal of Honor from the Korean War
-- A MOH was awarded in WW II to Douglas Thomas Jacobson, PFC, US Marine Corp, for action on Iwo Jima.

For those who are interested, the US Army Center of Military History has a listing of all MOH recipients and the citations for their awards at this URL:

http://www2.army.mil/cmh-pg/moh1.htm

Right now. Right here. You don't know anyone in aviation. I flew my last IFR cross country Thursday. Damn if the Centex VOR didn't go _. _. ._ _ _._ "CWK". Then the Waco VOR went ._ _._. _ "ACT". Then the Waco ILS went .. ._ _._. "IACT". The Navaids that don't do it (CW ID) are LORAN and GPS. Pack up any sectional aeronautical chart or approach plate and the
CW is printed next to the Navaid identifier. That's the last for your troll, wankstain.
H.

The RSS software for the A7 version radio will allow the side buttons
to be programmed for Zone select. Rather or not it will work in your
radio is another question. Just because the RSS software allows for
it, the radio may not let you do it.

The new version 6 RSS MTSX software has "MPL" and the radio will take
it and you get the sharp tone when you try to activate the feature but
the radio doesn't do anything.

You can only try and see if it works.

There are lots of web sites with net listings. For starters, check out
http://www.ac6v.com
Also, go to a search engine such as infoseek
http://www.infoseek.com and type in "amateur radio nets" (include the
quotation marks). That should keep you going for quite a while.

You missed the point, Jeff. Morse code skill is considered approximately
as important as everything else in ham radio combined. You can miss all
the questions on the most popular mode and pass the written. You cannot
miss all the questions on the third most popular mode and pass the code
test. Skipping all the written questions means skipping all the questions
on ALL the modes. Skipping all the code questions means skipping all the
questions on ONE mode. You call that fair?

Clean your antenna, Roger. 160, 80, and 40 are jammed with operators
in the evening.

> But hey, we still got us that neat Morse Code requirement. I guess
> that is more important to some people than having a thriving hobby.

Back in 1932 there were only 40 kilohams in the US. The hobby did quite
well with those few numbers.

Subject: An Open Letter, Apology, and Final Message from CB Rambo
Date: 1999/03/16
Author: CBRambo <cbrambo@aol.com>

Over the past few days, I have spent a great deal of time in reflection of my past behavior on the radio newsgroups. My conclusion is that I have wasted a great deal of time and effort engaging in pointless arguments and petty bickering with other participants here. This is time and effort that would have been much better spent on other, more meaningful pursuits. I have also come to the realization that I have offended some of you with my comments, as some have inadvertently taken my remarks in a personal manner. This was never my intention...and for this, I am truly sorry.

Contrary to popular belief, I am not a "bad guy". If you were to know me in person, you would probably say that I am kind-hearted, free-spirited, fun to be around, and generally easy to get along with. But, like all of us, I also have my character flaws and shortcomings. Specifically, I tend to be particularily stubborn at times (especially when provoked) and I am also prone to "carrying things too far" upon occasion. I like to play games, tease, and joke around...and sometimes, I don't know when to stop. This has always been a weakness of mine, and I am now working very dilligently to control it.

As I read some of my past newsgroup postings, I must admit that I am rather embarrassed and upset with myself for engaging in some of this nonsense. I have made off-topic comments here which have had the effect of causing chaos and disrupting the flow of information for which this forum was designed. I am certainly not the only one who has done this, but that doesn't justify my behavior. Lack of maturity, insecurity, poor judgement, the "thrill" of being safe behind a keyboard, and an occasional feeling of boredom in my life right now...all of these were contributing factors. Again, that does not justify my behavior, but I can see now how these feelings and character flaws caused me to behave as I did.

I also tend to get a little "touchy" when someone accuses me or implies that I engage in illegal radio operations. This is simply not true. Never has been, never will be. I am a law-abiding citizen who does not have even as much as a traffic ticket on his police record. I don't mention this as an attempt to justify my behavior, but only so that you might understand why I occasionally acted the way that I did.

In an effort to restore order and tranquility to this newsgroup, I will immediately and forever cease from posting here. I will be available via e-mail for the next 24 hours, and would appreciate hearing from those of you who have thoughts on this matter and do not wish to post them publicly on the newsgroup. When the 24 hours has expired, I will permanently delete the "CB Rambo" screenname from my America Online account and I will not appear online again. I'm sure many of you are skeptical here...and rightfully so...but time will indeed prove my sincerity. Again, I apologize to those whom I offended here and for being a nuisance on this newsgroup.

Thank you for your time. Radio is a wonderful thing. May it have a long and prosperous life. Goodnight and God bless you.

Thanx for your responses.....I travel all over the US for some of my Teaching at PD Academys and my Search & Rescue work.... I just recently acquired my FT-50, love the radio, usually I am given a radio from the department where I am visting or teaching a. It would be interesting to have some of the freqs ready to go on my laptop upon arrival, I am goingto try and build a nationwide database for use by my other team members as they acquire their FT50s, seems they all liked mine and are dumping their assorted brands in favor of the Yaesu.
Any responses can be e-mailed to 'Yourgrdian@aol.com'
Thanx again- Mike

So they're restricted to 50 MHz and above. Is that a loss?

Your thoughts and sentiments are well taken. For once, though, I believe a goverment agency has made the right decision, and applied the correct balance. On the one hand, the old salts must not have their privileges diminished. On the other, strong incentive must be given to extend the art.

Everyone's desire is to work world-wide, to effortlessly cross physical boundaries. HF operations already allows us that. At one time, these same HF bands -- 200 meters and up -- were thought to be useless for long haul communications. We now know just how wrong they were.

The new horizon is to push the limits on V-, U-, and EHF communications. Historically, where there was a will, there was always a way. (Otherwise, history just branded them fools.) I think it's grand that no-code techs don't have access to the easy HF bands. It is on their will that us old, tired, farts are riding. We leave it up to them to point the way to tomorrow. Myself, I copped for the easy way out, and took the code test.

The flaw in my logic is that those capable of leading new technology also have no trouble passing a code test. All that are left among the no-coders are the whiners, those just starting, and those happy to bounce around on local 'peaters. If the hobby truly is dying, it's because no one is left to push the horizon.

I find it ironic that the only real solution is to cut off the dead wood: close the HF bands to all amateur traffic. There will be a period of upheaval, and then hopefully, usable solutions found within the decade.

Let's be careful what we wish for. I'm for maintaining the status quo. Just because I'm old, tired, and lazy.

Michael.

You need to answer 7 of the 10 questions. 70% of 13 is less than ten.
Forget that they stipulate 13 wpm. They're testing for 10 wpm.

Besides, what's wrong with a no-code ticket? I yams what I yam!!

Michael.

1. The Babylonian Talmud, Judaism's holy book which takes precedence
over the Old Testament, cannot be antisemitic.
2. Facts cannot be antisemitic.
3. You have not addressed any of the facts cited by the previous poster.
Insults are not facts.

>keep in mind that western
civilization was
> built on JUDAISM.

Sorry bud, you got it exactly backwards: western civilization seems to
have been built *despite* Judaism. Over the centuries, Jews have been
expelled from the following European-controlled countries and
localities:

Date/Location Date/Location

250: Carthage 1559: Austria
415: Alexandria 1561: Prague
554: Diocese of Clement (France) 1567: Wurzburg
561: Diocese of Uzzes (France) 1569: Papal States
612: Visigoth Spain 1571: Brandenburg
642: Visigoth Empire 1582: Netherlands
855: Italy 1593: Brandenburg, Austria
876: Sens 1597: Cremona, Pavia & Lodi
1012: Mayence 1614: Frankfort
1181: France 1615: Worms
1290: England 1619: Kiev
1306: France 1649: Ukraine
1348: Switzerland 1654: Little Russia
1349: Heilbronn (Germany) 1656: Lithuania
1349: Hungary 1669: Oran (North Africa)
1388: Strasbourg 1670: Vienna

1394: Germany 1712: Sandomir
1394: France 1727: Russia
1422: Austria 1738: Wurtemburg
1424: Fribourg & Zurich 1740: Little Russia
1426: Cologne 1744: Bohemia
1432: Savory 1744: Livonia
1438: Mainz 1745: Moravia
1439: Augsburg 1753: Kovad (Lithuania)
1446: Bavaria 1761: Bordeaux
1453: Franconis 1772: Deported west of Dnieper
1453: Breslau 1775: Warsaw
1454: Wurzburg 1789: Alace
1485: Vincenza (Italy) 1804: Villages in Russia
1492: Spain 1808: Villages & Countrysides
1495: Lithuania (Russia)
1815: Lubeck & Bremen
1497: Portugal 1815: Franconia, Swabia &
Bavaria
1499: Germany 1820: Bremen
1514: Strasbourg 1843: Russian Border Austria &
Prussia
1519: Regensburg 1862: Area in the U.S. under
Grant's Jurisdiction
1540: Naples 1866: Galatz, Romania
1542: Bohemia 1919: Bavaria (foreign born
Jews)
1550: Genoa 1938-45: Nazi Controlled Areas
1551: Bavaria 1948: Arab Countries
1555: Pesaro

Could the expulsions have been because the Jews were busy little beavers, building western civilization? I don't think so.

>Now if there are Jew hating so called Christians out there,

Fact is, it is a well-known Christian virtue to love thy neighbor. But it is a Jewish virtue to hate Christians. Hate 'em with a passion. Their religion commands it. The Talmud teaches that "Only ye are designated as 'men' " (Baba Mezia 108b). The "ye" is Talmudists. The non-Talmudists (i.e., Gentiles, Christians) are not men, they are on the level of mere beasts, or cattle. They may be lied to, cheated, and exploited without blame.

Dr. Israel Shahak of Hebrew University reports that the Israelis burned hundreds of New Testament Bibles in occupied Palestine on March 23, 1980 (cf. Jewish History, Jewish Religion, p. 21). This was done under the auspices of Yad Le'akhim, a Jewish religious organization subsidized by the Israeli Ministry of Religions.

> I know it hurts but our way of life here in the west would be chaos if not for a

> certain man who apparently had an "in" with Jehovah. That man was
Moses who
> received the Ten Commandments, the CORNERSTONE OF WESTERN
CIVILIZATION!

Funny you should mention that. One of the prominent features of the Babylonian Talmud, the heart's blood of the Jewish faith, is that it reverses every one of the Ten Commandments, the teachings of Moses and the Prophets, and enshrines their opposites under a "whited sepulchre" which is a disguise for murder and "all uncleanliness", as Christ charged.

> Furthermore Jesus Christ, much to the dismay of the Valentine crowd,
came from
> the House of David and if you don't know what that means, ask your
priest or
> minister.

Jesus Christ is the ultimate object of hatred in Talmudic Judaism. Of all Gentiles, Christians are the most insanely hated, loathed and reviled because their doctrines are the opposite of every Talmudic doctrine. You don't seem to know that. Time you learned.

>These neo-Nazi creeps, female and male,

Just like a Talmudist: one can see that in your own heart, the worm of hatred gnaws.

>try to make you
believe that
> there is no linkage between Yeshua(Jesus) and Judaism.

Citation, please? I see no such claim being made by the previous poster.

There is a great deal of linkage between Jesus and Judaism, all of it negative. The Talmud teaches that Jesus "committed bestiality", "corrupted the people", "is turned into hell" (Sanhedrin 105a). As stated in the sadistic fantasies of the Talmud, Jesus gets to experience four methods of execution: he is stoned, then "hanged" or crucified (Sanhedrin 43a-43b, 67a) as a blasphemer of Pharisee Judaism; he is burned (Sanhedrin 52a): "the death penalty of burning was executed by pouring molten lead through the condemned man's mouth into his body, burning his internal organs"; he is strangled (Sanhedrin 52a and Sanhedrin 106b); in hell, his punishment is "boiling in hot semen" (Gittin 57a).

Much more can be cited to illustrate the "link" you proclaim, but I think the above will suffice. Is this the kind of "link" to Judaism you had in mind?

>They don't want
you to
> know that he was circumsized,

No kidding. So are all Moslems. And what, exactly, is so great about this practice of mutilating an infant's sexual organ?

>a Bar Mitzvah etc.

Actually I don't think so. The Bar Mitzvah is a recent invention and was at one time considered by Jews to be a great heresy. Dr. Israel Shahak, in his book previously cited, reports the case of a liberal rabbi in the Galician city of Lemberg (now Lviv) who was poisoned by Talmudists in the 19th century, for the offense of advocating and actually performing the Bar Mitzvah ceremony, which had recently been invented.

>You are expected to
>be caught
> up in lies and slander

Please cite the "lies and slander" that you have in mind.

>about those folks who gave you Jesus Christ.

They didn't "give" anyone Jesus Christ, for He was not theirs to give. They cast him out, disowned him, and piled calumnies on His head. "Those folks", to whom you tenderly refer, actually devote a considerable portion of their holy book to Christ's defamation: see above.

>Jews
> comprise one-tenth of one percent of the world's population,yet their

The tapes are a good way to start, follow what you are told to do on them. When you begin to get a little frustrated STOP. Take a break for an hour or 2 and come back and continue. Practice at least 15 minutes a day, more if you are able. I learned the code from tapes too and got to 7wpm in about 4 months, you may do it faster. I'm at 13wpm now. Most of all, have fun with it.

Congrats on your new license!

73,
Tom

4740. Need some GE DeltaS LowBand assistance

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-22 00:00:00 UTC
From: dj1@bresnanlink.net
Message-ID: <37469c67.42489205@news.supernews.com>
Source record: 142174

I am playing with a DeltaS on 6 meters. Radio worked great when just the Eprom was programmed up with 32 channels and using the standard no scan/ 16 channel head with a/b switch. I then found some 990 heads and set one up with the same channels. I programmed it as a Delta S 990. When I operated the radio all seemed to go well, it scanned properly but I found that it would not encode/decode pl.

I then programmed up the radio head as Delta S radio wide.
This time the keys on the 990 head beeped, PL was there on TX and RX and the GE encoding stuff came to life (I don't need it I just had tried to enable it in the earlier programming and it would work.) So I am trying to figure out what is the difference from normal to radio wide programming. When I remove and program the eeproms I can't differante between Delta S and Delta S wide. The only difference comes with the 990 head.

I am also trying to find some service manuals for the Delta S and the 990 head.

Any assistance you can provide will be appreciated. It has been a fun radio to have on 6. It's quiet around here, but it was fun to have on the way to Dayton.

4750. 3.950 on 14.300

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-23 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990523114408.20834.00004447@ng-cf1.aol.com>
Source record: 141879

At 1300 UTC today,5/23/99,on 14.300, I heard 3.950. Was it a bird? Was it a plane?NO, it was SUPERFELON,KV4FZ once again spouting off and degrading MY GOVERNMENT and MY PRESIDENT! Now get this.,.hard to believe but I heard him say it. I'll paraphrase it like so: The shootings at Columbine and in Georgia and in other high schools had nothing to do with guns and their accessibility--it all centered on Bill Clinton himself and his wife's "Village concept." And you wonder why Riley is mad as all hell at how ham radio is being misused and abused? Herbie, do us all a favor and join K4GFM, your snivelling lackey who is now playing gin rummy with Mike Galego,KA4MUJ, in hell. The problem with our youth going nuts is PARTIALLY attributable to weapons accessibility while having NOTHING TO DO with the Clintons. The main cause is due to do VIOLENCE CONDITIONING. There's too much on TV, too much in the movies and too much in video arcades and on computer software. Our kids are being taught that it's chic to murder. Gun control would remain controlled if there weren't so many businessmen out there who profit from showing violence and then accidentally encouraging it. Dammit, I'm sick and tired of people like the Schoenbohm ilk who intentionally mislead amateur radio into believing that our government is evill and our leaders are evil etc. Realize that KV4FZ is the way he is because he is a convicted felon, caught by the government-the Secret Service! The guy's a two bit thief who simply has an axe to grind, a toxic dislike for that same government that brought him down and will eventually grind up his ham ticket to confetti. Clinton has led our kids into maniacal behavior, he says. If that's so, then blame Clinton for putting three of his four sons behind bars! AF2Y, Doc

This is exactly correct. Code should be eliminated, and there should be
ONE
class of license. The the elitist attitude will be the death of ham
radio.
It is very unfortunate.

Well,
Its nice to see someone flaunting their wealth like you do. Does that make you feel like more of a man? By the way, it's amazing how the price of your self cleaning oven fluctuates like that..... You call everyone white trash when you can barely spell it yourself. Well, the rest of us have lives and don't sit in front of our computer posting childish messages while stuffing our face full of cookies from our self cleaning oven and sitting in overstuffed chairs. It's people like you that are the trash, my friend. Get a life-

My grandson had a friend over, she's 8, today.
She watched me checking into a net, took a look at the computers and radios
and said, "is this your work?"
I told her no, I worked in my office.
She said, "but then why do you have people talking to you and telling you
the weather?"

Wouldn't be a bad job if it paid better..

>government.
>

It's amazing how many people cannot discern the difference between a right and a privilege. Rights, like in the first, second, etc. amendments are not granted by the government, they are inherent and as such they are acknowledged as pre-existing by the Constitution.

A privilege, on the other hand, is not granted or guaranteed by the Constitution, it is granted by the issuing authority based on personal qualification. These privileges are usually granted with a defined set of rules or behavior which must be followed in order to keep the privilege. When these rules are broken, the issuing agency has the power to amend and/or revoke the privilege.

An Amateur license, like a drivers license grants the holder certain privileges. However, if you act like a fool behind the wheel, or the mike, then the issuing agency of either license has every right and authority to revoke your privilege.

This is done all the time in the case of a drivers license, and it's well past due to do the same for an Amateur License.

Your argument is incorrect. Ask Howard Stern, the other
"shock jocks" and the stations who have had their licenses threatened.
This has all been settled in the courts before.
Driver's Licenses are not in the Bill of Rights.
Freedom of expression is.

And besides-- this isn't really the point.
The point is not that you can say anything at all on Ham Radio.
There are other laws that protect the rights of other people
that place limits on such speech and that's fine.

The point is that Mr. Hollingsworth is attempting enforcement
based -in part- on the political content of speech,
not just in the manner it is delivered. It is a fine distinction,
but an extremely important distinction, for our very way of
life turns on such points. In this, he is out of line.

There are perfectly good regulations against broadcasting,
ghost talking and jamming. He is completely correct in
enforcing those rules. But when he begins suggesting
changes in the political content of speech,
all the while holding the club of license revocation
over a group's head, he goes too far.

It is sadly typical of a decayed society that the majority
are willing -without question and damning those who do question-
to follow any authority figure,
selling their birthrights and betraying their neighbors,
all for the promise of some temporary relief of some problem.
I'm sure you remember what Benjamin Franklin
had to say about such a people.

Regards,
Dave AB5S

>that (with about 30,000 hams at the time) "the bands
>are approaching saturation" ... clearly a ridiculous
>claim,

Since you weren't on the bands then (and you're not even on them
now with your Tech+ license), your statement is itself ridiculous.

>since we have nearly 20x that many hams today.
>For the full details, researched from the original
>documents in the National Archives by a professional
>archivist,

Your "professional" archivist is a bit off -- there were 46,000 licensed
stations in 1936 (see Page 3 of "200 Meters and Down"). To have that many
stations on HF simultaneously would create complete bedlam. The 3.485 MHz
of the then HF spectrum *was* saturated: Assuming only half the HF spec-
trum was usable at any one time, each two-person QSO would be spaced
0.076 kHz (or 76 Hz) apart. Worse yet, during daylight hours, if 10m
was closed, all 46 kilohams would be jammed in the then 400 kHz-wide
20m band: Each two-party QSO would be spaced 17 Hz apart.

Keeping NCI honest,
Jeff KH6O

"Monochrome" refers to the CRT having a single electron-beam gun and
a single-color phosphor on the CRT's screen.

Mono = single.

Depending upon the CRT's grid voltage, the beam+phosphor can create dozens
and dozens shades of grey.

You are trying to compare Public Broadcasting to that of a private radio service... By definition, the Amateur radio service is neither commercial, nor a broadcasting service.

Regulations for the Amateur radio service specifically forbid broadcasting, and /or operating the station for profit. Amateur regulations also frown on discussing topics of politics or religion. The court precedents regarding commercial broadcasting, like all court precedents, can only be applied to expressly similar circumstances. You cannot compare/equate apples to oranges in a court of law.

I would love to see some aggressive prosecution of outlaw ham operators in court. I think they will be rudely surprised by the verdicts, and the precedents set in these trials will be totally different than past rulings regarding commercial broadcast stations.

say Butt-fuzz

I sent a copy of your original
post to a few who are in that
business of what they do best:
do it to people like you.

get this you ass-end of nowhere fast

if bill ever has to ask for assistance
for his legal defense fund, all he has
to do is ask. I'll be the first to get
him what I can. and i'll bet hundreds
of NGers and more will too.

get this runt end of a gnat-fecaling

try asking people to help you with
money for your defense fund.

think about it square one. Minus one.
big zero.

I don't even think your mama will
strive to do it.

how many of us will contribute to
help Bill and how many of us won't
with you. THIMK.

best you really think this over and
then just blow away. by job and by
job and by job.

bill conduit
etc.

I posted this before, but apparently it didn't take, so here it goes
again:

The ARRL's 1997-1998 net directory is on the web at:
http://www2.arrl.org/files/infoserv/fsd/netdir97.txt

The 1999-2000 net directory should be coming out shortly (but as a
print publication; don't expect this to be posted on the web until
2001).

Message-ID: <927493638.067.25@news.remarQ.com>
Source record: 141918

The tapes are useful at first, but I'm partial to the software approach. Morse Academy worked extremely well for me. The bad side of the software is the temptation to push too far too fast. The tapes can't be changed, so you get the full dose. Maybe start with the tapes, and then work with software. Morse Academy's drills help you identify the problem characters, and allow you to work on those effectively. This isn't very meaningful until you know more than a few characters. In either case, you should strive to recognize the characters without effort. If you're working at decoding the sounds, you don't know them.

Think of Morse as similar to the phonetic alphabet. Anyone can learn the words in a few hours (Morse may take a while longer). The remainder is to skip the intermediate step of thinking it through: "KILO starts with K == K".

Work with the tapes, since you already have them. Don't be in a hurry, as you'll only have to go back to properly learn the ones you scrimped. Once you've done that, the software will take you the rest of the way to 13 and 20 very quickly. I especially like the MA drill that measures response time for each character. The slowest ones are the ones you need to work on.

Michael.

Finally, a coherent statement and one from someone
obviously versed in American heritage.

Hollingsworth is a bureaucrat. It is the right and DUTY
of every American citizent to continually question the motives
of federal bureaucrats.

It is unfortunate that most American citizens (and
ham radio ops) cannot comprehend what Dave, AB5S just
said. His reference to Ben Franklin's quote is another
which will probbly not be comprehended either, but here it
is anyway:

"They that can give up essential liberty to obtain a
little temporary safety, deserve neither liberty nor safety."
-Ben Franklin

Federal bureaucrats are quite happy that the present
day American masses cannot recall such quotes, much less
act on them.

Bob Lee

"For God's sake, get us out of the United Nations."

SB DX @ WW $OPDX.410
Ohio/Penn DX Bulletin No. 410

The Ohio/Penn DX PacketCluster
DX Bulletin No. 410
BID: $OPDX.410
May 24, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN and The Golist, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, KE4LWT, N4AA & QRZ DX, K6UR, N6RT, N6TQS, K7BV, K8YSE, DC8TS/KC2DMA, DL6FBL, F5NOD, G3LWM, G4BUE & DX News Sheet, GM0DEQ, GW0ANA, GW0VSW, HA5COK, HL2KAT, PY1KS, RA1WZ, SM5MX, SP5ELA, VE9DX, VK8HA and YO3FWC for the following DX information.

3W6, VIETNAM. "The 59(9) DXReport" reports that Karl, W9XK, will be active June 1st-July 20th as 3W6XK. Activity will be on 20 and 15 meters CW/SSB. QSL via homecall. ADDED NOTE: See XV7 below.

3W7CW UPDATE. Zygi, SP5ELA, from the Warsaw University of Technology RC (SP5PBE) and President, reports that Tom, 3W7CW/SP5AUC (ex-YI9CW), has been active from Hanoi, Vietnam since April 11, 1999. Tom has a one year license to operate on all HF bands plus 50 MHz, all modes. However, Tom's main interest is in CW. He is planning to operate some RTTY once his station gets fully set up. Tom's new QTH is on a second floor of a four story building (A DXer's paradise: no nearby high-rises, open horizon, tennis courts and parks all around. And, most of all, an unlimited access to the building's roof where Tom mounted his R7.) Tom is currently struggling with getting items ranging from a coax cable to a laptop computer, most of which have to be ordered from abroad. Fortunately, Tom took the majority of basics with him. He operates his faithful TS-180 and reports hearing not a single local 3W activity, only the neighboring BY, VS6, VK and JA. He has spotted many West Coast U.S. stations during the ARRL Contest, some of them really loud. Europe comes in with generally poor signals that he has to combat because of the overwhelming QRM from the local broadcasts, especially on 40 meters. Tom is planning to stretch some long-wire antennas north-west and possibly to other directions. He is a member of the Polish diplomatic corps in Vietnam and signed a four year contract. There should be lots of opportunities to work him, so dust those keyers off... For those interested in operating from Vietnam a

word of caution: a one-year license fee is 500 (USD)! QSL cards for 3W7CW should be directed to P.O.BOX 11, 02-800 Warsaw 93, Poland. Tom has been heard recently on 17 meters between 1230 and 1600z.

6 METERS CONTEST. Ciprian, YO3FWC, wants to remind everyone that the 1999 Oltenia Six Meter Contest will be held on the last full weekend of May (First period: May 29th, 0400-2000z, Second period: May 30th, 0400-2000z). All hams in the world are invited to participate in "Oltenia Six Meter Contest 1999". Rules can be found at "Romanian Amateur Radio Federation" Web site at: http://www.qsl.net/yo3kaa

BY, CHINA. The "DX News Sheet" reports that the Nanjing Agricultural University Radio Club will be active June 1-30th as BT99WED to celebrate "World Environmental Day".

BY, CHINA. Look for Pertti, OH2PM, to be active this weekend (May 29-30th), from the BY1DX station in Beijing for an all-band operation. Activity will be mostly on CW. QSL BY1DX via OH2BH.

CF3/VA3, CANADA. Look for amateurs in Ontario to begin using the CF3 prefix instead of VE3, and VX3 prefix instead of VA3 June 1-30th, for the 75th anniversary of the Royal Canadian Air Force (RCVAF).

CN, MOROCCO. Ben, DL6FBL/CN8WW, will operate during the CQ WPX Contest as a Single OP/All Bands entry. There will be some activity before the contest, but after the contest there will be no or only little activity because he will take down all antennas on Monday and go back to Germany early Tuesday morning. Ben states, "Please: during the contest all QSOs are welcome, of course. Outside the contest, please call me only on bands/modes, we have not yet worked!!! After this activity ALL logs will be merged and ALL QSOs (Oct.-Dec. 1998, Mar./Apr. 1999, and now) will be confirmed in one step!"

CY6, CANADA. Look for amateurs in Alberta to begin using the CY6 prefix instead of VE6, July 1-14th, to promote the Calgary Stampede.

DX CONVENTIONS (Update). The Holiday Inn in Visalia, where the International DX Convention is being held (in the year 2000), has a new area code. To make early reservations call 559-651-5000.

DX1S UPDATE. "QRZ DX" and "The Daily DX" sent out a press release from Martti, OH2BH, on his upcoming operation as DX1S. OPDX InterNet Subscribers will receive a copy of the release as an additional bulletin. Here are some excerpts from the release:
"Operators are Robin, DU9RG, Kan, JA1BK and Martti, OH2BH..... the station DX1S - DX Is - will hit the airwaves and be available for those who Deserve. DX1S is a new callsign of the Filipinas DX Society, of which WA6AUD and OH2BH are the first invited foreign members..... the station will be available May 28-31 for the multitudes on all known DX bands." Suggested frequencies: CW - 7005, 14025, 21025, 28025 kHz and SSB - 14195, 21295, 28495 kHz. QSL Manager for this special activity is KU9C.

GD6/MD0, ISLE OF MAN. GD6IA will be active during the upcoming ANRTS Contest, June 12-13th. Activity will be on 160-10 meters, but their

objective is to get some of the local hams active on RTTY.
Also, Doug, N6TQS, will be active as MD0BPI on RTTY from here May
21-27th. He will be using a wire antenna for the first two days, then he
will have a beam up and running. QSL via N6TQS or the G or W bureaus.

IOTA NEWS......
AS-122. This one came in late! Chung, HL2KAT, reports to look for
activity by HL0IHQ from Packryungdo Island now through May 25th.
Activity will be on 75/40/20/15/10/2 meters. This island is the
closest to North Korea, and it is a military area with a
sensitive zone. QSL via HL0IHQ; HL0IHQ, P.O.Box 375, Naminchon,
405-600 Korea. QSL searchs available at:
http://www.qsl.net/hl2kat
http://dx.qsl.net/logs

EU-008. Jeff, G3LWN, will be active June 1-4th, as 2S0PNS from the
Island of Pabay (57 17.7N/ 05.51.5W, IOSA NH11, WAB NG62). The
special call 2S0PNS is only available from May 6th to July 31st
and has been specially granted by the Radio Communications
authority to mark the Scottish Elections and the first sitting
of the Scottish Parliament. (The 2S replaces GM and of course
other GM stations can use the 2S prefix) The station will be
active on 160-10 depending on conditions and aerials available.
Jeff states that Pabay issues its own stamps (carriage labels)
and a special 2S0PNS stamp will be available.

EU-052. Jenci, HA5FA, will be active from Korfu Island with his CEPT
license as SV8/HA5FA/P between May 27th and June 2nd. QSL via
HA-Bureau.

EU-108. Operators GM0DEQ, GM0SEI and GM3WIL have planned another visit
to Lunga Island, Treshnish Isles (IOSA: NH17) on MAY 28-30th,
as GB5TI. Activity will be on 10/15/20/40/80 meters SSB/CW.
Last year's visit was cut short due to one operator suffering
a heart attack. QSL via GM0KVI.

EU-124. Glyn, GW0ANA, will be on Flatholm Island from August 27th
through September 1st. The callsign will be GB5FI. He states
that this will be a big event mounted by members of his club
"Barry Amateur Radio Society". They will be active on all bands
(Top band to 70cms) and modes (A1A, SSB, SSTV, RTTY, AMTOR,
PACTOR, and they will try PSK31). They will also have 6 meters.
QSL via GW0ANA bureau or CBA.

J6, ST. LUCIA. Jim/KF8VX and Cathie/KG8QL are announcing their summer
vacation/DXpedition to St. Lucia from June 19-26th. Callsigns are expected
to be J6/KF8VX and J6/KG8QL. They will be active on SSB and RTTY on all
bands based on propagation. QSL to home callsign or the W8 bureau.

KH0, MARIANA ISLANDS. Another group will be active from here during the
All Asian DX Contest. Look for Asa/JA6AGA and Tony/JA6CNL to be active
June 18-21st as KH0/AF4IN and KH0N. Listen for them on CW, 25 kHz up

from band edge.

NEW #CQDX HOME PAGE. Doug, N6RT, reports that the new home page of the IRC #CQDX Chat channel (with realtime spots from DX Summit) is now: http://dx.qsl.net/cqdx
The new page includes a java based IRC applet which you can try out if you have been curious about #CQDX but did not want to download and install any software.

OJ0 & OH0, MARKET REEF AND ALAND ISLANDS. A few press releases by Dennis, K7BV, announced that plans are now firm for the OJ0 and OH0 DXpedition. On May 25th, Dennis will fly via helicopter from the Aland Islands to Market Reef with Lars/OH0RJ, Seppo/OH1VR and Pasi/OH1MM. Operations will begin that evening (local time) after the antenna work has been completed. Listen for OJ0/K7BV, OJ0U, OJ0/OH0RJ and/or OJ0/OH1VR. Dennis will depart the reef for the Aland Islands OH0 Friday morning May 28th. One or two or all of the others may stay behind to operate in the CQ WPX CW Contest. K7BV will operate as OH0/K7BV from the OH0Z super station beginning the evening of May 28th and continuing until June 4th. He will use the OH0Z callsign during the WPX CW contest. Expect appearances on all bands 160-10 meters, the WARC bands and the RS12 satellite. A strong emphasis will be placed on CW. The 6 meters operation is questionable at this time. QSL OJ0/ OH0/ K7BV via KU9C. QSL OJ0U and OJ0/OH1VR via OH1VR. QSL OH0Z via OH1EH. The DXpedition Web site is now up and available for viewing at: http://www.qth.com/k7bv/

P3A AWARD. The 1999 P3A Team, which will be active in the upcoming CQ WPX CW Contest, announced that they will issue a special colorful award (with photos of all members of P3A) for contacts with P3A during 48 hours contest period. Details/press release will be provided to all OPDX InterNet Subscribers as an additional bulletin.

PW, BRAZIL. Alex, PY1KS, will be active in the CQ WPX CW Contest as PW1S. He will be on all bands as a low power entry. QSL via Bureau or direct to: P.O.Box 18123, Rio de Janeiro-RJ, 20722-970, Brazil.

QSL INFO AND NEWS......
4U1UN QSLS. The recent operation by Peter/ON6TT and Mats/SM7PKK should only be QSLed to: POB 3873, New York, NY 10017. (Remember ONLY this operation).

FT5ZH QSLS. Gil, F5NOD, reports that around 4000 FT5ZH QSLs have been mailed out, and the next 4000 QSLs will be mailed out in about one to two weeks maximum. They have received 8000 QSL currently. Some QSLs were received direct without postage contribution. These will be returned via the bureau. You can see the FT5ZH QSL on the following Web site: http://perso.easynet.fr/~f5nod/ft5z.html

The QSL route for 8P6AW is NOT via WB4RRK or K1XN. John has never been the manager for this club station. He suggests sending all QSL requests direct to 8P6AW: Amateur Radio Society of Barbados, Box 814-E, Saint Michael, Barbados.

The logs for the FO0AWI (Marquesas, January 1999) and FO0AWI (Australs, February 1999) are now online (as well as the FO0XUU operations) at: http://dx.qsl.net/logs

NOT THE QSL MANAGER! Steve Hurst, KA7NOC, reports that he is not the QSL Manager for YU1OJ. He has received many QSLs for this station over the last five years and has recently returned all cards to the hams who sent them. Steve WAS the manager for YU1PJ several years ago, but he has not heard from Zoran since the outbreak of war in YU-land in the early '90's. He feels this is why hams are sending him the QSLs. Should you require any further information, please refer to his Web site and follow the "YU1OJ" link at: http://www.magiclink.com/web/shurst

QSL YC0MZI via Muhamad Zaini "Zen" PO Box 7257/JKSPM, Jakarta 12072, Indonesia.

QSL YB0ZDD via Club Station "ORARI LOKAL PASAR MINGGU", PO Box 7257/ JKSPM, Jakarta, 12072, Indonesia.

SAVE YOUR GREEN STAMPS! EP/RA6LGM is a PIRATE.

WIA/IARU/VK8HA QSL BUREAU. Henry, VK8HA, states in reference to OPDX.409, Alan VK8AV does not refer to the WIA/IARU/VK8HA QSL Bureau. This bureau receives QSL cards for members as well as NON-members of the WIA. The WIA/IARU/VK8HA QSL Bureau address is: Box 619, Humpty Doo, N>T> 0836, Australia.

ZL9CI QSLs. These cards are expected to start coming out, and they expect to have all of the cards sent out by the end of June.

R200, RUSSIA. Look for special event station, R200AP, to be active on all bands and on all modes from June 5-7th to commemorate the 200th anniversary of the great Russian poet Alexander Pushkin. QSL via RA1WZ either direct (Al Trubchaninov, Rizhskij pr.51-104, 180016 Pskov, Russia) or through the bureau.

S9, SAO TOME (New on the Satellites?). Hardy, DC8TS/KC2DMA, states he will activate this one on the satellites. If you remember, he was active in 1996 as 5R8EO from Madagascar. He feels that it is now time for another "new one" on the satellites. However, he mentions that this is NOT a Dxpedition, but a holiday with his wife combined with a bit of satellite activity, if the licensing authorities allow this to happen. He has not heard anything yet about his license, but he will visit the Sao Tome Telecom to hopefully pick up a license on Monday the 31st of May. Activity in the hotel will be limited. Look for him between 1600-2000z. QSL is via the German QSL Bureau to DC8TS or direct. Direct QSLs for destinations outside of Europe require 2 USD return postage.

SV8, ZAKYNTHOS (Zante). Carl, GW0VSW, will be operating from this Greek island (IOTA EU-052) from June 1-14th, as SV8/GW0VSW. This will be mainly a vacation for Carl, but he hopes to be active every day. Activity will be on all bands mainly CW. He will also be looking for low power stations on the usual QRP frequencies. QSL via the bureau or direct to his home callsign.

XJ9, CANADA. A special prefix has been issued to be used by stations in Saint John, New Brunswick during the period of 0000z May 22nd through 2359z June 6th. There will be several stations active during this period. This prefix was issued to recognize 150 years of operation by the Saint John Police Dept., the oldest force in Canada. Andy, VE9DX, reports that he will be active during the CQWW WPX CW Contest as XJ9DX. Look for him before and after the contest on SSB, RTTY and PSK31.

XV7, VIETNAM. Rolf, SM5MX, is about to travel from Tokyo, his present QTH, to Hanoi to revive his call XV7SW for two weeks, May 23 to June 5. Rolf will take part in the WPX CW Contest. He is now the only remaining XV7 on CW. From now on, only 3W calls will be issued. QSL via SM3CXS.

YS, EL SALVADOR. Jack, KE4LWT, will be active as YS1/KE4LWT through at least August 15th. Activity will be on 10/12/15/17/20 meters. QSL through July 1st to: Jack R. Smith, Unit 3105, JTF New Hope, APO AA 34023. After July 1st, QSL direct to his home callsign. Bureau cards to the home callsign are always welcome.

Dan K Nelson wrote:
> You are trying to compare Public Broadcasting to that of a private radio
> service... By definition, the Amateur radio service is neither commercial,
> nor a broadcasting service.
Irrelevant. The Bill of Rights does not make a distinction
between "public" and "private" circumstance.
A sign declaring "NO BLACKS" is equally illegal
on a public office building or a private place of business.

> Regulations for the Amateur radio service specifically
> forbid broadcasting,
<snip>
I have already said that broadcasting is not the point
of this argument. We are in agreement about that infraction.
Please argue to the point.

>...Amateur regulations also frown on
> discussing topics of politics or religion.
"Frowning upon" something is a matter of personal opinion.
It is not codified law and cannot be under the Bill of Rights.
Neither your, mine nor Mr. Hollingsworth's personal politics
or prejudices have any place as a matter of law enforcement.

> The court precedents regarding
> commercial broadcasting, like all court precedents,...
> You cannot compare/equate apples to oranges...
Both services are licensed communications services
administered by the same agency of the federal government.
I think the courts would see it as apples to apples.
But this is also irrelevant. The Bill of Rights
does not contain an exclusion based on type of service.
Part of the function of Amateur Radio is communication.
That is self-evidently correct. Otherwise, any exchange
that was not public-service or technical in nature would
be illegal. You can't have it both ways. It's either
legal to say "I like Bill Clinton" on ham radio or it's not.
I propose that until there is a Part 97.xxx,
stating that it is illegal to voice political opinions
on ham radio, that no enforcment action can properly
be based -even in part-, on such a concept.

Communication of views is protected, be it between a commercial
Rash Windbaugh and 40-millions or you and I on 75 meters.
We cannot allow it to be otherwise if we value our rights.

An enforcement officer may not demand that a citizen
cease to express his views in a peaceful, law-abiding manner.
Those people who have been "broadcasting" are not abiding the law,
but that's not the issue. Mr. Hollingsworth has made it clear
that *in his opinion* (for the test he is applying is nowhere
codified in the regulations),
the politics of this group are not "in the proper spirit."
It would appear that he wants citizens to stop expressing those
opinions,
in a law-abiding fashion or not, because they do
not conform to his personal notion of Amateur Radio.
He implicitly threatens to use his enforcement powers against those who
do not comply. That is improper coercion that
denies the civil rights of citizens and is -out-of-line-.

> I would love to see some aggressive prosecution of outlaw ham operators..
Most people would. But let's do it -within the law-, protecting the
principles of the Bill of Rights.
There's plenty of material to use against the bad guys
without crossing the line to tyranny.

>...I think they will be rudely surprised by the verdicts, and the
> precedents set in these trials will be totally different than past rulings
> regarding commercial broadcast stations.
Let us hope not. If so, it will knock yet another support
out from under the already tottering Bill of Rights.
Our fathers shed their blood for just such points as this.
People of conscience must protest when these priciples are threatened.

You know the worst part about this whole mess??
He doesn't NEED to trash the Bill of Rights to get the bad guys!
Mr. Hollingsworth doesn't need to inject demands that people
not express certain political views. The rules against
jamming and broadcasting are all the club he needs.
So why trample on the civil rights of citizens when
it's unnecessary?

The courts have limited the bill of rights as far as free speech is concerned. You can't shout fire in a theater!
Traditionally ham radio has excluded political speech and religion.
The terms of your ham license determine how you use ham radio.
Allowing crap, like the 3950, goes against every legal tradition in America! Prior to this decade, ham radio was off limits to junk like them.
Only in the 90's do, primarilly conservatives, feel that they have the right to blow their shit using any/every media known to man. This is unique to this time and defies tradition.

Another conservative. Conservatives use profanity and nasty mean
speech whenever they are out of ideas (people such as yourself).
A question on the General Class exam in 1961 was what was the penalty
for violating Amateur radio laws, the answer was 5 years in the
federal clink and $10,000 fine.
I hope that a million Hollingsworths come about to rid the ham bands
of trash, such as yourself.

Found this on the net today......

----------start----------

Also, early internet reports, from many on the newsgroups, state that
John Mackey's mother may turn to give evidence & act as a witness
against him in the recent accusations about John Mackey falsifying
VE test scores in exchange for money from applicants.

----------end----------

Anybody know about this?

I know John has made many false claims about many things but do you believe
he would really take money to pass people?

John has lied on the net about his license status and other things but would
he stoop this low?

What's the story???

Funny that you mention people looking down on General class as this is what the majority of HAM's are.
I never want to be anything more than General Class.
My friend is an Extra Class and he has not used Morse code in over 15 years and he thinks coders are a bunch of idiots in this modern day and age.
He doesn't look down on anyone except people who want to be HAM's but never make an effort at all.

4811. Re: Family Radio Service freq?

family radio service operates in the 460 Mhz range.. YES, most ham hand helds and mobile that can be modified can reach these frequencies.. be warned you can only use 1 watt of power max in this band due to the fact that it is shared with the GMRS band as well. Here is a list of both the FRS and GMRS frequencies.

Family Radio Service General Mobile Radio Service
==== ==== ===== ===== ===== ==== =====
462.5625 - CH 1 467.5625 - CH 8 462.550 462.6375 462.7250

No way dude!
Drop the code because it is obsolete, but not the classes!
I do think that the classes need to be redone though.
Tech classes are fine, Novice should be dropped, General
is fine but the Advances and Extra classes need more incentive (as if I were
to ever become and Advanced or Extra).
As a general class, I have no reason to me (other than the honor) to go through the
hell to become an advanced or Extra for the little freq's and extra rights offered.

4813. Galaxy radios?

I'm trying to take the technician license exam on June. I'm doing this besides a hobby, also to be able to communicate with both cars in the family and the house and also among friends in Florida that has HAM radios also. I would like to know if there is a radio that will allow me to have access to the frequencies that I would be entitled once I pass the exam and if those frequencies will allow me to talk at least within a couple of hundred miles away. I'm not looking to bounce signals off the moon or anything like that, I just want to be able to use the radio to communicate for example from Orlando or Tampa to Jacksonville, and also to be able to use the repeaters so if I want to make a phone call from the radio I can. Will the VHF and UHF that a technician is authorized to use will allow me to use repeaters, talk a long distance and make phone calls. I'm planning on running 200 watts of power. Can a Galaxy radio do any of these things? The reason why I ask this, is because I like the format of the Galaxy radios, (buttons and knobs, not pushing buttons). I would really appreciate your help with this since I'm kind of new the HAM hobby and still studying for the test.!!! :)

Henry Knouse wrote:

> The courts have limited the bill of rights as far as free speech is
> concerned. You can't shout fire in a theater!
I already addressed this in my passage concerning limits to speech
that are placed to protect the rights of other persons.
"Broadcasting" speech is a good example of speech not protected,
because it violates the rights of others
and threatens commercial interests.
Individual expression of political opinions do not harm others,
despite those who freely choose to listen and freely choose to
act offended so they can have something about which to complain
or can feel part of some "righteous cause" against the imagined
offender.

> Traditionally ham radio has excluded political speech and religion.
Tradition is not law. Tradition is not a right. It is an informal
and uncodified agreement, and therefore subject to change and
NOT subject to federal enforcement.

> Allowing crap, like the 3950, goes against every legal tradition in
> America!...
Funny... the "legal tradition" in American for nearly 200 years
was black slavery and sanctioned discrimination against
jews, hispanics, etc. It is "legal tradition" in some
African countries to mutilate small children. Traditions
are not laws. See above.

> Prior to this decade, ham radio was off limits to junk like
> them...
Absolutely untrue. There have been scufflaws and brigands
on the radio since the first spark gap. It's only this
decade that we've grown so lazy about ferreting them out
that we're willing to trade off personal freedoms so
a federal functionary can do our dirty work for us.

> Only in the 90's do, primarilly conservatives, feel that they have the
> right to blow their shit using any/every media known to man. This is
> unique to this time and defies tradition.
Outrageously false statement to the point of laughablity.
Read any newspaper from the 1960s. Peace, Man!

All you procode fanatics better get your heart medicine
and some smelling salts and have the XYL stand by before
you read this ... :-)

***************
The following Press Release was issued by the RSGB and
the RA on Friday 21 May 1999:

New Licence Sets the Scene for the New Millennium
UK Amateur Radio Licensing is about to undergo the most
exciting changes seen since the introduction of the
Novice Licence in 1991.

Two major initiatives will allow greater access to the
full range of facilities that Amateur Radio has to
offer, and broaden the appeal of the hobby to a wider
audience. More amateurs will have the opportunity to
experience worldwide communications, and newcomers to
the hobby will find it possible to make contacts on a
wider range of frequencies.

These substantial improvements stem from discussions
between the Radio Society of Great Britain and the
Radiocommunications Agency, following consultation with
the Amateur Radio community carried out by both
organisations.

A new class of licence, to be known as the A/B licence,
and which will use the callsign series M5xxx, is to be
introduced in the early autumn. This will provide
access to all amateur bands, on passing the Radio
Amateurs Examination and a 5 words per minute Morse
test. 100 Watts PEP output will be allowed on the bands
below 30MHz (the HF bands); and 400 Watts PEP output
above.

The Novice A and Novice B licences will be enhanced in
the summer to allow a higher transmitted power than at
present. The power output will go up to 10 Watts PEP.
New frequencies will include the 144MHz band, an SSB
allocation on 3.5MHz and the extension of the existing
```

Novice HF allocation to include the QRP CW calling frequencies.

It is expected that the World Radio Conference to be held in 2002 or 2003 will agree to the removal of mandatory Morse testing for access to frequencies below 30MHz. Following that decision, the existing licence structure will be replaced with an incentive-based system. In the meantime, discussions are under way to ensure that Morse and data sub-bands are safeguarded by incorporating them into licence schedules.

In summary, the improvements are:

Access to the HF bands with a lower Morse test speed
The Class A/B licence to provide access to all HF bands at the 100 Watt PEP level
Higher output power on all Novice bands
Wider allocations on existing Novice bands
Access to 144MHz for Novice licensees
Safeguards for Morse and data sub-bands
In the longer term, the introduction of an incentive-based licensing system
The RSGB and the RA are hopeful that these initiatives will provide a more attractive path into Amateur Radio, at the same time as increasing the facilities available to existing radio amateurs. These measures, together with the new licence structure, which will be put into place after a future WRC, will provide a healthy future for Amateur Radio well into the 21st century.

For further information, contact:

Specialist Sectors Unit, Radiocommunications Agency, New King's Beam House, 22 Upper Ground, London SE1 9SA

> blah, blah, blah, drivel --snipped--
>

Let me attempt to set you straight. About 2 months ago a firefighter came to me and said that he thought that there was a CBer running an illegal linear near a local fire-station. The harmonic interference was causing a major disruption with both the rescue and the fire departments two way communications. After some investigation I found that there were no local ordinances or state laws prohibiting radio interference and the enforcement of which is solely placed on the FCC (AKA guys like Riley Hollingsworth).

Now you tell me, if your kid is lying in the middle of the street after being hit by a car, wouldn't you want the rescue to be able to freely communicate with the dispatcher at the fire dept without being interfered with by some radio operator whether it be a Ham or a CBer? This is just one of the countless reasons why we need people like Riley Hollingsworth and his dedicated and undermanned staff.

It is for reasons like this that a Riley Hollingsworth or any other FCC enforcement officer is worth their weight in gold. A bureaucrat.....I DONT THINK SO!

Kenwood TKR-820 Desktop Repeater with Internal Cel-Wave Duplexer. The repeater is a 2-20 watt commercial unit. The power supply is built in and also has a 12VDC input for emergency automatic backup power. The repeater has a CW ID installed. There is also a Full Duplex CS-800 Interconnect/Repeater Controller which is wired to plug into the accessory plug on the rear of the repeater. Currently the repeater is programmed for 444.500 / 449.500. The repeater can be setup to operate from 8 different CTCSS or DCS codes (can be mixed). The TKR-820 is type approved for GMRS, Commercial, and Ham. The repeater is the same size as a Kenwood TS-850S HF rig. It is about a year and a half old and is currently in service. I also have 1 new and slightly used (2 months) TK-860 UHF - 32 Channel radios with CTCSS and DCS for sale. I also have a DTMF mic for one of the TKR-860s. All of the equipment is in good working order and looks new. I can program the TKR-860 radios to any channel setup required. I will discount for a package sale! Email radio@vvm.com for prices on selected or package items.

Bill Cheek and Keith Knipschild Arrested

April 2, 1999

John T. Ward posted an article on USENET about the following article which appeared in
the Friday, April 2 issue of NY Newsday newspaper, page A31.

Feds: Man Eavesdropped on Police / Agents say he posted cops' info on Web site

By Hugo Kugiya. STAFF WRITER

The U.S. Secret Service and Nassau County police arrested an unemployed electronics
enthusiast from Kings Park after he intentionally intercepted communication sent and
received by the mobile data terminals installed in police cruisers, federal agents said.

Keith Knipschild, a former NYNEX employee, was arrested Wednesday in his home at 29
Amapola Lane for intercepting information and posting some of it on his Web site, http://www.knip.com, agents said. Police use mobile data terminals to check for outstanding warrants, review driving records and to send emergency information they might not want to broadcast across police scanners, such as details of an ongoing surveillance or a planned
search.

An affidavit from a federal agent found that Knipschild's Web site had 93 pages of
police transmissions from March 12, which included criminal histories and warrants,
motor-vehicle checks, medical information about victims, and witness statements. Nassau
police confirmed the information was transmitted by police on that day. Investigators say
a confidential source led them to Knipschild, who could not be reached for comment yesterday.

Federal investigators said three satellite dishes, ranging in size from 18 inches to
12 feet in diameter, as well as a 40-foot radio tower were discovered on Knipschild's property. Calls to federal authorities

seeking comment were not returned yesterday. Details about the disposition of the case were not available.

Federal documents indicate Knipschild's Web site includes information of interest to electronic enthusiasts, with links to Web sites about scanners, satellites and dishes, and amateur radio.

Federal investigators said Knipschild used an illegal electronic device to intercept police communications. In a related case, the Secret Service have arrested a San Diego couple, Bill and Cindy Cheek, on a New York warrant charging they sold such illegal devices on the Internet to intercept police communications. The Secret Service said one of its undercover agents purchased a device from the Cheeks, who shipped it to New York. Details were not readily available yesterday.

Mobile data terminals send and receive information by radio frequencies, which are encoded into a digital or binary format, one that is not available to the public. Furthermore, these terminals are password-protected.

Don't forget to mention that it is not legal to transmitt on the
ftequencies with a modified ham ht and the deviation is only 2.5 khz
instead of the normal 5 khz used in the ham ht. The received audio
will be low when received on a ham ht and if it is used to
transmitt, the audio on the frs will be distorted or broken up very
bad unless you back way off the mic.

Yes, this is undoubtedly the same John T Ward who works at Uniden, and was instrumental in getting the latest round of restrictions slapped on us .
Have you read the text of the latest Anti - Scanner Bill ? He is mentioned prominently in it. Maybe you should read that.

This is hardly news, it has been posted at least 20 times, and there are at least three web sites I can think of where you can read it as well.

> federal clink and $10,000 fine.

The question may have been there, but the correct answer was:

Statute (Congressional law) - 1 year and/or $10K
Communications Act, Sect. 501.

FCC Rule - $500 fine and no imprisonment.
Communications Act, Sect. 502.

These were the MAXIMUM penalties which could be imposed by a
court after formal prosecutions, which were as rare in the
amateur service then as they are now.

At that time the biggest stick that the FCC had was license
revocation. Monetary penalties ("forfeitures") imposed by the
FCC itself didn't come about until almost ten years later. The
FCC never had, nor does it have today, the power to imprison
anyone for anything.

See my earlier post for more details on current penalties.

It's not a prescaler, it's an ECL binary counter, so it would be in
the MECL databook. Their prescalers are in the MC12xxx number range
and (I think) are in the Communications databook (or web page section).

Depending where you are sitting, that's enough signal to get to the antenna of an aircraft com and open the squelch. At the very least, it would be irritating to the drivers.

I service General Aviation avionics. A signal at -65dbm from my test set is quite often strong enough to operate the aircraft nav receivers.

I know this because one of the tests I perform is a check on threshhold (nav flag) sensitivity and a comparison of the relative sensitivity of both Nav receivers.

The problem arises: Whilst we may feel that our scanners and ht's are safe, none of us has actually tested 'every' variable and could testify that 'it wasn't me' in front of the Coroner.

I use an IC R10 daily as a test receiver, have flown with it and used it in flight. BUT, the modern airliner has at least 3x 760 channel VHF coms, 2x 400 channel VHF Nav receivers, a couple of 75MHz marker receivers, a couple of 330 MHz Glideslope receivers, a couple of 200-1800khz receivers, a 9.45GHz receiver, a couple or three 4-5GHz receivers (rad alt and MLS) and perhaps a couple of 1575MHz GPs receivers.

These receivers DO interfere with each other occasionally, shortly followed by a manufacturers bulletin on how to prevent it. The manufacturers know what gear they expect to operate with and Local Oscillator frequencies are carefully chosen to prevent this.

The scanner or Ht is a wildcard. I'll bet none of you can tell me, off the top of your head, what frequency the LO is on when listening to your favourite Police frequency, for example. Remember that whilst scanning, the LO is hopping about or slewing about all over the spectrum.

You could, of course, go up the front and ask the pilot if you could use the radio, do a check on his coms and see that there's no interference, but in Departing Sydney airport, there are no fewer than 8 frequency changes required. Did you check them all?

You are absolutely right Joe. WB9BCC lived this lie for a while,
telling people he was a "SECRET" receiver of the MEDAL OF HONOR. There
is no such thing as a secret award they all are numbered.. In fact he
is lucky he did not
receive a visit from the FBI for spreading such a lie. Sinking so low
as to Steal glory from real heros like Roger Young. Commando Kelly and
others who received our nations highest award for valor. Dr Hate AF2Y
spread this story on the amateur bands also, telling what a great hero
this fellow is. He is no hero, he is a disgrace, a spinner of lies and
shameless.

Well around here there is a $190 fine if we are caught using a hand held mobile phone whilst driving. Hands free Car kits sell very well. We also have a very high percentage of mobile phone users. This year number of mobile voice calls made will exceed the fixed phone network.

Every empire has crumbled, including the empire of lands conquered by the ancient Hebrews and the empire of lands conquered by the Khazars.

The American nation was not founded on the principle of empire building, but on liberty and justice. Yet the US bathes the world in blood and injustice. The US government has utterly betrayed the promise of the American Revolution. Do you rejoice at this, or condemn it?

> Has the United
> States ever expelled her Jews?

Coincidentally, no. Not yet. But it may happen in the future.

While loudly proclaiming that THEY are the champions of the Bill of Rights and our American traditions, the Jews work overtime to subvert our ideals and steal our country out from under our noses.

The United States of America has a doctrine that church and state should be separate. But in April 1999, Jews and their running dogs arranged to have the US government sponsor a Jewish religious service. US government employees even got paid to attend. Of course they tried to keep it quiet . . .

And when some Americans found out about it and turned out to demonstrate and hand out fliers, the Jews tried to have the Americans swept off the street by the police! So you see what respect the Jews have for the First Amendment of the Bill of Rights!

Show the following to the ADL. Let us all know when the ADL, in the name of organized Jewry, issues its public condemnation of this abuse of the Bill of Rights.

===

Waco: Fresh Salt in the Wound!
by Carol A. Valentine
Curator, Waco Holocaust Electronic Museum
http://www.Public-Action.com/SkyWriter

This text is available with live links at [http://www.monumental.com/SkyWriter/980415]

Talk about an in-your-face insult! The US government holocausted 80-odd professed Christians in Waco six years ago. The murderers are still free, and, as far as we know, still on the US payroll. Not one of them has been indicted.

Yet on the eve of the sixth anniversary of the inferno, what does the US government do? Why it sponsors a commemorative week for non-US citizens- that is, Jewish non-US citizens-- who died over 50 years ago during World War II!

It gets worse!

* On April 15, the US sponsored a quasi-religious Jewish holocaust event.

* The US paid federal employees to attend this event.

* Federal employees were requested to stand for the "Kaddish Prayer."

* Clinton wrote a "Yom Hashoah" letter, which was distributed at the theater.
http://www.public-action.com/SkyWriter/980415/pgm_6.gif

* When a group of non-Jewish Americans turned out to distribute handouts pleading for justice for the Davidians and for free speech, event organizers attempted to sweep them off the street!

How did I learn of the "Holocaust Week of Remembrance"? Not from the newspapers. The US kept it pretty quiet. I was tipped off when several friends who work for the US told me the entire week of April 11-18 was being set aside to remembering the Jews who died in World War II.

[For a list of the US agencies participating in the organization of the event, see
http://www.public-action.com/SkyWriter/980415/pgm_5.gif]

Then I learned that a special commemorative program was being arranged on April 15, at the Lincoln Theater, 1215 U Street, N.W. In Washington, DC, and that public employees were being **paid ** to attend. I was stunned, and so were a number of others I knew.

We decided to distribute fliers at the April 15 program. I wrote the text, which is attached at the bottom of this message. Did I insult or degrade Jews who died during World War II? See for yourself.

The flier was printed on two sides. Side One cited the principle of "Equal Justice Under Law" and asked for the indictment of the murderers of the Branch Davidians. Side Two demanded application of *American* principles of free speech and free inquiry to the subject of Jewish deaths during World War II.

Working With Special Operations

Having arranged two Waco protests outside the FBI Building in Washington, DC (1994 and 1995), I know the wisdom of working closely with the DC Metropolitan Police Department and the division that handles

demonstrations, the Special Operations division.

There are provocateurs in Washington, DC. It's their job to cause trouble. In the past, Special Operations have shown me how to prevent trouble. So I obtained a demonstration/protest permit to make sure Special Operations were fully informed about my plans.

Surveillance and Security on April 15

Some friends of the Waco Holocaust Electronic Museum offered to help. We decided that fliers would be distributed by just two people, and that those people should be non-threatening to even the most timid heart. The first choice: a woman who appears to be about 40 years old (yours truly) :-); the second choice: a 13-year old school girl who volunteered to help.

Letting people know they are on record always helps keep order. So some supporters of the Museum provided a variety of conspicuous and inconspicuous surveillance and security services.

The entire effort was recorded by a conspicuously placed camcorder. I wore a conspicuous microphone on the lapel of my coat, and carried a tape recorder in a belly pack. A security detail was present, with a conspicuous cell phone.

The Morning of April 15

Unfortunately, I woke with laryngitis and could scarcely whisper. So I set off to Washington DC carrying an index card that read: "I have laryngitis."

I arrived at the Lincoln theater at about 11:10 a.m. At about that time a group of men arrived, who appeared to be organizers. With the exception of a short brown-skinned man, they all appeared to be Khazar/ Jewish. They showed a camera man inside the theater.

Within minutes I spotted the DC Special Operations Officer assigned to cover our flier distribution. I waved to him and then introduced myself--using pantomime and my "I have laryngitis" card. He parked across the street.

With the DC Special Operations Officer across the street and my surveillance and security teams in place, my 13-year old helper and I began to hand out fliers to those entering the theater.

Naturally, the flier soon reached the organizers. I saw a group gathered around the doors of the theater. I heard one voice say: "It's the Davidians!" I guessed that person had read Side One of the flier. Then I heard another voice say; "It's the revisionists!" I guessed that person had read Side Two of the flier.

After a few minutes the brown-skinned man who had been among the organizers approached me.

Pack Up Your Bags And Get Out

"I am Detective [name omitted]. I'm here to say pack your bags and get out. I'm not allowing you to ruin this for these people." I got his message real fast.

So I motioned the detective across the street to the Special Operations squad car. We crossed the street together and the Special Operations Officer rolled down the window of his car to talk to us. Referring to me, the detective told the Special Operations officer that "she has to leave."

Special Operations Officer replied (to paraphrase): "THE HELL SHE DOES!" This officer obviously had a better grip on the legal foundations of liberty in America than the detective. He refused the detective's request to have us removed, and we continued to distributed the fliers!

Having failed to deprive us of our First amendment rights, the organizers of the Jewish holocaust program had to go to another plan. One of them--let's call him "Sheldon"--stood outside the theater, telling those entering: "That leaflet is not from us. That is revisionist material." Revisionist material? Why describe "Equal Justice Under Law" and freedom of speech and inquiry as "revisionist material"? Why should Sheldon, on behalf of the Jewish holocaust program, have to disclaim such ideas?

[See Sheldon. http://www.public action.com/SkyWriter/980415/ sheldon3.jpg] If you have seen him before and know his real name, please drop me a line.

Reaction to Flier

The overwhelming majority of people coming in to the theater were Jewish. Upon hearing those remarks about revisionist material, many Jewish men smiled and told Sheldon they were *interested* in reading the material. One Jewish man, hearing Sheldon's warning about the flier in his hand, turned around and asked for two more copies.

The Jewish women's reaction was different. One woman caught my eye and slowly ripped the flier. Another woman crumpled it and was about to throw it on the pavement. I watched her raise her hand. But then she noticed the WHEM camcorder, stopped, walked over to the rubbish bin, and threw the flier into it.

A bus load of children arrived, and I gave each a flier. Sheldon spoke to the teacher, and she took the fliers away from the children.

*Enter "Morris"

Sheldon was joined by another--let's call this one "Morris." You can see Morris by clicking on. http://www.public-action.com/SkyWriter/980415/morris4.jpg. Sheldon and Morris took turns standing in front of the doors of the theater warning people about the flier.

From time to time, one or the other of them would loudly proclaim that we had SOME NERVE doing what we were doing. Had I been able to speak, I would have told Sheldon and Morris: "Don't say 'nerve.' Say 'chutzpah.'"

A particularly tender moment occurred when Morris, standing in front of the theater doors, screamed at the two pamphleteers: "YOU HAVE NO RIGHT TO DO THIS! THIS IS A FREE country . . . " The last word, "country," was uttered in a much softer tone. Morris apparently realized the irony in what he was saying as the word was leaving his mouth. My 13-year old helper could not help laughing, right then and there.

Sheldon and Morris had a third helper, a man I will call Herb. Each of them approached me at different times to ask questions and make comments:

"Who are you?"
"You have some NERVE!"
"What is your name?"
"What a NERVE."
"What organization are you with?"
"You have some NERVE!"
"Did you write this crap? It's disgraceful!"
"You've got a lot of NERVE."

As I mentioned above, I had laryngitis. Every time one of my torturers harassed me, all I could do was to show my "I have laryngitis" card. But that only made them madder, especially Sheldon.

"BULLSH_T," he yelled when I showed him the card. "You can talk." He then addressed several of his associates. "She can talk. This laryngitis thing is bullsh_t. This WHOLE THING is bullsh_t," Sheldon shouted, indicating the conspicuous members of my team.

At one point after showing Sheldon my laryngitis card, he continued to badger me. So I simply turned on my heel. The Waco Holocaust Electronic Museum camcorder picked up the image of Sheldon, dumbfounded, staring at the back of my head!

Preferring the Weaker Target

A Jewish woman, approximately 30 years old, came out of the theater and approached the 13-year old school girl who was helping me distribute the leaflets. This grown woman put her face right the little 13-year old's face and shouted: "I don't have any cousins. I don't have any grandparents." The little girl responded: "Please speak to that lady," and motioned to me.

The woman continued to thrust her face right into the little girl's and screamed: "I DON'T WANT TO TALK TO HER. I WANT TO TALK TO YOU!"

I went over and placed my body between the woman and the little girl. The woman then turned on me and said: "HOW DARE YOU PUSH ME."

Then it was Sheldon's turn to shout. "QUIET! QUIET!" he said to the woman. "SHE'S WIRED! SHE IS TRYING TO GET YOU ON TAPE. THEY ARE RECORDING EVERYTHING!" He motioned to the camcorder. Then the woman rapidly disappeared inside the theater.

Luckily my security man was right there, on his cell phone. It sure gave me a feeling of --er-- security, even though a potential incident did not eventuate. Our camcorder was, of course ,whirring all though the exchange.

Inside the Lincoln Theater

Here is how the service struck one of the US government employees who attended the event: "The noon gathering of federal workers from around Washington, DC at the Lincoln Theater on U Street NW had the distinct flavor of a religious service. That owed not a little bit to the manner of the presiding official, Secretary of Labor Alexis Herman. Herman spoke in the inspirational tones of a low-key baptist minister."

In the midst of the program a memorial candle was lit; the main speaker's address was bracketed by doleful songs sung by a tenor in what sounded like Yiddish to this Federal employee; and the program was ended by a call and response sort of prayer known as a kaddish. All of these factors contributed to the religious atmosphere of the event, wrote this person.

"Most of the audience, it seemed, was Jewish. There were a few blacks here and there. Near this writer there was a small concentration of them, most of whom apparently slept through the better part of the program."

To see the full accounting of the program from this employee's eyes, click on:
http://www.public-action.com/SkyWriter/980415/iwit_1.gif
http://www.public-action.com/SkyWriter/980415/iwit_2.gif

To see a the glossy, 8 1/2 x 11 inch color programbrochure given at the theater entrance,
http://www.public-action.com/SkyWriter/980415/pgm_1.gif
http://www.public-action.com/SkyWriter/980415/pgm_3.gif
http://www.public-action.com/SkyWriter/980415/pgm_4.gif
http://www.public-action.com/SkyWriter/980415/pgm_5.gif

By the way, look at the photo of the children behind barbed wire on the front of the brochure. The Star of David imposed over the photo makes the statement that those children were Jewish. But now look at the enlargement of the photo.
http://www.public-action.com/SkyWriter/980415/pgm_2.gif

Do those children look Jewish to you? They all seem to be of Germanic or Nordic racial stock . . . Sheldon must have overlooked this small detail.

Note the lighting of candles and the recitation of prayer documented on page 3.

Federal Lunch Hour

Just a few more words about the Federal lunch hour. Federal employees are allowed one HALF hour for lunch. The event was one hour long. Transportation to and from would take an estimated 30 minutes to one hour. The employees would still have to eat lunch--sometime. Add it all together, you can see that the taxpayer underwrote one and an half to two hours of pay for each federal employee in attendance.

Conclusion

The love of free speech and free assembly runs deeper in the hearts of the people than our enemies would have us believe. Think of all the bad reports about police throughout the country, and then think of the Special Operations division of the DC Metropolitan Police. On April 15, Special Operations breathed life into the First Amendment! They did their job.

And then think about Sheldon and Morris. They are right. It takes NERVE to stand up to bullies. And these bullies are not used to being opposed.

Just a few souls with courage . . . Had I organized a protest with a dozen picket signs, I would not have had so great an impact. The days of the mass demonstrations are over. Lightening strikes by a few courageous souls are the order of the day.

==Waco Holocaust Electronic Museum Flier, April 15, 1999==

The flier was printed on 81/2 x 11 paper,and then folded in half. These words, printed in big, bold letters, appeared face-up as the leaflets were handed out.

========== Side One, Top Half ==========

REMEMBER THE HOLOCAUST
==========

As the person turned the half sheet over this text appeared:

========== Side One, Bottom Half ==========

Remember The Holocaust . . . but which Holocaust?

It's safe enough to remember and talk about something we are told happened 60 years ago, in another country, at the hands of a government that no longer exists.

But what of The Holocaust that occurred in our own country, just six years ago at the hands of our own government? Is it safe for you to remember, and talk about, the Waco Holocaust?

Not one of the US military and government employees who assaulted, tortured, and murdered the Branch Davidians has been indicted. They still walk free.

Etched on the cornice above the Supreme Court building in Washington, DC are these words: Equal Justice Under Law. The murderers the Branch Davidians should be indicted and prosecuted as are other vicious criminals. How can you disagree? "Equal Justice Under Law." It's the American way.

For more information about America's shame, visit:
The Waco Holocaust Electronic Museum
http://www.Public-Action.com/SkyWriter/WacoMuseum

==========End Side One, Bottom Half ==========

Now read what was printed on Side Two of the 8 1/2 x 11 paper.

========== Side 2 ==========

The Great Holocaust Irony

Who Is Afraid of Free Speech and Free Inquiry?

In the past decades, a growing number of people throughout the world, from historians to scientists to human rights activists, have publicly questioned the veracity of the classic Holocaust story, to wit: Hitler and the Third Reich designed and implemented a plan to exterminate the Jews, built gas chambers for the purpose, and six million Jews died as a result. What has happened to those who freely inquire about the truth of this story, and freely communicate their findings? Let us look at the stories of just a few:

* Australian historian Frederick Toben was arrested in Germany on April 9th, 1999 on charges of "defaming the dead." How did this charge arise? During a private discussion with two German officials, Dr. Toben was asked if he believed in the Holocaust story. He responded: "That's what you say." Dr. Toben was then arrested, apparently because his answer implied skepticism. Dr. Toben is currently in Mannheim prison in Germany. For more information: http://www.adam.com.au/fredadin/adins.html . Won't you write to the German government and ask that he be released immediately? For names and address of contacts: http://www.fpp.co.uk/Germany/addresses.html

* Canadian human rights activist and holocaust revisionist Ernst Zundel has been charged by the Canadian Human Rights Commission (CHRC) with spreading hate. In a shocking ruling, the CHRC said that Mr. Zundel could not use the truth of his statements as a defense! http://www.webcom.com/~ezundel/english/misc/attention.html and http://www.webcom.com/~ezundel/. (Late news: On April 13, the federal court of Canada quashed the CHRC "truth is no defense" ruling.)

* Best-selling British historian David Irving's writing career has been ruined because publishing houses have submitted to pressure and will no

longer publish his books. He is forbidden to enter a number of countries around the world.
Mr. Irving's crime? For ten years he researched the Hitler and German High Command archives and found no documentary evidence of the alleged Nazi extermination plan for the Jews. Then Mr. Irving had the intellectual integrity to publish, and speak about, his research!
Visit Mr. Irving's website at: http://www.fpp.co.uk/

* In Switzerland, J�rgen Graf and Gerhard F�rster have been punished with fines and prison terms for writing or publishing non-orthodox books concerning the treatment of Jews in WWII. http://ihr.org/jhr/v17/v17n4_Articles.html

* In Germany, Germar Rudolf, a chemist trained at the Max Planck Institute, took samples from the alleged homicidal gas chambers of Auschwitz to determine cyanide levels. He concluded that chambers could never have been used in the manner claimed. Mr. Rudolf submitted his report to more than 300 experts for their critique before he published it. Not one of them found the smallest error; nonetheless, as a result of his scientific findings, Germar Rudolf was criminally charged under Germany's repressive "Holocaust-is-a-dogma" law. He was sentenced to a prison term of 18 months. The report he wrote has been banned in Germany and ordered destroyed. Many people connected to its publication have been punished with jail terms and/or fines. German Rudolf and his young family live in exile. http://www.webcom.com/ezundel/english/debate/014_jam.html and http://vho.org/Authors/Germar_Rudolf.html

* French scholar Robert Faurisson is Europe's leading Holocaust revisionist scholar. He has been "condemned" three times in both criminal and civil legal proceedings in France, and physically beaten by thugs. A former tenured professor at the University of Lyons, he now cannot hold a teaching position because of his writings. See: http://ihr.org/books/kulaszka/30faurisson.html

* In Germany, American Carlos W. Porter was sentenced in absentia for publishing truthful but ludicrous excerpts of the Nuremberg Trial transcripts as they were reproduced by the Allies. Porter wrote to the German court:

"I refuse to be deprived of a basic right which belongs to everyone else in the world as a matter of course: the right to freedom of speech and freedom of the press. I retract nothing. I regret nothing. I fear nothing . . . If you fine me, I will not pay it; if you put me in prison, I will go on a hunger strike . . . I defy your authority and I refuse to comply with any order to do anything. I am not afraid of you; I fear the future if I do nothing. That is all." Visit the website of Carlos W. Porter at: http://www.cwporter.co.uk/

AND YET WE WERE TOLD THAT WORLD WAR II WAS FOUGHT TO MAKE THE WORLD SAFE FROM TYRANNY . . .

Body handling: Binary attachment payload not displayed: KA8TOK.vcf

WFM is Wide fm for fm stereo signals and NFM is Narrow FM and is for communications like police, fire, buisness, ham radio and so forth that do not require stereo signals to be transmitted.

Greetings

Up early today as I have decided to go down the road the odd couple of miles to Perdiswell Leisure Centre to watch "Jabba The Hut" (AKA Eddie Hoo Hah Cotton G4PQZ) bumping into things and people in his Everest & Jennings "Kerbcrawler", at The Three Counties Rally.

These self diagnosed quasi "disabled" people are getting to be a bloody nuisance everywhere these days, you can't walk round a shopping mall without some great "nutritionally challenged" buffoon bears down on you in their battery powered mobility cart.

The main purpose to vent my spleen on here so early in the day? well just a plug for the LPWS web site, for some reason last Wednesday was a record breaker for visits, no idea why though, lets send the hit counter off the scale today as well!

http://www.laughingpoliceman.com

I am reliably informed a new site is in preparation, although the current pages and numbers will be retained and added to, as major search engines seem to have indexed the entire content. I did a search on G0MAL and G8ASO and was directed to our pages for both.

Keep smiling, and see you in Worcester about 11.15 am, looking forward to warmly shaking Eddie "Hoo Hah" Cotton round the neck, only my hands are too small!

73s G8ASO

Re: 3.58 (specically 3.579545) MHz emissions
from the color burst osc in TV sets ...

Just checked this out with my *Emerson* 21" TV
set on - and for the record did get NOT the usual
"60 dB over S9" as produced by the other sources ...

These emissions may have been *a fact of life* back
during the days of those gawdawful *tube* sets - but then
they produced a wide range of 'noise' throughout the
spectrum - most notably every 15.750 KHz (monochrome)
or 15.734 KHz (color) through the AM Broadcast band up
into HF ...

I'm really looking for reports from someone who
has done actual 'legwork' like I have and tracked
one (or more!) of these signal sources down ...

Chuck - In my experience DF with mobile HF gear and
3.58 MHz:

Either A) all TV sets are off in my little city or
B) 3.58 emissions aren't really a problem anymore

Jim

David Castle, WA9KJI, is starting to sing!!

Seems that he claims he was urged and provoked into jamming 3950 by none other than AF2Y, Doc-Boy! It seems Doc urged David to jam the net, and told David that as long as he was jamming "Nazi's", nothing would happen to him. (The definition of Nazi according to Doc is anyone who is a Republican.)

I think its a good idea to approach David and Dorothy Castle about who supplied Dave the equipment for jamming. We all know they were as poor as church mice. And in no way could Dave have afforded all that beautiful gear! Let's urge David to tell us who gave him the gear, and we'll go to bat for him, and urge Hollingsworth to rescind the penalty against David, and instead, ask for the revocation of the licenses of the person or persons who urged him to jam, and supplied him the equipment to do it.

Jr.

I see. Someone is hired to restore order to what is supposed to be a privilege (the use of the radio bands) and he is labeled a bureaucrat?

I hate to tell you this Paula (or whoever is using Paulas newsreader), you were NOT born with the inherent natural right to use radiowaves as you see fit. The use of these frequencies are a governmental privilege granted to those who pledge themselves to act according to the rules and regulations that they promised to adhere to the day they signed their license application.

What I find truly amazing is that some people confuse amateur radio with free speech, which is totally oxymoronic. The signing of an amateur radio license application constitutes a diminishment of free speech because if it didn't, no license application would be needed at all.

Dont you think a lawyer of Riley Hollingsworth's caliber could make more money in the private sector as compared to earning a government paycheck? Get real.

As I see it, Mr. Hollingsworth is a very honorable individual given a very tough job and you should be thankful that people of his stature would serve the government.

> but we can freely disclose the truth here. heh heh.

We won't hear it on the hambands?? Maybe not now, since KT4TR received
his letter of greeting from Hollingsworth. Prior to that, these things
were trumpeted constantly over the air, repeated several times a day
for the past two years! A few guys were even singing songs about it:
"Bad Check, Bad Check, A-Watcha gonna do?" Hey, remember KT4TR's
Special Stumpjumper Christmas announcement from 1997? Guess what it
was? WB2OTK had an outstanding warrant out of Florida from 1983!

For someone who goes by the screen name plaintruth, you sure seem to
like to engage in deception. Here's a suggestion: If you expect anyone
to believe what you claim, don't open the discussion with an obviously
false statement. It damages your credibility.

Have a nice day!

The term 'DX' was originated by amateur radio ops.Others use it to
mean different things.The original meaning of DX is to make contact
with a station in another country.This is required to qualify for any
of the ARRL DX awards that many Hams persue.You can call a dog a cat
if you wish...it dosnt change the fact that its still a dog....:>)

Once again a procode fanatic suggests further fragmenting the
amateur community in an effort to retain an "exclusive club"
at HF, along with its entry hazing ritual, the Morse test.

Additionally, I doubt that 40k HF-licensed hams "would be
plenty to insure the safety of our below-30MHz frequencies."
(Though I'm sure that many of the procoders wish that there
were that little competition for space on "their" bands.)

Hello all,
This is the way I see it. Something has got to be done! The radio was getting way out of hand. I mean when groups of people would attack other groups and one gang of frequency thugs would gang up on another then the QRM would fly. So I thing tha government needed to intrude this time. The ARRL self policing was not working. The Service was knoking its self down to in some cases lower than the garbage on the 11-meter band. A person would complain to the ARRL and the ARRL would refer one to the FCC and one would complain to the FCC and they would refer you back to the ARRL. I know this because I did this on more than one occasion to report servral so called "ham operators" that where jamming in 1996, 1997, 1998. I went through this over and over again. Other operators that I know tried the same thing and got the same resaults. So what happened the jamming go worse. It had gotton to the level of people organizing QRM. The FCC had to do something. In fact ITS ABOUT TIME they did. People have been warned and warned and even caught and let off the hook. I can think of a case here in the Atlanta area where guys got caught organizing the QRM on 2 meters and went to 75 meters to conduct the activity. Hollingsworth reliezed in that case, the FCC hasn't done anything in the past about QRM (FOR YEARS the record shows it!), so he let them off easy with a warning. Next time these people get caught it could be a big fine or even loss of station license. So it looks to me that this guy might be fare. If it were me these guys would be completly off the air. So it a good thing that Riley is doing it and not me. In all honesty I wouldn't want Riley Hollingsworth's job. I cannot beleive that one guy can handle it all. I think that he should have more help with in the FCC. Weather you people know it or not Amateur radio and the people involed play a part in national security. So we have to maintain and enforce part 97 if we are going to have a amateur radio service at all. The FCC as let this area go for far to long. So I think that Hollingsworth is doing the right thing by warning leters and inspections.
thats just my opinion I could be wrong
73 from Oris

Will someone get this sick bitch off my tail? Carol,you ought to be making the bed and doing the dishes instead of E-mailing me about how hoaxy was the Holocaust and how evil are the Jews and all the rest of your Nazi crap. You think anyone with a brain is interested in such garbage? You're nothing but a revisionist jackal and your husband is very well known for his vile anti-Semitism. Do me a favor you pathetic excuse for womanhood-send your revisionist lies elsewhere. Go up to Canada and tend to Ernst Zundel if you're unhappy with Daddy Tommy. Persons like you are not only an affront to Jews, but to America in general. You talk about the "Holocaust" in Waco? You use that term to minimize and trivialize the plannned and augmented near-genocide formulated at the Wannsee Conference by some of your heroes such as Eichmann and Reinhard Heydrich. Koresh was an A1 screwball who murdered his followers by disallowing their exit from the compound. By holding them hostage, he thought he could go on forever thumbing his nose at the U.S, government but an unfortunate incident occurred that cost the lives of ATF men and those in the compound. No ATF or FBI agent or bigwig planned the extermination of that Waco compound as did the Nazis vis a vis European Jewry. You say that American Jews have thus far not been expelled from the U.S.A. but might be in the future. Like hell, you witch. Jews in America will flourish and contribute long after the likes of you are in hell. Here's a suggestion Carol... you and your meathead husband Tom stick your heads in your heads in an oven and inhale the gas until you're dead. Then have your neighbor toss a match to incinerate both of you and in fifty years, when mention is made of the incident, a whole group of revisionists like you will say,"What incident? They died of old age." AF2Y, Doc

Actually, at least here in Southern California, the 2M commute component of amateur radio is one of the most literate and conversational parts of ham radio. Very few formulaic QSOS: instead, genuine conversation, generally very civil, of a wide ranging and interesting nature. Not like the CW formula QSOs.

OK I'll say it: I think that the no-code amateurs, as a group, compare very favorably with the rest of the hobby. Just look at 10M: most of the activity is in the Tech bands. Why? Because we like talking with these guys, and there are a lot of them, and they are not all over age 65. RJB.

4890. Questions On Kenwood SM-220 Scope

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-24 00:00:00 UTC
From: Tony Heatwole <heatwole@shell.clark.net>
Message-ID: <nRj23.337$l7.5575@iad-read.news.verio.net>
Source record: 141730

Hello. I have a few questions about the Kenwood SM-220 Scope that I'm hoping some of you might have the answers to. Please let me know if you can provide any help on any of the following questions. Thanks in advance! The questions go as follows:

-What are the dimensions of the scope, and do you know of any pictures of the scope on-line?
-What type of power does it take (AC or DC)
-How does it connect to a Kenwood radio?
-What is the BS-8 Pan Adapter and what does it do?
-And finally, what exactly does the scope measure? I've heard that on RX it acts like a Spectrum Display (like those found on IC-781, IC-746, IC-756) and on TX it shows you the waveforms of your signal. Is any/all of that true?

Thanks for reading.

4895. SS Agents, Scanners and Cornwallis

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-24 00:00:00 UTC
From: mf_luder@my-dejanews.com
Message-ID: <7icnfbosg1@nnrp1.deja.com>
Source record: 141735
Cross-posted to: rec.radio.amateur.misc,rec.radio.policy

This adminstration's activities have included subversion of the Constitution and high treason vis a vis China. You didn't think that they got the initials SS by accident, did you ?

Cornwallis had his day, and their day is coming.

Friday, April 2 issue of NY Newsday newspaper, page A31.

Man Eavesdropped on Police / Agents say he posted cops' info on Web site

An affidavit from a federal agent found that Knipschild's Web site had 93 pages of police transmissions from March 12, which included criminal histories and warrants, motor-vehicle checks, medical information about victims, and witness statements.

>But that's how the media writes its articles.

Federal investigators said three satellite dishes, ranging in size from 18 inches to 12 feet in diameter, as well as a 40-foot radio tower were discovered on Knipschild's property.

>I might be a little rusty on my rules of evidence, but what the hell >>>does this gave to do with anything ? It's like his attorney saying "and >Secret Service agents attend a 'no niggers allowed' picnic in Virginia >every summer."

Calls to federal authorities seeking comment were not returned yesterday. Details about the disposition of the case were not available.

>Yes, because they don't have one.

Federal documents indicate Knipschild's Web site includes information of interest to electronic enthusiasts, with links to Web sites about scanners, satellites and dishes, and amateur radio.

>I might be a little rusty on my rules of evidence, but what the hell >>>does this gave to do with anything ? It's like his attorney saying "and >SS agents attend a 'no niggers allowed' picnic in Virginia >every summer."

Federal (stasi) said Knipschild used an illegal electronic device to intercept police communications. In a related case, the Secret Service have arrested a San Diego couple, Bill and Cindy Cheek, on a New York warrant charging they sold such illegal devices on the Internet tointercept police communications. The Secret Service said one of its undercover agents purchased a device from the Cheeks, who shipped it to New York. Details were not readily available

yesterday.

>I guess theere were no Chinese traitors to watch.

Mobile data terminals send and receive information by radio frequencies, which are encoded into a digital or binary format, one that is not available to the public. Furthermore, these terminals are password-protected.

>Not when they're traversing the ether. Don't you love the government's mouthpiece, the media ?

Two simple rules to save your ass

1.If you're questioned by Riley, declare yourself a card carrying Jew on the internet . This way, you can defend your license by declaring yourself a victim, while circumventing the fact you called African Americans niggers.

2. Take your lawyer's advice and begin posting an endless stream of blind praise for the feederal government and Riley in particular. That way, Riley will read it or your lawyer can send a printout via certified mail to prove you've repented.

Gentlemen,
I have a suggestion. lets quit all this petty bickering and name calling, threating a asswippin,and general embarrassment to Ham Radio.
I say all the cowards who hide behind the microphone and keyboard show up to the next ''BIG '' Hamfest let's say Shelby,N.C. meet out in the area where they show off livestock, a perfect place for some of you.
well rope off an area and let you all fight it out once and for all. that is the perfect way to settle most disagreements just have to make sure everyone is unarmed i.e. canes, walkers, dentures,guns,e.t.c.once all the dust clears we shake hands a act like gentlemen instead of an Embarrassment to Ham Radio.
I bet the folks in Shelby would be glad to supply the area for such an event.
Oh!!!! I almost forgot probally wouldnt work because there would be 2 class off people. THE ONES THAT ARE SCARED!!!
AND THE ONES WHO ARE GLAD THEY ARE SCARED!!!
not afraid to post my call. got my asbestos drawers on.....
73 to those who respect our great hobby.

What a silly argument!
Using a washboard is the second-most used method of washing clothes
after a washing machine, so lets require people to use washboards before
they are allowed to use a washing machine.

Why do people not delete all this crap before posting a reply? Why do
people have to use gay signature files?

Form 610 can say what it wants but our Constitution overrides this and
if taken to court would be rulled unconstitutional. The FCC backed off
enforcement in the 80s because of a free speech case it lost.

I do agree with your message though. We do not need this type of
language.

The paper is worth nothing because the constitution overrides it. The
FCC lost a case in the 80s over profanities and stopped enforcement
for many years because of it. This is not to say that I support foul
language but rather say that laws and regulations cannot take away the
protection the constitution provides us. I do think there are ways to
use the law to stop the profanities. The answer won't be found within
form 610.

You folks are clueless. Use train with the M16A2, otherwise known as
THE assualt rifle. Our qualification targets are out to 400 metres.
No one, except the Marines (and means their cooks as well), does
extenive
firearms training. Most of us shoot once a year in order to qualify.
This
means we get 40 rounds plus 9 to zero the rifle.

The focus is to use aimed fire (one round at a time). The A2 has only a
three round burst which is to used only at night (better chance of
getting
a piece of the opposing force). The SAW (M249) is used as the only
squad
level automatic rifle. The M60 is for company level and higher.

Gary, we don't use the M79 anymore. It was replaced by the M204
which mounts under the M16. We also have the Mk 19 which is an
automatic gernade launcher. It shoots 800 rounds per minute out
to 1200 metres. That is firepower! Used at squad level and with
the three man MP teams (one Mk 19, one M249 SAW, one M16/M204 and
one M16A2 plus each man has M9 pistol).

the
>late 60s, early 70s.
You had to ask..... Oh well. I'd hate for someone to think that a former football star is behind this crap, so here it is:

The Definition:
That's the wrong John Mackey. This one's only claim to fame is being the top off-topic poster on usenet with thousands of off-topic messages across several different newsgroups in his short but moronic career on the internet. A dejanews search reveals all about this clown, with such famous threads as "The PERFECT defense for Bill Cheek!!!!" and "Blake Bowers CAUGHT forging & flaming AGAIN!". It is his self proclaimed mission in life, if you can imagine it, to single-handedly rid usenet of anyone who opposes his warped and twisted point of view. He will do anything to support his cause and has been caught lying, forging, cancelling messages, and creating aliases to show a false front of support. He is a living breathing self propaganda machine, and a bad one at that.

Now, our pal John will deny all or most of this, but don't be fooled. Do a dejanews search for yourself, and see the sheer number of messages this person has posted over the years. Dejanews reported back 1562 messages in rec.radio.scanner alone. By my count, John has posted about 6 or 7 on topic messages (very loosely on topic) out of that amount. The rest of them were simply insults, name calling, or sniveling denials and "prove it" posts. He thrives on replies, no matter how insulting. I think it is a subconscious need for attention that he apparently cannot receive anywhere else.

Prior to usenet, he was on a Fido echo related to scanners, but was subsequently kicked off of the echo for the same kind of behavior, which he still denies to this day. Just ask him anything, he denies all. The consummate liar's liar. To hear him tell it, he is a victim of a ruthless bunch of cyberthugs who harrass and torment him daily, but in reality he brings it all upon himself willingly. He enjoys it, of this I am convinced. The only thing more certain than his desire to disrupt is his predictable replies to any posting mentioning either himself or Bill Cheek, the subject of his apparent obsession.

John is the proverbial pot calling the kettle black. He is the person depicted in Aesops' fables, the one who only sees the small bag representing the faults of others tied in front of him and not the mammoth bag of his own faults on his back. He will take in an insult today only to use it on someone else tomorrow. He is a mirror, a virtual parrot who uses the same tactics that others use against him. He is lacking in better judgement, discretion, logic and common sense.

Sorry to post it to the non-scanner related groups, but I think it only fair that you all know the real deal about Laughing John's Flying Circus.

The Vision:

The only reason that John exists is because of the actions of others. I have in the past and still today propose a simple solution: ignore him. Once he is no longer able to disrupt the group, he will finally move on. Do not reply to him directly, and he will have no basis for his attacks. He will appear foolish and meaningless to any and all who happen to read his ramblings. Much like a small child who finds that a temper tantrum won't deliver the goods, he'll find better ways to fill his free time. No doubt he'll reply to this posting in an attempt to provoke me into a flame war, but it won't work - I would much rather discuss things related to scanning than things relating to immaturity. It is my belief that if others shared my feelings on this (and many do) that John would someday soon find that the only one listening to John Mackey is John Mackey.

And that, fellow citizens, would be music to my ears.

-Phil

With great interest we have followed the adventures or misadventures - take your choice- of Riley Hollingsworth. Last week an obscure lackluster bureaucrat on his way to an uneventful retirement and this week the poster boy of amateur radio and the ARRL. Indeed, he seems to be superboy, found everywhere at once.

His purpose, which is being well orchestrated by higher bureaucratic authority, will not be addressed by us due to the attendant emotionalism of nonprofessionals. Suffice to say, Hollingsworth's handlers pretend to know what they are doing, but do they?

Before long, we believe Hollingsworth et al will run headlong into a constitutional minefield, and if navigated improperly, it will be their downfall. It could be the bureau's Waterloo and conceivably the commission could be sucked into the vortex of constitutional law as well.

The commission has dam few friends, if any, left on The Hill, after the debacle over implementing the 1996 Telecommunications Act. Plainly, Congress is fed up with the FCC and is in no mood for more incompetence.

So, pull up a chair, get a drink, and light your cigar as we watch ole Riley meander on. Hey Riley, have you and your buds drafted strategy for taking on Glen yet? You might win, maybe, but you, your handlers, and the ARRL will not come out of that fight unscathed. We know Glen and respect him. Misunderstood and disliked by some, he still is one tough little S.O.B.

Richard, M.B.A., Ph. D. and those degrees aren't worth shit in a good street fight!

Monochrome TV is refered to as a black and white broadcast. Black
is the absence of light, and the white is a high intensity of light
given off from the CRT.

The true defination of a monochrome CRT, is one with a single gun or
channel. You can have a single gun CRT with green or orange phosphor
as in the older computer monochrome screens.

> Monochrome would imply. Heck, even Black and White is two
colo(u)rs.

"Monochrome" refers to the CRT having a single electron-beam gun and
a single-color phosphor on the CRT's screen.

Mono = single.

Depending upon the CRT's grid voltage, the beam+phosphor can create
dozens
and dozens shades of grey.

> for many years because of it.

Pray tell what case was that?

It certainly wasn't the case involving David Hildebrand, N6BHU,
of Hollywood, CA who was a user of the "Hollywood repeater",
146.61 MHz which is the only high profile case to go to hearing
up to now.

The case had to examine (a) was the content "indecency" and
(b) did the Commission have the authority to make amateur
communications subject to the same reasonable time, place, and
manner restrictions as were set forth by the U S Supreme Court
in _Pacifica_ for broadcasting.

At the hearing level the Administrative Law Judge ruled
in the Commission's favor on both points. Appeal to the Review
Board (the first level of appeal) reversed the ALJ on the
question of authority, holding that _Pacifica_ on its face only
involved broadcast content.

The higher level appeal to the full Commission reversed the
Review Board and upheld the Commission's authority.

The penalty requested by the Private Radio Bureau was that
Hildebrand's license be revoked. The Commission found that a
monetary forfeiture penalty was more approriate on first
offense where there was no established case law, but
because such monetary forfeiture was not proposed as an
alternative in the original Order to Show Cause it could not
impose same _post hoc_. Thus, Hidebrand was put on notice that
further offenses would result in certain license revocation.

That doesn't soundlike the "FCC lost a case". The Hildebrand
case remains the applicable legal precedent because it was never
overturned by a subsequent case at the Commission or in the courts.

This case was not about obscenity, which has always been
unprotected speech under any circumstances.

In his pleadings, Hildebrand raised the same "free and common
speech" arguments as folks have been raising here to justify

such language, and it just doesn't wash, folks. Not at the FCC, and not at the Supreme Court (the restrictions in +Pacifica_ have been upheld by the courts including the US Supreme Court in several cases).

The FCC curtailed (never really stopped) enforcement because The Congress cut field enforcement money to the bone and a string of Chairmen didn't have the spine (I'm being polite) to request the proper funding and to pound the table and demand that it be put back in the budget. At the same time certain folks in the licensing bureaus (I'm not pointig fingers - every organization has these types) who would have had to do some work had the field bureau come up with the cases found the situation just to their liking. The rest of us found ways around both obstacles but the going was very narrow and the limited resources had to be pointed toward other things.

"Them days are over" now because the total amateur radio enforcement function (and Riley) were transferred to the field bureau which always wanted to do the work, and we see what is happening.

"I VAS dere, Sharlie....."

JPNOLL wrote:
> Please take your bickering to another newsgroup,
> as it is not wanted here!

You could not be more wrong, JACKASS!!!

You have illegitamately defined the basis and purpose
of the Amateur Radio Service as bickering. Please
read Part 97.1 (a) which defines the service for
emergency communications.

Carol Valentine is squarely on point with her information
about the illegal destruction of the amateur station at
Waco. Keep in mind that the Holocaust of the Davidians
took place inside an FCC licensed station operating under
provisions of Part 97.405 (Station in distress).

The FASCISTS bastards a FCC had their part in the
slaughter of Christians there, making this issue
even more important to the discussion within
rec.radio.amateur.misc. How can ops in the ARS
take orders from the FCC which knowingly violated
the Communications Act.

For the supporting evidence,
http://www.atlcom.net/~geozim/index.htm

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch,
engaged in a criminal coverup which is further protected by
a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and
purposefully supplied radio jamming equipment to the FBI and,
with reasonable assumption, to the US Air Force for the
purpose of jamming AM and FM radio broadcasters, TV
broadcasters and the Amateur Radio Service. The amateur
station jammed was defined as a Title 47, Code of Federal
Regulations, Part 97.405 Station in Distress, relaying
emergency communications critical to safety of human life.
As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of
Information Act, using an exemption of documents not
allowed under the list of exempted documents types.
Whereas, I have not posted details on this to the
website yet, you can read the 36 descriptions of

FOIA requested documents in the FOIA Administrative
Appeal letter. All of these are denied on the basis
that I have figured out what the nature and content
of the documents are, and the FCC does not want to
verify my logical, analytical and deductive work
that has narrowed down the documents almost to the
point of writting them myself.

Neither last nor least, but in closing on FCC criminality,
FCC is a criminal co-conspirator with FBI to classify
documents pertaining to the criminal operations of the
FCC and FBI. Such classification of documents for the
purpose of avoiding criminal prosecution is specifically
described as a criminal violation in any Executive Order
pertaining to such classification at the time of
classification.

Get the FCC out of the control business, contact your
Congressman, ask that he support Henry Hyde of the House
Judiciary Committee to convene a hearing into the
criminal coverup by FCC Chairman Kennard of the
criminal operations of the FCC and FBI and US Air
Force engaged in Communications Act violations.

Get the American Radio Relay League out of its
tyrannical misrepresentation of the amateur community.
Publish the fact that the ARRL board voted not to
reveal the criminal operations of the FCC and FBI.
What decent person would be a member of such
a criminal organization. If you are in the ARRL,
moral integrity demands you quit.

R E A L I T Y C H E C K ! ! ! ! ! ! ! !

Definitive data on the posting history of Toilet Boy (aka Mackey). Edited for the more salient point(s). Compelling nonetheless. This is data from last year, we can only speculate just how much more bandwidth the friggin loon has wasted since.

SNIP --- Data From Smally ----

I have nothing else to say except that, out of curiousity, I searched the archives at Dejanews to see how much John "contributes" to the group. I found some 13000 posts in all in the scanner newsgroups since he arrived. THIRTEEN THOUSAND!!!!!!!!!!! Yet the on topic posts he has made can be counted on one hand, with room left over. Case closed, folks. John Mackey is the problem. Guilty as charged.

I have done it folks. I have accomplished what I set out to do. I have proven what the Clown Prince of Scanning is really all about: A personal, neverending vendetta against Bill Cheek.

SNIP ------ Data From Kindricks ------

Date	Mackey	Cheek	Kendrick	Bowers	Vetterle	allsafe	K4CC
JUL 98	413	386*	6	32	28	75	234
JUN 98	413	502*	0	64	45	97	95
MAY 98	22	208	0	11	8	12	12
APR 98	194	128	27	41	25	12	0
MAR 98	254	240	49	24	50	18	0
FEB 98	200	274	51	27	46	18	0
JAN 98	173	178	35	1	33	33	0
DEC 97	149	227	32	0	16	1	0
NOV 97	63	65	1	0	10	0	0
OCT 97	48	60	0	0	8	0	0
SEP 97	181	78	0	2	4	0	0
AUG 97	29	2	0	1	2	0	0
TOTALS	2139	2348	201	203	275	266	341

Consider this point. Less than two dozen of the total posts by Mackey pertained to scanners or scanning. Approximately half of the posts

made by Bill Cheek were devoted to scanners and scanning. Now go back
and look at the numbers again. You do the math.

There are two major products that came out of Berkeley: LSD & UNIX.
We do not believe this to be a coincidence ....

Here's my dream. Does this even exist?

A program that works through Windows (*not* just one in a DOS box) that uses *any* sound card in Windows (*not* just one that uses SPECIFIC hardware calls to a CERTAIN type of sound card only) that will receive *and* transmit CW, and various digital modes (RTTY, ASCII, TOR, PSK, etc) *without* relying on external hardware.

Am I dreaming? Does ANYONE have such a thing?

Then don't become a HAM. The stupid code requirement will be the death
of HAM
radio. It is very unfortunate.

Yeah, right Lloyd, we're supposed to worry about the damned telephone companies when they're illegally "slamming" telephone consumers back and forth between each other. And how can they be losing money and going to the poor house when I've received three checks totalling $200 if I would agree to switch to AT&Ts' long distance service? Do your homework Lloyd and stop posting like a goof.

Hi, I took a very close lightening strike early this morning (thankfully not a direct hit). I feel asleep with my TS-850S/AT on and the result is predictably not good. I live an apartment, so the antenna it was connnected to was inside. The radio still functions, but the receiver is a different story. I have had a bad experience with Kenwood's service center in virginia beach, va and I'd like to avoid using them if possible. Any suggestions on where to get the radio fixed?
Thanks
Mike, who is also using the new modem he had to buy.

Reading though the postings I've come to conclusion that DoNkBoY has to be a wrestler with his flamboyant behavior and lack of proper grammar. I doubt if anyone believes or really even cares what he is eating, buying, or how much money he has. I think he's actually a single slob living in a travel trailer in Arkansas eating beans out of a can and talking on his BIG CB whenever he's not wrestling down at the local armory. What even worse he has the nerve to call the rest of us white trash. Someone get this boy a Grammar for dummies book!

Jason

DISCLAIMER: I have no problems with people that live in trailers and eat beans out of the can. Used to be one of em!

COOL, fellow shooters on the ham side of the 'net.

Hope I'm not intruding, but I gotta say something here. I've owned 2
mini 14's and 1 AR15 I use for competition highpower.

Out of the box, an AR will outshoot the mini 14 any day of the
week. Reliability, accuracy, ease in finding parts.

I'll agree with you a lot of the kit AR's are no good, but a lot
of that rests on the shadetree gunsmiths ruining parts. THe design is
good and it doesn't need tampering with.

Okay, my rant over, on to defending my radios!

Jon N0OFG

This is the biggest problem our troops face. They are not trained to
shoot past 200 yards. Anything beyond 300 meters is
in atrillery range or can be "dialed in" with their sights on their
M16A2 sights.

The only troops that train to shoot are the combat arms branches
and they don't shoot live ammo that much. Support troops may never touch
a rifle after basic training and guess who's getting sent to the
hotspots with their field kitchens, trucks and typewriters? The guys who
aren't getting small arms training!

I don't care what caliber they shoot, they gotta' hit their target.
BRING BACK THE KD RANGES!

<<<<ATTENTION...ATTENTION...I WANT TO ALERT YOU TO THE FACT THAT THE GUY WHO POSTED THE LIBEL ABOUT ME IS LIBELOUS! I WILL BE CALLING ATTORNEY LAUREN COLBY TOMORROW TO BEGIN LITIGATION. MORE THAN ONCE I TOLD DAVE CASTLE TO LAY OFF THE OVERZEALOUS REACTION TO THE ENORMITY OF LIES PROMULGATED BY THE KVETCHES ON 3.950. IN A LETTER SENT MONTHS AGO, I TOLD HIM OUTRIGHT THAT MR.HOLLINGSWORTH WAS NO ONE WITH WHOM TO TRIFLE. I TOLD HIM TO OBEY THE 3.950 CURFEW IMPOSED BY THE MAN. IN MY ESTIMATION, HIS LATEST TROUBLE WAS DO TO A CLEVER SETUP BY THE BEASTS WHICH DAVE FELL INTO. HOWEVER IF DAVE WRITES A SINCERE LETTER TO MR. H. AND SWEARS TO CEASE AND DESIST ANNOYING THE MORONS, MAYBE HIS PUNISHMENT WILL BE REDUCED? I CAN'T PUT WORDS INTO RILEY'S MOUTH AND WILL NOT,SO LET THE CHIPS FALL WHERE THEY MAY. THIS BUSINESS ABOUT DAVID "SINGING" IS AS PHONY AS THE BIRDBRAINS NESTED ON THAT FREQUENCY; DAVE IS MAN WHO WILL ACCEPT RESPONSIBILITY FOR HIS OWN ACTIONS WHICH IS MORE THAN I CAN SAY ABOUT A LOT OF YOU. I HAVE CONFIDENCE IN MR.CASTLE WHO HAS CONSTANTLY OVERREACTED TO THE THUGS BECAUSE OF HIS INNATE LOVE OF COUNTRY AND ABHORRENCE OF BIGOTRY. GOOD LUCK TO YOU DAVID AND GOD SPEED. DOC, AF2Y>>>>>>>>
WA9KJI, David Castle of Evansville, IN, who was suspended from HF for two years for jamming 3950 KHz, vows to "take others down with me". Mr. Castle surprised amateurs on 14.313 this past Sunday, as he stated that he was provoked into jamming 3950 by AF2Y and others, who assured him immunity from prosecution. It seems AF2Y assured Mr. Castle that it was OK to jam "Nazi's", and that he would help take care of any backlash. (Remember, Republicans are "Nazi's" according to AF2Y) Mr. Castle is very upset that he is being made "the fall guy".

Several Liberty Net members are discussing the possibility of a deal with Mr. Hollingsworth to get Mr. Castle's suspension reduced or rescinded, if it is proven that their was a conspiracy to jam 3950, and that Mr. Castle was coerced into jamming, and given state-of-the-art radio equipment in order to do the jamming.

State tuned!

Connect an antenna to your radio -- you'll hear that the HF bands are as
crowded as any time in our past. Those complaining about the code gather
here on Usenet; they really are a minority. Everyone else is operating on
the air.

Gentlemen,
Due to my expertise with my MAC computer, I now offer you something
to peruse which will shed more light on the flotsam and jetsam loose on 3.950.
I will endeavor to bring you even more conclusive proof of their involvement in
HATE IN AMERICA. But in the meantime,read the following as a primer. More to
come. Doc,AF2Y

The Police Officer's Internet Directory ï¿½ ï¿½ - ï¿½ï¿½ www.Officer.com
Home Page | Agency Listings | Police Employment | Police Supplies | Contact Us
Hate Groups, Terrorists, & Radicals
ï¿½ ï¿½ ï¿½ï¿½ This page has two sections, the first links web sites of the watch dog
organizations that monitor hate groups and such, and the second is links to the
actual web sites of the hate groups themselves.
Watch-Dog Groups
The following links are to sites that attempt to keep up to date on the
internet activities of subversive people and organizations.
Anti-Defamation League
Hate Directory Compiled by Raymond A. Franklin
HateWatch
ICT Terrorism and Counter-Terrorism
Ira Wilsker's listing of Terrorism, Anarchy, Hate Groups
J. Harmon's "Lame Links"
Jewish Youth Information League
Klanwatch and The Militia Task Force
National Security Institute's Counter Terrorism page
Terrorism Research Center
United States Information Service (USIS) Terrorism page
Yahoo's Militia Listings
Yahoo's Terrorism Listings
Yahoo's White Power Listings

Hate Groups
WARNING:The following links lead to web pages that are extremeley offensive.
Unless you have a legitimate, professional need to learn more about hate
groups, you should return to the main directory and not give the authors of
these sites the validation of your attention.
Please DO NOT contact the servers that host these pages, in an attempt to have
them removed. They are indeed offensive, but there are several reasons why
attempting to get these sites deleted is a bad idea:
ï¿½ ï¿½ ï¿½ï¿½1.) These type of people love that kind of attention, they think getting
censored off of a server gives them status amongst their fellow hate-types.
ï¿½ ï¿½ ï¿½ï¿½2.) These web sites are an excellent source of intelligence for law
enforcement.
ï¿½ ï¿½ ï¿½ï¿½3.) These people are protected by the United States Constitution. As law
enforcement officers, we have sworn to uphold the Constitution. Even people

with offensive, small minded views have the right to voice them.

>
> SNIP

Why snip out the issue at hand John-bowl? You snipped;

"VE test scores in exchange for money from applicants".

Are you guilty? You don't deny it. You just snip it and it goes away?

How much money did you take? What were you asking for? How many people did
you pass through that should not have?

>
> > Anybody know about this?
> >
> > I know John has made many false claims about many things but do you
believe
>
> SNIP

Why did you snip out "he would really take money to pass people?"
John-bowl???
No denial just a snip.

You did it?

> > John has lied on the net about his license status and other things but
>
> SNIP

and then you snip out "but would he stoop this low?" don't you? Afraid
somebody might answer it again?
Did you stoop that low. You are know by most all on these NGs as a fraud
after you 5 Fcc license thing. Gee, you sure got quiet over that one.

> So Glenn WHEN have I lied ???

Last lie was saying you have 5 FCC licenses. want more.
You lied that you would quit posting when Bill did.
You lied that you didn't smoke a repeater.
You lied that you didn't smoke a power supply
You lied saying you weren't kicked off Fido by both Cheek and you BBS operator.
You lied saying you didn't spew obcenitites on the Puget Sound 523 repeater.
You lied about your bedpan changing job.
You lied about your degrees.
You lied about your changing your name constanttly to get through mail/news filters.
You are a living lie John-bowl, it is all you have.
You just lie about most everything.

>
>
> A search of yahoo & dejanews shows NO such internet reports as you claim.
>

It was posted on this NG and many others the day I posted my original message. Just because you are too dense to use the net tools availble don't blame me. I'll repost it again for you if you like John-Bowl.

> That's pretty funny!!!! My mother died 6 years ago!!!!!!!!!!!!!!!!!!!

Prove it John. Hard to imagine anyone admitting to being even related to you John-Bowl.

> Once again you have proven your self to be a liar!!!!!

Because I post a question regarding another post? You haven't denied anything so it must be true.

>
> Did you ever find the young gay amateurs you were looking for to practice
> you homo acts on???
>

This last statement shows how desperate you are John-Bowl. Go troll you gay stuff elsewhere. Do you think bring up your old forged posts take the attention off your alleged VE payoff scam?

Not when they're a condition of employment, you don't have to work there.My complaint when I was subjected to such indignities was that alcohol was not tested, but it's one of the most powerful and debilitating drugs.

>at that conclusion?

No. That's why I used a vague term. After all, 87.3% of all
statistics are made up on the spot ;-)

However, if you'd like a qualitative experience, try talking to some
of the many folks on the phone bands of HF. They all had to pass a
code test. Ask them how much CW work they do. Ask them if they still
know the code. I'll bet you'll be surprised at the answers you get
back. While you're at it, ask them if they'd like to see CW kept as
an entrance requirement.

I've done just that at various times over the last 20 years. And I do
get answers just as I stated. I admit it's not a proper statistical
sample. That's why I used the term "many", not "most." Fair enough?

Where is the evidence to support this? I don't find it
in the Joint House Committees' report following the 1995
House Waco Hearings. Are you pulling this out of your
ass along with your other comments.

> No ATF or FBI agent or bigwig planned the extermination
> of that Waco compound...

So ATF and FBI were just cruising the countryside looking
for goats to screw, and happened upon the cottage of the
three bears. This follows well the obviously false story
made up by FEDGOV.

The following evidence shows that federal action at Waco
had nothing to do with the service of a warrant:

(1) ATF admission that they had no warrant to serve,
and no plan to serve it in the event that anyone asked
to see it prior to inviting the agents to come in.
(2) Nothing to support the existance of any lawful
warrant being generated prior to April 22, 1993.
(3) Photographic evidence showing that February 28,
1993 action was not a normal police operation. Never
in US police history was there any destruction of
an amateur radio station prior to the service of
a warrant. Check the evidence at:
http://www.atlcom.net/~geozim/features/station.htm

If not Jews and Zionist behind this action, then
for certain the New-World-Order, anti-religious,
anti-Christian, anti-American types of CIA's
MKULTRA and psycho-chemical weapons research
background working within Cult Awareness Network.
This is all very well documented for anyone wanting
to know who was behind the Waco (WACMUR) case. To say
that ATF-FBI had no intention of genocide at Waco is
to deny the clear evidence. Cult Awareness Network
operatives were the only real advisors prior to
the raid and during the siege.

Remember that Clinton replaced the Director of
Central Intelligence (President Bush). What an

opportunity for revenge, using his old CIA chums
to bait a sociopath in the White House to murder
a Christian community.

Guys, I have held my ticket (tech +) since 1974, I am now 60 yrs old and have attempted to upgrade to general four time in the past 10 yrs. Not being able to master the code, and with the influx of new hams into 2 mtrs and 440 I have all but lost interest in ham radio. The thoery has never been a problem but that darn code......

Last week I received an invitation to join the AARL with notice that they are promoting the Tech + to General via grandfathering them. Today, I joined the AARL only because they have opted to support this concept. I know that there numerous advanced and extra class people that do not support this but times must change. Just because I did something in my past, should I expect my juniors to follow my foot steps? NO. Open your eyes and make positive changes for your/our future. My concept of code is that it is and has been a declining art, if it's your choice to use code so be it. It just wasn't made for me. In that, so should I be restricted from using the HF bands? Why, when I know the thoery of radio electronics and the rules of the road.

Have a wonderful day.............

Can you please cite the regulations that prohibit amateurs from discussing these, or for that matter, any specific topics? I don't believe they exist. These topics, much to my delight, have often been discussed by amateurs, many of them quite brilliant men from whom I have learned a great deal, ever since I began listening to the amateur bands about 31 years ago.

In my view, while it's all right occasionally to discuss tame, trivial matters like the weather or signal reports or what the XYL's fixing for dinner, no conversation is more interesting than one involving the important fundamental issues of our lives. Among those important issues are politics and religion.

Of course, it takes a certain kind of maturity of mind and spirit to talk -- and disagree on -- such weighty matters without becoming offended or disturbed. But those possessing such maturity are just about the only people worth talking to anyway.

With all good wishes,

Kevin, WB4AIO.

4977. THE REPUBLICAN PARTY

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-24 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990524150728.02111.00006018@ng-ca1.aol.com>
Source record: 141817

Hams seem to think that the Republican Party is the one to belong to if one leans toward anti-Americanism. Now hear this you morons. I've been voting since 1960 and have cast more votes for Republicans then for Democrats. In '64 I voted for Goldwater because his was the right way to go to extricate oursleves from Viet Nam. If we had to nuke the bums, then so be it. In '68 and '72 I voted for Nixon because, although he was domestically doggy droppings, internationally, in tandem with Kissinger,top flight. In '80 and '84 I voted for Reagan because he was so good looking, he should have been in the movies. In '88 I voted for Geo.Bush even though Quayle was a definite minus. But then something rotten happened in America. The wonderful Republican party was undermined by the religious right-the image of the illustrious elephant became tarnished. That proud significant party, without its realization, somehow became the Jesus Party. Huh? Encroachment by the Christian Coaltion zealots ruined the image of that G.O.P. being mainstream-being for ALL the people. The association of Republicanism and Christianity was fostered by the nut cases and militia movement and the dangerous right wing to make people believe that Jesus and the G.O.P. couldn't get along without one another. Dangerous anit-government movements grew as a result of religious manipulation-thought control etc. And by listening to the ham bands, as Lloyd Davies does since he's too damn stupid to get a decent ticket, the malignancy was spreading. In 1802 Thomas Jefferson talked about how there should never be a state religion in America in order to avoid the religious wars that had engulfed Europe for centuries. In case you're interested, the real reason why England fought France and England fought Spain ad infinitum, was RELIGION. Catholics versus Protestants with the Jews caught in the middle of all the mayhem. Hams radio ops...stop being deluded into believing that Democrats are all liberal and are communists as preached by these screwballs. And don't believe that the Republicans will continue to be the pawns of the religious right. Once the G.O.P. waves goodbye to the zany religious groups trying to control it,and sets itself firmy in the middle, we will have a great Pres. race come Nov.2000. The only reason why the Dems.come across as the party that cares about us is because the Republicans have allowed themselves to be subverted. In those halls of Congress stand as many fine Republicans as Democrats and it's not myth.What is myth is that the Republicans are the party of Jesus and that if one is a Christian, one MUST be a Republican. Religion and politics don't mix in America although separation of church and state was only strongly implied but never written. Get with it, Democrat and Republican hams--see the light and stop squabbling. We have a nation to save. Religion belongs in places of worship while schools are places of learning.Doc,AF2Y

Outline
New Possibilities for Extremists in the Internet Age
A Web of Hate
White Supremacists
Holocaust Deniers
Anti-Government Groups
Email and Newsgroup Hate
Freedom of Speech Issues
Mechanisms of Opposition

Hate on the Net

The Nuremberg Files website serves as a prime case study of online extremism but does not reveal the tremendous scope of extremist usage of the Internet. Today, in addition to radical anti-abortionists, a wide range of other extremist groups, including hate groups of all kinds and anti-government groups, have taken to cyberspace. Though it is difficult to gauge precisely the extent of the extremist presence online, hundreds of extremist websites currently exist, and their numbers seem to be growing at an explosive rate.1

New Possibilities for Extremists in the Internet Age

Historically, extremist groups have used print media of all kinds, including pamphlets, magazines, newspapers, books, and posters as vehicles of propaganda. And extremists have never failed to exploit new forms of electronic communication. So, in the past, extremists have used broad-band and short-wave radio, audiotape, videotape, and cable television to push their views. The advent of online extremism in the Internet age was, then, a matter of course. Extremists use websites, email, and online forums to communicate with one another and disseminate propaganda.2
Through the use of such online facilities, some of the limitations of traditional media and real life encounters may be overcome. Through the World Wide Web, material can be published to a global audience quickly, easily, and inexpensively. In addition to text, sound, images, and video may be included to enhance the visual appeal and communicative capabilities of extremist websites. Facilities such as email lists, newsgroups, and other online forums allow extremists of similar persuasions to meet in cyberspace, thus defying the restrictions of geographic isolation. And online forums not dedicated to extremism provide the opportunity for extremists to unleash messages upon unsuspecting and largely captive audiences around the world. Due to the highly anonymous character of the Web and most online forums, online extremists can cast off the inhibitions which come with being personally linked to oneï¿½s words. Material which one would hesitate to seek out, order, or posses in the

real world for fear of public exposure can be anonymously accessed in cyberspace. Through email, extremists who meet in online forums may continue their correspondences in private, using cryptography to ensure security if so desired. And extremists can use email to anonymously threaten specific individuals.3

A Web of Hate

Today on the Internet, an astounding array of extremist positions find expression. In 1996, the Anti-Defamation League (ADL) published ï¿½The Major Vehicles and Voices on Americaï¿½s Far-Right Fringeï¿½ an extensive catalog of real world extremist groups and individuals.4 By 1997, almost half of the individuals and groups listed in the report had established themselves on the Internet.5 Considering the extent of online extremism led the ADL in 1997 to identify the presence of a ï¿½Web of Hateï¿½:

Well-known bigots and hate groups and publications the Ku Klux Klan, The Spotlight (house organ of Willis Cartoï¿½s Liberty Lobby, the largest anti-Semitic propaganda organization in the United States), incendiary neo-Nazi William Pierce and his National Alliance, as well as David Duke, probably Americaï¿½s best-known and most politically active racist are active on the Web. Holocaust deniers, peddling anti-Semitism through pseudo-history ... have been particularly eager to embrace this new technology. ... Militias, ï¿½common law courtï¿½ activists, modern-day secessionists ... are also using the Internet. Add to that a number of neo-Nazi skinhead and white-power music sites, Web pages operated by Identity ï¿½churches,ï¿½ those hate groups masquerading as religions, as well as a number of independent haters located in the U.S. and countries around the world, and what emerges is a Web of Hate, a nexus of extremist propaganda that pollutes the social and political environment.6
The summary of the extremist presence on the Internet given here is extensive but by no means complete. Types of extremism the ADL fails to touch on include the hatred of gays and various religious groups. As exploring all parts of the Web of Hate in any detail would be infeasible, three particular areas (which overlap to varying degrees) will be considered in what follows: those occupied by white supremacists, Holocaust deniers, and anti-government groups.

White Supremacists

White supremacists have established a very substantial presence on the Internet. In 1995 Don Black, a former leader of the KKK, created Stormfront, the first major white supremacist website.7 Today, many other racist sites not too dissimilar from Stormfront exist. Hence, Stormfront may be examined to reveal the nature of the large class of sites to which it belongs.
Stormfront includes a library of articles espousing social, political, and historical views consistent with the siteï¿½s general themes of hate and bigotry. The library includes such titles as: ï¿½White Power: Weï¿½ve Got It,ï¿½ ï¿½Equality: Manï¿½s Most Dangerous Myth,ï¿½ ï¿½Destructive Immigration,ï¿½ and ï¿½What World Famous Men Said About the Jews.ï¿½ In addition to this extensive collection of racist propaganda, Stormfront contains discussion forums with titles such as ï¿½Strategies and Tacticsï¿½ and ï¿½White Activists,ï¿½ facilities for joining Stormfrontï¿½s mailing lists, a calendar of upcoming events for ï¿½white patriots,ï¿½ a collection of white supremacist graphics, and an archive of audio and video

clips of public addresses made by well known racists. Additionally, the site includes an extensive list of links to hate-related sites and pointers to hate-related Usenet newsgroups such as alt.politics.nationalism.white and alt.skinheads. Stormfront also links to the websites of organizations from ï¿½The Other Side.ï¿½ Among these is a link to the Anti-Defamation League, which is characterized as ï¿½the oldest organization fighting to suppress facts harmful to ï¿½Jewish Interests.ï¿½ï¿½ In sum, the Stormfront site is suggestive of the incredible depth and breadth of white supremacy online.

Holocaust Deniers

One current extremist movement closely linked to white supremacism is Holocaust denial. Holocaust deniers claim that the accepted historical account of the Holocaust is false or inaccurate, a myth propagated by the Jews; they claim, in particular, that millions of Jews were not systematically exterminated by the Nazis. Today on the Web, numerous sites can be found containing propaganda pieces posing as historical analyses which invoke falsehoods, distortions, and fallacious logic in arguing for the Holocaust denierï¿½s story. The response to the questions ï¿½What about Auschwitz? Is there any proof that gas chambers were used to kill people there?ï¿½ found in ï¿½66 Questions and Answers on the Holocaustï¿½ from the Institute for Historical Reviewï¿½s website typifies the language of Holocaust denial:

No. Auschwitz, captured by the Soviets, was modified after the war, and a room was reconstructed to look like a large ï¿½gas chamber.ï¿½ After Americaï¿½s leading expert on gas chamber construction and design, Fred Leuchter, examined this and other alleged Auschwitz gassing facilities, he stated that it was an ï¿½absurdityï¿½ to claim that they were, or could have been, used for mass executions.8

The most overt danger of Holocaust denial on the Internet is the possibility that people might be deceived by the air of historical authority conveyed by revisionist propaganda found online and led to wholly or partially accept its claims. And, of course, Holocaust denial has anti-Semitic overtones offensive regardless of the extent to which the story of denial is believed. As the ADL writes, ï¿½...the Holocaust deniersï¿½ propaganda insinuates subtle but hateful anti-Semitic beliefs about Jews as exploiters of non-Jewish guilt, and as controllers of academia or the media.ï¿½9

In response to the emergence of Holocaust denial on the Internet, a number of sites have been created which give genuine historical accounts of the Holocaust and explicitly refute claims of the deniers. The Nizkor Project, for example, contains extensive documentation and analysis of the real facts of the Holocaust, direct refutation of holocaust denial, including the correct answers to the Institute for Historical Reviewï¿½s ï¿½66 Questions,ï¿½ and an exposition of the methods and tactics of denial.10 Another site dedicated to telling the real story of the Holocaust is the Holocaust History Project.11 In addition to numerous essays about the Holocaust, the site contains pictures and translations of primary documents from the Holocaust.

Anti-Government Groups

Anti-government ï¿½militiaï¿½ groups represent another form of extremism common to the Internet. Such groups often espouse elaborate theories of governmental

corruption, conspiracy, and crimes against the people, and anticipate the need for armed conflict with the forces of a government bent on depriving the American citizenry of freedom and constitutional rights. A passage from the ï¿½Militia Declarationï¿½ of the Minuteman Pressï¿½ website exemplifies anti-government rhetoric found online:

Should any Citizen be injured, or suffer loss of life, now or in the future, by unlawful authority, and/or without due process, or if any action is taken against any signer, their families, or any supporter of this Declaration, it will be considered an act of war against the Citizens of all States. We will then no longer restrain our brethren form the use of whatever force is necessary to eliminate the threat of unlawful federal enforcement authority.12
Not surprisingly, anti-government websites commonly reveal a particular interest in guns, explosives, and military tactics. The website of the Montana Unorganized Militias is a case in point.13 The site contains recommendations for the acquisition of firearms and munitions, instructions for fortifying the defenses of oneï¿½s house, links to suppliers of military equipment, and information about tactical warfare strategy. And, perhaps most disturbingly, the site has a list of ï¿½Lethal Linksï¿½ to pages which give detailed bomb-making instructions.

Email and Newsgroup Hate

Thus far we have primarily considered expressions of extremism conveyed through websites. One notable feature of extremism on the Web is that, by and large, one must do something special, whether that is typing in a known URL, clicking on a series of links, or using a search engine, to come into contact with it. Unsolicited extremist email, on the other hand, can be thrust upon an unsuspecting recipient who did nothing to seek it out.14
In one incident reported by the ADL, ï¿½58 students at the University of California at Irvine, mostly Asian-Americans, received an E-mail demanding that they leave the campus or, the writer warned, ï¿½I personally will make it my life career to find and kill everyone (sic) of you personally.ï¿½ï¿½15 Other email attacks have targeted far more recipients. For example, in the ï¿½Crusader Spamï¿½ attack of 1995, thousands of mailing list subscribers received anti-Semitic email messages just prior to Rosh Hashanah and Yom Kippur.16
It is sometimes possible to track down the perpetrators of email hate. For example, one Richard Machado was implicated in the incident at Irvine and charged with the commission of a hate crime.17 Technically savvy hatemailers, however, can escape detection through such techniques as forging email headers and using anonymous remailers. Despite efforts to find an electronic trail to the source of the Crusader Spam, the culprit in that case was never identified.18
Extremist propaganda attacks are also commonly directed at Usenet newsgroups and other online forums. By posting messages to newsgroups, messages of hate can be inflicted on a worldwide audience. Even if users refuse to read the body of such posts, the subject headers, often filled with racist slurs and typed in capital letters, cannot be ignored. As in the case of email, the extremist spammer can employ technical tricks to avoid being tracked down.

Freedom of Speech Issues

Much of the material distributed on the Internet by haters and other extremists would no doubt strike most people as utterly offensive, abhorrent, and despicable. Material admitting to the application of such descriptors, however, has nevertheless enjoyed the protection of the First Amendment. According to legal precedent, the First Amendment prohibits, with certain important exceptions, the suppression of speech based on its content. The absolute repugnance of the content of the speech in question has not been found to constitute an exception. As quoted in the ruling of a federal appellate court in the case of Robert v. Collins, ï¿½ï¿½Under the First Amendment there is no such thing as a false idea. However pernicious an opinion may seem, we depend for its correction not on the conscience of judges and juries but on the competition of other ideas.ï¿½ï¿½19
One notable feature of much extremist speech online is the advocacy of violence or other illegal activity. The question of the protection afforded such speech by the First Amendment was considered by the Supreme Court in Brandenburg v. Ohio. In this case the Court overturned a statute outlawing the advocacy of ï¿½ï¿½the duty, necessity, or propriety of crime, sabotage, violence, or unlawful methods of terrorism as a means of accomplishing industrial or political reform.ï¿½ï¿½20 The statute had been used to prosecute members of the KKK for advocating violence against Blacks and Jews. It was ruled that ï¿½Freedoms of speech and press do not permit a State to forbid advocacy of the use of force or of law violation except where such advocacy is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.ï¿½21 Given this decision, most of the advocacy of unlawful acts propagated by extremists on the Internet receives First Amendment protection. Of course, the fact that certain types of extremist speech are not protected by the First Amendment should not be neglected. Speech which meets the ï¿½imminent lawless actionï¿½ criteria of Brandenburg v. Ohio, though relatively rare, may be silenced by the courts. And, as in the case of the Nuremberg Files and the sending of death threats through email at the University of California at Irvine, threatening speech may be unlawful as well. See our legal analysis of the Nuremberg Files for a further discussion of ï¿½true threats.ï¿½

Mechanisms of Opposition

Given that the law imposes relatively few restrictions on extremist speech in cyberspace, the question arises of what non-legal mechanisms of opposition exist. One such mechanism is the regulation of content by Internet Service Providers, discussed in the next section. Additionally, parentsï¿½ may regulate their childrenï¿½s exposure to online extremism through the use of filtering software. A number of products are currently on the market which may be used to block access to sites and newsgroups with offensive or inappropriate content. Among these is the ADLï¿½s HateFilter which forbids access to sites which preach hate and directs users who attempt to access such sites to educational material on the nature of hate. Perhaps the most powerful means of opposing the influence of extremism online is the proliferation of information over the Internet which raises awareness about the tactics of online extremists and refutes their fallacious claims. The sites mentioned above dedicated to setting the record straight about the Holocaust epitomize this tactic. Whatever the case may be, it is clear that extremist groups have discovered and taken advantage of the opportunities provided by online media, and for the time being at least, are here to stay.

To refresh your memory, Jeff, I said CW is the third most popular
mode in ham radio. You said, no, it's the second most popular mode
on HF. That's true but I said nothing about HF. Both of our statements
are true. There is no argument.

Cool! We'll have a front-row seat in which to view the trashing of
the UK HF bands. That will lead to even stronger support for keeping
the current code requirements here in the US.

> It is for reasons like this that a Riley Hollingsworth or any other FCC
> enforcement officer is worth their weight in gold. A
> bureaucrat.....I DONT THINK SO!

Hello
Well what you have stated above is the hole reason there is a FCC in the
first place. That is why we have RULES! That is why we have frequency
allocations and that is why we have frequency standards, tolorances and
so on and so on. That is also why they need to be enforced. See what the
root of the whole problem is the FCC hasn't been enforcing the rules up
until just recently. This practice has been going on for five or six
years now. I think that is why the amateur radio problem has gotton to
be this big. CB radio has gotton even worse. It also is why when certain
people have gotton caught they where let go with a warning, and a
reminder that the feds are back. I assume that things on amateur radio
will get better and some heads will roll! As far as content of QSO's
well I beleive in freedom of expression to a point. We all have to be
reminded to have respect for women and children, and I think that WE all
have for gotton this. With equal rights and other things as good reason
why. We all have free speech and we all need to keep that right but we
also must remember the resonsablity that that right carries. So no we
can't yell fire in a full movie theater, No we can't stand on the street

corner and yell nasty words. But we should have the right to exchange ideals via ham radio. Where do we draw the line? Paul Segal W9EEA wrote a interesting Amateur code in 1928. When I first got involed with the internet in 1995 I noticed that there where allot of Amateur radio related web sights but non of them had posted the Amateur Radio code. To me that seemed to be a problem with the moral fabrick of the service. I have heard guys tell guys with weak signals to get a amp and "if they could not afford the hobbie then stay off the radio". What kind of crap is that? That could be some 12 yr old kid that just built his first transmitter and he is only putting out a couple of watts or worst yet some guy calling for help on a broken car antenna, wrecked in a ditch some where. So this is why we need to enforcment of part97 as well as the rest of the communications act. I also think in the exame, what ever level, there should be some questions on the amateurs' code. This is why we need to have guys like Riley Hollingsworth that will in force the rules! I just hope he enforces the rules with a open mind. Content should only be a subject for enforcing the rules when the subject matter or language is offensive. Community stantards would be the judge of that. Politics shouldn't be discussed BUT I think that should be left alone as far as the FCC is concerned. That goes double for religon. I also found it interesting to be able to ask ones opinion on a topic. I have to remeber my responsablity in asking such questions is that he might not agree with me so I still have to remember to respect that. Not easy is it? This free speech stuff is not as easy as youguys make it out to be, now is it? There are a whole lot of responsabilties tha come with free speech and I think we all forget that at times. So I think that we all need to give this thing more time. Time takes time! Don't quit before the mirical happens. Who knows we might had a good service after all or we all might end up off the air.
Thats just my opinion I could be wrong!

> >
> > Tinky winky
HMMMM
I would say that is unreasable search.Piss tests and hair samples are
unreasonable search. I just love how the war on drugs has destroyed the
bill of rights and the constitution. Lets see we have road blocks now so
that says we are all gulity till we stop and prove were innocent. Thank
you war on drugs. Lets see here if four or five of us are grouped
together and we have on the same cloths we can be arrested under the
Rico act, HMMMMM right to assembly down the tubes. Thank you war on
drugs.
All this gun control because the states say we can't spank are kids so
they really don't know right from wrong and they do something stupid
because they don't know anybetter because the state said we can't spank
our kids. They blame this on the aviablity of guns. In 1969 you could
have a gun mailed to you. When I did something wrong my dad spanked my
butt. Since all the gun control crime has gotton worse. They are working
no more guns. The right to bare arms GONE? Lets see here on ham radio
we aren't suppose to even talk about this, so there goes freedom of
speech. HMMMM My kid can't say a prayer in a public school because of
this separation of church and state so there goes her freedom of
religon. I would say that the so called war on drugs and the so called

bite out of crime has allowed the drug dealers and criminals to win! I mean we have no more freedoms because of all the new laws. It has changed this sociaty. So they win! Well I beleive that it will not be long before they start attacking freedom of the press. I mean the press appears to want a change to the bill of rights they say that its old and doesn't work anymore. The politcians want to go after these bomb web sights. First they tried to get porn and the supreme court said no so now they are going after the bomb web sights for the same purpose. So they can control the web. I love this one all to save lives. I read a post from a guy in here and I have never heard or seen it before and I'm thinking about adding it to my web sight. Ben Frankin has been quoted in saying that "They that can give up essential liberty to obtain a little temporary safety, deserve neither liberty nor safety."
Think about it.

Thats just my opinion I could be wrong!

In all your posts you seem to allways call people names. Nothing very
nice names I might add. Why is that? I call people names but not
everyone. Whats the deal there? Do you allways have to attack people on
such a personnel level. Ever since you have come into this group you
call everybody some kind of not to nice name. Doc I think you need help
I truly do. What is going to happen when you have no more crosses to
bare? Heck your Jewish you not supposed to have any crosses to bare. I
would think by not having a savior for lack of better terms I would be a
little more nice. Wouldn't you think so?
Just a thought

The facts of the NG "rec.radio.scanner" prove you wrong!!! I
suggesteda legal defense be started for him & VERY FEW people
responded. Then
another person started a legal defense fund & AGAIN very few responded.
BTW - If you read Bill's letters he HAS asked for contributions & has
stated that he
is having to resort to a public defender becasue he has no money to
defend himself!

> try asking people to help you with
> money for your defense fund.

I have done NOTHING that needs a defense & if I had I
have the resources to defend myself!

Bud, please present your proof that I have lied or be considered a liar YOURSELF!

>reading the newsgroups, that all the equipment that was seized, except for
>one computer, was returned shortly after the arrest. He also knows that

I NEVER said equipment wasn't returned!!! I simply the fact that much equipment
had been seized. I clearly stated the facts! Are you trying to "color" the facts?

>there are NO State charges filed, and no evidence that there ever will be,

I NEVER said that state charges were filed, only that state charges MAY be filed.
Now you have stated (regarding the filing of state charges) "no evidence that there

ever will be", please present your proof of this statement or are you just
SPECULATING
with NO SUPPORTING facts???

>as the Federal charges will probably be dropped before any trial, due to the
>law saying you CAN listen to any Law Enforcement or Government freqs that
>aren't scrambled, and digital encoding is NOT encryption.

He wasn't arrested for "listening". He was arrested for selling equipment
specifically for monitoring law enforcement communications.

Please Bud, in the future be factual & accurate with your statements rather than
procuding your own version of the truth.

```
======================================================================
"There are more things in heaven and earth, Horatio, than
are dreamt of in your philosophy."
Shakespeare's Hamlet
======================================================================

Once i read a biography on Tesla and his work and stumbled upon an acount
of strange earthquakes that were connected (anocdotally) to some
experiment that he was working on. After reading about this i locked it
away in the laberinth of my mind. Years passed by and then more
information trickled in about teslas "earthquake machine". I worked hard
on my physics degree and a simple question about gravity became a
trigger. I recalled what little i knew about tesla and his work on
gravity. Now i seek more information on what went on here.
Any information will help!!

Please send replies directly to me at:

Gang,
A few days ago I received a phone call
from a stranger in the locality (i.e. PA-land)
who asked my advice about how to install an
amateur hf transciever in his yacht, anchored
in the Carribean. He told me that he wanted to
use the radio to keep in touch with friends.
He also told me he had no amateur radio
licence, but went on to say that it did not
matter, because 'it was allowed in America'.
I was very surprised to say the least.
Can anyone stateside tell me if there
is a widespread, uncontrolled, abuse of the
amateur radio bands in Region 2 by unlicensed
yachtsmen?

5017. Pointer to Ham Radio FAQ

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-24 00:00:00 UTC
From: wd1v@amsat.org
Message-ID: <wd1v-2405990627020001@wdonev.ne.mediaone.net>
Source record: 141857

The Amateur Radio Frequently Asked Questions (FAQ) List, formerly maintained by Diana Carlson, KC1SP and Ian Kluft, KO6YQ, has recently been resurrected by John Seney, WD1V. The majority of the original content of the FAQ remains the same, but now it's a hypertext document with thousands of links to radio-related sites and is a significant resource to all students of amateur radio - regardless of their license status. It may be accessed as a WWW Page:

http://people.ne.mediaone.net/wd1v

Please direct any submissions, feedback, or administrivia regarding the FAQ to wd1v@amsat.org

For those of you not ARRL Members, here's the latest off the pages on their WEB EXTRA. This one marks the beginning of the end for Victor the Miser and his band of crazed anti-American animals.
Happy reading.....Doc,AF2Y
HUDSON, NH: The FCC has asked a net control station of the Liberty Net on 3950 kHz to justify the net's use of Amateur Radio frequencies. Via Certified Mail May 7 to Extra class licensee Victor A. Misek, W1WCR, FCC Legal Adviser for Enforcement Riley Hollingsworth said monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." Hollingsworth said that such operation "is considered deliberate interference and cannot be tolerated on the Amateur frequencies." Hollingsworth pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," Hollingsworth wrote. He suggested The Liberty Net explore operation on the Internet or seek a low-power FM broadcast grant if that service is authorized. Hollingsworth reminded Misek that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services.'" He also pointed out that Part 97 prohibits broadcasting. Hollingsworth invited Misek to contact him to discuss the matter.

Kenwood TKR-820 Desktop Repeater with Internal Cel-Wave Duplexer.
Therepeater is a 2-20 watt commercial unit. The power supply is built in
and also has a 12VDC input for emergency automatic backup power. The
repeater has a CW ID installed. There is also a Full Duplex CS-800
Interconnect/Repeater Controller which is wired to plug into the accessory
plug on the rear of the repeater. Currently the repeater is programmed for
444.500 / 449.500. The repeater can be setup to operate from 8 different
CTCSS or DCS codes (can be mixed). The TKR-820 is type approved for
GMRS, Commercial, and Ham. The repeater is the same size as a Kenwood
TS-850S HF rig. It is about a year and a half old and is currently in
service. I also have 1 new and slightly used (2 months) TK-860 UHF - 32
Channel radios with CTCSS and DCS for sale. I also have a DTMF mic for one
of the TKR-860s. Also have 2 UHF Kenwood TK-350 (With DTMF PAD) and 1 VHF
TK-250 Hand-Helds (160 channel) with new NiMH batteries. All of the
equipment is in good working order and looksnew. I can program the TKR-860
radios to any channel setup required. I will discount for a package sale!
Email NO-SPAMwb5tty@vvm.com for prices on selected or package items. DROP
NO-SPAM from email address!

Normally I do not take the time to read things posted by RADIOSIGS and some of the other "rebels" on this news group. Most of it is "drivel" and unworthy of my time.

This posting is an exception to that. It points out a very threatening ruling made by the FCC and affecting our use Amateur Radio. We all should take close notice of this.

To this point in time, we as Amateurs have had the freedom to chat among one another on just about any subject we wanted. I do not agree with what those on the Liberty Net talk about and because of that I do not tune in that frequency and listen. I can not understand anyone who thinks the way some of them profess to think. I often wonder if it is nothing more than a put on for the attention they lack in their lives. If the FCC has the right to require them to justify their subject matter and use of the frequency then they have the same right to question everyone eleses right also. Can we no longer disagree with what our government is doing and express our opinions on the radio? Can the FCC find no other rule infraction that they have committed?

It might be different if I had to listen to them, but I dont. I can tune somewhere else or turn it off.
I have the same freedom with my TV, Telephone, and short wave receiver.

I am talking about the FCC controlling what we talk about on our radios. Not interference, foul language, bad manners, excessive power, broadcasting, or any other of the many rules that the FCC can enforce if they would. Is the day coming that we will get a OO notice for discussing religion on the radio? We have taken GOD out of our schools and we are now reaping the rewards of that bit of wisdom.
It bothers me that the FCC seems to be acting just on the bases of their subject matter.

So herein lies the problem.... How can a nation give it's citizens the freedom of free speech but keep subversive groups from spreading hate and misinformation with it.

I dont know the answer.... but I do know that we are losing our freedoms little by little because of these groups that use them for the wrong reasons.

WA9KJI, David Castle of Evansville, IN, who was suspended from HF for two years for jamming 3950 KHz, vows to "take others down with me". Mr. Castle surprised amateurs on 14.313 this past Sunday, as he stated that he was provoked into jamming 3950 by AF2Y and others, who assured him immunity from prosecution. It seems AF2Y assured Mr. Castle that it was OK to jam "Nazi's", and that he would help take care of any backlash. (Remember, Republicans are "Nazi's" according to AF2Y) Mr. Castle is very upset that he is being made "the fall guy".

Several Liberty Net members are discussing the possibility of a deal with Mr. Hollingsworth to get Mr. Castle's suspension reduced or rescinded, if it is proven that their was a conspiracy to jam 3950, and that Mr. Castle was coerced into jamming, and given state-of-the-art radio equipment in order to do the jamming.

State tuned!

Jack.....Of All Trades

International Morse Code was developed to bridge the language barrier not create an exclusive club. If you think that you are misaligned in your thinking. The reason it is a requirement is because every other country in the world has the same requirement and it is needed to comply with this issue. look it up.

blesses those
> who bless His Chosen and curses those who curse them. And why is it
that
> between all the expulsions,persecutions and mass murders, the Jews
have
> survived and enriched the world with their influence?

Enriched the world, you say? Using as a guide their holy book, the Talmud, no doubt? The Talmud is an evil document, it has an evil history, it carries an evil doctrine, and it has shaped an evil culture. Do try to explain to us how, and in what ways, according to you, this evil culture has enriched the world.

>Because they are
God's
> chosen people.

Oh, right. I guess this _must_ be true, because the Chosenites themselves tell us so. And they wouldn't lie to us about a thing like that, would they?

>And so people like Carol Valentine and her followers
>can rant
> and rave and accuse 'til the cows come home-you will only be able to

company are
> wormfood, the Jew will be in tact and always prepared to enrich this
world with
> great things to come. We are quite a remarkable people if you stop to
think of
> it

Ah-, so it's "we", now, is it? So you, sir, are yourself of the Chosenite tribe? Now the cat comes out of the bag. And you have come here to do us a favor, by telling us just how superior you are to us goys?

Well, now, Mr. Chosenite, you must certainly know a thing or two about the Talmud. Supposing you start by explaining to us the Kol Nidre? To refresh everyone's memory, a few posts ago Ms. Valentine wrote as follows:

<begin citation>
And what does the Talmud say about the obligation to tell the truth? Why, the Talmud sanctifies and institutionalizes false swearing, or lying.

"And he who desires that none of his vows made during the year shall be valid, let him stand at the beginning of the year and declare, 'Every vow which I may make in the future shall be null.' HIS VOWS ARE THEN INVALID, PROVIDING THAT HE REMEMBERS THIS AT THE TIME OF THE VOW. " (Caps in original.) A footnote describes the "Kol Nidre," a formal dispensation of vows prior to the Evening Service of the Day of Atonement. (Nedarim, 23a; pg. 68 of Soncino Press 1936 edition.)
<end citation>

With an abomination like the Kol Nidre an integral part of your culture as a Chosenite, authorizing you to bear false witness especially to goys, please tell us: why should anyone believe a single word you say? How can anyone ever know, whether or not you're lying?

>-if you use your head instead of biased hearts-if you understand
>some history
> and philosophy. I really feel sorry for anyone who keeps a chart of
the
> expulsion of Jews. All you're proving is how ignorant and biased
historical
> illiterates can be.

Historians, including Jews, keep such "charts". So now you think that proves historians are "ignorant and biased historical illiterates"? They should just ignore any data you don't approve of? Mister, you sure live in a bizarre world. I suggest you go see a doctor.

>Doc,AF2Y and a P.S. Chetley you are all bigfoot

Let's see -- there is no skill test for V/UHF, so you must be referring
to HF, yet, in further along in this thread, you say:

>Seems you consider it proper to twist my words into trying to
>convince others that I said "HF" when all I said was "ham radio".
>Why is it OK for you to twist my words to suit your agenda and
>not OK for me to correct the error that I was even talking about
>HF? Are you saying vhf/uhf is NOT part of ham radio?

Make up your mind, Cecil. We'll gladly delete the skill test for
V/UHF, if that's the region you're referring to in your earlier post.

I have seen it all with HRO. Sometimes they are good but I heard many horror stories. One favorite of mine is a Ham named Fred who purchased a MFJ TNC. He hooked it up and 1/2 of the functions did not work. He returned it and they stuck him with a 15 % return fee even though he claimed the unit didn't work. Then one week later Fred gets a call from a
guy named JOE who also purchased the same exact unit from HRO. It appears Fred left his business card in the Operator manual as a bookmark and HRO simply repackaged the radio and sold it as new. The new owner also couldn't get the TNC to work either and when he returned the TNC HRO denied ever doing it and it is their policy not to sell used or opened equipment as NEW. I think the real HRO policy is NOT TO GET CAUGHT is they can. They did.

My master? George, aren't you the one who, on 20 meters, would frequently say "Herbie's Number one" without giving your callsign? You are awful quick to pin the "suck boy" label on others, considering your worship of KV4FZ.

QRMing? How ironic to be accused of that by the guy who, until the arrival of Mr. Hollingsworth, would QRM on 20 until the band died, then move to 75 and jam until 10 pm or so! Gotta hand it to ya, George, you do blow a mean harp. Too bad doing it on the ham bands doesn't make you any money. Such a waste of talent.

Who cares what WB2OTK or his family members might have done. Who cares what's on his credit report? So what if, as you say, it's all true? If it is, one has to wonder why he has managed to escape prosecution on this felony warrant for the past 16 year in spite of the best efforts of your band of misfits.

As for your "threat", we both know if you had anything you'd have already posted it, instead of repeatedly making these implications. Again, I'll make a suggestion: Due to your credibility problem, be prepared to back up your accusations with something tangible. Recall that I told you that everything you post here becomes written to history, and that it leaves a trail. It would be in your best interest to make sure that you cross your "Ts" and dot your "Is".

Have a nice day!

I AM AN EXTRA WITH THE CALL AF2Y WHICH STANDS FOR "ALWAYS FRIENDLY 2 YOU". THE FCC ISSUED THAT CALL BECAUSE THEY APPRECIATED MY BENEVOLENT AND PUSSYCAT NATURE TOWARD MY FELLOW HAMS. THAT EXTRA DENOTES SUPER PROWESS IN THE FIELD OF AMATEUR RADIO WITH MY ONLY WEAKNESS BEING IN THE AREA OF ELECTRONICS. I ALSO MIGHT SAY THAT I HOMEBREWED(DREW,SKETCHED) MY QSL CARD WHICH WAS AWARDED IN 73 MAGAZINE,IN THE '80S, THE CARD OF THE MONTH. I WAS GIVEN TWO BOOKS AS MY PRIZE,ONE OF WHICH DEALT WITH THE FIELD OF ELECTRONICS SINCE WAYNE GREEN ALL TOO QUICKLY REALIZED THAT MY MAIN AREA OF WEAKNESS IN AMATEUR RADIO WAS IN ELECTONICS. I AM A MASTER OF CW, BEING ABLE TO SEND 100 W.P.M. WHILE ABLE TO COPY 7. AND THE CLOUDWARMER, TO THE UNWASHED UNINFORMED MULTITIUDE, IS THE BEST WIRE ANTENNA POSSIBLE AND I THEREFORE URGE YOU TO SEND ME AN S.A.S.E. FOR A FREE INSTRUCTION SHEET. IF I COULD BUILD ONE, YOU CAN TOO, SINCE EVEN WITH MY GREAT WEAKNESS IN ELECTRONICS,I HOMEBREWED ONE AND GOT THE SVRW, I MEAN THE VZWR...OH CRAP..I THINK IT'S SOMETHING LIKE AN SWEAR, DOWN TO A 1 TO 0 WHICH REFLECTED THE FINAL SCORE OF THE YANKEE GAME YESTERDAY. AND LASTLY I EMPHASIZE THIS POINT:THE CLOUDWARMER IDEA WAS FURNISHED BY ONE OF THE FINEST HAMS TO EVER HOLD A TICKET, THE ONE AND ONLY WB2OTK, RICH WHITEN, WHO HAS MORE ELECTRONIC EXPERTISE IN HIS LITTLE FINGER THAN YOU BIRDS HAVE IN YOUR NUMB SKULLS. THANKS FOR YOUR KIND ATTENTION. AF2Y,DOC.....
All this coming from Dr Hate, AF2Y a man who told the whole world that Duane Jacobson WB9BCC received the medal of honor. (with out checking the list, mind you, and Duane was the bravest man on amateur radio. All of this was pure BS. Just the product of these sickos demented minds. All the time trying to aggrandizing theirselves, inventing antennas, putting out little jack rigged books on vertical antennas. bragging on and on. phewy!!! the stench from these skuz balls is unbearable.

I see. Someone is hired to restore order to what is supposed to be a privilege (the use of the radio bands) and he is labeled a bureaucrat?

I hate to tell you this Paula (or whoever is using Paulas newsreader), you were NOT born with the inherent natural right to use radiowaves as you see fit. The use of these frequencies are a governmental privilege granted to those who pledge themselves to act according to the rules and regulations that they promised to adhere to the day they signed their license application.

What I find truly amazing is that some people confuse amateur radio with free speech, which is totally oxymoronic. The signing of an amateur radio license application constitutes a diminishment of free speech because if it didn't, no license application would be needed at all.

Dont you think a lawyer of Riley Hollingsworth's caliber could make more money in the private sector as compared to earning a government paycheck? Get real.

As I see it, Mr. Hollingsworth is a very honorable individual given a very tough job and >>

The Mt. Carmel Center had a ham radio station. It was apparently taken out before the February 28, 1993 ATF raid by an undercover agent on the inside.

http://www.public action.com/SkyWriter/WacoMuseum/war/page/w_d.html

Read the section toward the end about the ham radio tower.

BTW, notice the radiosig's beloved ADL (and other "Never Again" type Jewish groups) have not demanded that the killers of the Branch Davidians be brought to justice and prosecuted . . . Only Jews matter to these folks. The rest of us are dirt, just like it says in the Talmud.

===

* If a Jew murders a Gentile, the Jew suffers no death penalty.
(Sanhedrin 57a., pg. 388)

* if a Gentile strikes a Jew in the jaw, the Gentile, having stricken the "Divine Presence" (that is, a Jew) suffers the death penalty.
(Babylonian Talmud, Soncino Edition, London, 1935.Sanhedrin 58b, pg.388).

5054. A Moderated Amateur Radio Newsgroup...Please?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-25 00:00:00 UTC
From: rfenforcer@aol.com
Message-ID: <19990525174318.17929.00003587@ngol07.aol.com>
Source record: 141529

In a previous thread, Jeff in Hawaii mentioned the possibility of creating a moderated newsgroup. Is this possible?

I'm certainly not the only one here who dislikes having to wade through about 90% "trash postings" (personal vendettas, libelous statements, Internet text versions of 75-meter phone arguments, etc.) in order to read the 10% (or less) of useful information related to amateur radio which is contained in this newsgroup.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

5055. REQUESTS FROM AF2Y

Can someone assist with the following. Firstly, I need a copy today's post by the ex-wife of WB4AIO who does an excellent expose of him as well as his right wing crazed buddies. Secondly will someone tell me how to keep this loony, Lloyd Davies,N0VFP, out of my mailbox. I told the turd to stop corresponding since I could get just as much out of it as if I corresponded with a second grader. He is constantly leaving threatening notes. Can I E-mail AOL or would it be better to somehow automatically and electronically stop him from getting through? I never thought I'd see the day when I might have to electronically prevent harassment but this guy is a psycho. He and that Stinson boob from Texass are like two peas in a pod. Both wackos of the highest magnitude.Incidentally I have been informed that the Southern Poverty Law Center headed by the magnificent Morris Dees has been apprised of the ungodly situation involving hate on amateur radio and my best guess is that the S.P.L.C. will get involved in the 3.950 situation as well as other areas of orchestrated hate, anti-Semitism,white extremism and Holocaust denial. Thanks for your attention and hopefully I'll get positive replies to both of my queries. Any wise guy replies will be ignored, so save your effort, nitwits. AF2Y, Doc. Please reply preferably by E-mail to radiosigs@aol.com or via this fantastic messasge board.

5056. Help - Mobile Phone modifications

I would greatly appreciate if anyone has information on mobile phone
modifications/programing. Particularly Nokia 101 and Motorola 7500.
We are working on a project that requires mobile transmitters used for fault
alarms on remote industrial equipment and would like to be able to set up
various mobile phones as transmitters with the receiving mobile set up on
scan mode to monitor each of the transmitted alarm signals. The analog data
then will be fed into a computer for alarm trending.

Any help tips or references would be appreciated.

Regards,

Alf

Subject: THE EASY WAY TO MAKE IT!
From: radiosigs@aol.com (Radiosigs)
Date: 5/25/99 5:25 AM Pacific Daylight Time
Message-id: <19990525082522.19946.00004743@ng-ft1.aol.com>

You know fellows, I've been doing some serious contemplating. Although I'm an Extra and did it the old fashioned way by EARNING it. I still felt that perhaps the reduction of code requirements to get in, at least to some degree, had some merit. But after reading the garbage, the bigoted garbage and lies coming from the Code Free Tech blivot, Lloyed Davies, N0VFP,I chaned my mind. Better this oaf be OFF the General, Advanced and Extra portions since he'd disgrace all three. I say let him bask in the glory of a wussie ticket whole keeping his miserable mouth off the bands where REAL HAMS GO! Doc,AF2Y

You will have to learn the code and some electrical theory
You can get a US license in any town.
Go to Radio shack and buy the general Class manual and code tapes.
Practice the code EVERY day for 15 minutes 20 if you like, and after about
2-3 weeks, you will be able to pass the test. Don't let anyone tell you
that the code is difficult, because it really isn't. Anyone can learn it if
they have a desire, and I mean anyone.

Steady winds and smooth sailing to you!

I think I hear you saying that fun can be had above 50 MHz, but the pickings are too slim to justify maintaining the equipment. If that is the case, I can easily agree with your lament. For what it's worth, I worked hard to escape the shackles of the Novice/Tech+ HF bands as quickly as I could.

In QSO with a Fiji ham, he let on that they have no Novice class. The lowest class license they have requires 15 wpm and a General level theory exam. I mean no sarcasm when I ask this: is it better to have VHF frequencies and above only, or none at all? I realize there are many differences between the Fijian environment, and our local airwaves.

Michael.

And how long have you been a ham?
It didn't take me very long to realize 23 years ago, when I was a ten year old novice, that the name ham really came from the sqeeling noise that most hams make when gossiping about one another. I just learned that that was the way some guys are, and that I could enjoy the hobby by just filtering out the riff-raff. That's one reason I am a code only operator, but it exsists there too to some degree. Sometimes I get a chuckle from some of the ignorance out there!

What advantage would a "mobile phone" have for your application ??

It would seem to me that if you are scanning in order to pick up
the transmission, that a mobile phone is not needed. Do you
want the mobile phone to actually dial a phone number when
a fault is detected ??

When you say mobile phone, do you in fact mean "Cellular Phone" ??

If not, then perhaps a Motorola R-Net data radio unit, or a
Varda alarm would better suit your purpose..

Kantronics also makes telemetery equipment based around their
packet radio controllers.

Just my $.02 :-)

5076. Getting a HAM licence for e-mail

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-25 00:00:00 UTC
From: justin_and_deb@my-dejanews.com
Message-ID: <7ie9dl$r7g$1@nnrp1.deja.com>
Source record: 141626

I have a yacht in the Caribbean that I'm about to
sail to Australia on. I have a SSB with Ham
frequencies & a PC. All I want to use the Ham
for is sending personal e-mail to friends &
family to stay in touch. Currently I'm in the
USA (I'm actually an Aussie) and I'll be here for
another month before getting back on my yacht.
What type of Ham licence do I need? Can I get it
in a month? Is it possible to get the call sign
I need without learning morse even if I'm willing
to pay for it, then learn morse once I have the
time (once I'm cruising again)?
I'm really pushed for time right now but would
like to get the e-mail system going as soon as I
get back on the boat.

I don't know the INTERCON story, so can't come down
one way or the other on that specific point, but the
illustration of the flaws in the FCC position make this
an outstanding letter, casting the pure light of reason
on the irrational duplicity of the federal government.

Sadly, since it doesn't fit the currently fashionable
political climate of cursing logic and blessing lunatics,
it will likely go nowhere.

Should be preserved for us in
the upcoming fights in the courts, though.

Phil, I actually enjoy reading your posts because they're
informed and reasonable. I'm not a lawyer, so don't
always have complete information. Do you know the
circumstances that let Stern and his ilk off the hook with the FCC
several years ago? Was it that they reached a compromise
that he would limit his nasty talk and they wouldn't push further?

My personal beef with the commission is the appearance of
enforcement based in part on the political content of speech,
rather then actual violation of the regulations.
So the issue of obscenity isn't my hot-button.
But I'd like to hear how that issue actually went
from someone who knows what he's talking about.

5086. Oregon Callsign License Plates

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-25 00:00:00 UTC
From: Bob Williams <n7int@integrityonline.com>
Message-ID: <374ab06a@205.238.18.7>
Source record: 141636

Greetings,
To fellow Oregon hams out there, I have a question. Has anyone managed to get callsign plates on the Tree background plate, rather than the basic yellow plate? DMV says all I can get is yellow, while people have told me they've seen call signs on Oregon Trail and tree plates. How can I get the good ones?
Replies direct, please, not to the newsgroup. Thanks in advance.

73,
Bob Williams, N7INT
Hillsboro, OR U.S.A.

If God wanted me to studder he would have made me that way.

Pappy.... If GOD had intended for us to run around naked we would have been
born that way.
So much for what you think GOD intended.

AS for the Morse Code requirement keeping you out of Amateur Radio.......
It just aint so.
If you want it bad enough you will do what it takes to get it.

It aint easy to study something that you have no interest in.
In fact it is down right boring. I know because it was that way for me.
And I am not talking about those required college classes to get a diploma.
It takes time,determination, and discipline to learn the Morse Code.
If you lack any of these you will fail. Period.

When you really want it..... you will earn it.

Nice letter.... But....

Your letter just might be taken more seriously if you would have signed it
with your real name and call sign.

People with something to hide ....usually hide it.

Um, I hate to tell you this Bill, but we are born naked. You need to
brush up on the Old Testament before you open your mouth about God.

Did you hear from Deja.com about your racist
and foul-mouthed Dungboy logon yet, OTK?
That why we're not hearing your lunatic ranting today?

Go ahead... get another phoney logon.

It will get flushed the same way.

Lucent doesn't like you using their public server, either.

Log on here and debate like a decent human being
and you won't have so much trouble.

Regards,
Dave AB5S

FS: Hands-Free Communicators, VOX, Noise Reduction

These two-way communicators are often used in noisey environments.
They are built by Remic, U'nIcom. 50MHz operation with 1/4 mile range.
Equipped with padded earpieces that reduces environmental acoustic noise.
Each unit comes with hard case. In Brand new shape, never used except for a
test to
see they work. Best offer will take them. A total of four units are available.

available. Best Offer will take them.

Hello there,

I sailed as a Merchant Navy radio officer up till 2 years ago.
There are a number of leads you could possibly follow but you are right when you say you are pushed for time, however a month might just be enough time to get something sorted out. I will list these below, with explanations where neccesary. Part 1. below might not be relevant but my former maritime background makes me feel obliged to mention it.

1). If I am correct, you only have Ham frequencies. Really you should also have the 2182 KHZ R/T Emergency frequency, I am not too sure about the laws governing this as regards small pleasure craft/yachts but most people undertaking an international voyage will at least have a setup with MF/HF (Mediumwave/Shortwave) frequencies in the maritime bands, probably with something called DSC (Digital selective calling) under the GMDSS system and also this facility on the VHF band, but maybe you know this already. There are various companies running coast stations around the world that operate ship/shore E-mail servies now operating on maritime frequencies. (Note, the actual transmissions are in different format and translated and forwarded or vice versa). These are at very reasonable rates and I will give a list of these below. The thing is that you need a radiotelephone operators certificate or GMDSS operators certificate to do this legally. The good news is that I have heard of places offering week long GMDSS courses. More on this later.
However if you already have this facility then Thats OK.

2). You cannot get a ham licence without passing an exam. This involves knowledge of radio and electronics and it's application in radio circuitry. I am not too familiar with the American system but I know there are about 5 or 6 different classes of Licence. I have never heard of exemptions regarding the morse test to gain access to the HF bands. That may be changing soon with a slower morse test but it will also mean reduced power and that will be too late for you anyway. I am listing a number of places below that you should look up. They provide a wealth of information that will be up to date and relevant. The 1st and 2nd links below should be of particular interest to you.

Very interesting stuff from the wife of WB4AIO.

It seems he has a very low opinion of feds.

I hope Riley pays him a visit to discuss the article below:

http://www.splcenter.org/intelligenceproject/ip-4i4.html

Here is the article:

Q&A: Inside the Alliance

A former insider speaks

For four years, Kirsten Kaiser, 36, lived with her husband on or near the West Virginia compound of William Pierce, the leader of the neo-Nazi National Alliance and author of the racist fantasy novel The Turner Diaries. Kaiser was married to Kevin Alfred Strom, who co-hosts Pierce's racist and anti-Semitic radio show and is one of Pierce's closest associates. In that role, she got to know Pierce's inner circle and some of its members' thinking. Over the nine years of her marriage, Kaiser came to question the violently racist views of the Alliance -- especially after the deaths of 19 children in the Oklahoma City bombing, which was patterned on an attack portrayed in The Turner Diaries. Today, she is living in Minnesota and going through a divorce from Strom. The Intelligence Report interviewed Kaiser about her life and acquaintances inside the Alliance, and how she came to leave.

INTELLIGENCE REPORT: How did you first hear of the National Alliance?

KAISER: I first heard about it in 1986 through reading magazines which my second husband, Joseph McLaughlin, had. I remember initially I was really shocked. I had noticed that Joseph didn't seem to like Democrats or Republicans, and I asked him, "What are you anyway?" He said he was a [white] nationalist, that when he was 17 years old he had run away from home and gone to Iceland so he could be around other nationalists.

IR: What was your first contact with William Pierce?

KAISER: Joseph had me call Dr. Pierce one day in the summer of 1987. It was the day that [former Nazi leader] Rudolph Hess died. Joseph was all excited about this and they were all saying that it was a plot, a murder conspiracy.

IR: What did you say to Pierce?

KAISER: I said that I�d been reading his magazines. And he said, "You know, I'm really going to have to have you meet Kevin Strom. I know you'll just love him." I didn't meet Kevin until about four months later, on Nov. 7, 1987, when he came to our house in Arlington [Va.], but I really did like him a lot. I fell in love with him, but I didn't see him again until January 1988.

I was still married to Joseph at that time, but Kevin was starting to introduce me to people. I really wanted to meet people. I was very alone, very isolated.

They were all in this radical movement and they talked about radical things and it was very mysterious and fun and interesting. I had never met anybody like this. In the meantime, the situation with Joseph was getting worse. On March 15, 1988, I left. Kevin helped me move, and he moved into the apartment that I got.

IR: How had Kevin gotten into the movement?

KAISER: It turns out that Kevin's high school government teacher in Fairfax, Va., was a fascist who kind of recruited him into all this. He pointed him to the John Birch Society. Kevin was never involved in the Klan. He is the big intellectual -- we continuously made fun of the Klan. But he did read literature like Instauration [a relatively highbrow racist publication] and corresponded with people like Jared Taylor [who runs a magazine called American Renaissance and has argued that blacks are less intelligent than whites].

IR: When did you first meet Pierce in person?

KAISER: A little before that, at the very end of 1987. Joseph and Kevin and I all met Dr. Pierce at a restaurant in Arlington. I had just finished reading The Turner Diaries, which I thought was very poorly written, and I think I told him so, which may be part of the reason why he dislikes me so much. He said that he had written it very fast and that he was very surprised at how popular it had become. He said that he had always intended to rewrite it and make it better, but that he liked it real well.

IR: Do you think Pierce was serious about the message of the book [which depicts a race war set off by the protagonist's bombing of the FBI headquarters building]?

KAISER: Yes. That first night we met, I remember that he said that if they didn't blow up the FBI soon, it would become impossible because technology was getting better and better.

I used to drive past the Pentagon and other government buildings every day, and I never gave them a second thought until he started pointing out that there was this big sinister thing going on, that they were ultimately out to get me and Joseph personally, particularly because now we knew the truth that no one was supposed to know.

IR: How was Pierce treated that night?

KAISER: Everybody has always treated Dr. Pierce with tremendous reverence. Nobody calls Dr. Pierce "Bill." Even his wife calls him Dr. Pierce.

IR: And how did Pierce act toward you?

KAISER: Dr. Pierce said, "You're just a housewife," and I was so shocked and hurt. I had just got done reading his whole magazine, the National Vanguard magazine, which had a picture of Venus de Milo on the cover and went on and on about how women should be at home having children. I thought, "If that's what they think, why did he just say that to me?" It really hurt and confused me. It never made any sense.

Dr. Pierce doesn't like women. He told me later that he likes them in a James Bond sense. Those were his favorite movies, James Bond movies. In those movies, women are just sort of fun toys, and that is really how he sees them.

Once, Dr. Pierce showed me some mail-order bride catalogs after his third wife, Olga, left him for three or four months. They were just unbelievable. You pick up a catalog that's full of these women and almost every last one of them is named Eva. It was always eastern European women, from Czechoslovakia, Yugoslavia, Russia.

IR: After this initial meeting, I understand you stayed in touch with Pierce while you lived in Virginia and, later, in Maryland. When did you and Kevin finally move to Pierce's compound [on 346 acres outside Hillsboro, W. Va.]?

KAISER: We moved on to his land on Oct. 1, 1991, and stayed there in a little trailer until Sept. 3 of 1992. After that, we moved to an apartment above a truck garage in Hillsboro, and Kevin continued working for Dr. Pierce until 1995.

IR: What was it like living on Pierce's land?

KAISER: By the time we moved off the land, I had pretty much had it with the whole bunch of them. I listened to all these speeches about how this was a community and we were going to work together, and it wasn't that way at all. These people never even bothered to say hello and good-bye. They didn't have dinner together, hardly ever, and they didn't have any celebrations together.

There was no discussion between people about what they were doing and how it connected to what other people were doing. The only one who really knew what was going on was Dr. Pierce, and he wasn't telling anybody anything they didn't need to know.

Nobody drinks there. Drinking is absolutely forbidden. And watching television was not allowed -- even though Dr. Pierce watched the news every night, which I remember ended up getting some people

angry.

It was a station you could hardly see. It was more like listening to the news. You know, Dr. Pierce has extremely poor eyesight because he once kept his contact lenses in for two solid weeks and that damaged his eyes. He is supposed to be such a smart man, but he doesn't have any common sense at all.

They never did really like me there, and I think another one of the reasons was because I said, "If I'm going to work, you're going to have to pay me something because my time is valuable." They just thought that was unheard of. Everyone works for Dr. Pierce, if not for nothing, then virtually nothing. The people who were paid basically got about $300 a month. Dr. Pierce is very, very stingy in many ways.

IR: How seriously do you think Pierce took his own propaganda?

KAISER: Well, he told me that he had done his dissertation on how to build a nuclear bomb. And he made it very clear that when the time came, he would know what to do. He was really very serious about his desire to destroy Israel. It's not so much that they want to destroy the American government; Israel is what they really hated.

They are waiting for when the economic system collapses because this will help instigate a race war. During this time of unrest, they would take over the armories, take control of the government and bomb Israel. I mean, this is what he plans to do. I guess he's going to rule the world once this happens.

I really do think it's a version of The Turner Diaries.

IR: What about Hunter [the novel that Pierce wrote in 1989, after The Turner Diaries, that describes a campaign of assassinations of interracial couples]?

KAISER: Whatever book he was working would be his enthusiasm of the moment. When Hunter came out, that was the way it was going to happen. If enough mixed-race couples were assassinated in a big flurry, that would be enough to wake people up to action.

That book disturbed me. How can you judge somebody else in matters of the heart? If you really did fall in love with somebody of another race, I don't know if I could judge you. This is something I had a real problem with.

IR: How did events in the outside world affect Pierce's people?

KAISER: They were just delighted that Saddam Hussein was attacking Israel. Another thing that delighted them was when they had those riots in Los Angeles. They want the white man to hate the black. They hoped that when social unrest got so bad that a race war started, that would give us the chance to blow up all these buildings

and to get hold of an armory.

You know, wherever you went, you always knew where the armories were. Whenever we were traveling, it was like, "Well, where is the armory?"

IR: What kind of work did you do while you lived on Pierce's land?

KAISER: I did many mailings. I stuffed hundreds and hundreds of envelopes and inventoried books and did a number of other things. But I only did that for Kevin's benefit -- not Dr. Pierce's. As I said, I'd told him that he had to pay me something.

Dr. Pierce also had us making burial tubes [to be used for caching weapons underground]. They were made out of big PVC [plastic] tubes and we would seal the ends with these caps and special tape so that they would be waterproof. As many as we'd make, they'd sell. We'd make 10 to 20 at a time, and they were already sold.

IR: So it was a moneymaking operation for the Alliance?

KAISER: Yes, it was almost pure profit.

IR: What was the reaction when the Southern Poverty Law Center sued Pierce? [Editor's note: After a black sailor was murdered in 1991 by a member of the neo-Nazi Church of the Creator (COTC), Center attorneys sued on behalf of the victim's family and won a $1 million judgment against the COTC. In 1995, after the COTC fraudulently transferred ownership of its North Carolina headquarters to Pierce to keep it from the murdered man's family, the Center sued Pierce personally and won an $85,000 judgment. That judgment was upheld in July by a federal appeals court. The Supreme Court refused to reconsider it.]

KAISER: I remember very well Dr. Pierce making many trips to North Carolina and originally it was a very mysterious thing. After a while, he said that it was very hush-hush, but that it had to do with Ben Klassen [the long-time COTC leader who committed suicide on Aug. 6, 1993].

This all started when [former COTC activist] Will Williams started getting involved. He was like a liaison. After some time, Kevin came to me and said, "Oh no, it is finally happening. [Center co-founder] Morris Dees is suing us." It was like the end of the world. He was terrified of Morris Dees. Kevin just hated him. He said, "Once Morris Dees has set his sights on you, that's it, it's over." They were really upset.

IR: What was Williams' role over the years he was in West Virginia?

KAISER: His title was recruiting coordinator. He came in late 1991 or early 1992, and I thought he was very friendly, really a nice guy, initially. He traveled a lot, and Dr. Pierce paid for his travel. He took

over the farm house [on Pierce's land], and put a new roof on it and built a fence around it. He started raising German shepherds there. He had an obsession with German shepherds. By the time he left, he had 17 of them.

Six or eight months after Will arrived, he went to Russia and married a woman he'd been corresponding with and brought her back. She lasted just a few weeks and then she disappeared. Will was very upset. He just changed completely. This was at the same time that Harold Covington [leader of the National Socialist White People's Party] started attacking Will Williams, saying he was an FBI agent and a homosexual.

All these people are really, really paranoid. They all watch each other, and they're all convinced that everybody else is an FBI agent. For a while, there was even talk that Dr. Pierce was an FBI agent. He just laughed about that.

Anyway, Will Williams left in 1993, or possibly 1994.

IR: How did the standoffs at Ruby Ridge and Waco [in 1992 and 1993] affect the National Alliance?

KAISER: We heard about Randy Weaver [the white supremacist whose wife and son were killed by federal agents at Ruby Ridge, Idaho] long before anybody else did. Kevin was telling me every day it is just a matter of time before they come to get us. We have to be ready. We're stockpiling food and I'm keeping distilled water hidden around the house, and I'm getting more and more afraid.

After Waco, Kevin was always forcing me to watch this [antigovernment] video called Waco: The Big Lie [by Indianapolis attorney and militia advocate Linda Thompson, who once threatened an armed march on Washington, D.C.]. I am so full of fear that I don't know what is going to happen, and I don't trust Dr. Pierce. I am beginning to realize that there is something wrong with everybody I know in the movement. Nobody has a regular job, nobody has a regular [non-mail-order] wife. They don't have girlfriends, they don't have cars that work, they don't have any health insurance. They don't have a real life.

I am beginning to say to Kevin, "We have just got to leave, we have got to have a normal life." And he says, "What's a normal life?"

IR: What about the Oklahoma City bombing?

KAISER: The day after the [April 19, 1995] bombing, Kevin got really nervous. He went through the house and found all his old Voice of Tomorrow stuff. [VOT was a mobile, far-right pirate radio station that Strom ran out of a specially equipped van before meeting Kaiser.] I had never seen him so scared. We put a box of the stuff in the back of the car and we drove to the back of a Wal-Mart in

Virginia, I think, and dumped it.

Later, Kevin told me that Timothy McVeigh had called the Alliance five minutes before the bomb went off and that somehow the FBI knew. But he said McVeigh must have called a lot of other right-wing groups, too. He also said, "You know, the reason why they were all upset is because the bomb was just like the one talked about in the book." Everyone knew what book he was talking about [The Turner Diaries].

I had befriended a lot of local people in West Virginia, and after Oklahoma, a good friend came to me and said, "You know, Kirsten, you better watch your kids. If they get a chance the local people are going to kill your kids, because a lot of kids were killed in Oklahoma." I look outside my window and there are all these reporters. My heart is racing and I am just petrified. This is real. These are all real reporters, people dressed up in suits with cameras and microphones. I'm not making this up.

IR: How were you affected by all this personally?

KAISER: By this time, I had realized that the idea of a revolution was ridiculous. If these people can't hold down a regular job, what makes you think they can run a country?

Kevin told me that the bombing was a good thing, because it was a government building and that government employees had been killed. It was a part of the revolution. I called my brother and my brother said, "Yeah, well what about all those kids that were killed?" Kevin said to me, "Well, if there were children killed, they must have been the children of government employees and it will teach them all a lesson." This was retribution for what happened in Waco.

After I got through with this conversation with my brother, something began to grow in me. It was like this little seed. My brother works for the Coast Guard, which means the government, so Kevin was saying that he deserved to be killed. It took a little while for that to sink in on me.

I became so depressed after the bombing. The whole idea that they really think it's okay for children to be killed was starting to bother me.

IR: So you began to think about leaving West Virginia?

KAISER: At about this time, Kevin and Dr. Pierce were having a disagreement. I was happy because I was thinking Kevin was finally going to say we could leave. I wanted to go to Minnesota. One day, he came home with a magazine saying Rochester [Minn.] was supposed to be the best place in America to live. It was either 96 percent or 97 percent white, so it was acceptable for that reason. We moved there in November of 1995.

I don't know if anyone can relate to this except maybe a prisoner of war, but when we left I was able to listen to regular radio broadcasts. I hadn't heard Paul Harvey in years. I didn't know that O.J. Simpson had apparently killed his wife. Kevin hadn't allowed us to watch television or read the newspapers because they promote multiculturalism. Driving across country, we were stopping at gas stations and I could see newspapers with today's date on them. There were TVs in the hotel rooms. It was really weird.

IR: How was Rochester once you got there?

KAISER: I got a job as a real estate salesperson. I had a lot of fun, but I felt a sense of shame for the first time because when people asked, I couldn't say what my husband did. At the same time, I couldn't go to office parties, various social things, because Kevin didn't like being around people. And I couldn't go alone because that would mean getting a baby-sitter, and we couldn't have a baby-sitter because they'd be in the house and then they would know who we were.

The fact that I had to name my baby daughter Klara -- Klara was Hitler's mother's name -- was also starting to bother me. This whole deal with Hitler was really starting to bother me.

IR: When did it all come to a head for you?

KAISER: On Nov. 13, 1996, we were listening to the radio to hear the weather report. They were talking about some young couple in New Jersey that had hidden the fact that the girl was pregnant. They killed their baby after she gave birth in a hotel room.

I just started crying, and Kevin got mad at me. He said, "Why are you crying?" And I said, "They killed a baby. They killed a baby." I'm looking at my own baby, who is three or four weeks old, and I am just freaking out. And then Kevin said that it was a good thing that it happened, because the woman was a Jew and the man was a Gentile.

I was thinking several thoughts at the same time. How could he know the woman was a Jew? And it occurred to me, for the first time, that it actually didn't matter what race the child was. It was a little baby. I just kept envisioning that happening to my baby, and I couldn't stop crying. I curled up into a ball in the corner and held on to the baby. I wouldn't let her go, and I couldn't stop crying.

Eventually, I went to see a counselor. He told me that it was a good thing that I was upset, that everyone should be upset when they hear things like that. He said that all children were all part of our family. That is what he said.

In his office, I picked up an old magazine with pictures of the Oklahoma bombing. I screwed up my courage and I read the articles and I looked at the pictures. I was thinking that this child being held

by a fireman doesn't look any different than my son, Oskar, and it's covered with blood. And that whole idea, that there really isn't any difference, that children are children, all came to me. It all came together on that date.

Hy,

It's a dream until now but ...

take a look at CWGET and CWTYPE (CW of course)
IZ8BLY Hellschreiber.exe (Hellschreiber mode)
PSK31.exe (psk31 mode)

They are Windows programs using the sound card with receive and transmit
possibilities.

And IT WORKS.

So it must be possible to do it for other mode.

You just need the correct motivation. I had my Tech license about as long as you have. Got it around 1972 and about 2 years ago decided to do some serious work on the code and upgraded to Advanced.. For me, I just did not really have much use for the low bands. Did get interested in them for a while looking at the RTTY pix on 20 meters, but when the computers took over, I lost interest in that. Still have a model 19 teletype machine set up .Still don't have much use for the low bands. I have been an advanced for over a year and have made maybe 10 random contacts below 30 mhz. One of my purposes to get on the low bands was to get on some of the VHF nets and also the 28 mhz frequency that is above the area I could operate with the tech license.I have been keeping up a 2 meter repeater and active on 6 meters, 2 meters and 432 ssb. Also the satellites. Just having too much fun on the VHF and above to study the code.

Guess my real motivation is that my son had developed some interest in ham radio and got his no code tech license and was working on the code. Just could not let him out do me.

Not quite "off the hook".

The Evergreen stations paid a large six figure "settlement" to
the U S Treasury in lieu of a formal proceeding followed by a
fine. They also realized that this was their one-and-only
"first bite".

>My personal beef with the commission is the appearance of
>enforcement based in part on the political content of speech,
>rather then actual violation of the regulations.
>So the issue of obscenity isn't my hot-button.
>But I'd like to hear how that issue actually went
>from someone who knows what he's talking about.

The Commission's enforcement process - especially in amateur
radio matters - isn't so sophisticated that "political content"
has any factor. The only time that such "content" was even
paid attention to was where the licensee issues a clear "I'll
do what I want and I dare you do something about it" challenge
to the FCC for unacceptable behavior and then I had no qualms
about finding the violation in the action and going the full
bore with it.

We tend to lose sight of the fact that the Amateur Radio
Service is the only service regulated by the Commission that
has strict content control regulation by international
agreement, i.e. amateur communications are "limited to messages
of a technical nature relating to tests, and, to remarks of a
personal character for which, by reason of their unimportance,
recourse to the public telecommunications service is not
justified" to quote the (International) Radio Regulations.

As a ham of 49 years' experience, I have no problem at all in
determining what is acceptable and unacceptable conduct on the
air, and "hate and dissention" (to borrow a phrase from our CB
brothers) falls into the latter category and if it falls into

"prohibited communications" it should be dealt with as such.

Then again, the first ham transmission that I ever heard, on a one-tube regenerative receiver that I built for a Boy Scout project in 1950 was (and I remember it clearly to this day) "Hey, you lop-eared jackass, get off of 20 meters".

There's nothing new under the sun.

Hola OM AF2Y

Don't worry about it. The URL contains a lot of off-the-wall stuff similar to yours and that of Zimmerlee and others. Basically falls in the category of "if you point at something/somebody that people don't understand, and invoke demons, a certain number of stupid or gullible people will believe your story" and stone them.

Get your own facts -- make up your own mind.

BGO

In other words, what Phil is basically saying, is that the FCC can make up the rules as they go along. If someone says something nasty about Bill Clinton, and an FCC official worships the ground Bill walks on, he'll have no trouble "finding" a violation of some sort.

It's similar to cops pulling over African-American motorists at random. If they protest and ask what's the reason, they'll find anything wrong on the car, from a dim license plate light, to an air freshner handing from the rear view.

Jack....Of All Trades

The Supreme Court ruled passengers in cars can be searched along with
the driver. Think of WB2OTK as YOUR driver.

Another uneducated knee-jerk leftist who thinks saying nigger is
reference to what someone else (WB2OTK) said, is racist.
It isn't. Calling someone one is.

> <<<AN EDUCATED PUBLIC IS OUR BEST ANSWER TO THE HATEMONGERS ON THE INTERNET.

Thank God for exptremists who stand up to multicultural racists like you, which are the worst racist of all since you preach the blending of all races, therebye the destruction of all the races.

All the examples you claim are HATERS are actually the LOVERS. You are the true HATERS of the human race.

It takes ALOT of love and courage to do what Tim McVeigh did in order to help start a race war, in the name of the GREAT white man.

The reason people LIKE YOU, and most in authority are so apparently concerned about terrorism, is because you know the terrorists are after YOU and that they show you for what you are: self-centered creatures that have not been labeled officially yet in the animal kingdom.

People LIKE YOU, and Klinton, think NOTHING of saying that civilians can be expected to die, such as those in Kosova, those in Japan in WWII, and those that die at the hands of terrorist, in oder to preserve "their brand of freedom".

The silent majority, which IS the decent people who watch and question ALL that they see and hear, realize that creatures like you don't care whether terrorism or war destroys all of society, because your wealth will protect you in the mountains or caticombs under the earth.

Federal buildings, large corporations, and certain public events are protected to the max, not in order to protect the average person who seldom uses or visits these areas, but they protect the police, the authorities, politicians, the wealthy (those who can afford protection) and the real criminals (eg.those with their hand on "the buttons") that roam our world via the others.

I am NOW calling for the termination of you and your kind.

It is a GOOD thing that creatures LIKE YOU are trying to scare or force EXTREMIST into an undercover world, where they can more methodically plan and wait to destroy creatures LIKE YOU & Klinton, instead of randomly killing innocent people who may share our beliefs.

And people like me will continue to show you for what you are from up here in the light, therebye FORCING you into making the mistake of your miserable lives.

John :)

> license?

These and many more questions are answered in the exam material
necessary to get a license.
"Now your talking" is one such book.

Ham Radio is not a "frequency", frequency is NOT FM or AM.
Modulation is FM or AM.
A technician has NO privileges on 10 meters.
The power level of 200 watts vs 100 watts is insignificant in aiding how
"far" you can get.
A technician license allows full privileges on the 2 meter band.

5126. freedom of speech?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-25 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990524202913.28131.00004337@ng-fu1.aol.com>
Source record: 141677

Every day I read about how Riley is taking away our freedom of speech. What the hell is the matter with you? To carry on on ham radio; to make the hobby look bad by using foul language;overdo sexual connotations;preach white extremism, anti-Semitism, Holocaust denial and hatred for this government by way of insulting our leaders, IS DETRIMENTAL TO THIS HOBBY/SERVICE. Don't you understand this? Still stubborn? Sue Riley. See how far it'll get you. You'll go bankrupt or claim to go bankrupt like KV4FZ. Go scream FREEDOM OF SPEECH. The point is that we have it but on ham radio, we ABUSE it and that's what Riley's steamed about.For a decade we screamed, "Where's the FCC/ They have abandoned us. They are allowing ham radio to go to hell as did CB." We wrote letters to the Feds. When ignorant Mike Galego,KA4MUJ, was preaching anti-Semitism, I contacted my Senators who contacted the FCC. The answer back in 1989-1994? Freedom of speech!!!!! It was FREEDOM OF SPEECH then because it never occured to them that our spectra was threatened by foreign interests. Now speech is limited somewhat in ORDER TO PROTECT WHAT WE HAVE and you whiners and bitchers and moaners can't understand it. Look men, the sign oif maturity is FLEXIBILITY i.e. to be able to roll with the punches instead of panicking and allowing them to knock you out. Whether you like it or not, Riley is proving every day that he is an equal opportunity enforcer. He's pro and con no one and no group. He is insistent on a change for the better in this hobby/service and by God, he's going to get what he wants because of one main thing-he has the AUTHORITY to realize it! And so my recommendation is to change your ways and stop grousing.Carrying on indecently in ham radio is equivalent to screaming fire in a crowded theatre when there isn't any. Then tell the judge all about your freedom of speech and see how far it'll get you. Doc,AF2Y

Of course, AF2Y doesn't seem the least bit
upset that the Clinton Administration has
far and away the greatest number of Jews,
homosexuals, lesbians, and communists than
any administration in the history of the U.S.

Jewish newspapers ... newspapers that the
much-hated goyim gentiles are not supposed
to see ... openly boast of the fact that the Jews
have the Clinton Administration and the
Democratic party "in their pocket".

Hey Doc, when are you going to complain
about that, you ffffing hypocrite?

Come on Doc, admit it. You HATE Christians,
don't you? Why else would you spend your
every waking hour fighting them?

But that's OK, Doc. Keep spreading your
anti-Christian, anti-White hate. These folks
need to see who their enemies are!

Could it be that George Washington and
Ben Franklin were absolutely correct when
they said that Jews should NEVER be allowed into the U.S.A.?

5129. JAPAN RADIO COMPANY "JRC" JHM-402S25 mobile UHF radio HELP NEEDED .!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-25 00:00:00 UTC

I would highly appreciate your help regarding the following problem:

I do owe one of JRC's mobile radios under name >> JHM-402S25<< It is UHF

150 Channels radio .!!

and the DEALER code of this UNIT was 22222222 so in order to change

frequencies etc. one should

press arrow UP and simultaniously power on radio .!! after that number

22222222 should be entered

from keypad, from then on it is possible to reprogramm the radio .!!

Unfortunately i have reset radio

and it has cleared its RAM Memory DATA, so now radio has drawn initial

settings from its EPROM

and the DEALER code is not 22222222 anymore, so i cannot access to radios

frequencies anymore and

thus cannot reprogramm it .!!! Can you possibly tell me what is the FACTORY

DEALER code of this

radio so i could reprogramm it or is there any other way to enter into DEALER

mode without

entering PASSWORD thru keypad ????

I find it neccessary to tell you what is shown on the display of the radio when it

powers up .!!

i suppose it is software revision number or something like that ... ??

A-1.02 is shown ??

Please if you can help me in any way i would be eternally thankfull to you cause

i find it REMARKABLE RADIO .!!!

Any kind of Service Manual or Service information would be highly appreciated

regards

Fox

Perhaps, but at least we wouldn't have AF2Y.

HAW HAW HAW

But seriously folks, did you note how AF2Y
completely sidestepped my comments about
the Clinton Administration and the Democrats
being under Jewish control?

Come on now, herr Doktor, if it is bad for
the Republicans to be under Christian control
as you claim, then certainly it is just as bad
(if not worse) for the Democrats and Clinton
to be under Jewish control. I say "worse"
because at least Christians consist of a
substantial majority of the nations populace,
while Jews are a very small minority ....
a minority with a history of pro-communist
activity and anti-American espionage. Such
a minority should not have such power in
our government, news media, publishing,
and other places, should they?

If you say "they should be allowed to have
such disproportionate power", then I don't
want to hear another word from you about
the supposed influence of Christians on the
Republican party.

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!

.....

Please Welcome:

Rich Sampson / KD6FYE <kd6fye@pacbell.net>
Half Moon Bay, CA

jonathatnloh/kf6wdh <jloh@futon.sfsu.edu>
San Francisco, CA
I'm interested in learning about how amateur radio operators get used in emergent situations. I'm a volunteer with the American Red Cross's Disaster Action team here in San Fran. And I'm wondering how this new tech license can benefit the SF DAT.

Schertz,Texas
I mainly help the National Weather Service during skywarn events by providing a link from the Amauter radio to NWS.

.....

Current Events:

We are holding a 2 day No code technician license class & exam in San Mateo on Satursay & Sunday June 5 & 6. The class runs

from 8:30AM to 4PM each day followed by the exam from 4PM to 5PM. The fee is $15 for the study materials and the test processing fee. If any one is interested please contact me, Ross Peterson WB6ZBU, Email WB6ZBU@pacbell.net for reservations. It is recommended that the prospective ham NOT study before the class as they will lower their probability of passing. The course teaches how to pass the test, not understanding of the material. We have about a 75% to 80% pass ratio. If anyone is interested to attend to be able to take the system back to their local area they are welcome.

Thanks
Ross Peterson WB6ZBU
.....

PENNSYLVANIA
Ice Storm/Y2K Consequences Exercise
by Keith A. Spangler, PEMA

Harrisburg, PA For two days a winter storm battered southeastern Pennsylvania with 30-mph winds and record-breaking temperatures below zero. Twenty-one counties were covered by three inches of ice. Ten storm-related deaths were reported. All major roadways were impassable in the affected area, and more than 400,000 people were without power.

This was the scenario facing federal, state and private sector emergency management officials participating in an "Ice Storm/Y2K Consequences" exercise sponsored by the Pennsylvania Emergency Management Agency (PEMA). Held at the State Emergency Operations Center (SEOC) in Harrisburg, the exercise was designed to test the Commonwealth's plans for responding to a widespread ice storm and the potential for computer problems posed by the transition into the new millennium.

According to John Bahnweg, PEMA's Director of Operations and Training, this scenario was one of the most realistic and challenging exercises presented by PEMA. "The success of the exercise is credited to a joint effort between PEMA and representatives from the various agencies which helped plan and develop the scenario. We asked the participating agencies to help us build the exercise," Bahnweg said.

This was the first time agencies outside PEMA were invited to provide input during the planning stages of an exercise. In the past, exercise planning and development was the responsibility of the operations staff assigned to the SEOC.

To help agency representatives become familiar with building scenarios, PEMA held a one day scenario development seminar. This eight-hour program, attended by more than 50 representatives, covered the basics of scenario development.

The seminar was well received and helped set the stage for exercise play which began at 7:00 a.m., December 3, at the SEOC, which is nearing completion of a major renovation.

The agencies in attendance included: Departments of Aging, Corrections, Environmental Protection, General Services, Health, Military and Veterans Affairs, Public Welfare and Transportation, State Police, Public Utility Commission, Turnpike Commission, Red Cross, U.S. Department of Veterans Affairs, Office of Administration (Continuity of Government Group), Union County Emergency Management Agency, FEMA Region III, GPU Company, Pennsylvania Rural Electric Association and PP&L Company.

The day long exercise was a learning experience for everyone, according to Bill Thorpe, leader of the exercise design team. "The fact that the exercise used a fictitious date-January 1, 2000-made things interesting. Participants were required to consider whether the problems they were facing resulted from the storm or malfunctioning computer equipment.

"Participation by on-site FEMA Region III staff provided us the opportunity to interact with our federal counterparts in a near real-time scenario," said Thorpe. Ice Storm/Y2K Consequences also included several mini scenarios which involved people and locations outside Harrisburg and the 21 affected counties. One scenario involved the simulated activation of the management staff of Pennsylvania's Task Force #1/ Urban Search and Rescue Team for a roof collapse at the Lebanon Valley Veteran's Hospital where more than 30 people were trapped or injured.

Other exercise simulations involved in the Ice Storm/Y2K scenario included; a hospital evacuation caused by a heating and air conditioning failure, dam spillway releases caused by computer control malfunctions, 911 center failures, and a prison riot.

Two of Pennsylvania's major utility companies, GPU and PP&L, also activated their storm centers and practiced their storm response actions. The utilities also interacted real-time with the Public Utility Commission to gather information and coordinate response to simulated region wide power outages.

"Ice Storm/Y2K Consequences was an excellent training tool prepare the Commonwealth's emergency management officials for the 1998-1999 winter storm season and the upcoming transition into the new millennium," Thorpe said.

"Planning and exercising in preparation for emergencies is a fundamental part of our business, and we take our business seriously. Whether it's a natural disaster such as an ice storm, or a technological event such as Y2K consequences," Bahnweg said.

"Conducting a joint exercises like this one was truly
educational for everyone involved. It provided the
Commonwealth's emergency managers and the other exercise
participants, insight into the potential for the unforeseen
problems that could affect the entire state."

A copy of lessons learned from Ice Storm/Y2K Consequences
exercise is available by writing to: Pennsylvania Emergency
Management Agency (PEMA), John L. Bahnweg, Director Operations
and Training, P.O. Box 3321, Harrisburg, PA 17105, or e-mail

This week's EMCOMM Bulletin:

EMC185 Agency Needs Shift 2/4
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC185 Agency Needs Shift 2/4 For release 5/24/99

"WHERE DO WE GO FROM HERE?" (contined article by Rick Palm K1CE,
from May 1999 QST Reprinted with Permission; Copyright ARRL)

"Last year, the ARRL sponsored four public service conferences
around the country to identify future telecommunication needs

of served agencies and reconcile them with corresponding present and future capabilities of the ARES program. The question we wanted to try to answer is, how will Amateur Radio continue to play an important role in providing emergency telecommunications in the future, in the face of new technology and the greater capabilities of such systems as the global mobile-satellite services? And what could our served agency representatives tell us to help us adapt to their evolving needs?

The conferences were held in Seaside, Oregon; Alanta, Georgia; Wichita, Kansas; and Tampa, Florida. Conference proceedings were reported in August 1998 QST, p 86; September 1998 QST, p 84; January 1999 Q5T, p 70; and February 1999 QST, p 80 respectively. Local, state and national Red Cross, Salvation Army, county and state emergency management agencies, National Weather Service, forestry departments, public safety (state police), and the National Hurricane Center were all represented. Each conference drew roughly 50 conferees, who were handed many solid ideas by these served agency reps, steering us in a good direction for the future. Here's a look at a few of the salient points.

MORE CROSS-TRAINING IN SERVED AGENCY FUNCTIONS
WILL ADD VALUE TO OUR CONTRIBUTIONS.

This was a recurring theme in all four conferences. Especially in the case of the American Red Cross, amateurs can increase their value to the agency by taking advantage of training courses offered for several disaster relief functions: damage assessment, shelter management, mass care and feeding, for examples.

Traditionally, amateurs have declined to perform functions unrelated to their primary radio communication interest and training. Indeed, ARRL literature has cautioned amateurs against providing unrelated services, encouraging them to concentrate on their role as radio communicators only. The caution was founded on a healthy concern that amateurs performing unrelated functions for which they were not trained would become liabilities rather than assets, and cause Amateur Radio to lose credibility. However, if we do not broaden our perspective on Amateur Radio's traditionally limited role, we minimize our utility and risk finding ourselves outside looking in when it comes to serving Agencies engaged in future disaster relief. Proper training and certification in the various functions are the keys to a successful bid for greater utility and corresponding perpetuation of our public service tradition.

INTEGRATION OF AMATEUR SYSTEMS WITH NON-AMATEUR
SYSTEMS WILL INCREASE UTILITY AND VALUE.

Kandel and other who have worked on ARRL planning and advisory committees have proposed greater integration of Amateur Radio Systems with other telecommunication systems, despite concerns

that we would dilute the "purity" of the amateur service and give other interests a foot in our door. Kandel says this is happening anyway: APRS, an Amateur Radio developed technology, now incorporates computers, the lnternet, weather stations and the GPS. As another example, WiinLink developers have interfaced Internet e-mail and HF radio using PACTOR. Hybrid systems such as these may represent an opportunity to enhance our contributions to served agencies for the future. Emergency managers and NWS personnel at the conferences all appreciated the value of APRS and similar systems in gathering information, and supporting communications from locations not serviced by their own."

Continues bulletin 186, which will be 3 of 4 parts of original.

To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

My oh my, how George doth protest! Something must have struck a nerve, George. Look at all the grammatical errors in your message. Why, you were so angry that you could hardly piece together a coherent sentence, could you?

I guess it really causes you pain to realize that it is you who truly is the "suck boy". It occurs to me that not only are your lips glued to the hind quarters of KV4FZ, but that you're actually WB2OTK's little puppet as well! I'll bet that not a minute goes by without you thinking of 'OTK, does it. You wake in the morning, and the first thing on your mind is Richard Whiten, and these thoughts follow you throughout your day, until the moment you finally fall into an alcohol induced slumber. George, are you listening? Pay careful attention: This is not normal behavior. Seek help immediately!

Doesn't it bother you that WB2OTK has such power and influence over you? Don't you ever wonder what you're missing in life while you spend every waking moment consumed by your obsession with WB2OTK? Hasn't it harmed your relationships with friends and family? Surely they can not share your preoccupation with this man.

George, do you ever find yourself absorbed by homo-erotic fantasies involving WB2OTK? In these dreams, does he make mad, passionate love to you for hours on end, then write you bad checks? Does he make you scream "Daddy, make me pay!!"?

I don't know, George, I really worry that you're spending your golden years foolishly. I'm sure that you must have someone out there who cares for you, who wishes that you'd give up your fantasies and return

to reality. But, if you really do care for WB2OTK more than you do your friends and family, maybe there are more appropriate means of expressing your feelings. Instead of QRMing him, send him flowers. Instead of posting all this nonsense over the internet, invite him to a romantic dinner. Dancing might be a nice touch. Talk to him about your feelings, Rent a room in a nice hotel... I don't know. Think about how you'd want to be treated by a lover, George. If you want to win his heart, treat him the same way. The manner in which you're going about it is all wrong!

Have a nice day!

5147. Form Letter for Intercon Investigation

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-25 00:00:00 UTC
From: joe@public.com
Message-ID: <374A284A.694592E4@public.com>
Source record: 141698
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Dear Mr. Hollingsworth,

Based upon your recent statements concerning a long-standing amateur radio network, asserting that the FCC was "unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," and based upon your recent remark that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services'", please consider this to be a formal request for an investigation of the activities of the Intercontinental Traffic Network.

The Intercontinental Traffic Network operates daily on the frequencies of 14.300 or 14.313 MHz. It is owned and operated by Ms. Ruth C. Hoffman, N4LMC, of Clearwater, Florida.

Based upon ten years of monitoring that network, it is apparent that the FCC will be "unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service." The Intercontinental Traffic Network has, on a daily basis, provided services that, "could reasonably be furnished alternatively through other services." These services include the illegal solicitation of international telephone patches for the purpose of by-passing the common carriers. Furthermore, The Intercontinental Net (also know as INTERCON) has blatantly and repeatedly acted as an alternative to the High Seas Marine Operator in the Caribbean and around the world.

INTERCON has facilitated and sponsored the illegal operation of unlicensed and under-licensed operators who desire services that could reasonably be provided, at cost, by legitimate commercial operations. INTERCON has also actively encouraged and supported illegal "jamming" of stations who questioned the purpose and integrity of the net. In the past, the net has launched vigorous hate campaigns against radio amateurs who dare question their motives and tactics.

Although this net claims to be a "public service" (in the interest of safety), it has no agenda for regular training of its members in proper emergency operating techniques. The net does not schedule regular safety drills or any form of emergency simulations. The majority of its members are totally unable to provide the "public service" that the net claims to be making available.

It is clear that the Intercontinental Traffic Network is merely a sham organization. It was created to provide free services for chiselers who are unwilling to pay for legitimate commercial services. INTERCON should be

ordered to either cease its illegal activities or stand down. Their misuse of amateur radio spectrum and resources should no longer be tolerated.

Please investigate this matter and provide whatever information you are able to gather on how "the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service". Please also provide information on the services that the Intercontinental Traffic Network is providing that "could reasonably be furnished alternatively through other services."

Thank you.

Sincerely,

Amateur Radio Licensee:

Since Riley Hollingsworth, as a representative Of the FCC and the US Government has now publicly announced his deep seated prejudice against the Liberty Net and certain hams that have the courage to criticize our perjurer-in-chief, I feel it is now time to investigate The Intercon Net. Using rascist, bigoted QRM'ers such as WB2OTK, AF2Y, and N3CND, the Intercon Net has maliciously interfered on HF for years. Ask your congressman to remove the Hate group known as Intercon from our airwaves. Feel free to enclose some of AF2Y's bigoted racist posts to illustrate the hate contained in this group.

Yep, we can implement that right after we institute a requirement for
licensing washing machine operators. How does your Kenmore get out on
20m?

Kenwood TKR-820 Desktop Repeater with Internal Cel-Wave Duplexer.
Therepeater is a 2-20 watt commercial unit. The power supply is built in
and also has a 12VDC input for emergency automatic backup power. The
repeater has a CW ID installed. There is also a Full Duplex CS-800
Interconnect/Repeater Controller which is wired to plug into the accessory
plug on the rear of the repeater. Currently the repeater is programmed for
444.500 / 449.500. The repeater can be setup to operate from 8 different
CTCSS or DCS codes (can be mixed). The TKR-820 is type approved for
GMRS, Commercial, and Ham. The repeater is the same size as a Kenwood
TS-850S HF rig. It is about a year and a half old and is currently in
service. I also have 1 new and slightly used (2 months) TK-860 UHF - 32
Channel radios with CTCSS and DCS for sale. I also have a DTMF mic for one
of the TKR-860s. Also have 2 UHF Kenwood TK-350 (With DTMF PAD) and 1 VHF
TK-250 Hand-Helds (160 channel) with new NiMH batteries. All of the
equipment is in good working order and looksnew. I can program the TKR-860,
TK-350, and TK-250 radios to any channel setup required. I will discount
for a package sale!
Email NO-SPAMwb5tty@vvm.com for prices on selected or package items. DROP
NO-SPAM from email address!

And if they were to do away with all CW requirements, that would give no-coders about ONE-SEVENTEEN THOUSANDTH of ONE PERCENT more bandwidth than what they have now.

Or, to look at it another way, if you were to take the driving distance from NYC to LA as the sum of the frequencies that hams can use without knowing any CW at all, eliminating CW would give them about an extra 1/2 mile.

What the HELL is wrong with you people?

I know Bill Cheek and most of you people most likely do not. Why the hell would anyone want to pretend he's Bill? I think Bill has the brains to stay off a group like this right now and even if he didn't he'd use his real name.

Damn people! Find something REAL to talk about!

Oh no, I could NEVER try to hold that title. Bill Cheek won that title
severaltimes over according to information POSTED by YOU. Remember the "reality
check"
post where YOUR OWN DATA showed that Cheek posted several hundred more posts on
usenet than me!?!?!?!?!

Below is an abbreviated qoute:

Date | Mackey | Cheek |

TOTALS | 2139 | 2348 |

> rec.radio.scanner alone. By my count, John has posted about 6 or 7 on topic
> messages (very loosely on topic) out of that amount. The rest of them were
> simply insults, name calling, or sniveling denials and "prove it" posts. He

More of your LIES!! I have posted MANY valuable & on-topic posts
regardingamateur repeater frequencies, antennas, UV affects on coax, scanner
freqs in
the midwest, etc.

> Prior to usenet, he was on a Fido echo related to scanners, but was
> subsequently kicked off of the echo for the same kind of behavior, which he
> still denies to this day. Just ask him anything, he denies all. The

I have never denied this, infact I have often felt PROUD that Bill Cheek kicked
me offof the "scanradio" echo since he kicked anyone off the echo who had a
technical background
or felt was a threat to him. In fact, when Bill left the echo there was an
election for a
new moderator & I was nomonated by several, but Bill refused to allow an
election
that included me. That is how Blake was able to get the moderatorship of that
echo!

> The only reason that John exists is because of the actions of others. I
> have in the past and still today propose a simple solution: ignore him.

Then why have you chosen to respond with this lengthy post?

Yes, they are all simple on my homepage.

http://sm0vpo.8m.com/
http://www.geocities.com/SiliconValley/3569/
http://hem2.passagen.se/sm0vpo
http://members.xoom.com/sm0vpo

Booze, antennas, transmitters, receivers, data, information, kits, even PCB foil patterns to download - Everything for the homebrewer - you name it.

No fees, no registeration, no membership.

Also a technical message board so that you can add technical questions. If anyone asks a question you can help with then please post a reply (it will save me a load of time).

One of the latest additions was a calculator for basic radio formulae but this is just a start. I will be adding attenuators and the like very shortly.

<<< WARNING >>> There is NO sex on the site (except for a rather nice screensaver).

best regards from Harry - SM0VPO

Well Mike, I'm old, tired but limited lazy. I have had my tech + ticket since 1974. I have attempted the code but to no avail on several occassions over the years. Theory hasn't been a problem, especially when I took the general theory. If the older hams want to lock us other older hams with tech + tickets out so be it, it's there loss. There are over 100K of us across the US. I was so confident eorn's ago about passing the general code test I bought a ts-430s and now it just sits there collecting dust. In fact it hasn't been on for over 8 yrs.

I'm not against the code, in some facits it may be what is needed. I don't need the code to survive life. Frankly I havn't been on 2 or 440 for over four or five years, I just lost interest. Being frequency locked is like being out of gas on a desert highway. I commend the people that have mastered the code and have an interest in such. I see the code as: If God wanted me to studder he would have made me that way. No disrespect intended. I was so bored with 2 mtrs 15 yrs ago I put up a pair of 19 element beams, purchassed a kenwood tr-9000, 160 watt amp. and went on sideband for some excitment. Worked well until the 9000 quit and kenwood doesn't support that model today. The beams are for sale or trade now.

To answer your first question: It could be a big loss to the ham community.

What ever, opinions will vary. I have enjoyed to various opinions posted on the subject.

nero

consistent, reliable communication on 6m via a ground wave
probably a 60 mile radius when using antennas at less than
30 feet. most of the time, i can do that reliably. i
use a 1/2 wave vertical at about 25 feet, and a 5 element,
log periodic antenna at about 30 feet here is dallas, tx, &
generally run 100 watts.

5173. I thought this NG was about radio?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-25 00:00:00 UTC
From: W1PEV <paulvanasse@tp.net>
Message-ID: <32x23.2397$733.114782@typ11.nn.bcandid.com>
Source record: 141724

After having read most of the postings submitted to this NG it appears that about 2/3 of the postings are either about politics, slander, or pure personal conjecture. I was under the impression that submissions to this NG were to be for the betterment and proliferation of amateur radio.

It also seems that the ratio of off topic discussions on this NG almost perfectly matches the ratio of identical off topic discussions that can be heard on just about any amateur frequency on any given night. This fact demonstrates to me that either the same individuals are consistently vocal on both the radio and this NG, or that these NG postings reflect a perfect sampling of the attitude that's currently present in the amateur radio hobby.

This is my suggestion. Please take it for what its worth to you:

When you are sitting in front of your computer screen wearing your two horned Viking helmet, and after having read something that makes your blood boil which forces your blood pressure to cause your fingertips to explode with energy, please have the MATURE discipline to sit back and make an adult decision of whether or not you should reply and whether your reply is truly appropriate. The difference between and adult and a child is an adult CAN control his/her emotions.....supposedly.

What will be interesting to see is the individuals who decide to flame this post.

73's to all and long live the hobby!

Not very easily. You could modify a VW Bug into a Ferrari, but would you really want to? The very fact that you ask leads me to believe you don't have the technical background to build your own FM transmitter, which is what you'd have to do. (Please don't take offense, I don't have that kind of skill either! My skill level with homebrew electronics falls somewhere between dumb and dangerous. <g>)

The thing to do is go out and get yourself a *real* Amateur HT. Most if not all of them have receive-only coverage that is the same, or in some cases better, than a scanner. Plus, you won't have to deal with the expense and hassle of building your own.

That is incorrect. There is NO requirement for US citizenship
to hold a US amateur license. Hundreds, if not thousands of
non-resident aliens hold US callsigns ... there was a big stink
not long ago about wealthy JAs and others gobbling up lots of
"choice vanity calls."

> Further, even if you are a US citizen, a US license does not give
> you the right to operate anywhere in the world.

That is, however, true. When operating in other countries,
generally permission must be obtained from the authorities.
However, US amateurs need no prior permission to operate
in Canada (with some observation of rules) and the US has
recently signed up for CEPT reciprocal licensing whereby
US Tech+ and up licensees have full amateur priveleges in
CEPT countries (yes, full-band HF priveleges, as if they
were extras, with only having passed a 5 wpm Morse test.)

Also, the US has recently announced new rules whereby
visiting amateurs from countries with which the US has
reciprocal operating agreements need not file for a
permit and wait for paperwork ... they simply need to
observe the prescribed rules and to carry a copy of their
home-country ham license.

However, even if the inquirer gets a US ham license, it
won't be valid outside of US jurisdiction (he states that
he wants communications on a sailing vessel, heading "back
home to Australia") ... once outside the territorial
limits/waters of the US, the US license likely will be
invalid, UNLESS, the sailing vessel is a US-documented

vessel, then the US license applies on the high seas as
the vessel is a "US flag" vessel. If the vessel is NOT
a "US flag" vessel, then, presumably the country where
the vessel is documented has jursdiction (if anyone does)
while "on the high seas."

However, whatever country's ham license is held and how
the vessel is documented, once the vessel enters the
territorial waters of another country, THEIR rules and
regulations and licensing requirements apply.

(I lived aboard and cruised a Tayana 42 sailboat for
5 years, including extensive travels in Latin America.)

Actually, Jeff, unless the rules have changed, non-citizens
cannot document vessels in Mexico ...

> Suppose he decides to operate his radio
> without a license. Is he subject to FCC or Mexican radio laws?
>
> Please cite the proper US, Mexican, or ITU radio regulations with your
> reply.

Before I left California, bound for Mexico and points beyond,
I spoke with the FCC in Washington about my license renewal.
I told them that I was leaving the US for an extended period
of time on a sailing vessel and would HAVE no US address.
They told me that I had to have a US mailing address in order
to renew my license, which I arranged for, but they also stated
that they (the FCC) had NO authority outside of US
jurisdiction/territory/territorial waters.

I recognize that a documented vessel is "sort of" like "a
little piece of its country of registry," but only to a VERY
limited extent ... try to refuse boarding to an armed inspection
party off someone else's coast if you want to see just how
limited :-)

Now I realize that ship station licenses are recognized world-
wide, but ham licenses are not (though reciprocal agreements
exist) and I always made sure to obtain the proper ham permits
from the local authorities before operating in other countries'
territory/territorial waters. On the high seas, I used the
marine bands.

I ran across the best deal on cloning software and computer cable and adaptor combination. RT Systems has a great deal. Windows Software, computer cable and adapter for $39.00. The same cable will work with the R2 when they come out with the software for that little jewel. Their number is 1-800-723-6922. Look here for software information: http://www.rtsars.com/icq7_cloning_software.htm

Happy programing...Scott, KA7FVV

So, what are you saying, George? Why are you being so cryptic? Let's hear the whole story, it all it's detail!

Oh yeah, I see that you're still having problems being coherent. Are you still angry, or did you have a few too many sips off that ol' bottle before you wrote that?

How are you doing with your infatuation with WB2OTK? I don't know if Rich likes chocolates or not, but I'm sure it wouldn't hurt his feelings if you were to send him a large heart-shaped box full. Even if he doesn't like them, he'd probably appreciate the gesture. I know that you're thinking of him, even at this very moment! I have an idea, run on down to the nearest Hallmark and pick out a nice greeting card, one which really expresses your true romantic feelings about him. Hey, while you're there, take a look at their Precious Moments collection. I'll bet that he'd really be touched if you sent him one of those cute little statues! Oh hell, George, go for the trifecta: The Chocolates, the card and the Precious Moments Statue! You'll have him eating out of the palm of your hand!

Between you and me, I'd keep quiet about your whipped cream and hot fudge fantasies involving WB2OTK... at least until you two get better acquainted. Just trying to help!

Have a nice day!

The man asks if AF2Y can stop defaming his character. My reply: WHAT CHARACTER? The man's a BARF-StumpJumping abomination who likes to toss anti-Semitic remarks my way. Okay, Lloyd the Toid.. you have free speech but it works two ways and since I'm a hell of a lot smarter than you, you're going to lose. Want to play games with words, you horse's patoot? You can begin to look better to me if you pass a real ham license examination to get a real ham ticket instead of the silly piece of worthless paper you now have tacked up on the outhouse wall. You have a BIG MOUTH for being an A.H. SWL,don't you, birdbrain? For never having the intelligence to get the type of license to allow you to do some talking on 14.300 or 14.313, you seem to be so smart about everything. And then you attack my dear friend, Ruth Hoffman, N4LMC, who's a 73 year old grandmother, well respected in her community and church. and expect that a decent person like I will sit back and let you get away with defaming her? Like hell, bozo. I'll make you pay for all your mud slinging and then some. You've had it, creep, and when I get through with you, you'll pack up and move someplace else. I'll give you insult for insult and double the heat. But I won't attack your religion as you conveniently attack mine, you slimy bastard. You're in a WAR, Lloyd baby and I'm gonna clean your clock. If I were you, I'd seek out help from your lowlife buddies like Herbie, "Badblood," "Queenie the Weenie, "Polly the Redneck," Billy Jackoff Moore and others because you're going to need it. And when I get finished with you, I go after Stinson BIG TIME because he's your equal. YOU AIN'T SEEN NOTHIN' YET, you ignorant redneck white trash. Doc,AF2Y

RFEnforcer <rfenforcer@aol.com> wrote:
>In a previous thread, Jeff in Hawaii mentioned the possibility of creating a
>moderated newsgroup. Is this possible?

It is possible, but the group-creation process is a real headache:
First there is the Call For Discussion (CFD) whereby the proponents
give their arguments in favor of creating a new group, and post
a copy of the charter for the newly proposed group for everyone to
inspect and make comment to; then there is heated debate back and forth
as to why another new group should be added to the rec.radio.amateur
hierarchy -- the arguing can get nasty! Not only do the proponents have to
convince the rec.radio.amateur community of the need for a new group, but
they also have to convince the Newsgroup Creation Gang (those are the
folks who send out the new NG control messages to news admins worldwide
informing them that a new group has been created and to consider adding
the new group to their news files).

After the 30-day CFD then follows the Call For Votes (CFV) in which
everyone in the rec.radio.amateur community get to cast their vote via
email to a neutral third party; a second CFV is conducted. At the end of
the voting period, the vote counter reports the outcome to both the r.r.a
community and the Newsgroup Creation Gang. If the proper proportion of
Yes votes were received, then, if the Gang gives their final approval,
the above mentioned NG creation control message is sent out to the
news admins. Then you have to hope that the news admins will add the
new group to their news collection.

Whew!

So, who would like to start the ball rolling? (Not me -- it's easier
just to use a kill file to filter out all the goof-balls who have
rolled in here over the past year or two.)

It also seems that the ratio of off topic discussions on this NG almost perfectly matches the ratio of identical off topic discussions that can be heard on just about any amateur frequency on any given night.
==========

Are you saying here that hams should only discuss ham radio on ham frequencies?

If this is the case, then when I call my mother (75 years young) on the telephone, we should only discuss telephones? And her telling me about her classes in *Country Line Dancing* or how her seedlings are doing in her greenhouse would be *off topic*???

Or when I e-mail my old football coach, we should only discuss computers?? And the where abouts of former teachers, or the 22 pound salmon I caught in Lake Huron would be *off topic*???

Ham radio is about people. Different people have different interests. And who really cares what we talk, so long as our conversation does not interfere with your conversation. And if it does, just say so, and most hams will move up or down 4 or 5 KHz (or in the case of CW, 500 Hz will do the trick)

Shaun
Have a look at Goran Vlaski's web page:

http://vlaski.virtualave.net/

He has a program that will read your radio data and allow you to mod the data and upload it back to the radio. I was able to get my 8K.... series FT50 to transmit in freeband. The only catch is that once you power down and back up again all the data in the radio is lost and you have to download it again. I emailed Goran about this and he says there is a fix, and he is still working on it.

We have a CB band in Australia at 476 MHz so it would be useful to have access to the CB repeaters for emergencies, particularly in remote regions where there is no activity on VHF and UHF amateur bands. Let me know if you have any more success with it
Cheers,
George VK3BGJ

Opps.... Someone hit a nerve.....You SHOULD be upset.
The same hammer that the FCC is using on the Liberty Net could be turned and used against your net next.
Or do you think that your net has some special arangement with the FCC?
Ever hear the story about the Goose and the Gander? How bout the pot and the kettle?
To take this as something personal is the WRONG approach and it totally misses the point.

5214. FS Last precision OCXOs

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-26 00:00:00 UTC
From: douglas dwyer <doug@ddwyer.demon.co.uk>
Message-ID: <1tQm9TAvU8S3Ewwv@ddwyer.demon.co.uk>
Source record: 141570

Clearing out the last of these frequency references, unused precision SC
cut oven controlled crystal oscillators at 16.384 MHz that divide down
to 1,2,4kHz etc., they approach
small rubidium in long term stability and do better in
short term stability.
This is the only frequency I have, as Im an oscillator designer I
recognised these (parts in ten to the eleven/day) oscillators when they
came on the market from a cancelled cellular phone system in the UK,
Now 5% list price ie UK pounds ï¿½25 or $equivilent + postage
Email for circuit to lock to any other freq around 10MHZ in 1kHz
steps and fuller spec.

>Are you saying here that hams should only discuss ham radio on ham frequencies?

No, what Im saying is that the ratio of childish bickering on the NG perfect matches the ratio of immature behavior "on the air". Of course, a wide diversity of conversation is what being a Ham is all about, however, name-calling, slander, and plain hyperbole is not what I consider "diverse". Its divisive and unconstructive to everyone.

Im well content listening to two Hams talk about "Why Pine trees are green?" even though I have may no interest in the subject, nor would I want to contribute to a conversation such as that, but I still consider a subject such as that a worthy conversation for someone who may have a valid interest.

KK7HO Spun:

> Why wouldn't I be able to "handle" it? I've put up with their escapades ever
> since I became a ham, simply because I wanted to talk on 3950.

Correction:

All you wanted to do is "JAM" 3950, and agitate others to do the same.
We've heard you in action, and in case you haven't give a listen:
http://members.xoom.com/_XOOM/kevin_strom/kk7ho_jamming_19990313.wav

> My Statements are 100% TRUE and I am sorry if don't
> know it !

The truth is that you have committed other crimes on HF,
namely, the conspiracy to commit murder, or at least
attempt to intimidate W1WCR by discussing how much it
would cost to have him killed, with K5BLB. Hear it at:
http://members.xoom.com/frg9600/500.wav

So beware when KK7HO speaks. He is trying to reverse
the roles of who the good guys are (Liberty Net) and the
Jammers, like himself. He just can't stand a patriotic discussion
on 3950, and will stop at nothing to disrupt the legal
discussions on that frequency.

I'm not a pilot, but I do have some knowledge of the FAA requirements.
I'm not speaking for anybody but me btw.

Any electronic item used on an airplane has to be qualified (to DO-160
requirements is one way to demonstrate to the FAA that it's qualified)
and then Certified for that model. Certification would mean ground and
possible flight testing of the equipment on that major model airplane.
Once you got your qualification test report, you can look at the
spectrum
of radio emissions and you know what systems may be susceptable and
check those for interference, but any system affected can lead to one
or the other box being uncertified.

All equipment used on board must be controlled and checked at regular
intervals by FAA certified technitions. Once in the hands of a non-
certified technition, it's become suspect - only a conformity inspection
to make sure it is of the same design and no unauthorized modifications
to the unit have been made can bring it back into certified status.

If you're not an FAA certified technition, anything you bring on board
is illegal to turn on, (and an FAA technition wouldn't turn something on
that wasn't certifed for flight, even his test equipment on board
must be flight certified) according to the FAA. But they left it up to
the pilots to enforce it.

I've seen everything from Cell phones to CD players mess up flight
deck avionics. Some things don't. A lot depends upon the equipment
being used, the airplane model, and even where you sit on the airplane.

Any equipment that is latent, that is, battery operated and running
like a cell phone waiting for a call, or a lap top with an active
clock while off, is right out.

: Nope.

Well -- the correct answer is always: "It depends."

One of the regional state highway patrol freqs is at 154.905 mcs.
So, I get to hear a lot of "tweep-tweep-tweep" QRM between
144.200 and 144.205 mcs.
Granted, this is not a "modification" to xmit on amateur freqs.
Oh No, it works that-a-way right out of the box.

This is all absolutly correct, "anyone can learn it if they have a desire", but there are a couple of points that I didn't see addressed in the other posts.

In your message below, you say that Australia is your home. Does that also mean that your citizenship is also there? Only US citizens are directly eligible for a US Amateur Radio License. If you are a citizen of another country, you must first have a license in that country and then you are eligible for a reciprocal license, in the US.

Further, even if you are a US citizen, a US license does not give you the right to operate anywhere in the world. A good idea might be to get ahold of a copy of the FCC Rules and Regulations, Part 97. This is the section that covers Amateur Radio Service. Section 97.17 covers reciprocal permits. You can down load a PDF copy from "http://www.fcc.gov". Section 97.501 covers Qualifying for an Amateur Radio License.

To go directly to the document section use the URL below and select the document "47cfr97.pdf":

http://www.fcc.gov/Bureaus/Engineering_Technology/Documents/cfr/1998/index2.html

But, if you do get a license, don't limit yourself to E-Mail. We would like to talk to you as well.

Good Luck,

Martin

I though it was fairly clear that you did not need to be a citizen of
the US to be a US Amateur radio operator. Just pass the tests and
you're in. I think this topic is covered nicely on the Novice/Tech
exams. From what I remember of my theory study, the ruling states
that anyone can become a US Amateur radio operator except a
representative of a foreign government.

The reciprocal license is a different issue.

BAWAHAHAHAHAHAHAHA!

What people? 40 people are on this NG telling you what a worthless piece of
dog dung you are and not one person steps up to your defense. WHY?

1. everyone hates John-Bowl Mackey
2. Nobody respects John-Bowl Mackey
3. All of the above

correct answer is #3

Tell again about all your FCC licenses John-Bowl.

BAWAHAHAHAHAHHAHAHAHA

We just came into possession of a Kaar Engineering TR246 Packset HF Portable Transmitter/Receiver Battery Operated with 6Mhz Crystals and Vacuum tubes 3A4 3V4. Does anyone know the value of this piece or any more information on it? My husband (whose the Ham in the family) doesn't know if would be worth enough to sell so he can buy a new HF rig. Please email woods@zianet.com if you have any information.
Thank you so much for any help you can give us,
Helen

Once again, off topic. What a surprise.

What does "coherantly" mean, retard? Is that your self-admitted 2nd grade education shining through?

Yoo speek reel gud.

Your at it again, Doc....saying that "cloud warmer" is
the greatest thing since sliced bread. Donny had no idea what he was
talking about yesterday when he said I QRM'ed you.

As far as OTK goes...his day will come sooner than you think. This is
a man who had a pistol in a car I was in. I have NO DOUBT that he would
have pulled it on that policeman if OTK's temper would have got out of
hand.

I'm glad that I told that gentleman you were in QSO with yesterday
just what a snake in the grass you really are. I don't believe for one
second that the reason you have been off the air for so long is that
you are busy with other things.

I think Hollingsworth has put some kind of quiet hours on you....just
like what he has done to the gentleman from South Carolina.

Do You Yahoo!?
Get your free @yahoo.com address at http://mail.yahoo.com

David,
I just wanted to say how much you hurt my feelings yesterday by cutting
me down in front of a new QSOee. I've never done anything to you except to be
kind and courteous andf therefore do not deserve that kind of insult.
Furthermore you are leaving yourself wide open for revocation by intentionally
jamming. If you have something against me, do it like this-man to man-not on
amateur radio which MUST be cleaned up in order to save the spectrum. I am
truly surprised by your abruptness and rudeness and feel I'm worthy of an
aoplogy. My call AF2Y stands for Always Friendly 2 You and that's why the FCC
issued it to me. I have always gone out of my way for my fellow ham and you
know it. I expect an apology from you and if it isn't received, my feelings
will remain hurt.
If you think that Mr.Hollingsworth put quiet hours on me,that's your perogative
but please don't spread it around since it's very embarrassing and I know you
wouldn't want to hurt my feelings even more. 73,"Doc

Is a license even necessary for use in international open waters? Seems
to me you can, as master of a ship at sea, issue yourself any license
you see fit. Operation in territorial waters might be different, and
possibly requires an alien license.

Michael.

5239. URGENT FLASH ! CW to die, Pope Reacts ! (via ARRL, RSGB, Wash Post)

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-26 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <7ihepp$5tb$1@nnrp1.deja.com>
Source record: 141595
Cross-posted to: rec.radio.amateur.policy,rec.radio.shortwave,rec.radio.amateur.misc

Notice ARRL pulled a Klinton and let an "ally" announce this most NWO like change, to avoid a potential PR nightmare. ARRL knew months in advance and any claims to the contrary are lies.

"It is expected that the World Radio Conference to be held in 2002 or 2003 will agree to the removal of mandatory Morse testing for access to frequencies below 30 MHz," states a joint news release issued May 21 by the RSGB and the RA. "Following that decision, the existing license structure will be replaced with an incentive-based system. In the meantime, discussions are under way to ensure that Morse and data subbands are safeguarded by incorporating them into license schedules."

Pope John Paul II said Wednesday that it is natural for humans to wonder when the world will end, and advised all to await the day with serenity and hope.

``Nowadays, everything happens with incredible speed -- because of the breakthroughs in science and technology and the expanded means of communication,'' the pontiff said at his weekly audience in St. Peter's Square.

``It is therefore natural to question what humanity's destiny is and what its final goal is,'' he said.

The pontiff, who turned 79 last week, told the hundreds of pilgrims who assembled in the square on this perfectly sunny day that the tension surrounding the ``final event'' must be faced with ``calm hope.''

What does this have to do with amateur radio policy?
<<<WHAT A PIECE OF DAMNING AND INCRIMINATING INFORMATION. THE BEST THING I'VE
EVER SEEN ON THIS NET. NOW YOU CAN READILY UNDERSTAND WHY RILEY HOLLINGSWORTH
IS QUITE CONCERNED WHETHER OR NOT THIS LIBERTY NET WHICH PREACHES ENSLAVEMENT
TO ALL OF THOSE WHOM THEY CONSIDER NON-ARYAN, IS WORTHY OF RETAINING THEIR
HATE FREQUENCY. THE ANSWER IS SIMPLE. CHECK OUT RAY FRANKLIN'S "HATE DIRECTORY'
ON THE INTERNET. YOU'LL SEE KEVIN STROM'S NAME MENTIONED. YOU'LL SEE THE 3.950
GANG OF THUGS MENTIONED. REMEMBER..THE ONLY TIME A MAN'S LIBERTY IS TAKEN AWAY
IS WHEN HE TAKES IT FOR GRANTED-WHEN HE DOES NOTHING TO COMBAT PIRATES OF
LIBERTY. GET ON YOUR COMPUTER AND E-MAIL RILEY IF YOU BACK HIM vis a vis STROM
AND HIS GOOSESTEPPING RATS. STAND UP FOR AMERICA. STAND UP FOR FREEDOM AND
JUSTICE AND TOLERANCE AND THE DIGNITY OF ALL MEN! WE ARE ALL GOD'S CHILDREN AND
THE ALMIGHTY CHOSE TO OFFER VARIOUS COLORS. NO ONE IS BETTER THAN ANYONE ELSE.
WE SHOULD HELP ONE ANOTHER INSTEAD OF HARMING. JUDAISM IS THE PARENTS OF OUR
WESTERN CIVILIZATION AND CHRISTIANITY THE OFFSPRING. PARENTS AND OFFSPRING ARE
FAMILY, NOT ENEMIES. IF YOU'RE WHITE EXTREMIST AND YOU NEEDED BLOOD FROM A
LIVING MAN OF COLOR OR AN ORGAN FROM A NEWLY DECEASED ONE, WOULD YOU RATHER
REJECT THEM AND DIE? IF YOU'RE AN ANTI-SEMITE AND NEEDED BLOOD OR AN ORGAN TO
SURVIVE,WOULD YOU REJECT THEM FROM A JEW? GET WITH THE PROGRAM, PEOPLE. REJECT
RACISM,BIGOTRY AND INTOLERANCE AND YES, SEXUAL PREFERENCE DISCRIMINATION TOO.
LET'S KEEP AMERICA STRONG AND VITAL AND A BEACON OF HOPE TO ALL OPPRESSED!
RILEY CAN BE REACHED VIA RHOLLING@FCC.GOV AF2Y,DOC>>>>>>>

"Doc",

Wouldn't this be an opportune occasion for you to calm down some of your "hate speech" in rec.radio.amateur.misc? This forum isn't the proper venue for you to act out your nazi-paranoid dementia. Don't you know that there are newsgroups dedicated to the discussion of Anti-Semites, Neo-Nazi's, Republicans, Racists, the Religious Right and all the other ghouls and goblins that are haunting you?

Individuals who want to discuss amateur radio related topics inhabit this newsgroup. Neo-Naziï¿½s, KKK'ers, Skinheads and Star Warï¿½s Action Figure collectors have their own newsgroups. As a tenderfoot on the Internet, you need to educate yourself on the proper path for venting your spleen. Ruth Carolyn Hoffman, N4LMC, doesnï¿½t need you to run roughshod over her shopping list of ï¿½enemiesï¿½. She has adequately developed her own methods for dealing with those who dare to question the motives and tactics of The Intercontinental Traffic Net.

Have you ever considered hosting a weekly ï¿½encounter groupï¿½ in your home? Ranting in this newsgroup isn't going to enable you to find peace of mind. You can't exorcise your psychological demons by pretending that jack-booted Naziï¿½s are lurking in amateur radio, ever ready to ship you and yours off to Treblinka in a cattle car. Pretending that it is so doesnï¿½t make it a reality.

Real Naziï¿½s would have silenced anyone who threatened them. Since you have not been silenced, it is safe to assume that these ham radio Naziï¿½s either exist only in your fertile imagination or they do not feel threatened by your actions. Regardless, your frenzied blathering is a total waste of time and effort. Wouldn't it make more sense to expend your energies by helping a friend preserve his highly endangered amateur radio license?

Why are you applying your infamous "Never forgive, Never forget"
philosophy to people who have neither requested nor need your
forgiveness? These contributors have not done a thing to harm or
threaten you in any way. All they have done is disagree with you. Is
that sufficient cause for you to behave like an unbridled Philistine?
Your behavior in this newsgroup has been exceedingly unbecoming for
someone who claims to be a representative of Judaism. It's high time
for you to cease being an embarrassment to The Faith.

You have reached the point where you are even badgering and
tormenting Oris, N3CND. If ever there was a ham who has tried to
understand everyone's point of view, it has to be Oris. And now it
appears that he is about to be included on your constantly expanding
list of supposedly "Un-American" radio operators. Oris believed you
once and it nearly cost him his ISP. Considering that, don't you agree
that he deserves better treatment and consideration from you?

At the very minimum, you need to terminate your incessant name-
calling, character assassinations, and personal attacks. Is it
possible for you to discuss a topic in an objective manner without
trying to leverage your arguments with ï¿½hate speechï¿½, insults and
slander? I can remember a time when you were capable of making a
strong argument without resorting to such tactics. It is a shame to
note that you have allowed yourself to mentally deteriorate to such a
low level. Where is the AF2Y who used to love fair, open and robust
debate of an important issue? Has the ghost of Capt. Mike Galego,
KA4MUJ, forever vanquished that incarnation of AF2Y?

You will do whatever you will do. Just keep in mind that there is
always someone ï¿½a hell of a lot smarter than youï¿½ (as you put it),
waiting in the wings should you stray too far beyond reason. Jousting
with a few windmills in this newsgroup is probably of no lasting
consequence to anyone. Perhaps your vitriolic tirades, and retro-
drivel from the 1940ï¿½s, are actually entertaining to some in this
newsgroup. But you are far from prepared to debate these topics with
someone who knows you and understands your shallow, transparent
platform of hatred. Good luck in finding relief from your misery. You
won't find it in here. Here's hoping you find lots of suckers to fight
with you. I won't be one of them until you clean up your act.

No, No. He graduated up to
first grade...he says
it in prior his story
mention when he admitted
to turning bill Cheek to the
feds...

He graduated up to 1st Grade...
what you see is what he gives
as such.

bill conduit

Turns out in the international aviation treaties somewhere (ICAO treaties) pilots are supposed to learn code. Nobody bothers, its easy to recognize the three letter VOR, NDB, or four letter ILS ID with the code printed in front of you. Just stumbled across that in another group.

Bus station Bobby. Who in the hell is George? I think the people on this web site are sick and tired of your telling them by way of addressing someone else, your desires toward Rich Whitten WB2OTK. I have no objection if you have a perversion of loving men, boys, little girls, critters, etc, but I think it is sick,
but to write your desires under the guise of addressing someone else on the web site? Give us a break, this is your
personal life , do not share it with us. But maybe you want the world to know your oreintation. enough already, we already know. Who is this "George" you keep addressing?

Why is it that no one but on one ever addresses the
evidence that I present? Is it because they know that
I am right, and squarely on point?

In contradistinction to the idiotic blather, I present
the important information that shows how the genocide
of the Davidians should get the interest of all
amateur operators at:
http://www.atlcom.net/~geozim/index.htm

Now, addressing the issues point by point.

> ANTI-SEMITIC

No, I support the cause of the Semitic Palestinians to
a homeland: all of Palestine, illegitimately taken by
Jews.

> ANTI-GOVERNMENT

The people are the government. I am a populist and
support legitimate government by the people, not
by Zionists who control it now.

> BESMIRCH OUR DEMOCRACY

I cannot find the word "democracy" anywhere in the
Unanimous Declaration of Independence, the US Constitution,
or any of the Constitutions of the several States. When
you refer to OUR DEMOCRACY are you telling us that you
are really a foreign communist? Telling the truth is
not besmirching anything. If the shit fits, you have to
wear it, shame and all.

What does this have to do with amateur radio policy?
<<<WHAT A PIECE OF DAMNING AND INCRIMINATING INFORMATION. THE BEST THING I'VE EVER SEEN ON THIS NET. NOW YOU CAN READILY UNDERSTAND WHY RILEY HOLLINGSWORTH IS QUITE CONCERNED WHETHER OR NOT THIS LIBERTY NET WHICH PREACHES ENSLAVEMENT TO ALL OF THOSE WHOM THEY CONSIDER NON-ARYAN, IS WORTHY OF RETAINING THEIR HATE FREQUENCY. THE ANSWER IS SIMPLE. CHECK OUT RAY FRANKLIN'S "HATE DIRECTORY' ON THE INTERNET. YOU'LL SEE KEVIN STROM'S NAME MENTIONED. YOU'LL SEE THE 3.950 GANG OF THUGS MENTIONED. REMEMBER..THE ONLY TIME A MAN'S LIBERTY IS TAKEN AWAY IS WHEN HE TAKES IT FOR GRANTED-WHEN HE DOES NOTHING TO COMBAT PIRATES OF LIBERTY. GET ON YOUR COMPUTER AND E-MAIL RILEY IF YOU BACK HIM vis a vis STROM AND HIS GOOSESTEPPING RATS. STAND UP FOR AMERICA. STAND UP FOR FREEDOM AND JUSTICE AND TOLERANCE AND THE DIGNITY OF ALL MEN! WE ARE ALL GOD'S CHILDREN AND THE ALMIGHTY CHOSE TO OFFER VARIOUS COLORS. NO ONE IS BETTER THAN ANYONE ELSE. WE SHOULD HELP ONE ANOTHER INSTEAD OF HARMING. JUDAISM IS THE PARENTS OF OUR WESTERN CIVILIZATION AND CHRISTIANITY THE OFFSPRING. PARENTS AND OFFSPRING ARE FAMILY, NOT ENEMIES. IF YOU'RE WHITE EXTREMIST AND YOU NEEDED BLOOD FROM A LIVING MAN OF COLOR OR AN ORGAN FROM A NEWLY DECEASED ONE, WOULD YOU RATHER REJECT THEM AND DIE? IF YOU'RE AN ANTI-SEMITE AND NEEDED BLOOD OR AN ORGAN TO SURVIVE,WOULD YOU REJECT THEM FROM A JEW? GET WITH THE PROGRAM, PEOPLE. REJECT RACISM,BIGOTRY AND INTOLERANCE AND YES, SEXUAL PREFERENCE DISCRIMINATION TOO. LET'S KEEP AMERICA STRONG AND VITAL AND A BEACON OF HOPE TO ALL OPPRESSED! RILEY CAN BE REACHED VIA RHOLLING@FCC.GOV AF2Y,DOC>>>>>>>

That is completely untrue.

ANYONE, except agents of foreign governments are eligible for US amateur radio licenses. That includes citizens of other countries, liek me, for example! :-)

Similarly, you don't even have to take your license exams in the US. As long as three accredited VEs oversee and process the exams, the actual exam can take place ANYWHERE in the world, including Australia. There are several VE teams conducting examination sessions in Mexico for mariners who sail down south, then decide to get their US ham license.

> Martin, Do you need a license to operate in international waters?

Yes, you do.

Your vessel is covered by the laws of the country in which it is registered. If your vessel is registered in the US, then you must abide by all of the FCC's rules.

This is not the case. You are bound by the rules of the country where the vessel is registered while operating in international waters. You are not a "country to yourself" where you can do anything you like!

George, George, George, Please don't get so defensive! I'm only trying
to help you with your little problem, sorry to have apparently touched
a nerve! Gosh, you're sensitive about this, aren't you?

If you wonder why people think you have a little crush on WB2OTK, And
they do, I've heard them talking, think about your presence here on the
net; it all revolves around either WB2OTK or AF2Y. It quickly becomes
obvious to everyone that you have an abnormal preoccupation with these
two men, but that's OK, just make sure you don't run afoul of any local
anti-stalking ordinances. Here at the dawn of the new millenium,
homosexuality is not the dirty thing that it was in your youth. I
don't personally understand it, but far be it for me to condemn it,
either. You are what you are, and I suppose you can't help that. It
just seems sad to me that you are forcing yourself to live this lonely
life, unable to truly express your feelings to the men who mean the
most to you. I don't know if Doc or Rich are gay, I tend to think that
they're not, but that doesn't mean that they wouldn't be flattered if
you came clean with your TRUE feelings instead of constantly attacking
them.

So, here's another idea. Next time you get the overwhelming desire to
post more nasty stuff about them, send them a Candy-Gram instead! Now
tell me, who wouldn't like to receive a Candy-gram... or better yet,
one of those Vermont Teddy Bears that they advertise on the radio!
I'll bet they'd be touched.

Please don't be mad at me, George. I'm only trying to help. If you
don't want to take my advice, I'm sure that there are many good
therapists in the Memphis area. Make an appointment with one, I'm sure
they will be able to see you through this problem and help you live a
much happier life.

Have a nice day!

Did you register your vessel to your own make-believe country?

I'd like to hear the callsign you invent for your make-believe radio license. And once word gets out on the bands that your call is bogus, you'll be classified as a "pirate" and no one will talk to you (that's a matter of law -- we're forbidden from communicating with such stations).

As an Australian citizen, you're subject to Aussie radio laws (and international ITU regulations, too). Just apply for a high-seas radio license from your home country, and use the HF SSB marine bands for your traffic. Please remain off the hams bands unless you go about getting the proper license.

I ran across the best deal on cloning software and computer cable and adaptor combination. RT Systems has a great deal. Windows Software, computer cable and adapter for $39.00. The same cable will work with the R2 when they come out with the software for that little jewel. Their number is 1-800-723-6922. Look here for software information: http://www.rtsars.com/icq7_cloning_software.htm

Happy programing...Scott, KA7FVV

Really? Suppose a U.S. citizen is cruising on his Mexican-registered
boat in international waters. Suppose he decides to operate his radio
without a license. Is he subject to FCC or Mexican radio laws?

Please cite the proper US, Mexican, or ITU radio regulations with your
reply.

Sounds good but, there is free softwhere available on the web and pre-made adapter for about $10. I built my adapter for about $3 in junkbox parts from the schematic on hamradio.cz

Enjoy your interface, I wonder how the software compares to the free program. Let us know any additional features.

Looney - Tud, did you really think we were going to wait until the "official' legal defense fund was established , before we would help a friend ? I sent what I could, and quite a while back. I will send more, if I get ahead far enough to see my way clear. I am not going to wait for a nut-cake like you (or anyone else, for that matter) to say it is now "officially set up", and send my money God knows where and to whom. I MOST CERTAINLY would not send anything to any "fund" set up by YOU, and that is CERTAIN. Bill has learned the truth of the old saying, that you find out who your real friends are when you are down and out.
And here is what I have to say on the matter. Bill needs your help, and he needs it NOW, not 6 months or a year down the road, when some "official defense fund" is set up. You want to help Bill ? Then send him the help. You a friend of Bill`s ? Then do what you would want Bill to do if it was YOU that was down and out. That is what being a real friend means. And maybe your God, Whoever or Whatever he is, will smile upon YOU in YOUR time of need.

The man asks if AF2Y can stop defaming his character. My reply: WHAT CHARACTER? The man's a BARF-StumpJumping abomination who likes to toss anti-Semitic remarks my way. Okay, Lloyd the Toid.. you have free speech but it works two ways and since I'm a hell of a lot smarter than you, you're going to lose. Want to play games with words, you horse's patoot? You can begin to look better to me if you pass a real ham license examination to get a real ham ticket instead of the silly piece of worthless paper you now have tacked up on the outhouse wall. You have a BIG MOUTH for being an A.H. SWL,don't you, birdbrain? For never having the intelligence to get the type of license to allow you to do some talking on 14.300 or 14.313, you seem to be so smart about everything. And then you attack my dear friend, Ruth Hoffman, N4LMC, who's a 73 year old grandmother, well respected in her community and church. and expect that a decent person like I will sit back and let you get away with defaming her? Like hell, bozo. I'll make you pay for all your mud slinging and then some. You've had it, creep, and when I get through with you, you'll pack up and move someplace else. I'll give you insult for insult and double the heat. But I won't attack your religion as you conveniently attack mine, you slimy bastard. You're in a WAR, Lloyd baby and I'm gonna clean your clock. If I were you, I'd seek out help from your lowlife buddies like Herbie, "Badblood," "Queenie the Weenie, "Polly the Redneck," Billy Jackoff Moore and others because you're going to need it. And when I get finished with you, I go after Stinson BIG TIME because he's your equal. YOU AIN'T SEEN NOTHIN' YET, you ignorant redneck white trash. Doc,AF2Y

CB Rambo Sez,

It'll be a uphill fight..... Lloyd will Win!

Very true... however it is a very coveted half-mile. It's the
half-mile that lets one talk from the east coast to Europe on 5 watts
via the world of sky-wave propagation. It's not the sum of the
frequencies that are in question -- it's the desired properties of the
HF frequencies vs. VHF/UHF.

However, some very nice radio work is done in the VHF/UHF region and
several of my friends have Tech tickets and are having a blast with
radio and the various modes used there. And you are quite correct -
there is a huge frequency range that is allowed without knowing CW. I
personally would like to see some HF voice portions of the bands
opened up for Tech use but keep the CW portions just as they are (I
know there are international considerations but I would still like to
see portions of the HF bands opened for Tech use).

Regards,

- Dave Bernazzani

Copyright (c) 1997 - Ingrid A. Rimland

July 29, 1997

Good Morning from the Zundelsite:

This is the second part of a two-part series on Allied conduct in defeated Germany. It is part of a radio broadcast put out by Kevin Strom of the "American Dissident Voices" fame, a National Alliance production. (http://www.natvan.com/)

As I said yesterday and as I want to reiterate today, our reproducing an excerpt of this particular broadcast is not meant as an endorsement of the ADV program overall. I make this disclaimer because ". . . acting in concert" is the newest wrinkle our enemy employs in trying to stop the unstoppable - in silencing Revisionism.

However, there is no need to reinvent the wheel, and much of the information below was originally compiled by Dr. Austin App, one of the earliest Revisionist, from whose research I am now borrowing:

"Quite apart from any ethnic or ideological considerations, World War II was a war between, on the one side, the elitists who created Communism as a way-station on the road to their New World Order - and on the other, THOSE WHO OPPOSED THAT NEW WORLD ORDER.

It is a tragedy of millennial proportions that America and Britain were induced to fight on the side of Communism and Communism's masters.

Few today remember that in the 1940s, the Allies, who even then were calling their world-government-in-the-making the "United Nations," were pursuing a policy of unconditional surrender, which meant that the Germans would be obligated to accept an occupation government whose announced intentions, the infamous and genocidal Morgenthau Plan, would have reduced Germany to mediaeval conditions and cut her population by enforced starvation.

Go to a large library and check out Secretary Morgenthau's book, "Germany Is Our Problem", Harper and Brothers, 1945. You will note the use of the term "United Nations" on the front flyleaf and in the foreword by Franklin D. Roosevelt.

(Similarly), a prominent Jewish writer in America, Theodore Kaufman, had in 1941 written a book entitled "Germany Must Perish", which advocated the extermination of all Germans by sterilization.

Kaufman's book received favorable reviews in major American magazines and newspapers. Other books, such as Louis Nizer's "What To Do With Germany", also contributed to this atmosphere of strident anti-German hatred.

War propaganda and official policy combined to create an image of the German as sub-human and deserving of almost infinite punishment if not annihilation.

Churchill said to the Germans in January, 1945:

"We Allies are no monsters. This, at least, I can say, on behalf of the United Nations, to Germany. ...Peace, though based on unconditional surrender, will bring to Germany and Japan immense and immediate alleviation of suffering and agony."

Against that false claim the late Dr. Austin App proclaimed the truth:

* Those Allies who were "no monsters" literally raped more European women than had ever before been raped in the history of the world.

* They put Germany on a starvation-level diet.

* Under direct orders from Dwight Eisenhower, they killed more than a million German POWs. (Editorial note: See James Bacque, "Other Losses" describing how these soldiers died through administratively ordered neglect and starvation)

* They looted 12 million people of their homes, goods, food, and even clothes and drove them from their homelands.

* They took one-fourth of their farmland, they took their ships and their factories and their farm implements and then told them to live by farming.

* They abused and starved to death more German babies than there ever were Jews in Germany.

* They brought to their death five times as many Germans in one year of peace as died during five years of war.

* They raped and debauched hundreds of thousands of German, Austrian, and Hungarian girls and women from eight to eighty.

For the Americans and British, open rape was not as common as among the Soviet troops. The Soviets simply raped any female from eight years up and if a German man or woman killed a Russian soldier for anything, including rape, 50 Germans were killed for each incident, as reported in TIME magazine, June 11, 1945.

But for most of our boys, having that "wonderful time" depended a great deal on the "cooperation" of the German and Austrian women. From the starving and the homeless, of course, sexual "cooperation" could be bought for a few pennies or a mouthful of food. I don't think we ought to dignify this arrangement with any other than its true name of sexual slavery.

The "Christian Century" for December 5, 1945 reported "the American provost marshal, Lieutenant Colonel Gerald F. Beane, said that rape presents no problem for the military police because a bit of food, a bar of chocolate, or a bar of soap seem to make rape unnecessary. Think that over, if you want to understand the situation in Germany."

The "Weekly Review" of London, for October 25, 1945, described it thus: "Young girls, unattached, wander about and freely offer themselves for food or bed. ...very simply, they have one thing left to sell, and they sell it... ...as a way of dying it may be worse than starvation, but it will put off dying for months -- or even years."

Dr. George N. Shuster, president of Hunter College, wrote in the "Catholic Digest" of December 1945 after a visit to the American Zone of occupation, "You have said it all when you say that Europe is now a place where woman has lost her perennial fight for decency because the indecent alone live."

By official policy, the Allies created conditions in which the only German mothers who could keep their young children alive were those who themselves or whose sisters became mistresses of the occupying troops.

Our own officials admittedly brought the Germans down to a total daily food intake less than that of an American breakfast, a level which leads to slow but sure death unless relieved.

According to testimony given in the United States Senate on July 17, 1945, when the colonial French troops under Eisenhower's command, presumably mostly Africans, entered the German city of Stuttgart, they herded German women into the subways and raped some two thousand of them.

In Stuttgart alone, troops under Eisenhower's command raped more women in one week than troops under German command raped in all of France for four entire years.

In fact, of all the major belligerents in World War II, the German troops had by far the smallest record of rape and looting. In fact, the German army's incidence of rape in all of Germany's occupied territories was even lower than that of American troops stationed on American soil!

According to the International News Service in London, January 31, 1946, when American soldier's wives were brought to Germany, they were given special authorization to wear military uniforms because "the GIs did not want their wives mistaken for Fraeuleins by other occupation troops."

A writer for the "New York World Telegram" January 21, 1945 stated "Americans look on the German women as loot, just like cameras and Lugers."

Dr. G. Stewart, in a health statement submitted to General Eisenhower, reported that in the first six months of American occupation, venereal disease jumped to twenty times its former level in Germany.

I want you imagine an orgy of rape like this happening in your country, in your neighborhood, to your family, to your wife, your sister, your daughter. I want you to imagine what it would feel like to be totally powerless to stop it from happening, completely unable to bring the criminals to justice.

And I want to ask you, were there ever any "war crimes" or "hate crimes" trials of these butchers and rapists and inciters to butchery and rape?

Ladies and gentlemen, you have been lied to by those who want to submerge us into their world government. The public schools, the major media, and the

government are lying to you."

(Kevin Strom in "American Dissident Voices")

Thought for the Day:

"When it was seen that many of the wicked seemed quite untroubled by evil consciences. . . then the idea of future suffering was advanced."

(Lewis Browne)

Sammy Seagull AKA "Bus station Bobby"

I can tell by your ramblings you are a incorigible pervert. So, I will stop advising you. You should have long sessions with a shrink. You have many problems, mental and physical. I can not make any sense out of your postings. Just rantings about some "George" whoever he is. I can only wish you luck with the path you have selected to go down. Just be careful in the bus stations and public places you frequent. You know the last time you had a little problem with the officers. I will terminate these contacts with you by saying it is very sad case. I don't think you get much help from your xyl as I myself have heard some of her pornographic remarks 0n twenty meters. Good luck and good bye.

Well, last night I reread Part 97 and all of the questions from the test question pool, and you are correct. I didn't find it very clear from Part 97, however, there is one question in the Novice test question pool that references it. I guess when you haven't taken a Novice exam in over 30 years, you tend to forget things. I don't even know for sure if it was on the test then.

At least my post livened up the discussion.

Oh, I don`t want to "educate" John. You cannot educate a Racoon beyond a certain point. No , I will leave that task to those who are willing to take on the labors of Hercules.
But I WILL occasionally set him straight, especially when he is contradiciting himself.
As for Conduit, I am really not all that happy with him, either. I butted heads with him a while back. And I would STILL not advise people to send off their hard - earned money to some "official legal defense fund", Which may or may not be legitimate. Like I said, if they want to help Bill, then they should not wait until Bill goes under.
Don`t get me wrong. I like you Smalley, and I have seen you hit the nail right on the head too many times to count. I see you as a man who adheres to his principles, and does everything he can from one day to the next to see that everything is right. I have yet to see any contradiction in your speaking or your character. If you lived nearby, we would undoubtedly be friends.
But ignoring Mackey is not going to get rid of him. It is not just that Mackey thrives on the attention he gets. He has been obsessed with Cheek for over three years. Mackey enjoys negative attention, and seeks after it. Your assessment would be of a NORMAL person, which he is certainly not. What sane person would carry on a tirade after three years, even after the object of that tirade has been gone from the group for over a year ? Even the mere mention of Bill Cheek sets him off. I have seen him respond to Cheek`s AUTOMATED POSTINGS, for Gods sake !
Mackey, in his delusion, sees himself as some sort of hokey "saviour" of the group, in that he is going to keep us from talking about Bill or TO Bill. In other words, he has set himself up as some sort of "censor" on the group. I really don`t understand why the USENET authorities have chosen to ignore this fact for over three years, while the Looney interferes with both Bill Cheek`s freedom of speech, and everyone else`s.
Have a look at my other posting, where I describe Looney -Tunes "pattern of behaviour". This is typical of the obsessed, and he certainly is that. He repeats this pattern over and over, ad nauseum, like some kind of crazy robot. He cannot and will not be stopped by his fellows on the group, and it is my considered opinion that he has made a "Life`s Work" out of this stupidity. Now there is a lofty goal ! You seriously misjudge his mental state, since you are about as normal as Apple Pie, Phil, and tend to think in those terms. So do most people. But after observing him for over three years, I know what he is about.

> The courts have limited the bill of rights as
far as free speech is
> concerned.

See, this is the left-wing elitist oligarchist nonsense we're up against. The courts don't limit the Constitution---precisely the reverse is true: "This Constitution, and the laws of the United States which shall be made in Persuance thereof . . .shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby . . ." (US Constitution, Art. VI, par. 2.)

You can't shout fire in a theater!

Oh, yes, you can, and must, when the occasion requires it; but if you do so negligently or maliciously you are responsible for the consequences. Moreover, no one may practice prior restraint on you, e.g., by taping your mouth, unless you are a child, a mental defective so adjudged, of a criminal. I wish I had a nickel for every time the above statement by a Supreme Court Justice (Holmes?) has been taken out of context in an effort to justify all kinds

of Draconian, paternalistic, freedom-stifling usurpations by government-too-big-for-its-breeches!

> Traditionally ham radio has excluded political speech and religion.

Traditionally, Baal-worshipers and Incas sacrificed their babies and children, burning them alive to pacify their pagan "gods". Saying Ham Radio has excluded religion is incredible when there are Bible Nets all up and down the bands. And how do YOU define political speech? Partisan diatribes (i.e., Democrat, Republican, Socialist) I think most would shun anyway, but true politics is simply human activity in relation to power. Who can formulate means to identify or exclude that? Not even Solomon!

> The terms of your ham license determine how you use ham radio.

The terms of my ham license, in Part 97, specify nothing about refraining from discussing current events, government, anthropology, geopolitics or foreign affairs. Indeed, an official publication of the ARRL (and that organization is recognized by the FCC as a partner in regulating ham radio) explicitly cites current events discussions as being among the many activities hams CAN and DO engage in! Additionally, the Communications Act of 1934 as amended explicitly states that NOTHING in the act shall be so construed as LIMITING FREEEDOM OF SPEECH or authorizing any Federal agency to engage in CENSORSHIP!

> Allowing crap, like the 3950, goes against every legal tradition in
> America! Prior to this decade, ham radio was off limits to junk like
> them.

If your reference is to the Liberty Net, it has been functioning since the mid-1970s---about 3 decades. And, as a teenager in the late '50s (FIVE decades ago), I can remember listening on 75 Meters to the Confederate Crab Net whose participants expressed many views akin to some expressed on the Liberty Net. Your credibility would suffer less if your facts were accurate.

> Only in the 90's do, primarilly conservatives, feel that they have the
> right to blow their shit using any/every media known to man. This is
> unique to this time and defies tradition.

I speak only for myself: as a 7-year veteran of the Liberty Net, I am NOT a CONSERVATIVE and if I thought the Net were conservative I wouldn't participate! If there were something worth conserving in the present corrupt political system here, perhaps I would be. I am a Constitutionalist/Populist like Jefferson. It was he, and thousands like him, who set the REAL tradition for America: Government stay out of my face! You mind your business and I'll mind mine! No confiscation of the fruits of honest men's labors to feed parasites! The anti-Liberty toadies wouldn't last 10 seconds in a debate with real Americans like Jefferson, Washington, Paine, Andrew Jackson, et. al. And the erudite Americans cited above were adept at expressing their thoughts, so they found it unnecessary to use the corrupt, filthy, vulgar gutter speech to which the previous writer has resorted, calling patriots "junk" as he himself emerges from his wallowing in the gutter.

5283. Written decoding software for sound cards?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-27 00:00:00 UTC
From: MOstrowski <M_Ostrowski@yahoo.com>
Message-ID: <7ijle3$69q$1@ink.msen.com>
Source record: 141389
Cross-posted to: rec.ham-radio.packet,rec.radio.amateur.digital,rec.radio.amateur.digital.misc,rec.radio.amateur.misc,rec.radio.scanner,rec.radio.shortwave

I'd like to hear from anyone who has written digital signal decoding
software using sound cards.

I'm currently searching for information relating to decoding digital signals
(CW, RTTY, AMTOR,
CLOVER, PSK31, etc) using a sound card. I've used several of such software
packages currently
available for download and I like to try my hand a writing something
similar. I have many years
experience professionally programming both DOS and Windows applications
using C/C++/MFC,
but have never had need to interface to a sound card until now. I'd like
this application to be
Windows 95/98 based but I've heard rumors that directly accessing the sound
card interface is
difficult, if not impossible, under that OS.

Any tips you can pass along that can get me started will be greatly
appreciated; also any info
on books/articles/websites/source code/libs you've found helpful.

Peter, of PSK31 fame, told me that the Microsoft mmsystem.dll
handles interfacing to the sound card. I haven't looked for
info on that DLL but I assume it is available from Microsoft.
I'm also interested so please post whatever sound card interfacing
info you gather.

For Sale:

Kenwood TS-850 SAT I am the original owner and it has gotten very little use. Scores a 10 for looks. This is a 160 through 10 meter all mode radio. General coverage receive starts at 100 khz and goes to 30 mhz. I have installed additional filters for CW and and SSB making the total number of filters = 6. Very good front end. Built in Antenna Tuner. Worked all over the world with a wire antenna. In very good condition. I also have the RS232 serial port adapter to connect this rig to a computer for auto logging and control. I live in southern California if you are local and want to check it out.

Great for Field day, RTTY, DX or just SWL

$1000.00 cashiers check or money order only.

I will pay shipping conus only.

You can relpy to me at n6teb@usa.net

Thanks, and 73

Dave N6TEB

The problem with programs that use soundcards that decode radio info can't be built around visual basic
as VB is so damned slow.
Thus, soundcard decoder programs require the knowledge of real programmers (C++) which explains why they are so
damned buggy, due to Windows needing thousands of lines of C++ code just to initialise a stupid program (being
sarcastic but you C++ Windows programmers know exactly what I mean).

Primo job opportunity for RF designers - My apologies if this message breeches the status quo of this user group. I am simply mentioning a good deal to any person who might want one. The place: either northern California or next to the Rockies in Colorado. Your choice. The company: a $220M electronics/semiconductor outfit with international sites. Salary: wide open, these folks are hungry. Skills: BSEE or equivalent years of experience in RF design engineering; 5+ years experience preferred; knowledge of process design (engineering/manufacturing); good communication skills (written and verbal); experience with Type II & III level projects; good understanding of ECO process; knowledge of broadcast in either of these two broadcast bands - 500kHz to 107MHz or 50MHz to 800MHz; knowledge of solid-state amplifier design. You can contact me, Charlie Wirt at charliejazz@yahoo.com.

I don't know, I think I see logic behind the FCC regulating emissions of a receiver since ANYONE can by a reveiver, no license required.

One way around the problem is to wrap the speed-critical stuff in
a DLL, but use VB for the user interface.

Actually getting samples from the sound card isn't all that hard.
For initial development you may even want to avoid the soundcard
stuff entirely, use whatever program is available to you to
record samples to a file, and then process them offline. Either
use the Windows API functions, or just use fopen() and grab the
bytes yourself.

What to do with the samples once you have them is the hard part.
My usual suggestion for a first book on DSP is Ifeachor and
Jervis, _Digital Signal Processing: a practical approach_.
For comms stuff (which you will probably also need), try a
text like _Communication Systems_ by Haykin.

<5417119C35ACE747.297F3196266D03AE.8A9B850D2FF2B9FE@library-proxy.airnews.net>...
:The problem with programs that use soundcards that decode radio info can't be built around visual basic
:as VB is so damned slow.

Actually VB 6 is not that slow. Problem is in lack of support for
Multi-threading and callbacks that are required to fully exploit the
potential of mmsystem.dll API.

:Thus, soundcard decoder programs require the knowledge of real programmers (C++) which explains why they are so
:damned buggy, due to Windows needing thousands of lines of C++ code just to initialise a stupid program (being
:sarcastic but you C++ Windows programmers know exactly what I mean).

Well, It's not that bad. But there is function of complexity of
implementation vs. size of the project. For VB it grows steeper
but VB starts at 0 value. C++ starts at some positive number (since you
will need bunch of to put "Hello World" on the screen") but grows slower
with size of the project. To make story short: smaller projects are easier
to do at VB while large ones on C++.

George

I hope you find what your looking for. I would make a sujestion to you.
I would sujest that you try to do this under Linux (i.e. Unix) first. I
think that you would have alot better response with the linux OS versus
Windows. Good luck let me know what you find out.
Thanks Oris

Here's a list of names of elite who would have made wonderful exemplary members
of the BARF,StumpJumpers and the 3.950 assembly of lice.
1. Hermann Wilhelm Goering
2.Rudolf Hess
3.Joachim von Ribbentrop
4.Wilhelm Keitel
5.Ernst Kaltenbrunner
6.Alfred Rosenberg
7.Hans Frank
8.Wilhelm Frick
9.Julius Streicher
10.Walter Funk
11.Hjalmar Schacht
12.Karl Doenitz
13.Erich Raeder
14.Baldur von Schirach
15.Fritz Sauckel
16.Alfred Jodl
17.Franz von Papen
18.Arthur Seyss-Inquart
19.Albert Speer
20.Constantin von Neurath
21.Hans Fritzche
22. Heinrich Himmler
23. Josef Paul Goebbels
24. Adolf Hitler
With the exception of numbers 22,23 & 24 who committed "Selbstmord" as they
say in German(suicide), the rest stood trial at Nuremberg for war crimes,crimes
against humanity etc.Ten died by "Tod durch den Strang" as they say in
German(death by hanging), some got up to 20 years and two got
"Lebenslaengliches Gefaengnis" as they say in German(life sentences) and two
were not guilty(nicht schuldig). However when we stop to consider what the
three rotten and bigoted ham radio groups signify,how can we not say what
wonderful members the 24 would have been? Doc,AF2Y

Thanks for reposting Miss Rimland's article, in which she quoted some of my work. She is an indefatigable truth-teller, and anyone who has had any interactions with her will tell you that she is a Lady in every sense of the word.

The excerpts are from one of the articles of which I'm most proud; so thanks again.

Except for the laughable subject line, it is an excellent post overall -- and a vast improvement upon the name-calling and insults which we all too often see from you. Of course, I do note that none of your own writing is in the post, so that may in itself account for the improvement.

Your usual posts do no credit to your cause, and in fact are hardly worthy of an emotionally disturbed five-year-old. They really don't constitute an argument for or against any position. They constitute what are usually referred to as "fits" or "outbursts."

It may be too much to expect from you, but a continuation of this trend toward more gentlemanly debate would be welcomed by many.

Happy Internetting,

--

Posting this nonsense says far more about the kind of person _you_ are, Mr. Anonymous, than it does about me.

It's from the website of the anti-American and anti-freedom Morris Dees, a creature of most peculiar sexual inclinations who has made a career out of abusing the legal process to defame and bankrupt patriots and freethinkers.

Virtually nothing in it is true.

In your case, you are merely a worm who, failing utterly to make your case with facts, resorts to personal attacks of the vilest kind, even descending to involving little children, none of whom is yet of elementary-school age, even _publishing their names_ in association with horrible and false accusations which may well incite the unstable to unspeakable acts.

In Dees' case, he is guilty not only of all the above, but also of abuse and exploitation of the mentally ill for his unhuman "cause."

What Dees doesn't tell you is that the poor, delusional, then-vindictive and now-exploited woman was, prior to the "interview," an inmate for two stretches in the local mental ward, in part for threatening to do things which resulted in her not only losing physical custody of the children, but in having only court-supervised visitation with them for an extended period.

I don't blame her for her psychological problems. I do blame the political vultures who quickly moved in to exploit her condition in a failed attempt to hurt my reputation (I mean, will anyone _actually believe_ that I scout out armories everywhere I go so I can "bomb Israel" and "rule the world"?).

Thank you for proving, in a far more dramatic and convincing manner than anything I could say, just exactly what kind of foul monster you are.

Vita brevis,

> screwball>>>>>

<snip>

Radiosigs seems to be trying to tell us that:

1)the "Jews" are a [Semite] race, and that

2) unnamed persons [Hitler and the Third Reich?] have tried to
exterminate this "race."

I congratulate Radiosigs. He has offered us subjects that are truly fit
for discussion on amateur radio. Why? Because freedom of speech
applies to amateur radio, and the subjects raised have caused an
emergency condition throughout society. On the other hand, Radiosig has

offered us erroneous information.

1) Hitler had no program of racial extermination of the "Jews." The Germans felt that the "Jews" had taken over their country and wanted the "Jews" out of their face. That's why Hitler shipped those in German-occupied Europe to concentration camps in railway cars instead of shooting them on the spot. Numbers were tattooed onto their arms and they were used as prison-workers once they arrived at the camps.

Ever wonder why so many "Jews" survived the so-called holocaust? After all, the Germans were the most efficient people on the face of the earth. If the Germans wanted them all dead, how come so many survived?

Since World War II, a growing number of scholars and human rights activists have researched the so-called "Holocaust" of the "Jews" and have called it, among other things, "the hoax of the twentieth century."

One of the most famous of the holocaust revisionists is Ernst Zundel who lives in Toronto, Canada. The "Jews" have been going ballistic, trying to shut him (and the website that carries much of his research) down. They cooked up a charge and hauled him before the Canadian Human Rights Commission. When Zundel attempted to defend himself by saying he had uttered the truth about the so-called "holocaust," the "Jew"-controlled Canadian Human Rights Commission told him:

"TRUTH IS NO DEFENSE"

Think about it. The Jews wanted to ban truth from the courtroom when the holocaust was being discussed. Why? Kinda makes you think, yes?

In early March, 1999, the Federal court of Canada threw out this "truth is no defense" ruling. Yes, the "Jews" got whupped in court! They have been going NUTS ever since!

No wonder Mad Albright and the Zionists in the US have been going bananas with the bombing in Serbia. They gotta take out their frustrations on someone! And why not the Serbs? They're Christian, aren't they?

If you want to find out more about holocaust revisionism, go to:

http://www.Public-Action.com/SkyWriter

and check out the revisionist links I have in that directory.

2) Radiosigs seems to be telling us "Jews" belong to the semitic race, because to oppose their political actions is "anti-semitic." Radiosigs is misleading us on this, too.

The vast majority of Jews we meet are NOT semites, but descendants of the Khazars, a people who spoke a Turkic language and who flourished in the Dark Ages around the area of the Caspian Sea near Russia. The Khazar Emperor was converted to Judaism in the 700s AD, and thus his subjects were converted, too. The descendants of *Khazars* (not

semites) form European Jewry. And it is these European/Khazarian "Jews" who rule Israel. For more information, see "The Thirteenth Tribe" by Arthur Koestler, Random House, 1976. You can get a copy of Koestler's book at the bookstore of:

http://www.natvan.com/

Now why would the descendants of the Khazars be telling us they are descendants of the semites? Because they are liars. Lying about their lineage enables them to corral the sheeple (Christian Zionists) who believe "God" wants the rest of mankind to be subjected to the old Biblical Hebrew master "race." They will quote you all kinds of Bible text to prove the point. Some sleight of tongue is required of course; switch "descendants of Hebrews" with "descents of Khazars" and call 'em all "Jews." The dumb goyim won't notice the difference . . .

Remember, "Jews," no matter what their ethnic background, have been brought up in Talmudic culture, and in that culture false swearing is sanctified.

"And he who desires that none of his vows made during the year shall be valid, let him stand at the beginning of the year and declare, 'Every vow which I may make in the future shall be null.' HIS VOWS ARE THEN INVALID, PROVIDING THAT HE REMEMBERS THIS AT THE TIME OF THE VOW. " (Caps in original.) A footnote describes the "Kol Nidre," a formal dispensation of vows prior to the Evening Service of the Day of Atonement. (Babylonia Talmud, Nedarim, 23a; pg. 68 of Soncino Press 1936 edition.)

None of this is meant unkindly. I just think the "Jews" should stop lying and manipulating others and become a little more laid back. They should confess and pay back the money they have stolen by running the holocaust scam. Then they should decide if they want to become Americans. If they do, they should renounce the Talmud and sign on to the Bill of Rights. If not, they should go to Israel to live among their own kind. "Live and let live" -- that seems fair, doesn't it?

[BTW, a friend reminded me last night that the Devil is called "The Prince of Lies." Sends a shiver up your back!]

Zombie Wolf wrote in message <7ijh1m$tq4$1@garnet.mint.net>...
>Oh, I don`t want to "educate" John. You cannot educate a Racoon beyond a
>certain point. No , I will leave that task to those who are willing to take
>on the labors of Hercules.

I think even they wouldn't be up to the task.

>But I WILL occasionally set him straight, especially when he is
>contradiciting himself.

Even if that's what he wants you to do?

>Don`t get me wrong. I like you Smalley, and I have seen you hit the nail
>right on the head too many times to count. I see you as a man who adheres
to
>his principles, and does everything he can from one day to the next to see
>that everything is right. I have yet to see any contradiction in your
>speaking or your character. If you lived nearby, we would undoubtedly be
>friends.
>But ignoring Mackey is not going to get rid of him. It is not just that
>Mackey thrives on the attention he gets. He has been obsessed with Cheek
for
>over three years. Mackey enjoys negative attention, and seeks after it.
Your
>assessment would be of a NORMAL person, which he is certainly not. What
sane
>person would carry on a tirade after three years, even after the object of
>that tirade has been gone from the group for over a year ? Even the mere
>mention of Bill Cheek sets him off. I have seen him respond to Cheek`s
>AUTOMATED POSTINGS, for Gods sake !

And I'm not saying he won't! But look at the way things are now. As it
stands now, John comes out saying something so ridiculous you *know* it's a
troll, dozens of people respond out of sheer indignation, and John takes his
time to respond to (and enrage) each and every one. The result is 350+ off
topic messages a month from him alone. I've seen his threads grow to over
100 messages within days!

Now imagine this. John puts out one of his "trolls" and not one soul
responds. John attaches himself to one of Bill Cheek's automated posts, and
no one stops to look. It'll drive him nuts! He's got an obsession allright,
and it is ATTENTION. Look what happened when Bill left, did he stop? Nope.
Now it's the "Cheek-A-Likes" like Blake, you and myself that he's after, at
least to hear him tell it. Bullcrap. He wants the attention, pure and
simple. If it weren't for us, he'd find someone else to justify his jackass

crusade. But if no matter what he did, no one fell for it, well what's left? Without the attention he craves, he WILL seek it elsewhere.

>Mackey, in his delusion, sees himself as some sort of hokey "saviour" of the
>group, in that he is going to keep us from talking about Bill or TO Bill. In
>other words, he has set himself up as some sort of "censor" on the group. I

>

Yikes No Jeff !!!!! (hi hi)

I was involved with one group that changed to a moderated group and it was not too bad. That group did it to get away from spam and advertisers.

I really don't care if we change this one or start a new one but something has to be done.
r.r.a.misc is the only place for general discussion of ham radio issues and is one of the first place someone who is interested in finding more about amateur radio is going to come. We do not give a good representation of the service with a 90% noise content from just a relative few lids.

I would think that having several moderators and the use of a mod-bot would help keep the trash off. I have been on moderated lists with mod-bots and they do a good job.

A mod bot allows multiple moderators. It will automatically post a message from a pre approved member of a group and will filter the remaining messages that are sent to the moderators so that they have a minimal amount of messages to approve and send on.

Once a new user has posted several times within the guidelines of the charter they are moved to the pre approved list. If a pre approved poster abuses the group they are moved off of the pre approved list and their posts must be once again approved by the moderator. There is also a feature that will just flat reject posts from certain users or even domains.

This group seems to be about 90% noise from the trash ops. The "on the air"
trash is limited to only a couple of frequencies on one mode. It is much better
on the air.

I am concerned that newcomers to the hobby will be put off by what they read
here and never really get a chance to see what the hobby can offer.

Ah, but it is necessary. Many folks are using newsreaders that don't
display the NGs in the header. Thus, they'll do a follow-up wrongly
believing that their post is only going to the NG they're currently
reading, not realizing they too have cross-posted to many groups.

No, I am a Christian, and I can never perish. I am anti-Zionist as is God. I support the cause of the Semitic Palestinians, the rightful owners of Palestine. Since I am Israel, the blessing is to me, not the Jews.

According to you, when Jesus Christ refered to the Jews as being of their spiritual father the Devil, this earned God His own everlasting damnation?

Now, please address the issue of genocide carried out against Christians inside an amateur radio station at Mount Carmel Center, Waco, Texas, as described at the website below.

Has anyone happened to notice the little "inconsistancies" that Blake posted about John recently? John asked for proof that he was a liar, and got it in spades. I think John won't be back for a while - too busy wiping the egg off of his face. Worth a read if you haven't already.

If nothing more, it proves that John is here strictly for the attention, and Mr. Conduit is right on the money in how to deal with him.

Michael,
you can find at least one very usefull source code example
demonstrating sound card programming under MS Windows on creative labs
(soundblaster) ftp server:
ftp://ftp.creaf.com/pub/creative/devinfo
The file I used is
fullduplex.exe
I used this example as a starting point for my DSP programming under
Windows NT using Visual C++ 5.0.

Good luck!

Well, George, thank you for your kind wishes. I wish you well in the
future and do hope that you will strive for the happiness that is so
lacking from your life. It has been my pleasure to provide you with a
bit of guidance, and I do hope that it has been helpful to you.

I'm sorry that you choose to end this dialogue at this point. It has
been most entertaining, but I understand that you must do what you need
to do.

I'm glad that I have been able to be of some assistance. Rich assures
me that he is not interested in a relationship with you, as he and
Idene are very happy. He did say that he enjoyed the chocolates,
however. Sending them anonymously was a nice touch, though he was
aware that you sent them as he'd been following this thread.

George, I sincerely wish you the best in your future endeavors,
provided that they do not in anyway violate FCC Regulations or local
stalking ordinances.

Have a happy day!

Heck no it isn't.
I'm for completely dumping code but there should be at least
a division between VHF and HF classes.
BTW, did you know that if you don't know what you are doing with
ham transmitters, you can cause damage to your body?
There is a reason for the licenses, so you don't fry yourself, give yourself
brain tumors, etc.

Posting this nonsense says far more about the kind of person _you_ are, Mr. Anonymous, than it does about me.

It's from the website of the anti-American and anti-freedom Morris Dees, a creature of most peculiar sexual inclinations who has made a<<<<HEY STROM, BETTER WATCH WHAT YOU SAY ABOUT SEXUAL INCLINATIONS AND THE REST OF YOUR ROT. YOUR EX-WIFE MAY MAKE ANOTHER POSTING ABOUT WHAT A LOUSY LOVER YOU WERE. AFTER ALL SHE DID MENTION HOW YOU AND ERNST ZUNDEL AND WILLIAM PIERCE WERE IN BED TOGETHER! HEIL YOUR TUCHUS, YOU NAZI-LOVING LOWLIFE. Doc,AF2Y>>>>>> career out of abusing the legal process to defame and bankrupt patriots and freethinkers.

Virtually nothing in it is true.

In your case, you are merely a worm who, failing utterly to make your case with facts, resorts to personal attacks of the vilest kind, even descending to involving little children, none of whom is yet of elementary-school age, even _publishing their names_ in association with horrible and false accusations which may well incite the unstable to unspeakable acts.

In Dees' case, he is guilty not only of all the above, but also of abuse and exploitation of the mentally ill for his unhuman "cause."

What Dees doesn't tell you is that the poor, delusional, then-vindictive and now-exploited woman was, prior to the "interview," an inmate for two stretches in the local mental ward, in part for threatening to do things which resulted in her not only losing physical custody of the children, but in having only court-supervised visitation with them for an extended period.

I don't blame her for her psychological problems. I do blame the political vultures who quickly moved in to exploit her condition in a failed attempt to hurt my reputation (I mean, will anyone _actually believe_ that I scout out armories everywhere I go so I can "bomb Israel" and "rule the world"?).

Thank you for proving, in a far more dramatic and convincing manner than anything I could say, just exactly what kind of foul monster you are.

Vita brevis,

I know this is the wrong thing to say......but the idea of making up a call sign is very appealing. I'm happy talking on the SSB frequencies I just want to use the ham freq. for email. I have a pretty good understanding of the tech side (and enjoy learning more) I'm just pushed for time right now to do the CW. Would the base stations that I email to know if my call sign was bogus? I can easily deal with the CW once I'm cruising again, I'd just like to get the email going as soon as I get back to the boat.

Jeff,
I see that you are still paralyzed by your inability to
make a coherent argument or accept correction. Therefore,
you very childishly cycle responses to other NGs through
the followup_to command. A mature adult would not have
this problem. Therefore, when we respond to you, we must
do so as we would to a very slow, brain-damaged, and
emotionally crippled child.

Little boy, you cannot understand that Part 97.405 is
a regulatory issue. As usual, little boy, you have never
been correct concerning anything. Since you cannot ever
grow up, you cannot perceive issues in a mature manner.
In the future, little boy, when you soil your pants in
the form of an incoherent argument, don't post it to
this NG.

At long last, after years of game playing and political meandering, the Net Management has chosen to make a "statement". Isn't that remarkable? It was such a monumental event in mankind's development that their "statement" warranted the issuance of unsolicited e-mail notifications at the expense of Florida taxpayers. That should not surprise anyone. When "The Net" does anything at all, it is usually aimed at short-changing the public and getting something for nothing. Why wouldn't they continue their history of public chiseling by using a State of Florida public account to promote their extra-regulatory activities?

What a web they weave... when they practice to deceive! We are told that every word they say is backed up with tapes and letters testifying to the truth of the net's position. We are told that what we are receiving is not just opinion. It is "fact"! Well...where are these tapes? Where are these letters? Who generated them? Why aren't the net's sources being cited and why aren't these fictitious documents a part of the public record? Could it be that these so-called "facts" are nothing more than another sham presented by the net management in an attempt to maintain a death-grip on their membership?

We are told that "The Net" has no interest in suppressing anyone's opinion. If that is so... why does the net refuse to discuss the issues with the very people it claims it does not want to suppress? Why do net members continue to cause intentional and malicious interference at the behest of the net management? If the net does not want to suppress public opinion... why do net members appear in swarms every time the topic of net misconduct is approached? Jamming on behalf of the net.... Is that how "The Net" shows its commitment to the inclusion of everyone's point of view?

Free speech? "The Net" is not the least bit interested in free speech or the free exchange of ideas. "The Net" doesn't have time for free speech. It has to devote all of its time to more important pursuits... such as providing a pseudo-commercial telephone service for ill-equipped yachtsmen and make-believe missionaries. Now they even pretend that they had no role in the Jim Jones Guyana affair. History does not support that claim. History tells quite another story... a story of daily net involvement with illegitimate operators passing illegal traffic in and out of Jonestown. The net manager's brain washing and spin control has conveniently erased the net's memory. However, unfortunately for them, the B.A.R.F. still remembers. We remember it all.

How easy it to say, "There is no hate in my soul for anyone..." after the damage has been done. Words and biblical quotations come easy after the victim has been ground to dust. How easy it is to be benevolent after a vendetta has been waged to destroy a person... privately and publicly. "The Net" can take their cheap excuses and feigned innocence and put it back in their bottomless bag of lies and deceit. Net managers who want to be peacemakers? Just who are they? Which net managers? Where are they now? Why are they not ready and

willing to meet and work through this disagreement with the B.A.R.F.?

Why is the net management always so worried about who wants them to resign? Why is this card always being played? It is to gain sympathy... plain and simple. Of course, the B.A.R.F. feels that certain members of net management need to move on. These managers have misdirected "The Net" to the point where the net has become a detrimental influence within the Amateur Service. They have piloted "The Net" into foul waters and aground. They have made the vendetta with KV4FZ the net's prime business. They have misused the net's resources in order to wage war with our organization and our leadership.

The net management doesn't need to resign... it needs to be removed and publicly censured by its membership. But, conveniently, the net now claims it doesn't have a membership. If "The Net" doesn't have any membership... then to who is the net management responsible and accountable? Ponder that for a while, net "non" members! Has your net management become a "law unto itself"... accountable to no one but themselves?

The net czarina claims that she has hatred in her heart for no one? Then why is it necessary to slander and belittle the deceased members of our organization? Does the net really want to discuss "easy targets"? What then could be easier than to attack amateurs who have gone to their final resting-place? And what could be more cowardly? The twisted minds of the net managers are so filled with hatred and bitterness that they cannot even allow the dead to rest in peace. They want to blame their own shenanigans on these defenseless hams that are no longer around to state their case. But that is just fine. We have come to expect it. The B.A.R.F. stands by its fallen heroes... every one of them. And we stand by their deeds and their words.

Net members... will your management ever do the same for you? Or will they treat you like another N4PCK and pretend you never existed?

Why are all the crocodile tears now being shed over the net management's decision to use 14.300? No tears were shed when the B.A.R.F. was systematically, and with premeditation, deprived of a place to operate on 20 meters. The nets most conspicuous hired goon bragged, time and time again, that his sole purpose was to "deny access" to any B.A.R.F. member or activity. He and his thugs were brought upon the scene for that very purpose. These RF hooligans have stated, repeatedly, that what they do... they do on behalf of "The Net". Maybe the net membership should reconsider who they feel obligated to grace with "standing ovations" in Orlando. Or is "The Net" now prepared to disassociate itself with these radio terrorists? That will be the day! It is more likely that 1999 will see the rise of yet another hired hit-squad that is willing to carry out openly what the net witch plans in secret... in the smoke-filled back rooms of the net honchos.

Since when does a mythical "group of Mexican amateurs" have the right to hand out frequency allocations? And just who were these conveniently appearing do-gooders from "South of the Border"? Who died and left them in charge of 14.300?

Somebody had better give that reincarnation of Lucretia Borgia a clue. She and her henchmen do not have an obligation to "uphold the amateur profession." The amateur service is not a profession... not unless one is concerned, daily, with the operation and promotion of a pseudo-commercial telephone bypass cabal. The B.A.R.F. doesn't need to read the Amateur's Code to know what is right... and what is wrong... for Amateur Radio. We have the FCC rules and regulations to guide us. Those rules clearly state that it is neither permissible to regularly solicit international or high-seas telephone patches nor is it permissible to set up a net operation whose sole purpose is to bypass the international common carriers.

When was the last time you heard an emergency preparedness exercise on "The Net"?

Whether or not the FCC chooses to enforce the letter of these regulations pertaining to phone patching is a moot point. Most of these regulatory federal agencies now exist for only one purpose. They are focused on justifying their own existence by becoming a cash resource generator for the Washington bureaucracy. They are laying the groundwork for the conversion of the amateur spectrum into a revenue producing cash cow. "The Net" is playing right into their hands by demonstrating, every day, the commercial possibilities of the HF frequencies. If the nets can operate a pseudo-phone company on 14.300... why can't a real business pay to operate there and be taxed by the politicians? Now, perhaps, the amateur world can see and understand why the FCC adheres to a "hands-off" policy when it comes to the nets. It should be very clear why a dissident voice emanating from the Virgin Islands poses such a threat to both "The Net" and their stooges in Washington.

Fellow hams... where do you stand on this crucial issue? The B.A.R.F. wants to know your opinion on the continuing misuse of amateur spectrum by the pseudo-commercial "service" nets. Just click on the E-mail address provided at the bottom of this page. We are not afraid of free, open and robust discussion of these issues. We welcome healthy, constructive criticism. We are not "The Net".

5331. York Metal Enclosures, know anything about them?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-27 00:00:00 UTC
From: old_computers@yahoo.com
Message-ID: <7ikk1u$fg8$1@nnrp1.deja.com>
Source record: 141437

Hi,

I trying to find if the company that made enclosures under the name York or York metal works or something similar still exists. These enclosures were commonly used in the 70's for electronic projects. I am trying to restore several pieces of equipment that uses them. They are green color, marble type texture to them, about 18x10x10 inches (although they came in many different sizes). If you could even tell me what the exact name of the company is that would be great.

thanks for any help
steve

The B.A.R.F has received some very interesting E-mail during the past week. In the interest of fair play and openness, the following communications will be discussed:

From Upstate New York:ï¿½

Question: "Why isn't the B.A.R.F. Home Page dedicated strictly to Ham Radio? Why do I have to read all this political stuff on a Ham Radio Page?"

Answer: The B.A.R.F. (unlike most Amateur Radio organizations) does not focus solely upon radio issues. We are both a radio club and a political action forum. The B.A.R.F. has always promoted the free, open and robust discussion of important and controversial issues. The B.A.R.F. Web Page not only follows in that tradition, but presents personal insights from members and supporters with "first hand" information on topics of special interest.

From Floridaï¿½

Question: "I don't understand the BARF emblem. What do the symbols mean?"

Answer: That is a very good question. The B.A.R.F. emblem has adopted the traditional diamond shape that is used by almost all radio organizations worldwide. The stylized antenna (at the top) is also the symbol of human life and mankind's dependence upon a Higher Power. Think of it as a solitary human with arms raised towards heaven. It also symbolizes human potential and destiny. You might recognize this universal icon from a very popular charitable organization that tries to unite various agencies in a single yearly fund drive. The Celtic Cross (in the middle) represents the crisscrossed paths that our lives must follow. Each of us must follow this "circuit" to reach our final spiritual goal and fulfill our potential. The circle represents the infinite nature of the soul and the superior power of the intellect over the animal instinct. Many churches are adorned with the Celtic Cross including nearly all Presbyterian and Reformed Churches and many Roman Catholic Churches. However, the B.A.R.F does not endorse any particular church or faith. Members are free to interpret the cross in terms of traditional European-American culture exclusive of any religious creed or doctrine. The grounded lightning (bottom of emblem) illustrates the power of superior argument and rational thinking to effectively "ground" the lightning bolts hurled at the B.A.R.F. by our opponents. Time and time again, the enemies of the B.A.R.F. have tried their best to defeat The Truth and silence our leadership. But the B.A.R.F. just keeps growing stronger and more resolute. The B.A.R.F. membership displays our emblem with pride, demanding (and enforcing when necessary) that all who might encounter our emblem pay it due and proper respect. Hail the Barf Emblem and all those who wear and display it!

From Indianaï¿½

Question: "What does this have to do with the present sorry state of affairs on both 20 meters and 75 meters? I am tired of the foul language, character attacks and deliberate interference!"

Answer: The B.A.R.F. is tired of it, too. But, in order to understand why this is all happening, one must have an historical perspective. The same gang of thugs who were recruited in 1990, to fight the B.A.R.F., is now perpetrating most of the rude behavior and offensive language that you have heard on the air. These glory-seekers sought to intimidate the B.A.R.F. and suppress its vital message concerning the illegal operations of the so-called "service" nets on 20 meters. Their program of intimidation and bullying has never ceased. It has been carried on, back and forth between 20 meters and 75 meters, for nearly eight years. It was not the B.A.R.F who came to 75 meters to recruit these radio hooligans. It was the "service" nets. They needed hired goons to carry out their agenda and they found willing accomplices in the ready pool of social degenerates and misfits on 75 meters. However, the present turmoil on 75 meters (especially 3894.5 and 3901) is also rooted in "hurt feelings" and the rejection of former friendships. Unfortunately, there is a personal side to this controversy and that story will probably never be told in its fullness. The B.A.R.F will never take action or make statements that might further endanger the future of innocent young children.

Perhaps the most significant event in escalating the "war" on 75 meters was the decision, by a former friend, to ostensibly leave the 3894.5 group on 75 meters. This former "regular", in the fall of 1993, felt daily pressure from the "service" nets, and his mentor in New Jersey, to disassociate himself from his 75 meter friends. This shadow lord in New Jersey convinced his gregarious, but shallow minded, follower that he had better "trump up" some excuse and leave 3894.5 or else. Or else what? Or else, he would no longer be in the good graces of "the nets" and sheltered under their supposed umbrella of protection at the FCC. At the same time, this fellow was fighting a very stiff Notice of Apparent Liability (the largest N.A.L ever issued to a radio amateur for malicious interference) and he did not dare risk losing the "pull" that the nets claimed to have in Washington. Was he being duped? In all fairness, it is hard to say. One fact is clear. He was never required to pay one cent of his N.A.L. even though there is no record that the FCC ever dismissed the action.

The worst was yet to follow. This same fellow's natural inclination towards mischief did not allow him to simply walk away from 3894.5 and find a new "home frequency". Instead, he bombarded 3894.5 nightly with foul pornographic tapes, the infamous "dirty box", "wind" generators, prerecorded tapes and every other known form of deliberate and intentional interference. This is not speculation. It is fact. His signal was logged and analyzed many times by the FCC and verified to be emanating from his station. One B.A.R.F member was even shown the map of FCC "hits" on this interfering station's location. There were so many FCC markers over this station's QTH that the entire west region of South Carolina was obliterated. Yet, for some unknown reason, the FCC refused to follow up on the evidence. Was it a lack of funds or adequate staff personnel that prevented the FCC from taking action? We seriously doubt it. Now, for nearly four years, the situation has changed very little. It has degenerated, for the most part, into "trench warfare". What you are hearing today on 3894.5 and 3901 is a direct result of the FCC's inaction on over $10,000 in

uncollected N.A.L's. The B.A.R.F invites our guests here to check with the FCC and determine if the N.A.L's were ever paid and if notï¿½ why?

From Virginiaï¿½

Question: "Why don't all the parties to this disagreement just sit down at the bargaining table and hash out this mess? Isn't this whole affair giving Ham Radio a 'black eye'?"

Answer: The B.A.R.F. has offered, on many occasions, to meet with the leadership of the opposition, the FCC, and the ARRL, in an attempt to reach some measure of accord. The so-called "service" nets refuse to discuss the matter. They would rather continue their hate campaign as a method of silencing the B.A.R.F. On 75 meters, every offer of discussion with the opposing faction has been met with comments like, "We don't talk to trashï¿½ we burn it!" Ask yourselfï¿½ what does a comment like that do to the possibility of peacefully negotiating a settlement? At some point, it becomes very difficult to discuss matters with a group that finds such joy in character assassination and personal attacks. Regardless, the B.A.R.F. remains open to any and all suggestions on how best to end the conflict. The B.A.R.F. seeks a just peace and an end to the daily insanity on 14.313 and 75 meters. Can the same be said of the nets and their followers? If so, let them propose a meeting time and place, with mutually agreed upon referees (such as the ARRL might provide), where discussions may begin. The B.A.R.F. will be thereï¿½ ready to talk and present our case. But the continued attempts to destroy the personal lives of our leadership must stop. The vendetta against KV4FZ must end. The B.A.R.F. agrees that this whole situation is, indeed, giving Ham Radio a "black eye". We are willing to explore any avenue that might resolve the conflict.

And finally, another from Florida:

Question: "Won't this fight stop when KV4FZ leaves the air?"

Answer: No. Although KV4FZ is very important to the cause, and truly loved and admired by all B.A.R.F members and supporters, the B.A.R.F will not be silenced if KV4FZ should lose his battle. A war is neither won on a single battlefield nor does a single general win it. The B.A.R.F. has an ample pool of leadership from which to draw qualified and articulate spokespersons. Should the nets be successful in temporarily silencing Herb, there will be a grass roots swell of support that will surpass the current B.A.R.F presence on the bands by tenfold. Good Americans will always step forward to uphold the underdog when his cause is just and true. Amateur Radio Operators are no exception to this rule. The telephone bypassing nets, along with their hired goons, and their stooges in Washington, will not manhandle the B.A.R.F. and bully us into submission. We will continue the fight until we are given a fair hearing and an appropriate forum to air our position and grievances.

Amateur Radio is indeed for a very different purpose than the Maritime Mobile Radio Service (correct term). "Marine" has no connection whatsoever with the military unit with a similar name by the way. Yes, stations in the maritime mobile radio service require licensing for the equipment and, depending on the country, require operator's certificates for the user for SOME classification of vessels (recommended that everyone using "Marine" radio equipment have at least a restricted radio operators certificate....even if not required). The reason behind it being a GOOD thing to have the operators certificate (which becomes mandatory and of higher grade for larger vessels) is that the training shows you HOW to best use your marine gear and HOW NOT to abuse the system - you'll come to appreciate this big time!). The only similarity between Amateur Radio and Marine radio services is that they both may use equipment sharing similar (not the same) frequencies and modes.

Make no mistake....Amateur Radio is a hobby....Marine (Maritime Mobile Radio Service) is serious business....whose intent is foremost to provide distress/urgency/safety services in a predictable and efficient manner....with the SECONDARY use to facilitate business related to maritime mobile operations (ships traffic, phone patches, messaging via many means). Marine radio is not for frivoulous pastime!

George hit the nail on the proverbial head. The problem with signal processing in real time is that you need a real-time processor. Unless your eating all of the processing time this can't be done reliably in Win9x.

The second problem is that Win9x does not let you talk to the card at the hardware level, as well as to the DMA. You would need to do that to effectively perform near real-time capture and hold processes of any sound frames you're trying to deal with. Best bet there is to write a 16-bit dll, which will allow you to do these things.

Uh...not to quibble but, "scanners" are...uh...scanning RECIEVERS. I suppose it would be sorta feasable to boost the local oscilator power up somewhat, and sorta use it as a transmitter that way, but I don't know why you'd wanna do that.

Don't wanna sound snippy, but I think I misunderstood your question.

Thanks, people.

CIAO!

5346. An excerpt from WB4AIO's XYL's interview - HOLLINGSWORTH PLEASE READ

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-27 00:00:00 UTC
From: Anonymous <nobody@replay.com>
Message-ID: <199905262320.BAA22712@mail.replay.com>
Source record: 141497
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

The XYL of WB4AIO was interviewed by "The Intelligience Report."
Here is a little of what she had to say. The subject was the OKC
bombing on April 19, 1995.

Excerpt:

Kevin told me that the bombing was a good thing, because it was
a government building and that government employees had been
killed. It was a part of the revolution. I called my brother and my
brother said, "Yeah, well what about all those kids that were
killed?" Kevin said to me, "Well, if there were children killed,
they must have been the children of government employees and it
will teach them all a lesson." This was retribution for what
happened in Waco.

End excerpt.

Again, I hope Mr. Hollingsworth or some of his professional
associates contact WB4AIO to discuss the above.

The entire interview can be found at:

http://www.splcenter.org/intelligenceproject/ip-4i4.html

Hello all I've found this thread with dejanews and I hope I am not off topic, or intruding. I have a question regarding the A2 rear sight. When viewed from the top, are the A2 sights on standard issued M16's slightly rotated left? I am talking a couple of degrees due to the spring tension the rear sight assembly is under? I am asking this because on some Ar15's I have noticed this phenomenon, and apparently most say that a slight amount of left rotation of the rear sight assembly is normal. I was wondering if this is so in the military issued M16A2's as well. I am really curious about this so those of you in the armed forces please enlighten me.

I don't know who makes me want to vomit on them more, the Kaiser, ARRL Puppetmaster K1ZZ or the FCC WTB (or the losers who keep working what few Yugoslobs are QRV)

Klinton Ready To Consider Kosovo Land War -Paper

LONDON (Reuters) - Fuhrer Wilhelm Klinton is ready to consider a full-scale Kosovo ground war against Serb forces,
sending up to 90,000 U.S. combat troops if no peace deal emerges within three weeks, Britain's Times newspaper
reported Thursday.

The newspaper, which led its front page with the story, quoted unidentified NATO sources for its information.

Although NATO was officially planning for a peace implementation force of only 50,000-60,000 troops, there
was a growing feeling in Washington and London that it must prepare for a much bigger operation involving
150,000-160,000 troops, the Times said.

``Mr. Clinton's dramatic conversion, after weeks of apparent reluctance to send in ground troops, has emerged in
the light of detailed briefings from General Wesley Clark, the Supreme Allied Commander, last week,'' it said.

The newspaper said a new sense of urgency had been injected into NATO's contingency planning because of a
warning from the military that a decision would have to be made by mid-June if the alliance was to contemplate a
ground offensive.

``The tight timetable is being dictated by the alliance's determination to start returning ethnic Albanian refugees to
their homes in Kosovo before the winter,'' the Times said.

It quoted the sources as saying that with Clinton committed to defeating Yugoslav President Slobodan Milosevic
one way or another, the United States would be expected to contribute more than half of the force.

The sources estimated the U.S. contribution could be about 90,000 troops who would be deployed from the
United States, not Germany.

``Britain and France would also be expected to play a major part,'' the Times said.

Subject: Re: Cable Question
Date: 1999/04/01
Author: jmackey <jmackey@usa.net>

Bud (the original) wrote:
Our resident electronics expert, John Mackey, has said in the past

> that after 2-3 years of exposure, the outside covering of coax will

> be too damaged to be useable.

Bud, thanks for the plug & support, but that is not exactly what I
said/Over time of exposure to UV, coax that is NOT UV resistant
(like RG-8, 8214, 9913, RG-58, etc) will become more & more
lossy resulting in permormance decreasing. RG-214 & RG-213 are
UV resistant coax. Se a qoute below from Rich Wells stating that
UV is an issue to be of concern, as I have been said in the past.

From: "Rich Wells, N2MCA" <n2mca@strongsignals.net>

inside the cable can degrade performance. If all connections are
properly sealed and it can stand up to UV, then you should be all
set for a while. Strong Signals,
Rich Wells N2MCA

Guess he couldn't appreciate your humor. I got quite a chuckle out of it when I read it.
Since I started this thread I will mention that in my non ham life I'm a windsurfing junkie. The sport of windsurfing has been on a steady decline for the last 5 or 6 years, and they don't have to know the code (ha). Few younger people are interested in paying the dues, it can take months or years to become good enough to enjoy the high wind sailing that is so popular in places like Hood River, OR. Instant gratification is what people want now. Maybe the CW haters will be satisfied if they publish all the CW questions and answers like they do for the theory! As long as the CW sub bands are preserved, it won't bother me if they eliminate the code.

Computers and the internet is what has taken the interest away from amateur radio. One problem is that many people get their license but never get on the air. They were so bored by all the dopes on 2 meters that they found something better to do.

<snip>

Radiosigs seems to be trying to tell us that:

1)the "Jews" are a [Semite] race, and that

2) unnamed persons [Hitler and the Third Reich?] have tried to
exterminate this "race."

I congratulate Radiosigs. He has offered us subjects that are truly fit
for discussion on amateur radio. Why? Because freedom of speech
applies to amateur radio, and the subjects raised have caused an
emergency condition throughout society. On the other hand, Radiosig has
offered us erroneous information.

1) Hitler had no program of racial extermination of the "Jews." The
Germans felt that the "Jews" had taken over their country and wanted the
"Jews" out of their face. That's why Hitler shipped those in German-
occupied Europe to concentration camps in railway cars instead of
shooting them on the spot. Numbers were tattooed onto their arms and
they were used as prison-workers once they arrived at the camps.

Ever wonder why so many "Jews" survived the so-called holocaust? After all, the Germans were the most efficient people on the face of the earth. If the Germans wanted them all dead, how come so many survived?

Since World War II, a growing number of scholars and human rights activists have researched the so-called "Holocaust" of the "Jews" and have called it, among other things, "the hoax of the twentieth century."

One of the most famous of the holocaust revisionists is Ernst Zundel who lives in Toronto, Canada. The "Jews" have been going ballistic, trying to shut him (and the website that carries much of his research) down. They cooked up a charge and hauled him before the Canadian Human Rights Commission. When Zundel attempted to defend himself by saying he had uttered the truth about the so-called "holocaust," the "Jew"-controlled Canadian Human Rights Commission told him:

"TRUTH IS NO DEFENSE"

Think about it. The Jews wanted to ban truth from the courtroom when the holocaust was being discussed. Why? Kinda makes you think, yes?

In early March, 1999, the Federal court of Canada threw out this "truth is no defense" ruling. Yes, the "Jews" got whupped in court! They have been going NUTS ever since!

No wonder Mad Albright and the Zionists in the US have been going bananas with the bombing in Serbia. They gotta take out their frustrations on someone! And why not the Serbs? They're Christian, aren't they?

If you want to find out more about holocaust revisionism, go to:

http://www.Public-Action.com/SkyWriter

and check out the revisionist links I have in that directory.

2) Radiosigs seems to be telling us "Jews" belong to the semitic race, because to oppose their political actions is "anti-semitic." Radiosigs is misleading us on this, too.

The vast majority of Jews we meet are NOT semites, but descendants of the Khazars, a people who spoke a Turkic language and who flourished in the Dark Ages around the area of the Caspian Sea near Russia. The Khazar Emperor was converted to Judaism in the 700s AD, and thus his subjects were converted, too. The descendants of *Khazars* (not semites) form European Jewry. And it is these European/Khazarian "Jews" who rule Israel. For more information, see "The Thirteenth Tribe" by Arthur Koestler, Random House, 1976. You can get a copy of Koestler's book at the bookstore of:

http://www.natvan.com/

Now why would the descendants of the Khazars be telling us they are descendants of the semites? Because they are liars. Lying about their lineage enables them to corral the sheeple (Christian Zionists) who

believe "God" wants the rest of mankind to be subjected to the old Biblical Hebrew master "race." They will quote you all kinds of Bible text to prove the point. Some sleight of tongue is required of course; switch "descendants of Hebrews" with "descents of Khazars" and call 'em all "Jews." The dumb goyim won't notice the difference . . .

Remember, "Jews," no matter what their ethnic background, have been brought up in Talmudic culture, and in that culture false swearing is sanctified.

"And he who desires that none of his vows made during the year shall be valid, let him stand at the beginning of the year and declare, 'Every vow which I may make in the future shall be null.' HIS VOWS ARE THEN INVALID, PROVIDING THAT HE REMEMBERS THIS AT THE TIME OF THE VOW. " (Caps in original.) A footnote describes the "Kol Nidre," a formal dispensation of vows prior to the Evening Service of the Day of Atonement. (Babylonia Talmud, Nedarim, 23a; pg. 68 of Soncino Press 1936 edition.)

None of this is meant unkindly. I just think the "Jews" should stop lying and manipulating others and become a little more laid back. They should confess and pay back the money they have stolen by running the holocaust scam. Then they should decide if they want to become Americans. If they do, they should renounce the Talmud and sign on to the Bill of Rights. If not, they should go to Israel to live among their own kind. "Live and let live" -- that seems fair, doesn't it?

[BTW, a friend reminded me last night that the Devil is called "The Prince of Lies." Sends a shiver up your back!]

That's called a learning disability. It's especially difficult to teach not to post off-topic articles to the amateur radio NGs. You're the one who started this thread, and for some odd reason, you included the ham groups. Why is that? Can you give a reasonable explanation?

We can teach gorillas to communicate using sign language, yet as you state above, we can't teach you anything.

Another one of you leftist soccer-mom hubbies who can do no wrong.

Don't you lecture me on Nazis, how many of your family members got killed in the well-organized slaughter known as D-day because the Anglo-Saxon sympathesizing racist U.S. government didn't have the balls to drop the atom bomb on Berlin.

It was "ready" in time for the Japanese though, hmmmmm ?

Now Klinton has ordered 9,000 Purple Hearts because we won't be using ground troops. He was warned by Russia. At the least such an occupation will destroy Weimar Russia's "democracy". Get ready.

What am I supposed to do, ladies and gents?. David Tolassi is threatening and harassing me and even Rich, WB2OTK. Should I report this to the ISP and AOL carriers or simply write it off as a prank or "machoism?" Please advise. Tnx.Doc,AF2Y

Will never in a million years say "sorry" to you, Doc. I exposed you for what you really are to that gentleman you were in QSO with.

I have been working on my Mustang and have BIG PLANS to drive down to Washington to speak with Mr. Hollingsworth first hand about what I think of you and OTK.

Come to think of it Doc, I might just keep on driving and pay a visit to the OTK castle....I will wear my running shoes just in case OTK goes nuts.

I don't know why you posted mr last email to you on deja vu?? This is between you and myself Doc & the whole world is not ready for your kind of terror emails sent to me.

With PerformanceCounter API and high priority levels you can get better resolution and response. Win NT will be much better choice for time-critical applications. The reason for that is Win95 memory management is designed to better utilize physical memory at the expense of response time. For sound processing NT offers more then plenty real-timeness unless you want 44Khz resolution stereo (don't need that for SWLing).

Don't know much about Linux but am very curious about it.

What? How does type acceptance for manufactures have anything to do with homebrewing.

>This also made it
>possible for the government to get more control over the amateur public
>as Intel is trying to do with the Pentium III chip.

What control does type acceptance have over the amateur public? In what way do you link making sure that commericially made amateur gear does not have spurious harmonics etc to serializing micoprocessor chips for identification?

>It also cost the
>government money to not only enforce type accepted equipment but also be
>sure that new equipment is type accepted. What a wast of money to see
>that CBers don't get amps.

Type acceptance is not designed to see that CB'er don't get amps, it's purpose goes far beyond that. I work for a Swiss company who has just sold some RF ID tag systems into the states, our equipment must be Type Accepted by the FCC, that is we transmit 5 watts on 2.4 GHz and we meet the spectral purity required along with a host of other things.

The thing is there are more amps out there
>then ever. Its the same thing as gun control. The government tries to
>control the flow of guns so what happens there are more guns then ever.
>If the FCC would adopt my band plan or something like it Type Acceptance
>wouldn't be nessacary.

I'm not sure you understand what Type Acceptance is.

Okay, Gang, everyone whose newsreader does NOT display what NGs you're posting to, please tell us what software you're using. Cecil (W6RCA), you go first, since you're the one who first alerted us that there is such a catagory of newsreaders.

Note that I've set the "followup-to" line to just .misc.

Kenwood TS-440S-AT
+PowerSupply
+Speaker
+ 2 Filters

~ Mint Condition
~ Single Owner
~ Low Use

Package includes the following:

TS-440S-AT - With Built-In Antenna Tuner
PS-50 - Kenwood Power Supply
SP-430 - Kenwood Matching Speaker
YK-88SN - Kenwood 1.8KHZ SSB Filter
YK-88C - Kenwood 500 HRZ CW Filter
SM-TS-440S - Kenwood Service Manual
OM-TS-440S - Kenwood Operating Manual
Receipts - All HRO original purchase receipts encluded.

This rig is in factory new condition. It
is complete as listed above and includes
all original Kenwood equipment boxes.
Soon after the purchase of the above rig,
It was replaced with a Kenwood TS-950D
resulting in very low usage.

If you are seriously interested in purchasing
a top quality rig, this is it. $850.

Includes ground UPS shipping in USA

what is this nazi crap? Ever since you got in this newsgroup its Nazi this and Nazi that. This isn't a Nazi Newsgroup. This is a Amateur radio Newsgroup. Mind you that the misc mean pretty much anything its still doesn't give you the right to spout off about everyone being a Nazi! I'm of German desent and I'm starting to get a little offended. I have nothing against any creed and I sense that you are attacking anyone that is German. I would sujest that you take this crap you post about everyone being a Nazi somewhere else before people start to complain and you will be banded for spaming the newsgoup like your buddy porkbut. I think you should think about the new amateur radio operator that would see these negative posts about the amateur radio community being Nazi communists and so on. PLEASE Stop posting this trash

A ratio is a measure comparing two like quantities, so I imagine your
ratios compare good posters to bad posters, and good QSOs to bad QSOs.

It's easy to monitor a single newsgroup to arrive at the first ratio, but
how on earth could you monitor every on-the-air QSO (all bands, all modes)
simultaneously 24 hours per day, to conclude that your second ratio
"perfect(ly) matches" the first?

I suggest that you go back to CW; the CW QSOs I've heard over the last 23
years have contained *very* little immature behavior; maybe we should
outlaw phone.

Hi Wendy,I live 200' from a commercial broadcast tower and when I
purchased my first 2-meter rig a radio shack HTX212 I found that it
would not even function in that high RF environment.
I tried a lot of radios and very few work well in this situation.Some
of the worst are the Icom IC2000H,IC2100,IC281H,radio shack
HTX212,HTX242.
I asked the folks at Hahe radio outlet what would work and they said
in a tough case like this that the Yaesu FT2500M was the best bet.Mine
worked so well that I bought another.They are currently about $199.
You may not always be in a high RF environment,but we all drive thru
them and it sure is nice to have a radio that you can set the squelch so
you don't miss your friends and still not have the thing making strange
noises all the time because of inter mod and desense.
Handhelds will be worse than mobiles as a general rule(unless you use
only the rubber duck). Tracy

Also Titus destroyed all of the records of the Jews in
70 AD. No one knows that they are Jewish for a fact.
I only know that I am Israel by adoption, which shows
a greater love on God's part. In addition, God is not
a respector of persons. Jews are not special, but need
salvation as much as goys (hebrew for the non-Jewish
livestock property of the Jews).

Thanks for the comments. All should keep in mind that this
discussion is important to amateur radio because America's
Holocaust was carried out in an amateur radio station. This
should make the station at Mount Carmel Center equal to
Dachau, Bergen-Belsen, or Auschwitz.

> I'm not sure you understand what Type Acceptance is.
Well I maybe I'm wrong. I thought type acceptance was basicly a set of
values that the FCC put on CB equipment. Its like I can't build a MRF
455 amplifier without the proper filtering. Nor can I sell it to a non
ham if the amp is to work between 25 and 30 MHz in the United States.
Part 97 also says I can only build one a year if the amp is going to
operate between 25 and 30 MHz. That is what I thought type acceptance

ment to the amateur community. The FCC had all ready set standards for bandwidth for speicific emission types and the FCC had all ready set standards for power output and harmonic suppression. I allways assocated type acceptance to commercail equipment. These rules values where all out before I heard the expression type acceptance. I never heard the term type acceptance until CB radio. I also thought that the reason for type acceptance there was because people didn't understand radio. So they came up with type accepted radio to asure the public that these radios where with in legal standards.
I don't know maybe I'm wrong

posting me first. What
a genuine compliment.
I cannot thank you enough
for the notoriety this posting
will do for me ... can i be
your friend bill?

by the way: Blake Bowers hates
my guts. How can you put him
in the same "notoriety-list"
with me. he must be rolling
over in his GRASS skirt.

or blowing in it.

William...you really make my day.
What an honor.

Gee. over in rec.sport.swimming
they call me the BUNKER GUY. what
an uplifting experience to remember
when I am out doing video and stop
and think about your pungentness
in making me NUMBER UNO.

OH you are a very special guy William.

gosh. and I thought being a good videographer
seen on tv often was my calling. to think you
put me into this nirvana-ized world of LE STINKERs
you love to hate.

What a life? What a guy you are bill?

did i tell you Bowers just sent me an E-mail
telling me to go to your address and obfuscate on
your front door-bell?

To bring this to light is so refreshing. To
be able to die and put this on my crypt.

William...who else have you saintized? It
must be a short list as you must be.

William...mahalo. Aloha. Ono Ono post brah.
you one wiki-wiki guy who is a legend in your
own mind..but to do this, wow. I am just
unable to express my appreciation for your
being so damn wunnerful. I will print this
out and send it out with all resumes I send
out or when peole ask me for referneces....

you just have no idea as to how it is to
be number One in your assessment-schtick.

Can we send this in to DAVE's TOP TEN.
I really think it belongs with the DAVE-man.

How much do i have to send you for it
autographed William? Does that include
a "phlem" sample from your brain stem

question mark.

OH William, you naughty man you. are you
sure it is ok to be so nice to you.
another question mark

william in small caps to keep the mood
up to snuff.

william...I salute you. will you be going
on the lecture circuit soon...i'll come and
be your friend on stage with you and then
we both can count the money we will share.

Oh william...william...such a sweet guy.

i will respect you in the morning william.

I hate to say it but I agree. I find it very insulting being of German
desent to even be assocated with the Democratic opps Nazi party.

Does Netscape Communicator 4.51 have a filter list?
I just downloaded it and would like to filter the crap out too.

Jeff:

It's really not to difficult to accomplish what you desired in your post. The answer is, certainly, yes. You need to pull out of the scanner all the proper LOs (local oscillators), mix them in the proper order (using doubly balanced mixers), and modulate the final result with the type of modulation and information you desire. You're there! You may prefer to apply a little amplification to the result to render the "signal" a bit stronger, but that isn't too difficult, either, in these days of MMICs and hybrids. Trivial!

Dave - W6LEV

Dr. Hate has decided that he is a "real ham", one of the chosen , and the rest
of
us should not be allowed to express ourselves. The "SWL" has been and still is
an
integral part of this hobby. SWL Doris Parnarfiello, as Dr. Hate should
recall,
was very much a part of his anti-BARF campaign until she got to know him
better.
There are SWL's that probably know more about radio theory, rules, and practice
than many licensed hams. But in the world of Dr. Hate class warfare along with

racial and ethnic stereotypes are encouraged by him. He actually is a a radio masochist. What he enjoys the most is to observe conflict are providing free gasoline. Lloyd you don't belong in ham radio becasue you have a pint of veiw which differes from his and you are expressing it.

Lloyd enjoy your holiday.....I will be out also from June 4th on for a couple
of
weeks. When Dr. Hate finds out I going to the Fatherland (Germany) he will go
beserk. That should keep him occupied with a new onslaught of diatribe for at
least a month.

Hard to believe that none of these BARFies and/or STUMPIES whether alone or combined can outwit and outwrite me. I got them in "bud" like they say in Yiddish. If there's anyone out there who dislikes me and is capable of writing intelligently, please do so. I'll read. But if you are of the run-of-the-mill e.g. "Queenie the Weenie" or Bobby "Badblood" IQ, SKIP IT. Either come up to me or shut up because I'm not going down to your level. I'm much too bright, clever,handsome,erudite,wise ,educated and humble to stoop to your level. "Doc" Modest, AF2Y. I AM THE GREATEST, JUST ASK ME.>>>>>>>

Listen you Aryan Nations poster child, my dad landed on Utah Beach at 5:19 am, 6/4/44. An uncle piloted a glider in with his Ranger unit an hour or two earlier. Both lived through it all, My Dad to Dresden, and my uncle to Cologne. You're damn right I can do no wrong, as long as I am arguing with a flip-flopping make-it-up-as-you-go-along goosestepper who knows half the alphabet, and none of the vowels. If your grasp of reality is so loose you believe SAC/UN didn't nuke Berlin because of Teutonic (not Anglo-Saxon, opposite compasss direction) I think you probably need residential care. Berlin was already captured and thoroughly cleaned out almost two months *before* the first A-bomb test at Los Alamos. Would have been really poor form to nuke Germany *after* they surrendered and were disarmed, dont you think?

BTW, I am a happily single leftist, and hate soccer and that whole stinking mess

You know I'm not your buddy, Doc.
But when we go to war it's above board and honest
and nobody says anything about
coming to someone's house and acting like an idiot.

People threatening each other with physical action, sending
threatening or actually harassing email should have NO PLACE on the
net.
I'd think even Brain-Dead Dave would know that. Maybe all
those hours with the Jammin' for Jesus crowd has him "confused."

I don't know how AOL's news reader works, but somewhere in there
is an option to read all the information in his mail headers.
In those headers, you'll find some kind of "PATH" statement that
tells you the path used to forward the mail. Also look for
something called "Posting Host." Send mail to "abuse@yahoo.com"
and "support@yahoo.com" and all the other providers in the path.
Include a copy of all the information in the header and body
of the harassing email or threatening post. If they find
he's actually been harassing you, they'll yank his access.

Be aware that he gets to defend himself so if you've been
sending nastymail to *him*, the ISPs might take a look
at *both* your accounts.

See ya on the battlefield

For Sale:

Kenwood TS-850 SAT I am the original owner and it has gotten very little use. Scores a 10 for looks. This is a 160 through 10 meter all mode radio. General coverage receive starts at 100 khz and goes to 30 mhz. I have installed additional filters for CW and and SSB making the total number of filters = 6. Very good front end. Built in Antenna Tuner. Worked all over the world with a wire antenna. in very good condition. I also have the RS232 serial port adapter to connect this rig to a computer for auto logging and control. I live in southern California if you are local and want to check it out. Late edition serial number #60800xx

Great for Field day, RTTY, DX or just SWL

$1000.00 cashiers check or money order only.

I will pay shipping conus only.

You can relpy to me at n6teb@usa.net

Thanks, and 73

What it means in real life is that the FCC can ask questions
and if it doesn't like or believe the answers it can delay or
withhold issuance of the license or even set the license for
revocation/suspension after a hearing.

This is known as a "308(b) inquiry" because it is authorized by
Section 308(b) of the Communications Act which says:

All applications for station licenses, or modifications
or renewals thereof, shall set forth such facts as the
Commission by regulation may prescribe as to the citizenship,
character, and financial, technical and other qualifications
of the applicant to operate the station; the ownership and
location of the proposed station and of the stations, if any,
with which it is proposed to communicate; the frequencies and
the power desired to be used; the hours of the day or other
periods of time during which it is proposed to operate the
station; the purposes for which the station is to be used;
and such other information as it may require.

(note this here)

The Commission,
at any time after the filing of such original application and
during the term of any such license, may require from an
applicant or licensee further written statements of fact to
enable it to determine whether such original application should
be granted or denied or such license revoked. Such application
and/or such statement of fact shall be signed by the applicant
and/or licensee in any manner or form, including by electronic
means, as the Commission may prescribe by regulation.

> What determines the "qualifications of a licensee or applicant"?

The Commission, subject to legal appeal if the applicant is rejected. There's a whole pack of cases on "qualifications".

> Is passing the written and code tests enough? In most cases,
> yes.

If you will read the 610 form (soon to be 605) you will see other things to which the applicant has to attest. At one time, the Commission had a list of individuals who could not receive licenses without a further review. Most of the persons on that list were not political targets but were bad-check passers. Now it's done by computer, which is why one has to submit the TIN to ensure that the individual is not barred from receiving benefits such as a radio license from Uncle Sam.

> But it looks like there can be other conditions. I wonder
> what they might be.

> Violating FCC rules certainly can bring
> about a license suspension. How about violating other laws?

At one time a felony conviction was a bar to holding a license. That was dropped a long time ago. If one's criminal record does not impinge on operating a radio (i.e the crimes had nothing to do with radio) it is no longer a bar.

> Like advocating the overthrow of the US Government. Certainly
> that could bring about some type of information seeking action
> at the very least.

Yup. And it calls the character of the applicant into question. Character qualificatins are some of the first things that the Commission looks at and we all know lots of hams who are real "characters" anyhow.

Dear Mike,

The most comprehensive source that I have found (excepting purchase of
an SDK from Microsoft) is "Windows 95 Multimedia & ODBC API Bible" by
The Waite Group Press - Richard J. Simon, Tony Davis, John Eaton, and
R. Murray Goertz.
It has chapters on Waveform and Auxiliary Audio and on Multimedia File
I/O. Those two chapters are really all you need to do everything that
needs to be done for a mode like PSK31.

If you can locate a "Books-a-Million" store, they may be able to help
you - I got my copy at 50% discount - normally $54.99. CD-ROM is
included.

Doc,AF2Y>>>>>>>>

By the evidence of your own statement, I guess the Hebrew people must have been antisemites, because they "perished" ages ago; i.e., they mostly disappeared through intermarriage and assimilation with other tribes and races.

What we see making the news these days is the Khazars, converts to Talmudism from southern Russia who are just wannabe Hebrews, and who flaunt in our faces the repugnant immoral characteristics some of which have been described by Carol Valentine.

Now if you could just get a grip on your foul mouth and hateful mind (if such a putrid, microscopic fever-swamp may be called that), and address the issue of the illegal destruction of the amateur radio station and genocide at Waco: we are all ears. The floor is yours.

What the devil has this to do with ham radio??
ANYWAY--
Hind sight is 20-20 as the old saying goes.

Patton and others wanted to drive the Russians back to russia.

I believe after we had smashed the Nazi government we should have re grouped ourselves and re organized the German military that was left and made a joint effort to put communism back in the stone age.

The treaties ending WWI guaranteed a WWII. Just as the UN diddling around making new borders and combining nations guaranteed the mess we are having now.

The A2 sights are designed to do that. Zero stays the same provided the spring doesn't go South.

Some gunsmiths who buld competition AR's will weld a "bump" to remove this, but it doesn't affect accuracy IMHO.

And even then, "real time" is a bit of a joke. For example, the best resolution
and lowest timer interval you can get out of the high resolution timer is 1ms.

Fah!! I'm not against Linux (I run it here myself), but the difference in available tools makes comparison less than likely.

Best advice: write the FFT and multimedia modules as OCX's using C++, and build the front end using whatever trash you like. The FFT module is very small, about 300 lines. The MM interface is similarly small, about 100 lines.

Michael.

This sounds like the rantings of someone that is clearly off base.
Question is, Who is lying? Is it WB4AIO, or his ex-wife
that is trying to get custody of their children?

It wouldn't be the first time that someone was less-than-honest
during a custody case.

The few times I've heard WB4AIO, on shortwave, revealed nothing
like the article quoted. He sounded conservative, but that's
along way from the allegations in the article.

I agree with Scott. (not that this gossip belongs here) It looks
like this thread has it's roots in a child custody case, and was
started by this guy's ex-wife as a ploy to use in court.

Sheese....

Leave this poor WB4AIO, and his children alone.

I know there is a USA vs other countries
question in this thread. But if US has the
jurisdiction, operating without a license
could get you fined and have your equipment
confiscated.

The laws are likely to be similar in other
countries.

And now you've publicly stated your intent!

> ...Would the base stations that I
> email to know if my call sign was bogus?...

Yes they would. You can look up any callsign
in just seconds via several servers on the web.

Please be considerate of the radio frequencies
that we (hams) are licensed to operate on. Don't
be a pirate.

what is this nazi crap? Ever since you got in this newsgroup its Nazi
this and Nazi that. This isn't a Nazi Newsgroup. This is a Amateur radio
Newsgroup. Mind you that the misc mean pretty much anything its still
doesn't give you the right to spout off about everyone being a Nazi! I'm
of German desent and I'm starting to get a little offended. I have
nothing against any creed and I sense that you are attacking anyone that
is German. I would sujest that you take this crap you post about

everyone being a Nazi somewhere else before people start to complain and
you will be banded for spaming the newsgoup like your buddy porkbut. I
think you should think about the new amateur radio operator that would
see these negative posts about the amateur radio community being Nazi
communists and so on. PLEASE Stop posting this trash

I would have to agree that type acceptance of amateur radios is the
beginning of the end for Ham Radio. This put a stop to allot of the
strait from paper to the air homebrewing of equipment. This also made it
possible for the government to get more control over the amateur public
as Intel is trying to do with the Pentium III chip. It also cost the
government money to not only enforce type accepted equipment but also be
sure that new equipment is type accepted. What a wast of money to see
that CBers don't get amps. The thing is there are more amps out there
then ever. Its the same thing as gun control. The government tries to
control the flow of guns so what happens there are more guns then ever.
If the FCC would adopt my band plan or something like it Type Acceptance
wouldn't be nessacary. See my band plan at;
http://www.dirtball.com/band.html
Of course thats just my opinion I could be wrong.

The Liberty Net, far from being distasteful, is quite the opposite to freethinking people.

Sometimes jammers or hecklers chime in with distasteful comments, of course, which happens less these days since WA9KJI received his well-deserved punishment. And, rarely, someone checks in and says something regrettable, but that's freedom for you. (Of course, making statements that the European race and the culture it created deserve to survive is not even slightly distasteful, except to those for whom Bill Clinton or his masters constitute a moral compass.)

What's distasteful are the system hypocrites like the at-the-trough types who profit as they pretend that the system is honest and honorable, the mob who are ready to lynch anyone who's unpopular at the moment, and, to a lesser extent, those who have "despaired" so much that they say and do nothing.

The Liberty Net isn't a membership group, and on any given night stations may express quite a range of views, but on the whole it consists of those who 1) aren't hypocrites, 2) haven't "despaired", and 3) are more correctly described as Jeffersonian than any of the other words which have been applied to them.

Most important, they are gentlemen who adhere to the spirit and the rules of Amateur radio -- and their detractors are not.

And let us not forget the enabling act which created and authorizes the Federal Communications Commission:

"Sec. 326. Censorship

"Nothing in this chapter shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication."

Honor bright,

Kevin, WB4AIO.

Looking at the evidence, particularly the forward-looking infrared taken over Waco by people who can't be accused of being "anti-government" (and as analyzed by the man who developed that technology), it's clear that innocent people trying to leave the burning church were _machine gunned to death_ by people claiming to represent me and paid by my tax dollars.

That bothers me.

It indicates that elements within our government are seriously out of control, or are being controlled by irresponsible thugs.

Some honorable people, including those in government employment, have spoken out against these and other crimes. In honorable men and women lies the only hope for our nation.

It also troubles me that the media cover up these crimes, and give to the boobs the utterly false impression that "everything's basically all right" and that the _real_ danger is those who point out criminality in high places.

Many people, possibly you, have an impenetrably obtuse attitude that "that just can't happen" "we have a good democracy and all who question that are wackos or haters" which blinds you to the fact that some in the government are criminals and murderers -- and, while that attitude is precisely the result wanted by the billionaire media elite, it is also demonstrably incorrect.

It is as if King Arthur's name and robes were assumed by his murderers, and you, Lancelot, continue to give fealty to the form when the substance is long dead and rotting in a nameless grave.

With good wishes,

Kevin, WB4AIO.

I agree with you about the Liberty Net and
the implications of Section 326 quoted above.
The problem is that "our" government rarely
follows its own rules, and usually does whatever it damn pleases. The blatantly

treasonous assault on the 2nd amendment is
a prime example of this.

These TV-fed morons in here who cry about
the Liberty Net's opinions lack the requisite
intelligence to extrapolate the results of free
speech limitations into the future, where
no one will be allowed to say ANYTHING
critical of the government al-a Soviet Union
style. Thanks to morons like them, we WILL
have a tyrannical government that will
micro-manage every aspect of our lives. Of
course, we won't be able to do anything about
it because the same idiots hooted and hollered for total gun confiscation.

These politically-correct slackjawed cretins
should try taking to heart some of the things
that are discussed on the Liberty Net. The
Liberty Net participants are not trying to
destroy America, they are trying to SAVE it!

I'm really surprised it's such a chore to implement this stuff under Windows. Not to turn this into an OS war, but reading sampled sound (and playing sound for transmit mode) hasn't been a major problem on the Mac (for my MultiMode). Perhaps it has to do with Microsoft's implementation. I haven't done any serious Windows programming (I sometimes consider porting MultiMode over to Windows, although this discussion seems to imply that the sound I/O isn't trivial), but it's quite simple on the Mac. You decide which sound input device to use, set the sample rate, sample size, etc, and that's it. Specify how many samples you want, and your callback procedure gets called (at interrupt time) when they're ready. The sound input is buffered, so nothing gets lost if it takes a few extra milliseconds (or even seconds) before your procedure gets called again. (Perhaps because you're doing some special processing and disabled interrupts, or aren't ready, for whatever reason)

After first writing my low-level sound input routines, I haven't touched them in a year of adding new modes to MultiMode, except one time, to handle the newer G3 Macs that can only sample at 44 kHz.

Packet will more slightly more of a challenge, due to the quick turn-around times required, but it still looks quite easy.

I STRONGLY SUGGEST that you get a copy of the 610 form and
re-read it. In a nutshell, when you apply for an Amateur Radio Operators
Licence, you surrender several of you constitutional rights, among them
the right to privacy and 5th Amendment protection for ANYTHING you transmit.

Don't believe me? Better re-read Form 610 as well as the "legalese" on your
licence where you sign .

Finally, the FCC can conduct a flash inspection at ANYTIME when you have a
licence
which can in some cases where "probable cause" comes into play, carry more
weight
than a court ordered search warrant - since your licence is FEDERALLY ISSUED and
supreceeds all State laws and statutes.

A ham licence is an acceptance of an OPEN DOOR to your domicile by the FEDS.

Like it, or not.

I'm familiar with the case in issue here, and your
name calling will not change the facts, and nobody really
cares whether you choose to believe them or not. The
choice is yours.

Hollingsworth has had the pertinent facts in this
case for several weeks now. Whether he has chosen to
act or not is unknown.

Yes, there is some necessary anonymity
involved here. Hollingsworth deserves a chance to
clean up his own house without alot of unnecessary
publicity. Moreover, attorneys for the amateurs who
Hollingsworth is investigating deserve an opportunity to
examine certain information and determine if it is of
any benefit in their clients' cases.

Go troll elsewhere.

For years FCC managers have operated as
though they exist in a vacuum, subject to no outside
authority. Comm lawyers profit from this belief and
therefore are staunch supporters of the status quo.

Ask any FCC manager, the Constitution does
not apply to them, except when expediency dictates it
should.

Political science students are familiar with the
"Cozy Triangle." A classic example is:
FCC managers, Comm lawyers, & Media giants.

Only Congress has the power to smash this cozy
triangle, and right now the Republican Congress has
about as much gumption to do that as they did to fight off
continued attacks on the Second Amendment.

Cheers!

Hi Chris,

Long time - no type...

You're right, this could very easily turn into an OS war. Believe it or not, the Mac's (actually Motorola's) interrupt structure is a lot more efficient for these kinds of things. What you say is essentially how you would program a sound card if you were to use Window's built-in sound interface. However, Window's sound drivers are still tied back to the clunky IRQ scheme still underlying in DOS. This is part of the speed issue.

Calm down, George. Just admit that you're in error. Name-calling only
makes you look sillier than you already appear. Of course, admiting
that you're incorrect would cast doubt on all the so-called evidence you
claim to have against our fine government. Why do you fear posting to the
the .policy NG? That's your target audience.

Enjoy the weekend, George.

Gentalmen lets clarify something here. The FCC has access to my station anytime they like BUT they don't have access to my home! I spent over 10,000 dallors to protect my family from the garbage on ham radio and so my wife and children can continue enjoying their privacy if the FCC were ever going to inspect my station.
I spent the 10,000 dallors on a 16X12 concrete bock building, with 2X4 interior walls with R-19 insulation and sheetrock walls. This is what houses my ham radio station and my computer shop.
I would sujest if you guys don't want a fedral offical snooping around your home take the time and money to build yourself one of these buildings for YOUR ham radio station.

Interaction in DOS is/was at a hardware and firmware level. Thus, SB compatibility was a significant issue in the bad-old-days. During software installation, the setup program looks for the SB environment strings, or queries you for the IRQ, and I/O and DMA ports. Some "game engines" supply sound libraries, almost always supporting SB. Quality varies. The most stable of these is Win9x. :)

Michael.

Your post is an attempt to re- and mis-direct the discussion, Bill.
I freely said I don't have the answers.
The fact that I don't know the answers
doesn't mean I can't define the problem.
Defining it is the first step to fixing it.

The FCC is beating the Liberty Net -which I don't support-
with a rule and refusing to apply that same club to the Intercon.
They get away with "interpreting" rules however they like,
according to the political expedience of the hour.
That's simply unjust and immoral.

That, in a nutshell, is the problem.

If *you* have any answers which are to the point,
other then pointing a finger at people and yelling
about what they've already said they don't know,
I'm sure we'd love to hear them.

This approach is not cheap, but very interesting.

Buy a TI 'c6x01 eval kit ($999 or 1450, dependeing upon whether
you buy the fixed point or floating point unit). The DSP eval card
plugs into the PCI bus and is downloaded via the PCI bus in WinNT
(I'm not sure whether it works with Win95/98 or not). Included is
a C compiler, IDE, emulator and download software. The DSP card
has line in, line out and mike in audio ports.

See TI and DNA Enterprises for details.

From today's ARRL letter, Volume 18, Number 22 (May 28, 1999)
<<<Look, you anonymous cowardly fool. Riley is out to protect our bands from being infringed by foreign interests. The Liberty Net does NOTHING to enchance the proper image of American ham radio. In fact, the monstrous white extremist anti-Semitic Nazi-loving muthas are intentionally helping to destroy our beloved hobby/service in the same way they hope to overthrow our government. Riley knows this; I know it and so does everyone else who prides himself on being an American.
AF2Y, Doc>>>>>>>>

An excerpt from "FCC'S HOLLINGSWORTH QUESTIONS LIBERTY NET"

Hollingsworth also pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or applicant.

What does this mean, "seek information". It could mean doing some research by reading articles or talking to ex-wives. While this article focuses on the Liberty Net, it could apply to individual amateur radio operators.

What determines the "qualifications of a licensee or applicant"? Is passing the written and code tests enough? In most cases, yes. But it looks like there can be other conditions. I wonder what they might be. Violating FCC rules certainly can bring about a license suspension. How about violating other laws? Like advocating the overthrow of the US Government. Certainly that could bring about some type of information seeking action at the very least.

Food for thought. What do you think?

Entire article is at:

KIM: Daniel Atkinson in the U.K., a frequent contributor to this program, thought that the interview two weeks ago with Graham Mytton was very interesting. Dr. Mytton is the recently retired head of audience research and audience mail and BBC World Service. He observed that much of the programming in international; radio is boring. Daniel adds his own comments:

TALENT: He made some excellent points which it seems are sort of accepted as being the case in International Broadcasting, yet few people ever shout out and proclaim them. I think its very useful that these issues are brought more out to the fore for discussion.

When I first started shortwave listening at the age of 14, I found some of the broadcasters intensely dull. These same broadcasters I now find very interesting, yet their formats haven't altered. Its just that I've come to appreciate content more and focus less on presentation.

Nevertheless, I feel that International Broadcasters in particular seem to be very poor when
it comes to programme presentation. Often it is simply the voice of a presenter, frequently not very charismatic, and this can be a real turn-off. Yet VOA, Radio Netherlands, Deutsche Welle, and other large international broadcasters have gone that extra step to bring a dynamic image to their broadcasts, and I'm sure it can only have done them good.

If younger listeners are to be targeted, broadcasters don't need to take on a condescending attitude, but some audio stimulation can go a long way. The fast paced, youth-orientated 'Roughly Speaking' on Radio Netherlands is a fine example of this. I personally don't need to hear fancy jingles and rapid paced content, but such qualities undoubtedly enhance listening enjoyment for others and could make the difference between programming being kept on, or switched off.

This is especially important for international broadcasters, because listeners have to tune in
especially, rather than the programming always being available at the push of a button. In order to ensure listeners are making the effort to tune in every week at a certain time, the
programming has to be especially appealing. International broadcasters must strive to become more than simply a curiousity or passing interest. This is clearly visible from some stations' mailbag shows, which rustle up no more than a few reception reports and a handful of letters from devoted listeners with a special interest in the country. Perhaps the
fact that many international broadcasters are government-funded and -based means the grey suit of government churns out an equally grey format of programming.

Kevin Alfred Strom <kevin.strom@innocent.com> wrote:

>Most important, they are gentlemen who adhere to the spirit and the
>rules of Amateur radio -- and their detractors are not.

Kevin,

After seeing your web page, I finally have an idea what the Liberty Net is about. Because I am located a long distance from the east coast, I have never heard the net or the jammers on the radio. Anyone who has not seen your web page description of the Liberty Net might benefit from visiting it. I know I did.

Two things in particular struck me when reading the web page. One, you say that you have never found many aspects of ham radio interesting and that taking to people on the ham bands is something you felt was generally boring until you found the Liberty Net. Two, you suggest that the people who jam the Liberty Net do so because you feel they are not capable of participating in discussions at your level.

As I said before, I have never heard your net, and I have not bothered to read the tons of hogwash posted to Usenet over the last few years about it, pro or con. Since I haven't heard the net, I can't comment about net members breaking the 'rules' of amateur radio. The people who jam the net obviously are breaking the rules and should be punished appropriately.

The 'spirit' of ham radio is another subject. Somewhere, many years ago, maybe from my elmer, I heard it said that politics and church matters were two subjects that were better saved for forums that did not include the ham bands. I'm sure that's not a rule, but it seemed like a good idea to me. I'm pretty sure that when the FCC established the amateur radio service, they didn't do it with the intent of providing a public forum for you and your friends who are capable of higher levels of discussion than most hams to air your political or religious views.

I understand the jamming of the Liberty Net has been going on for years, please correct me if I am wrong on that assumption. I fail to understand why anyone who professes to be interested in participating in serious, high level discussions, as you say you are, would continue to do so in a forum that is plagued by constant interference, jamming, and profanity. Seems to me you and the net members would be smart enough to take your discussion elsewhere where you could enjoy it without the peanut

gallery pestering you on a regular basis. But you don't. So I must surmise that maybe, just maybe, you and your friends participate in the net because you obtain some hidden joy from causing all the jamming and the hate and discontent that the net causes. Remember, you said you are otherwise bored with ham radio anyway.

While most hams, me included, would champion your freedom of speech, constitutions rights, etc. I think most hams would agree that the amateur radio service wasn't intended to provide you with a quasi broadcast environment to exercise them. While you may not have broken any rules, you and your fellow net participants, in my opinion, are pissing all over the spirit of ham radio and I'm sure that the majority of hams would probably agree with that opinion.

Twenty meters wasn't intended to be God's business band, but it used that way on a regular basis by people who understand that following the 'rules' doesn't include abiding by the 'spirit' of ham radio. Twenty meters also wasn't intended to be used as an international HF telephone switch by people in leaky sailboats, but it is used that way on a regular basis by people who understand that following the 'rules' doesn't include abiding by the 'spirit' of ham radio. And seventy five meters wasn't intended to provide you with a forum to air your superior views on politics and I'm sure you must be smart enough to realize that you although you may be following the 'rules' that when it comes to the 'spirit' of ham radio you are so far out in left field that you've hit your head on the upper deck of bleachers.

You should be really proud of yourself, Kevin, your Liberty Net is a testament to the fact of how screwed up ham radio has become. Hardly a day goes by in this newsgroup when one of the no-code proponents doesn't use you as an example of why incentive licensing doesn't work.

The use of the amateur bands is a privilege that is granted to people, not a right guaranteed by anything to anyone in particular. In my opinion, you are no better than the jammers - you both cause a black stain on the spirit of ham radio. Now that somebody with a bottle of stain remover has come along at the FCC, I sincerely hope he smears enough of it on all of you so that you all disappear in the next load of dirty laundry.

If you and your Liberty Net friends are half as smart as you'd like the rest of us to think you are, you'd do the world and yourselves a favor and disappear on your own. Do the rest of us a favor and take the sailboat geeks and the bible bangers with you and don't let the door hit you in the back of the head on the way out, you've already got that nasty lump from the bleachers.

You are indeed entitled to your views, Kevin. But the rest of us are also entitled to not hearing them when we tune our radios in the ham bands, and we are entitled to not having the spirit of amateur

radio stained by your presence. Rush Lamebrain pays for his airtime.
We don't owe you any for free. You wouldn't know what the spirit of
ham radio was if you tripped over it, so if you've come here to preach,
please stick to the rules.....

>10,000 dallors to protect my family from the garbage on ham radio and so

Maybe that streak of unreasoning paranoia is why they're called "Liberty
Nuts".

Notice how he STARTS OFF with spelling any 4th grader would be ashamed of?

Notice how he was so sure that the FCC would end up having to visit his
shack? Only somebody who has been in the wrong AND KNOWS IT has any reason
to expect such a thing.

I sure am glad to see that the FCC is finally "taking out the trash".

Way to go, FCC! Obviously you folks have got the nut cases quite nervous
about no longer being able to get away with acting like lids.

That's what I like to see. Not long ago the average "career lid" didn't have
much to be nervous about, and talked real big about their "rights".
Now we're seeing the character defamation which invariably follows any time
someone dares to speak up about these "Liberty Nut" clowns. That means
they're running scared.

Way to go, FCC! Sock it to 'em!

Doubtless a good idea.

>...I wonder if this is why people don't
> single me out for jamming.....
The advantage of being a member of a compliant herd
is that one does not draw attention to one's self.
The members never get noticed, but then the
idea of a herd is safety, not achievement.

>from them.

Let me ask you a question, Kevin.

Last night I was on 20 meters, and I talked to eight other hams. The first conversation was with a station in the U.S., and we talked about Yaesu radios, audio quality, microphone elements, and some internal menu settings in the Yaesu radios. After that I talked to another U.S. station that I knew, we just said hi and bye as he had to go do something.

Then I talked to a UA0 who was primarily interested in a QSL card, follow by a short contact with 7Q7DC where we played spin the antennas for a few minutes to see if propagation was better LP or SP.

After that I spent over an hour talking to a U.S. ham on the west coast. We discussed computers, the internet, digital signal processing, and a bunch of other electronic/computer/ham related 'stuff'. He looked at our club web pages, where I have a bunch of Guam pictures, and we talked about Guam, typhoons, and I explained some of the pictures he was looking at. We discussed my house, and his two houses, construction and size wise. We talked about available software for sound cards, he told me about some of the projects he was working on, I told him about some I am working on - again, ham radio/computer/electronics kind of 'stuff'. After a long, enjoyable conversation, he had to go and I spent a another ten minutes or so talking to two other U.S. stations who were primarily interested in QSL cards from Guam.

All in all, I spent probably two and a half hours on the radio, and during that time, talking to eight other hams about a bunch of different things, and listening to other hams talking, I never heard two seconds of jamming, profanity, or malicious interference from anyone.

Now that I think about it, in twenty plus years of operating on all the ham bands, the closest I have come to being the subject of intentional interference from another ham is a few frequency related CQ duels during a contest, and being someone who enjoys contesting, I have

come to expect that as something that's just bound to happen now
and then.

Although I'm not an expert on being jammed, I would imagine that
what people are talking about or doing on the radio is very much
related to the content or operating practices of the hams on the
receiving end of the jamming.

Obviously, since nobody bothers to jam my amateur communications,
you guys must be talking about something different than the things
I normally talk about on the radio.

So what is it that you guys talk about on the Liberty Net that seems
to upset so many people and provoke all the jamming, when all the
things I talk about on the ham bands don't seem to get
anybody upset ?

> I and you have always been free to discuss, as gentlemen, whatever
> we please with our radio friends since the beginning of amateur
> radio.

First of all, that's technically incorrect. We have never been free to
discuss business, and only recently have we been free to discuss
ordering pizza with our local pizza parlor.

I don't agree with that, sorry. I don't think religious beliefs, polictical
beliefs, racial predjudices, or anything you would see on the Jerry
Springer show should be discussed on the ham bands. And I don't
think anybody needs to make a rule telling us we shouldn't be discussing
those subjects on the ham bands, I think we should be smart enuff
to figure that out for ourselves. Most first grade teachers don't discuss
their weekend sexual escapades with their students every Monday
morning, even though there is no hard firm rule preventing them from
doing so - they have the common sense not to.

If I was to stand up on a trash can in the Narita airport and start
yelling "I HATE ASIANS" as loud as I could, I would also think that any
reactions solicited from the people around me would be a direct result
of my own actions. I can't help but feel the same way about your
jamming problem.

Ham radio is a hobby to many of us, a service to some of us. Hobbys
and volunteer services are supposed be enjoyable pastimes. I don't see
how you can come from a busy day at work, turn on your radio, and
enjoy being jammed (since 1992) unless your definition of fun is much
different than mine.

Code Quick Tapes worked well for me after trying the Gordo tapes &
super morse, Nu Morse etc. It teaches each character to you as SOUND.
After passing up thru advanced, I got hold of the Computer Program
for Code Quick. I wouldn't recommend it for learning it from the
start, but darn good at getting the speed up.
After you know the code, I'll recommend a website to practice on:
http://www.biochem.mcw.edu/Postdocs/Simon/radio/exam.html
it also has practice for the written tests.
Above all.... when you get your first upgrade... USE IT USE IT USE
IT !!!!! You'll find plenty of others at your speed in the novice
section of 40 & 80 mtrs... so don't be worried about getting run over.
A friend of mine and myself got on 10 mtrs for one week, and worked up
to 13 WPM, and passed our tests at the hamfest. Of course, don't stop
for a breath after your upgrade... it's alot easier to keep the ball
rolling after you kick it the first time. Keep on till you get to the
top. Shouldn't take you over six months unless you want it to.

GOOD LUCK.... you may find you enjoy it once you get a grip on it.

Doc,AF2Y>>>>>>>>

By the evidence of your own statement, I guess the Hebrew people must
have been antisemites, because they "perished" ages ago; i.e., they
mostly disappeared through intermarriage and assimilation with other
tribes and races.
<<<Hey Jack...you're spouting off Valentine neo-Nazi propaganda. Vanguard crap.
The Jews are here to stay because the Creator didn't give the Ten Commandments
to jerks. WE ARE THE LIGHT OF THIS WORLD. WE GAVE YOU THE ETHICS TO LIVE BY.WE
GAVE YOU YOUR LORD AND SAVIOUR. WE WERE NEVER DESTINED TO WORSHIP HIM AS GOD
BECAUSE THE CREATOR FORBADE IT. GET THE MESSAGE CREEP? We're going nowhere and
if you don't like it,stuff it.AF2Y,Doc>>>>>
What we see making the news these days is the Khazars, converts to
Talmudism from southern Russia who are just wannabe Hebrews, and who
flaunt in our faces the repugnant immoral characteristics some of which
have been described by Carol Valentine.

Now if you could just get a grip on your foul mouth and hateful mind (if
such a putrid, microscopic fever-swamp may be called that), and address
the issue of the illegal destruction of the amateur radio station and
genocide at Waco: we are all ears. The floor is yours.

5494. FCC can "seek information"

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-29 00:00:00 UTC
From: Anonymous <nobody@replay.com>
Message-ID: <199905290145.DAA14554@mail.replay.com>
Source record: 141280
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

From today's ARRL letter, Volume 18, Number 22 (May 28, 1999)

An excerpt from "FCC'S HOLLINGSWORTH QUESTIONS LIBERTY NET"

Hollingsworth also pointed out that Congress has authorized
the FCC to seek information to enable it to determine the
qualifications of a licensee or applicant.

What does this mean, "seek information". It could mean
doing some research by reading articles or talking to
ex-wives. While this article focuses on the Liberty Net,
it could apply to individual amateur radio operators.

What determines the "qualifications of a licensee or applicant"?
Is passing the written and code tests enough? In most cases,
yes. But it looks like there can be other conditions. I wonder
what they might be. Violating FCC rules certainly can bring
about a license suspension. How about violating other laws?
Like advocating the overthrow of the US Government. Certainly
that could bring about some type of information seeking action
at the very least.

Food for thought. What do you think?

Entire article is at:

So I think it helps to read an quote the whole damn article, not just bits and pieces.

Here is the whole article, less the opening paragraph:

QUOTE

Hollingsworth also pointed out that Congress has authorized the FCC to seek information to enable it to determine the qualifications of a licensee or

applicant. "We are so far unable to determine how the transmissions of this group meet the standards of, or contribute to the purposes of, the allocation of frequencies for the Amateur Radio Service," Hollingsworth wrote.

Hollingsworth alluded to The Liberty Net in comments during an FCC forum at the Dayton Hamvention, openly questioning the behavior of net participants. "I don't get the connection yet" between what Liberty Net participants do on the air and the basis and purpose of Amateur Radio, he said.

In his letter to Misek, Hollingsworth suggested The Liberty Net explore operation on the Internet or seek a low-power FM broadcast grant if that service is authorized. Hollingsworth reminded Misek that Part 97 "prohibits communications on the Amateur frequencies that, on a regular basis, 'could reasonably be furnished alternatively through other services.'" He also pointed out that Part 97 prohibits broadcasting. Hollingsworth invited Misek to contact him to discuss the matter.

END QUOTE

What the article says -- quite clearly -- is that Riley is asking them to provide justification for the way they were acting on 3950. That's the information he is seeking -- an answer from this crowd.

Dear Mr. Nobody,

Notice that he did't say "new" authorization or anything to that affect.
Congress -has- (and for a long time already) "authorized" the FCC to
"determine the qualifications........"

In other words, it means that Part 97 outlines what requirements a person
has to meet in order to be granted an amateur licenese.

: Food for thought. What do you think?

I think you have too much time on your hands if this is your bigest
worry. :)

For the both of you, Mary and Tim, you don't seem to
be able to read. The information is at the website below.

As I have come to always expect, no one, certainly
neither of you, will address the issue. Both of you
want to want to kill the messenger. The FBI has
already admitted criminality. FCC admits operations
at Waco but has worked with FBI to classify what these
were. White House hides behind a rule they made up
that does not exist, claiming exemption from the Freedom
of Information Act. White House does not deny giving
orders for the jamming, a clear abuse of power. FCC
has denied documents illegally claiming that I have
deduced too much already. Deduction is not on the list
of FOIA exemptions. None of this is a conspiracy
theory. If you don't believe it from me, ask the
agencies to justify what they did. Ask FBI to show
the authorization from US Attorneys Office to engage
in jamming operations. It doesn't exist. Do your
own research, it will amaze you.

The problem is that the amateur community is made up
of cowards who never take a stand on anything. Their
precious talking privileges are more important to them
than the entire amateur radio service, which was illegally
jammed by the FCC. The amateur radio station at Mount Carmel
Center became a concentration camp for 51 days, thereafter
it became an extermination camp. The Oversight and Justice
Committees of the House Waco Hearings found that FBI did
not negotiate in good faith, therefore the deaths of the
Davidians should be placed on the FBI for creating the
situation that resulted in an end to negotiations. Radio
communications with anyone willing to negotiate could
have saved the lives of those at the station. FBI and
FCC worked to interfere with this communications
ability, without warrant, authorization, probable cause,
or explanable need.

What I want from this NG is what I have, the opportunity
to educate. What I want from you individually is for you
to open your mind, be mindful of the difference between
a child and an adult, and act maturely. Children cannot
see beyond themselves. If this story had been printed by
the buckets-full-of-turds at ARRL, I would not have to
present the suppressed truth through the only uncensored
medium which common people still have.

One of the nice things about Win95/NT/OS/2/Linux is that you don't have to write low level code to access the sound card. The drivers take care of it, and it should would on all types of sound cards. One of my biggest peeves is that most of the sound card software requires a SB16 or 64AWE sound card and doesn't support anything else since they use direct hardware calls.

Decoding RTTY doesn't need real-time processing. Sure, VB isn't quite up to snuff for it, but it does make a nice front end so you don't have to spend a lot of time writing C++ code. Use a DLL for all the signal processing. Buffers can take care of any processing lag, although decoding RTTY isn't exactly "intensive".

From: Fudge <fudge@mv.igs.net>
Message-ID: <7iohm7sgn1@news.igs.net>
Source record: 141292

I am planning an erection of a fixed, bi-directional 3 element 20 M and 15 M Qubical Quad this fall. Three 30 foot Red Pine trees have been felled and their bark stripped. They will be coated with wood preservative and tar when dry. A section of medium walled steel conduit will be bolted to the top for increased height.. Commercial fiberglass Quad's are not feasible due to extreme winds and ice storms.
I require the following software

1. A Bearing program. ie From my QTH in Eastern Ontario I wish to enter Lat and Long and receive a compass bearing for Sydney, Australia on the short path.The reverse direction to the East should be good for Central and Northern Europe. This information will be used to "sight" the antenna.

2. A Smith Chart Program. Perhaps this does not even exist. This will be used to calculate the reactances needed at the end of a short transmission line to tune the reversible Director and Reflector.

You can also donwnload my (free) Software for the IC-Q7
and IC-R2, you will find some things not implemented in
the competition products like adjustment mode, entering
frequences below 30MHz ...

You can also make the cable for 2 US$, that will work
with the IC-Q7 and IC-R2.

For 50 US$ you can get a interface that will:

1. program/control every radio Half and Full duplex.
2. program any eprom, seriell and parallel
3. communicate with every GSM phone, Nokia, Ericsson, ..
4. communicate with any calculator/organizer
5. read/write any Smartcard, GSM, I2C, Phonecards, ...
6. emulate any SmartCard.
7. connect temerature sensors
8. MagstripeCardReaders

any a lot more

That is the best deal.

This is a mesage for all Radio Amateurs visiting the Central Florida
area and the world's largest family attractions destination...

Walt Disney World, Sea World, Universal Studios, MGM Studios,
and lots others

http://www.qsl.net/lmars

If you need information on amateur radio resources in the area try
surfing over to the web site of the Lake Monroe Amateur Radio
Society. Here you'll find email links to club members that can assist
with information and other contacts in the area.

And if you need to know what repeaters are active in the area check
the "WD4GDB Repeater List" link for a complete list of active
repeaters here in the Central Florida area and around the attractions.

>Since when do TV station broadcast in one colo(u)r as the name
>Monochrome would imply.

Monochrome does not mean one colour! It means monoCHORMATIC!
On a grey scale from black to white!

>Heck, even Black and White is two colo(u)rs.

Yes, but we are talking about chrominance here, not "colours."
You don't seem to have learned the difference!

>By the way, the best Black and White is what is know as a Twistee cone.
>That is when they combine Vanilla Ice Cream with Chocolate Ice Crea.

Sigh - again, chocolate ice cream is BROWN, not BLACK!

Maybe you are colour blind. Though I rather suspect what we have here
is misperception of chromatic DENSITY!

5514. Re: FCC can "seek information"

Newsgroup: rec.radio.amateur.misc

There is much confusion regarding what the FCC can or cannot do, and what the ramifications are to amateur license holders. The FCC is a departmental extension of the US Government that has it's own set of ADMINISTRATIVE LAWS.

The difference between STATUTE LAW and ADMINISTRATIVE LAW is that Statute Laws are passed by Congress or States for the "good of the populous". Administrative Laws are passed for the "good of the administering organization".

Take the US Park Service for example. There may be a US Park Service Administrative Law that prohibits drinking alcohol on any federal park grounds in the US. The burden is on the visitor to fully understand the rules and regulations of the park upon entering. The term "ignorance of the law is no excuse" would clearly apply.

Clearly a person can legally stand on a sidewalk, or in their own backyard and drink as much alcohol as they want. As long as this person is of age and doesn't become a nuisance, he clearly has the right to do so. This is the difference between the two types of laws. Certain individual rights are infringed when one agrees to place themselves under the hospices of an governmental department or organization. Another prime example is the military. They have a completely different set of Administrative Laws governing conduct, of which the military can question the applicability of which at any time (without Congressional approval).

Now back to the FCC. The FCC can have Congress add ADMINISTRATIVE LAWS at any time to insure the sovereignty and efficient operation of the FCC. Remember, the FCC's an extension of the government which means they have a governmental purpose for existing. When an amateur radio enthusiast applies for a license what he or she is saying is that they will act according to whatever rule or regulation is in place at that time and the FCC has the right to question the amateurs practices at any time. The burden is always on the amateur, not the FCC.

Like or not there is no constitutional amendment guaranteeing radio use. The use thereof is completely up to the discretion of the department of the US Government thats been charged with administering it. In this case that department is the FCC.

The problem with what you're saying is that the drivers are only meant for playback and recording in a certain format - NOT the kind of FFT processing that's required. This processing is also not available in the standard sound dll.

> Decoding RTTY doesn't need real-time processing. Sure, VB isn't quite up to
> snuff for it, but it does make a nice front end so you don't have to spend a
> lot of time writing C++ code. Use a DLL for all the signal processing.
> Buffers can take care of any processing lag, although decoding RTTY isn't
> exactly "intensive".

Disagree. It's a lot more complicated than you think. There's not just the decoding part that needs to be done here. There's also the issue of discriminating the desired tones from the rest of the clutter and noise that you're passing through there. You need FFTs to do this since zero-crossing techniques just don't cut it in a real signal environment.

Once that filtering is done, only then can you start decoding the signal. I agree that some buffering is required, but you only have so much buffer space for windowing an accurate capture and hold function. Sooner or later if the processing isn't fast enough, you will have a buffer overflow and will lose synchronization. I've done this with single-processor 486s, Pentiums and Pentium II machines. They all overflow at some point when trying to do this with the standard interfaces to a sound card.

Since we're not talking about true multi-processing operating systems/environments, the signal processing is too intense for the results to be refreshed to any Windows user interface (especially with VB). This may be a bad analogy, but the result is similar to getting dropouts on RealAudio. If you're dropping large chunks of data during the buffering process, what's the point.

The bottom line here is that sound cards were never designed to be true signal processing chips like the TMS series. If people want a real decoder in their machines, they need a different card that's going to do the extra processing for them rather than rely on their main processor to do it for them.

OK, mf_luder@my-deja.com, what a clever man you must be, whoever the hell you are (I don't know, since you don't sign your posts with a real name, but hide behind the anonymity of DejaNews) you wanted it, so here it is: first, what the <insert expletives of choice here> does my license class have to do with *anything* in
any of the *posts* I have made in response to your seething, trivial, self-fouling hate filled diatribes on this newsgroup?

Not that anyone is really interested, but so we are clear, I earned my Tech ticket the last week in March 1998, got my call Monday the 6th of April 1998. I have not upgraded yet, but will when I can pass Element 1(b). That will be this summer. I have a CSCE for 3(b) and 4(a) earned that same exam day. I have sent in my FISTS application, and just received the first issue of my subscription to Electric Radio recently. I like CW a lot; I soon will be using ot as my main mode. If you like, I will send you my new letterpress printed QSL card, in announcing my passing 1(b), just as a special favor to you "mf_luder." You don't have to worry about giving me your home address; I can just send it to the buro, if *they* have your address, that is.

You see, after finishing my M.F.A. in English here at A.S.U. last May, I have been sorta busy with this little Doctoral program I entered last Fall, and with the small duties of being a new college instructor of English. I am *so* sorry 'luder', that I am not up to your high standards as a ham, though I do hope to be one day. And you know what? I don't even own an HT. Just an old IC-271H, and a 6M Gooney-Bird with which I have earned WATV in a very short time. BTW, I notice you don't sign your posts with your *call*; is there a reason for that?

It's not important, just as your squeaky little barbs about FM repeaters and CB are pointless in the context of of this nice flame exchange we are having. What is important is that, since you insist on making an ass of yourself in public, I point this out to you and other readers here. Luder, it would be important enough to correct your mistaken attempts at revising history, even if they were just
mistakes. But that is just the thing 'mf', I don't think you are making a mistake when you say that the Truman Administration calculated not to nuke Germany. I think you know the timeline of the Manhattan Project, and that Teller wanted to use the bomb on Germany, just as everyone else reading this knows it. Oh, where were these Anglo-Saxons in Berlin you insist we were sympathizing with in not nuking that city? C'mon, you can tell us, can't you? It is ironic, after my calling you a Nazi, that you should continue in the vein of cynically spreading the same misinformation. As Goebbels said so notoriously: "The lie repeated often enough is the truth." But, hey, I am a fair guy, and I'll back down from calling you a Nazi. You are not a Nazi. I do

not believe or think that you are a Nazi, or ever were. You are more of a, well, of a coattail-riding self-congratulatingly mentally-gymnastic (w/sprained ankle) bombastic certain Italian Fascist of that same era. You have your charm and are entertaining, as Mussolini, though it's small consolation that Il Dupe was funny and charmingly insane, *unlike* his bubbas up north.

What the hell does the Pope's prophesying the "end-times" and ARRL's back-pedaling on CW testing have to do with one another? You wrote it, mf_luder@my-deja.com! Or Y2K, CW, the Czar and Kaiser? Oops, there goes another one. Here is a real whopper: USENET = "the real world of ham radio"? That one's yours also 'mf'! And to think you came up with that doozy because you somehow disapprove or are contemptuous of some DejaNews r.r.a.* readers killfiling, who? mf_luder@my-deja.com! It is all forever laid down in pixels. Not to mention the perhaps many spoofed DN, Hotmail, etc. alter-egos you must maintain!

Lastly, and most ridiculously as you have demonstrated at least a fair degree of literacy here before (though I unfairly faulted your spelling last round), when I pointed out in my previous post your Dan Burton-ish, Helen Chenowith-ish imaginary version of fundamental W.W.II history, you rushed in babbling (<sigh> yes,
again!) about the fate of *my* family in the war in Europe, and <gasp> you accused me of *lying.* Well, as you have shown, while you may be able to read and write pretty well, your geneology stinks! My *mother's* father, Piet Zmeuss, her two eldest brothers Aram and David, and a second-cousin just named Ben to anyone who can remember even that, died in Buchenwald in early 1943. My *father*, Norval White, and his brother, my uncle Tommy, an infantryman and a Ranger respectively, landed in Normandy early on D-Day, fought across France and Germany as so many 100's of thousands of others did, no big deal, and survived as many 1000's did not, a very big deal from where I sit.

So take your spellings of the President's name with a 'K' <yawn>, along with your Land-of-Make-Believe 4-color history books and tragi-comically monochrome sense of American political culture and get thee to a "compound" in the great white north, out of the flight path of those black helicopters whose pilots don the blue berets. Do it, you know, because I am a "leftist member of the NWO" (and that ain't a rap group). Hope your sweet belligerent paranoia keeps you warm and cozy there. Don't forget to write!

5520. The FCC, Rules and Lynch Mobs (long)

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-29 00:00:00 UTC
From: David Stinson <arc5@ix.netcom.com>
Message-ID: <374FF72C.AA6BDD4B@ix.netcom.com>
Source record: 141306
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

(someone asked)
> What does this mean, (the FCC will) "seek information"....
> Food for thought. What do you think?

The FCC, like other regulating federal agencies, is empowered
by congress with something called "administrative law."
Administrative law deals with the establishment, duties
and powers of agencies of the Executive branch of government.
It's included in the authorizing law that establishes them.

Here, in admittedly very simplified form, is what the law says:
1. The FCC has the power to regulate communications.
2. The FCC has the power to create whatever regulations
it deems appropriate to accomplish #1.

The second part is the "devil in the details."
This provision literally means that regulations
created by those federal agencies have the force of law.
Therefore, the FCC, EPA, FBI, IRS, ATF etc.
can literally create laws -known as "regulations"- on the fly,
and they have the force of the original authorizing law.
The only effective and timely check on this awful power
is the "enacting" agency's own regulation-making process,
which is usually fluid enough to warp a new regulation or,
more usually, a new "interpretation" around any situation.
What's happening to the admittedly distasteful
Liberty net is a prime example.

You'd think this legal concept would have fallen before
the first constitutional challenge, but it didn't.
The concept became general in the US as an expedient during our
civil war and the following occupation- an early example
of how trading away principles for temporary expedience
has terrible and lasting consequences.

What does this mean? In simple terms--
the agencies can do nearly anything they want to you
up to whatever the PR and political traffic will bear.
And the traffic bears more and more every day.
Indeed- the majority are standing in line to
join the lynching parties. Step right up, folks!
Get your tickets! Just hand over a fundamental
human right or two at the door, then come enjoy the show.
(At least until it's your turn....)

That's why it's OK to use an obscure rule to demand that a
Liberty Net justify itself while ignoring the same rule as
it applies to an Intercon. It's currently popular to persecute
ultra-right-wing people, so we'll drag this club out of
the regulations closet and beat them with it.
When someone protests, we can count on
the howling mobs of the majority to silence him.
If that doesn't work, a new rule "interpretation"
can provide both rope and tree for the mob's entertainment.
If you want to go bankrupt fighting it in court, be our guest-
the agency has the tax base of 90 million workers to spend.

What's really sad about all this is that the people in
these agencies aren't power-mad little hitlers--
they want to do a good job and actually be of service,
and usually they do and are. Something about the way
we humans construct our systems-- something about how
we conceive of "rights" and "rules"-- something about
the incredibly complex web of pressures bearing on
points like this- seems to inevitably lead to honorable
people like Mr. Hollingsworth being trapped into a system
that sometimes does dishonorable things.

Maybe that's what Thomas Jefferson was thinking when he
told us that laws must be few, specific and rigidly interpreted.
We took the easy way out with Hamilton: Laws can be anything
we want them to be at the given moment.
This situation is the result.
A lack of strong, principled leadership from the top
is surely one reason, but it isn't the only reason.

I haven't the intellect or education to discern what went wrong.
Perhaps this is inevitable in human systems.
Maybe someone else out there has the answers.
It's important to name the problem,
but I don't know how to solve it- if it can be solved.

Certain comm lawyers will say all this isn't correct, of course.
They must, for the concept of administrative law is
their bread and butter. Many have a vested interest in
keeping this usurpation alive, since it leads to
masses of litigation. So any attempt to bring
this corrupt legal concept to light always draws
lots of flak. The truth usually does.

Perhaps this is how it should be.
When given liberty, human beings are quick to trade it away
and even quicker to lynch those who protest.
Perhaps the experiment of our Bill of Rights is a failure.
I don't know...
Sometimes it's easier to just despair of the whole mess.

Greetings from Tornado Alley.

The service panel at my house has a GFCI breaker built right into it for the 120V, 15 amp circuit that covers the garage, bathroom, and outdoor outlets. It is full of RFI! It puts out strong, wideband interference on 114kHz, and similar noise all over the LW, MW, and SW bands as well.

Anyone have a similar experience with CGFI's? Anyone know of a good RFI-free replacement for my service panel?

DOS is conspicuous by its absence. Aren't there DOS drivers available
for soundcards? Are there standard DOS calls available for soundcards?
If not, could we come up with some? How is/was soundcard interfacing
handled under DOS?

Fred:

I am not familiar with RFI-generating breakers, but an alternative might be to replace the GFI-breaker with a standard breaker, and then install a GFI-outlet as the first outlet in the string -- thus providing comparable GFI protection to all the outlets on the leg.

I've looked at your website George, I beleive the letter that Gingrich wrote was probably real, seems to me the reply indicates how the FCC did indeed have the authorization under a specific ruling, while you may or may not agree, that's what it says George so now what?

>As I have come to always expect, no one, certainly
>neither of you, will address the issue.

What's to address George? You think they commited a crime, ok let's say they did and let's say they addmitted it. You seem to be the only one here who cares. Let's assume all your information is factual. Ok now what? What exactly do you want us all to do George? If you want to put the FBI/FCC/ATF on trial, get yourself an attourney and go for it, clearly your arguments are not convincing enough for everyone here to get behind you so do you think by posting them week after week your going to somehow convert someone over?

>The problem is that the amateur community is made up
>of cowards who never take a stand on anything. Their
>precious talking privileges are more important to them
>than the entire amateur radio service, which was illegally
>jammed by the FCC.

Again George, I've never been jammed by the FCC, none of my friends have, in 20 years of operating on the air I know of no one who has been jammed so if the FCC jammed the amateur station at Waco there must have been a reason for it, so I've acknowleged that the FCC may have illegally jammed the station at Waco. Now the big question is, do I care? The answer is NO.

>
>What I want from this NG is what I have, the opportunity
>to educate. What I want from you individually is for you
>to open your mind, be mindful of the difference between

Now this is the interesting part, "be mindful of the difference between a child and an adult, and act maturely"

A couple of quotes from your previous posts George

"SO SUE ME, you sick NAZI BASTARD! "
"just like the bucket of turds who make up the ARRL."

"who take their orders from Fieldmarshall Von Klinton"

I just wanted a clarification George, are the above quotes your example of acting maturely?

Son, your postings indicate you can't differentiate a Kaiser from a
Komissar. Usually people who are very unhappy or threatened by events
find scapegoats and are AGAINST many things/people really NOT FOR
anything. Have you tried any of the 3 P's: Prozac, Paxil or Provera?

You are responding through fear that this will happen;
otherwise you would be silent. The majority of readers
never participate in the discussion, but they still
get the information and education. This is my primary
goal, it is a very good strategy, and I can understand
your concern.

You are lively proof of the effectiveness, I have
changed you from a cry-baby who didn't want to hear
the truth to a cry-baby who fears the effectiveness
of truth.

> Again George, I've never been jammed by the FCC,

Wrong! The FCC jammed the amateur radio service.
If you have a license, they jammed your service.
Don't care? Fine, lose your service.

Don't have a license? You also were jammed. The
right of free speech was denied to broadcasters.
Broadcast AM, FM and TV stations all were jammed
by the FCC. Don't care? Fine, lose your Constitution.

I am addressing this maturely, because I see beyond
myself. I did not know the two operators murdered
by FCC-FBI, but I see beyond myself to the need of all
operators to be free from government tyranny.
Truthful diction is sometimes hurtful to those who
hate to hear it.

5534. Hollingsworth The Hypocrite

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-29 00:00:00 UTC
From: Anonymous <anonymous@replay.com>
Message-ID: <1KV33.73$Da.1894@news.ntr.net>
Source record: 141320
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

And Hollingsworth is a hypocrite when it comes to
enforcing rules, regulations, & ethics within the
FCC CIB!

He was advised weeks ago from several sources,
concerning an internal CIB problem and security breach
where a CIB official, operating during official duty hours
from his office on government property, while on the public
pay roll , was and STILL IS conducting personal
business via amateur radio.

This smacks of HYPOCRISY! when Hollingsworth and
the FCC will not require their own employees to adhere
to civil service ethics, regulations, and rules! Yet,
Hollingsworth is running around like a goody two-shoes
requiring amateurs to obey rules, regulations, and vague
"ethical" guidelines. Even so far as to JUSTIFY their
qualifications to hold an amateur license.

This situation has existed for over a decade! and
still continues to this day.

Even worse, this person has disclosed sensitive
internal FCC information, including ongoing FCC
investigations, investigative techniques, and FCC
equipment descriptions and capabilities. All the above
is taking place openly via amateur radio on an almost
daily basis. One would think CIB managers and
Hollingsworth would honor their oaths of office and plug
this decade old security leak before running around
shoving rules, regulations, and vague ethics down
everyone's throat!

How about CIB signature analysis techniques and
equipment? That was last week's topic of discussion!

Perhaps the solution to this decade-old problem
which Hollingsworth, the FCC, and CIB are unwilling or
unable to rectify is to begin posting the information, which
this FCC employee is disclosing, on the internet for even
a wider audience to take advantage of.

Perhaps the people who Hollingsworth is
strong-arming to justify their qualifications to hold an
amateur license should supply Congress, the media,

and their attorneys with concise examples of the way
in which the FCC and CIB will not enforce rules, regulations,
and ethics when it comes to their own organization.

HYPOCRISY with a capital H.

Hollingsworth Hypocrisy! Clean your own house, before
telling others to clean theirs!

Mike,

Here's the page to let you select form 610 for download or to load to your Acrobat reader to print out.

http://www.fcc.gov/formpage.html

And here's the address of the actual page with the 610 form. You'll need Acrobat reader, available for free download and install.

http://www.fcc.gov/Forms/Form610/610.pdf

I think you still have to fill out the form and send it in. They're very quick about getting the new license back to you. I think it took me less than 2 weeks, just prior to Christmanstime last year.

You need to file a new form 610 by mail, with your new address on
it, as a request for a modification of your license.

But you can at least download the latest printable version of form
610 from somewhere on the fcc.gov site, I forget exactly where,
which speeds things up quite a bit.

All the best,

Kevin, WB4AIO.

I got it as a gift and I already have one. I never took the radio out of the box.
The radio also comes with a brand new Diamond srh-519 sma antenna which costs $35 and a Maha MH-C204F rapid charger for AAA or AA nicads/nmhd batterys. The cost of this plus 4 nmhd AA cells was $30. I am asking $200 for the whole package. Remember this radio is brand new and was never used. I will pay shipping, if interested please email me.

Thanks

Tony

Naw, build all you want, maybe call them "WorthLess" amps, amd sell thwm on eBay! Yesterday, by my count, there were (8) illegal amplifiers for auction on the Ham section, I can only guess how many on the CB-side. And eBay doesn't care, they'd love to help you sell illegal equipment. How else do you explain the continuation of their listings in spite of complaints from others about these things?

Fellows,if you ever have a chance to hear me either on 14.300 or 14.313 about 1100UTC,you will know why I am considered one of the top hams in this nation. Despite a rather sluggish and oftimes dead band, I am working the VKs like you wouldn't believe. I'm offering an instruction sheet on how to build my CLOUDWARMER 2 element wire beam;I have sent out several sheets for just S.A.S.E.s but there still remain a host of you who are languishing in indolence when you could be hauling in all that DX as I am. As I said previously, the idea for the antenna was given to me by one of the finest hams to ever hold a ticket-a man having unbelievable electronics skills in all phases of ham radio-a man who's encyclopedic mind renders books useless-I speak of Richard Whiten, WB2OTK from Easley,S.C. Yes, I was skeptical when Rich first told me about this type of NVIS antenna; in fact, I scoffed at the idea of a dipole having a reflector, but the proof of the pudding is in the amount of QSOs and I am a winner! You too can be a ham radio winner and wizard. Hams will look up to your QSO achievements as they do mine and you too will be the envy of the crowd. That antenna is so good that the other day I taped a weak conversation in a language that seemed bizarre to me. I brought the tape over to the language department at Cresskill State University in North Jersey and you wouldn't believe what they told me. The language was NOT OF THIS PLANET. The tape is now on its way to S.E.T.I. headquarters(Search for Extra Terrestrial Intelligence) as well as to Dr.Alan Hynek in the Chicago area, the man who was called in as an expert during the making of "Close Encounters of the Third Kind." That CLOUDWARMER could have picked up what the Arecibo dish has been looking for for a half century---proof of life elsewhere than earth. I expect a call from the ARRL about this next week and word has it that the NY Post will be sending a photographer and journalist over for pictures and an article. I urge you to get out of your doldrums and send an S.A.S.E. to me for that instruction sheet. It'll make all the difference in the world and out of it also. AF2Y, Doc

I hope you mean for Chris to port Multimode to Linux and not DOS instead of Windows. Even if I may argue that he may do better porting it to Windows (if that is indeed practical), Linux is at least a current, viable, and very powerful operating system for the PC. DOS hasn't been a current O/S for 4 years now. Why do hams continue to write for it? Then again, there are some still writing programs for the Commodore 64, so I shouldn't be surprised.

I submit that this has more to do with people wanting their
frequency to end in .000, then there actually being a shortage of room.
If ops would use the filters and procedures available to them,
I think they'd find lots more room then they realize.

Can you be more specific about the "speed issue?" Are you talking
about *latency* (i.e. the amount of time required for a given sample
to wend its way through the various layers of the OS to reach the
user's application)? Or are you talking about the ability of the
multimedia APIs to deliver sampled data to the application at the same
rate as they are being sampled (e.g. the sound card is set to sample
at 44kHz, but samples only arrive at the application code at a lower
rate, like 38kHz)? If neither of these is the case, then how can you
claim that the API is the problem?

I submit that the true bottleneck is not the Windows APIs at all, but
rather the algorithm, the implementation of that algorithm, the
processing speed of the CPU, or some combination of these. As noted in
an earlier post, if the processing demands are too heavy for the main
CPU to handle in real time, then some kind of coprocessor, whether in
the form of a dedicated DSP chip or an SMP architecture with multiple
CPUs, is pretty much a necessity for real time processing of the
sampled data.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 411
BID: $OPDX.411
May 31, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, WB2REM, K4QD, KE4LWT, N6RT, AA7X, K8YSE, NE8Z, KE9KD & DX Central, BD5RV/4, CE6TBN, CX5BW, DL6FBL, EA5BY, EA4DX, G4BUE & DX News Sheet, GM4FDM, GM4DMA, IK1QBT, JH6RTO/AH0R, JM1LJS, PS7AB, PT2NP, PT7WA, YZ7ED and ZS6AQS for the following DX information.

3C0, ANNOBON ISLAND. An international team of operators composed of Ramon/ 3C1GS, Roberto/3C1RV, Elmo/EA5BYP and Vicente/EA5YN, are now in advanced planning stages for an early September 1999 DXpedition to Annobon Island. ALL the necessary permissions have been obtained, transport arranged and the logistics needed to put together an operation from this rare new one. The team will be joined by a PTT representative and will leave a complete station on the island. The callsign will be 3C0R, and the operation will last for 10 days. Activity is planned for 160-2 meters on CW/SSB/RTTY. More information will follow and is available from any of the operators or via the following Web sites:
LYNX DX GROUP http://web.jet.es/lynx
CLIPPERTON DX CLUB http://www.multimania.com/cdxc/

7S5, SWEDEN. "The 59(9) DXReport" reports that special event station 7S5F will be active until December 31st by the Falu Radioklub, founded in 1924, to celebrate its 75th Anniversary. QSL via SK4AO.

9V, SINGAPORE. Steve, K9WO (ex VS6WO/VR2WO), who has been in 9V-land for 20 months, has now received the license and callsign 9V1DX. We have not seen any QSNs on this station. QSL via KA9UQT.

AH2, GUAM. Seiji, JH6RTO/AH0R, will be active from Guam as AH2/AH0R on June 3-6th. Activity will be on 10 to 30 meters, especially on the WARC bands. QSL via JH6RTO or direct: Seiji Fukushima, Hase 1182-2506, Atsugi 243-0036 Japan.

CV5A, ISLA DE FLORES. Pedro, CX5BW, informs OPDX that during June 4-7th a couple of CXs and some LU friends will activate IOTA SA-030, "Isla de Flores", signing CV5A. They hope operate on all bands and modes including the WARC bands and digital modes, PSK31. QSL via CX2ABC: P.O.Box 950, ZC 11000, Montevideo, Uruguay. Visit their Web page to find out more about the island at: http://isladeflores.8m.com/

E4, PALESTINE. The "DX News Sheet" reports that a group from the UK may be active from here June 14-28th. Activity will include 6 meters. Meanwhile, two station have been active over the past week and weekend. David, E41/OK1DTP, continues to be very active on 20/17/15/12 meters SSB at various times of the day (try 1330-1500z and 0000-0200z). QSL via OK1TD. Also active is E4/OK5DX. Activity seems to be mainly CW on 40/20/15/10 meters on various times during the day. It has been reported, but not confirmed, QSL via OK1YN.

E41/E44/4X DXPEDITION. Hide, JM1LJS, plans to be active from these three areas during the period of July 23rd and August 1st (depending on his work schedule). According to his release, activity from Palestine will be from the Gaza Strip and West Bank. He will operate in Israel until he receives the Palestine license. Until he receives his Palestine license, his detailed schedule is not known. Activity is planned for 80-10 meters CW/SSB. His power limits are: 500w in Palestine / 100w in Israeli (The Japanese license limitation is 150w in Israel). His callsigns and QSL Mangers are as follows: 4X/JM1LJS - QSL via JL2UXN, E41/JM1LJS (or E41JA) - QSL via JL2UXN (*** West Bank Only) and E44/JM1LJS (or E44JA) - QSL via VK4FW (*** Gaza Only).

HR, HONDURAS. Look for Al, K3VN, operating from Honduras during this next week. He will be there for about one week on business. He plans to be on the WARC bands and low bands depending upon equipment and antennas available. QSL via K3VN call book address.

IOTA NEWS.....
EU-008. (Correction!) In last week's bulletin OPDX.410, we mentioned that Jeff, G3LWN, will be active June 1-4th, as 2S0PNS from the Island of Pabay (57 17.7N/ 05.51.5W, IOSA NH11, WAB NG62). Jeff's callsign should have been G3LWM, not G3LWN.

EU-083. Tony/IK1QBT, Nino/IK1ZOZ and Alex/IK1OXF will be active from Gallinara Island (rare island of Ligurian group), between June 5-6th. Operators will sign homecall /P and activity will be on all HF bands SSB/CW (WARC included) around the standard IOTA frequencies. There will also be activity on 6 meters, VHF/UHF on SSB Reference number for the Italian Island Award (IIA) is SV-01. Gallinara is a private island, and the daylight visit is very restricted only to Island Archeologic and Biologic presence. EU-083 is the most wanted IOTA in North America because of the difficultly to stay and operate during the night. QSL via their respectives home calls, bureau or direct.

SA-018. The "TEMUCO RADIO CLUB" (CE6TC) has organized a DXpedition to Quinchao Island in the Chiloe Arch. The operators will sign

CE6TC/p, July 20-25th, and they will participate in RSGB IOTA Contest. QSL via CE6TC, Box 1234, Temuco Chile or via bureau. For more information check the Web page: http://www.qsl.net/ce6tbn

SA-046. A group will be active from Itamaraca Island, June 3-6th. Callsigns and operators will be: PT7BZ/PY7/Ely, PT7WA/PY7/Luke, PY7XC/7/Jim, PY7ZY/7/Ciro and PY7/7/Fred. Activity will be on 40-10 meters CW/SSB (no nets or list operations). QSL via their home callsigns.

J6, ST. LUCIA. Bill, AA7X, will be operating from Jalousie Bay, from June 24-30th, using the callsign J6/AA7X. He will operate on 40-10 meters. QSL to home call.

JT, MONOGOLIA. Operating from the remote Central Steppe region of Monogolia, Laurence, GM4DMA, will be active signing JT from June 19th for approx. 10 days on 1.8-50Mhz using 100 watts into a simple antenna and solar power. He states that he will be living in a traditional "Ger" - a felt lined circular tent. He will be training a volunteer staff in HF communication techniques before their 10 week expedition covering from the Gobi desert in the South to the forested uplands and mountains to the North of the country. This trip follows earlier training visits to Patagonia (CE), Uganda and Namibia this year for the "Youth Development Charity Raleigh International". They are conducting environmental, community and adventure expeditions in these and other countries.

JY, JORDAN. Look for Pete, N3FNE, to be active now through the summer of 2000 as JY9NE. Activity will include 6 meters. QSL via home call.

OJ0, MARKET REEF. With the current activity from here, Gerben, PA5NT, reports to OPDX that he has been to Market Reef in 1983 and has constructed a Web story/page about his trip together with some additional interesting information about the reef. If you would like to see some pictures and read details about OJ0 land, visit the Web page: http://dx.to

PACIFIC DXPEDITION. Roberto, EA4DX, will once again be active from the Pacific. This time he will be active from Tuvalu (T2) and Fiji (3D2) during August/September 1999. His planned schedule so far is:
T2 - Funafuti, Tuvalu (callsign will be issued on arrival) August 26th through September 11th.
3D2 - Viti Levu, Fiji, signing 3D2DX/P from September 13-16th
Activity will be on all bands 80-10 meters including the WARC bands on the usual SSB DX frequencies. His equipment includes Yagis for 10-12-15-17-20 and a vertical for 40-80 meters, plus 1 kw linear. QSL via EA4CP CBA. More info to come later.

QSL INFO AND NEWS....
FO0PAP and FO0MAC cards are now being received. John, K8YSE, reports that cards are being mailed as processed. Be looking for them in your mailbox.

QSLs for ZV0SB and ZV0SW. The ABRA-DX Brazilian Association has informed OPDX that the QSLs for the ZV0SB and ZV0SW DXpedition are now being sent

out by the QSL Manager, PT2GTI. The QSL card can be seen at the ABRA's Web site at: http://www.pt2dx.org.br

QSL 2S5VG/P via GM3UTQ (CBA or the bureau). This station was active this past weekend from Island of Eigg (EU-008). Operators were GM3NIG, GM3UTQ, GM4FDM, GM4YMA, GM0UKZ and 2M1EDN.

NEW QSL Manager. Rick, NE8Z, reports that he is the new QSL Manager for all QSOs with HC1OT, HD1OT, HC1OT/HC8 and HD9OT. Ed, K8ZZ/KG8CY, is no longer able to help Pedro due to his work schedule. Any QSLs sent to K8ZZ in error will be given to Rick by K8ZZ (they see each other often). All old contest logs will also be loaded on Rick's computer.

QSL ZV7ZZ (Calcanhar Lighthouse, DFB -04) via PS7ZZ: Francisco E. de Freitas, Av Sao Miguel dos Caribes 31, Neopolis II, 59086-500, Natal RN, Brazil (or via the Bureau).

"YUGOSLAVIA OFF-LINE" states Ed, YZ7ED. He informs OPDX to let all OPDX readers that YU HAM are not able to get any QSLs. There are two reasons: 1) QSL Bureau NOT working 2) Post Office NOT working. So, as of March 23th (1999) they haven't received any letters/cards via the post office service. Ed states that he will inform us when their post office service starts working again, but he beleives that this will not happen soon because of the war.

QSL CN8WW via DL6FBL. Ben's E-mail address is: dl6fbl@boc.de
Also, details and infos may be found at: http://www.boc.de/dl6fbl

VA1A active this past weekend was a special event station celebrating 90th Anniversary of the first powered flight in Canada (and British Empire) by the Silver Dart - on February 23, 1909. A special QSL card showing the Silver Dart being pulled by the horses on the ice is available via K3BU, Box 282, Pine Brook, NJ 07058, USA.

VQ9CV logs are now online. The VQ9CV logs through May 13, 1999, are now available at: http://dx.qsl.net/logs

JW9PJA logs are now online. The JW9PJA logs for all operations through March 1, 1999, are now online at: http://dx.qsl.net/logs

QSL Manager for ZS6SCI is via ZS6NB: Ken Pickersgill, 60 Selborne Ave., Lyttelton, 0157, Pretoria, South Africa.

SPECIAL EVENT. BT99WED is a special event station for "World Environment Day" and will be on air from June 1-30th (Thanks to the help of BA4RC and other local hams.) The station is set up by Nanjing Agriculture University to call the attention of radio amateurs to worldwide environment protection. They will operate on several bands and modes. They eagerly want to get in touch (on the air) with some environment protector or universities and schools devoted to environment protection. So, please tune for their signal. QSL BT99WED via F6FNU. For any comments, please direct them to Michael Chen/BD5RV at: by5qn@qsl.net

VP2EREM, ANGUILLA. Jim, WB2REM informs OPDX that from June 28th until July 8th, he will air this special callsign from the Island of Anguilla. Operations will be on both CW and SSB, mainly on 10-15-20 meter bands. QSL via WB2REM.

YS, EL SALVADOR (Update/Change). Jack, KE4LWT, informs OPDX that he will be active as YS9/KE4LWT, not YS1/KE4LWT as first reported. He was informed last week by SIGET in El Salvador that he was misformed and that he should be using the YS1 prefix. Please refer to OPDX.410 for more details.

ZS8, MARION ISLAND. Deryck, ZS8D, was active this past weekend on 14195 kHz around 1450z. He has indicated that he still hasn't erected his beam antenna, but is currently using a wire antenna. QSL via ZS6EZ.

George, you don't seem to get I suppose. Yes I read your post, and yes I think your a blithering idiot and yes you think I am a coward, since we agree on all these things and you know that no one here is really interested in your conspiracy theorys why not take it somewhere where they WANT to read what you write?

>The point is that this is an amateur radio issue,

No it isn't, the attack was not made BECAUSE they were radio amateurs it was because of thier failure to allow the FBI into thier compound. Are you telling me the raid would not have occoured if there were no amateur station on the compound?

>it belongs here. You may be a coward now, but I
>see nothing in God's law that you must remain
>such. Thanks for bumping up the length of the
>thread.

The length of the thread George? Does that mean something to you? George, the only coward here is you, your afraid to take your information public because your afraid for your life (not that leaving the country would help you) but let's face it George you have the info to bring them to their knees but due to your cowardness you wont publish it. You call me a coward but I assure you if I had the info I would publish it and not make excuses about making arrangements to leave the country. So strap some balls on yourself George and mail me the information, I'll be glad to take it public for you. Otherwise, go piss off, your like an old woman bitching and moaning. I'm ready to ADDRESS THE ISSUE George, when are you going to send me the 'secret' info that your cowardness keeps you from publishing?

>You are responding through fear that this will happen;

Wrong George, I'm responding because I strongly disagree with your use of the RRAM newsgroup for this purpose, however your certainly not the worst spammer we've ever had. You are reasonably entertaining and since your post contain at least a tinture of logic to them I am responding.

>otherwise you would be silent. The majority of readers
>never participate in the discussion, but they still
>get the information and education. This is my primary
>goal, it is a very good strategy, and I can understand
>your concern.

George, you are no concern of mine, your a big bag of hot air with no one willing to listen you must turn to an amateur radio newsgroup with the hopes that someone will give you the time of day. The Michigan Militia gets quite a bit of press George, they have been on the national news several times although I can't say I've ever seen you on TV. Why not take your message to them and let them help you reach the masses?

>You are lively proof of the effectiveness, I have
>changed you from a cry-baby who didn't want to hear
>the truth to a cry-baby who fears the effectiveness
>of truth.

You've changed nothing George, I thought you were a blithering idiot months ago when you started with this crap and I still think your a blithering idiot, I appreciate the fact you have a message and you want people to listen to it, but you don't have a clue how to do that, your spending your time in rec.radio.amateur.misc trying to rally support, if you had an sense at all you would know the number of readers here is very limited with respect to the general public, and you have time and again called us cowards, now is THIS the group you expect to get results from George? Not very bright on your part, see where I'm going here George?

>> Again George, I've never been jammed by the FCC,
>
>Wrong! The FCC jammed the amateur radio service.
>If you have a license, they jammed your service.
>Don't care? Fine, lose your service.

George I love it, your like Burt/Drew/Masa and the rest of the corn flakes who pass through here as soon as you actually start discussing the issue all logic goes out the window.

I say again OLD MAN, I have never been jammed by the FCC, I didn't say they didn't jam the "service" I said they never jammed me. No I don't care, and now please explain to me how the FCC jamming a particular station at in Waco is going to effect me loosing or keeping my license?

>I am addressing this maturely, because I see beyond
>myself.

No your not, my 17 old son has 10 fold the discussion skills you have. Your replys contain verbage like Nazi, Von Klinton and a whole host of other childish remarks, your very very far from addressing the issue maturely my friend but I'm sure you believe it to be so.

George, Radiosigs is a Jew-Zionist who pretends to be an "American." No way he will want to address what happened to the two amateur radio operators in the Mt. Carmel Center, and their families and friends.

Why? Wise up, George. The Mt. Carmel Center was not a JEWISH community. To Jews and their mind controlled Zionist zombies, the JEWS are the only people who matter.

Had the two amateur radio operators been Jews, had the others there been wearing beanies or black hats and banana curls, Radiosigs and his fine friends at the ADL would be bleating non stop.

Let's take a look at one of the little victims who is just not important enough for the ADL and their mouthpiece (Radiosigs) to worry about:

http://www.public.action.com/SkyWriter/WacoMuseum/death/74/74_aut.html

Melissa Morrison was a cute little girl, wasn't she, George? Tough for her, though, she was not Jewish. Now have a look at her body:

http://www.public action.com/SkyWriter/WacoMuseum/death/74/74_pix.html

As you can see, only the bottom part of her legs and her feet were found.

Radiosigs says:

> > I'm an American and proud of it.

I guess he is proud that the US murdered Melissa and mutilated her body? Step up to the microphone, Radiosigs. Let's see how you justify this.

As did I, my ex-Navy radioman VE was a pain the ass. One minute solid or
nada.

I did this on the first try. I also passed both the Advanced and Extra
written with one wrong on each, first try.

> I think the code test speeds should be lowered.

I agree, but not with the particulars.

5 wpm test for all HF licenses until it's eliminated in 2002.

FAR increased difficulty for the written. They're ponlic for God sakes,
anyway.

Bottom 25 kHz of each band for CW, next 25 for digital, the rest phone.

And trash that inefficient, 80 kc wide SSTV garbage. It's 1999. It's
stupid. Let old men trade bikini shots on the internet.

> Can you be more specific about the "speed issue?" Are you talking

Look, you can set the card to "record" and fill a buffer via the APIs. The way the APIs work, an asynchronous callback *message* (essentially and event message) is sent when the buffer is filled. Keep in mind that the MMSystem and MCI APIs were not designed for anything past the transfer of this data either to or from a file system. Also, depending upon what the computer is doing at the time (maybe you're also downloading a large file off the Internet, trying to access a newsgroup using OE5 <G>, or even processing the data, whatever) that message is not enough to ensure consistent processing of buffer chunks. If the processor is busy, more than one message can go unresponded, and you lose data. Different latency than you asked about, but nonetheless that's the way the API works. If the API were such that a specific routine were run synchronously after each buffer fill, that would be a different story.

> rather the algorithm, the implementation of that algorithm, the
> processing speed of the CPU, or some combination of these. As noted in

This is the other part of the problem, since they go hand in hand. Assume at this point that the buffer is essentially filled with signal levels in the time domain, ready to be used. You still have to convert that data to the frequency domain (FFT), optionally filter it, determine the levels about the region of the mark/space frequencies, and buffer that. Another process has to then synchronize and interpret the resulting mark/space stream. On top of that, all of this processing has to compete with other processes that the computer is doing (see above). On 486s, you barely have enough overhead just to perform and display a 4096-point FFT at an acceptable refresh rate. Even then, if you drop a chunk of data it doesn't matter since your eyes will filter that out.

> an earlier post, if the processing demands are too heavy for the main
> CPU to handle in real time, then some kind of coprocessor, whether in
> the form of a dedicated DSP chip or an SMP architecture with multiple
> CPUs, is pretty much a necessity for real time processing of the
> sampled data.

Agreed. That was my earlier argument when I mentioned that a true DSP card should be used. A sound card is *not* a true DSP, just a simple time-domain analog/digital converter. Perhaps the scheme of doing everything in software will work on a 500MHz Pentium III, but how many SWLs have one of those. Just not practical.

NO, ham radio will die as long as contest curmudgeons at ARRL keep
stupid code requirements intact and refuse to toughen the written. Do
not say I accused you of being a codeless "loser", that was not what I
said or intended. The point is, codeless techs often are career liars,
saying they will learn code to fit on., when they really have no
intentions. Therefore, they should just not waste our time. Who cares ?
This doesn't apply to you, whoever you are.

There was a program called MDT that decoded Police Packet at 4800
baud at 850 - 860 MHz or so, and did it with the Multi-Media API for
the
sound card.

Basically he used a C module to get the speed he needed, and then
programmed everything else in Visual Basic.

Alas, there was a big late-night attack by police in several cities
to confiscate the software. I haven't heard if the process is
on-going,
but until new laws are written, police will confiscate contraband
first
and only say oops if you got enough money to make a Supreme Court
case. That along with Cell-Phone receivers, and CW radar receivers.

I did a search on MDT and most of the sites it was at are now gone.

The only remaining link I found was at Qualcomm and the San Diego
Police are scared to go in there:

http://people.qualcomm.com/ppomes/Crypto/MDT.html

But this is the original MDT message, and not useful for the Sound
Card software you need.

The U.S. is quickly becoming a clone of Communist China. It may be
that we stole the nuclear secrets from China, rather than the other
way
around! We're too stupid to let mere engineers design government
bombs :-)

FWIW...

Many inspection authorities will gag at the installation of a breaker
not listed for the specific panel in question. Even if the breaker will
fit and function properly, unless the panel listing includes that
specific breaker, you can be required to replace it with a listed
breaker.

I've been going for quite a few years, there are a bunch of bad apples in every crowd I must admit, but all in all there are a lot places I'd less like to go. I travel a lot and have ttaended hamfests around the country in all regions, seen some pretty good ones too, byt hamvention remains the grandaddy of them all. DARA puts on a pretty darn good show, most appreciate it, the declining attendance is probably a sign of the times in the life of amateur radio, which is obviously not rosey. The jammers on the talk-in frequency are the ones that should be caught and hung to dry in front of Hara Arena for three days and nights. That's the sort of "crap" that makes amateur radion look 1/99th of a notch above CB in stead of ions above, of all things, and that's horrible.

5562. Putting a mobile antenna on a bicycle??

Is it possible or feasable to temporarily attach a VHF or UHF antenna on a mountain bike?? (Bicycle)??

Mounting is easy, Power is easy, but the antenna that can handle 10-20 watts and have low VSWR is another story. I'm looking for longer range and handy-talkies are just not cutting it!! Has anyone ever tried this?? --Greg-- N0FKI

QST magazine had an article about bike antennas in the march 193 issue. Using one design, I made one for my bike using an old CB antenna with a 52" steel whip. I clipped the coils wires and re-soldered the coil connections using a wire of minimal length. The SWR is under 2. I attached it to the luggage rack on my bike and used a 1/ wave counter poise. I can hit some repeaters up to 20 miles away.

A better antenna is a TV twin lead-in wire J-pole that I made for use in my house. There are some plans floating around on the internet and you couple find them via Yahoo or Dejanews. For bike use, I slide the J-POLE into about 5 feet of 1 inch PVC and secured the top of the JPOLE with a PVC cap over the pipe. I then use an S ring and put one end (downward opening) of the S ring over the bike's rear frame at the left side of the rear axle. I then set the bottom of the PVC pipe onto the other end of the S ring. I use a bunge cords to hold the PVC pipe straight up.

I have worked two public service events with the JPOLE and am happy with it. It is the better of the two antennas. Unsure of max power on the JPOLE, but the first antenna above should be able to handle your wattage.

Let me know if someone e-mails you a better design.

Greg:
You are talking about a half wave antenna. Larsen sells these and
they recommend them for sailboats with fiberglass decks, back-hoes
and other heavy equipment, and yes bicycles too. Some of the other
companies make them as well, such as antenex. You will almost get
the same gain with a half wave with no ground plane, as you will with
a 5/8 wave with a ground plane. You will get at least 2dbi gain over
a quarter wave with ground plane. You will not be disappointed.
Good luck and 73,

Joe Kennedy.

C'mon, you can tell us, can't you?
> It is ironic, after my calling you a Nazi, that you should continue in the
> vein of cynically spreading the same misinformation.

Right, leftists think unbiased history is anti semitic and biased. Let
me clue you in son. I've had more dealings with the state of Israel, its
people and history than the summer you spent on a kibbutz or the 5 bucks
you drop in the Jewish Agency cans. I can quote chapter and verse of
Herzel and you arm chair "Israelis" do amaze me so. So quick to fly off
the handle, so quick to recall the Holocaust, so slow to build up the
Zionist Enterprise. Just foam at the mouth the next time you see an Arab
and yell "no compromise !", unlike real Israelis.

> What the hell does the Pope's prophesying the "end-times" and ARRL's
> back-pedaling on CW testing have to do with one another?

Missed the "speed of life, communications, changes" segment, did you ?

Thank you kindly for the family history, it saved me from having to do
more research, which I would have done had you given me more time.

> survived as many 1000's did not, a very big deal from where I sit.

So, answer this: Suppose you knew that in exercising your right not
to be censored, the things that you spoke on the air today would be
used against the amateur service to eliminate the amateur bands
tomorrow (See the April 99 QST article on FCC Monitoring). Would
you continue such speech? Amateur radio *can* be legislated out
of existance; do you want to be one reason why that happened?
Are you being a good custodian of the spectrum granted to us?

There are only six FCC people monitoring all of HF nationwide, Dave.
That's down from dozens in previous years. Amateur radio is on the
bottom of their priority list. (I again reference the April issue
of QST.)

>That, in a nutshell, is the problem.

Now you understand. Good.

Jeff, I do think about being a good custodian of the spectrum --
often!

Along with rights and privileges come responsibilities, especially
to future generations. I'd like to bestow both freedom of speech and
amateur radio to my posterity.

I endeavor at all times to comport myself as a gentleman on the
amateur bands, just as I do in "real life." I doubt that anything I
have ever said there could possibly be used as an excuse to
legislate away the tiny slices we are allowed of the spectrum our
predecessors pioneered.

The same cannot be said of those who have attempted to purposely
interfere with me and the other legitimate operators on 3950,
however. To call their endless torrent of noises, catcalls, and the
grossest of obscenities "ungentlemanly" is an understatement
bordering on the absurd. What they are doing is contrary to law, to
the amateur regulations, and certainly brings disrepute to our
service. _Ideas_ of all kinds can and should be tolerated, but
malicious interference should not.

The ideas expressed on the Liberty Net have been expressed for about thirty years that I know of, and probably since the beginning of amateur radio. There was never any problem with that, until the jammers moved in a few years ago. It's the jammers and the would-be censors who are breaking, or threatening to break, the law.

With all good wishes,

Kevin, WB4AIO.

[...]

I didn't say that, Jim.

There are several aspects of amateur radio which have captured my
interest -- AM is one; did you see my AM-related link? I didn't
participate often on 3950 until 1991, though I listened off and on
long before then. And I've been licensed since 1972.

Many amateur contacts are empty and meaningless (I've undoubtedly
been guilty of a few of those myself), but I'm happy to have met
many brilliant, creative, witty, and truly kind people over the
years through the hobby.

> Two, you
> suggest that the people who jam the Liberty Net do so because you

>

In some cases, yes.

One jammer, who has recently been removed from HF for two years,
used to repeat "I'm just as good as any of you guys" as part of his
jamming "routine," when he wasn't playing tape loops or cursing.
That's pretty conclusive, in my view.

> As I said before, I have never heard your net, and I have not

> to air your political or religious views.
>
[...]

Just because you "heard it somewhere" and it seemed like a good idea
to you, doesn't make it the "spirit of amateur radio," Jim.

To me, the spirit of amateur radio is the free and friendly
non-commercial exchange of ideas, and the development of technical
skills, via radio waves. In the process, our nations and our lives
are enriched by our conversations and the friendships which grow
from them.

The Liberty Net has served that spirit admirably, and totally
legally, for three decades. It caused no problems for anybody. Then
the jammers arrived on the scene in 1992.

Despite your allegations, the Net participants derived no pleasure
from their arrival and have striven to get enforcement action
against them for years.

When the FCC was established, it was specifically forbidden from
controlling the idea-content of transmissions in any service. That's
demonstrable, and the prohibition is still law.

Furthermore, I don't regard 3950 as a "public forum" for my views.
I'm a published author, and print and the Internet are my public
forums. Amateur radio, aside from its experimental/technical aspects
which I also enjoy, is a place where I can talk with my friends
about things which concern or amuse me, or about Life in general.

I and you have always been free to discuss, as gentlemen, whatever
we please with our radio friends since the beginning of amateur
radio.

It seems to me that the one who suggests that that tradition should now change is the one who wants to trash our service's heritage and impose his views upon others, _in complete contradiction to not only the law, but to the spirit of amateur radio which has prevailed for nearly a century_.

I prefer not to quote or address the crude language and insults in the latter part of your post. It seems odd that you would make such hostile remarks, considering your admission that you have never listened to our conversations.

With all good wishes,

Kevin, WB4AIO.

Jim
That is the right idea don't do things that would make the feds snoop
around. I don't! I still would like to protect my families privacy.
That additude about well if your not doing anything wrong so let em
snoop has all our privacy introuble. It also says that I'm guilty of
some wrong doing so let me prove I'm innocent. That kind of thinking is
also has the Bill of Rights introuble also.
Also to the nerd who can only find fault with spelling. Thats pretty
lame. I guess your not smart enough to do something to protect your
families privacy. Whe I got my ham ticket I reliezed that gave the feds
a open door into my house. I don't want that! So I built the ham shack
outside of the house.
Its just what I did to keep the feds out of my house and
still be able to legaly enjoy amateur radio. All though with the way
this government is becoming a socail governemnt instead of a democratic
government it will be just a matter of time before the feds police and
any other government agency can come in to yours and my home when ever
they want. You have the so called war on drugs to thank for that.

Just as I thought, your "source" is anonymous, just as you are, "Anonymous."
Hmmm, does 1=1? Personal business??? Riley's primary job responsibility is to
enforce the R&Rs of the A.R.S., and to disseminate information about the same,
which is what he has been doing on the bands. This "report" sounds mighty
fishy anyway. You blend together what seems to be Part 97 issues about
commerce and amateur communication with, claimed, internal FCC work rules.
Which is it? I would be surprised if Riley's operating on the ham bands from
his office receives anything less than the full blessing from his bosses.
Maybe I have early-onset Alzheimers, but I think I remember reading in QST
that Riley's office-bound ham operations were after hours, anyway.

<snip>

Strong-arming? Hey "Anonymous," remember when you signed that ol' Form 610?
The line above your signature reads, in part, that you agree to be bound by
Part 97. Nobody was forced to sign that document. And, hate to be so cynical,
but why should Congress care? They are the biggest offenders when it comes to
breaking their own rules. . .

I'm unclear what you want me to quit? Ham radio? You mean if I didn't go
staright to "extra", I should just abandon the whole pursuit? Why is that? Or
my academic career? I love what I do, and am pretty good at it. The subject
matter, and the opportunity to share that, and have a direct effect on the
intellectual, and by extension political and cultural, lives of young(er)
people. Doesn't pay very well, but has a lot going for it otherwise. I also
have a book of poems coming out from W.W. Norton this Fall, and am starting a
small publishing company with some friends and colleagues soon. I have so much
fun I worry about being arrested because I smile so much.

You claim my bias and your lack of bias, without any reference to any *evidence* of any sort. You don't need a graduate degree to understand that claims demand some citation of something commonly agreed to as reality. Dealings with Isreal? What? You import tomatoes and strawberries? More secret agent stuff. National security keeps you mum, I see. mf_luder@my-daja.com, you are about to corner the market in generalities and rumor. The end of your paragraph really shows you starting to lose control of your filthy little mind. Who's foaming? You are jumping to a lot of conclusions about my life, aren't you. Not to toot my own horn so much, but notice how I don't make assumptions about you. I just tear apart your addled, rabble shrieks. Thanks for making it so easy. Thanks for recycling, too.

No, it just didn't make any sense. The ARRL is accelerating the apocalypse by caving to oressures to reduce/eliminate CW testing, thus speeding up the data rate? Is that it? That is the clearest {sic} I can make of it, and I make my living explicating obscure texts.

> teach you geopolitics.

Hey, way to go! We at least have the X-files in common! Wow, maybe we *can* be friends after all! Now, you *do* know that Carter didn't come up with the black choppers myth, just exploited it for aesthetic and commercial reasons, don't you? Don't you?! Just who is it that is learning geopolitics (or is it ET politics, since the X-Files choppers carry the agents of those damn grays (and you thought the Reds were bad!) from television here?
>
> Do it, you know, because I am a "leftist member of the

There you go again! Are you saying that a) I am not a dupe of the NWO, or b) I am not a rap star? I mean, I suppose I could be wrong about the NWO, or Illuminati, or Tri-Lateral Commission, or whatever it is these days that is threatening personal liberty and the free market, or maybe I am a cell-leader of the UN after all, just telling you I am to throw you off the trail, but hey, don't rain on my parade, I'm sending out demos, and hope to be as big as M&M someday soon.

5590. Christie Aponte back in the hospital..

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-30 00:00:00 UTC
From: you@somehost.somedomain
Message-ID: <_I943.52$Ly.4458@petpeeve.ziplink.net>
Source record: 141194

Christie Aponte, the teenaged ham from Puerto Rico that was badly injured in a car accident, returned to Childrens' Hospital this past week. Two months ago, Christie travelled back to Boston for scheduled surgery on her hip. After completing the procedure and rehabilitation, she returned to her home to complete the school year.

Unfortunately, the surgery didn't take, and she returned to Boston last week for repairs. After going through another round of surgery last week, doctors admitted that they had to make more repairs during this coming week.

Christie is not particularly happy to have to undergo serious surgery three times in two months. I'm sure you can imagine how difficult this must be. As a result, she needs some cheering up.

If you'd like to send her a "Get well email", check out the following Children's Hospital web site. There, you can send her a personal email greeting that hospital staff will deliver to her door.

Thanks for your consideration.

Can't you just answer the guy's question instead of advertising your lack
of knowledge by nitpicking it to pieces?
He obviously meant monochrome as in BLACK & WHITE. Instead you give out with
all this BS about stations broadcasting in only one color ('scuse me, colour)
and ice cream and chromatic density and blah blah blah. Sheesh.
All you're doing is evading the question and making yourself look like a
jackass in the process.

Are you aware of the large numbers of hams who still
listen to ('guard') 52.525 MHz on six Meters?

Over the years I have logged hundreds of contacts on 52.525 ...
Using no more than 15 watts in the first few years.

Thanks for writing, Jim.
Yes, but most military radios will not make this frequency
without buying special crystals or modification.
Standard issue crystals are available for the frequencies chosen,
and irreversable modifications to historic radios
are no longer acceptable to serious collectors.

Now that you have expressed your usual bit of
hate speech, would you care to address the issue?
You did not refute the evidence of FCC and FBI
misconduct presented at the website,
http://www.atlcom.net/~geozim/index.htm

Personal attacks are not the business of this NG.
The title and text of your posting contributes
nothing to the NG. The last futile effort of a
weak-minded person is to attack the messenger.

The thread "CAROL VALENTINE IS A SICKO!" is what
generated your current posting. Her statements are
important to this NG because they pertain to
America Holocaust: the genocide of Christians
inside an amateur radio station. This makes
her contribution to the NG squarely on topic
for the NG.

Radiosigs wrote:

Source record: 141214

I'm sorry, but "ground wave" runs out at several megahertz ...

You're talking standard VHF ranges at 60 miles or so ...

Now, try 120 miles to a mobile with just 100 watts - that's ground wave (what used to be the FW LW beacon in the 300 KHz range).

Again, sorry - ground losses are just too high as high in frequency as 50 MHz.

Jim, you're making a case that jamming is caused by
the discussion subject of the group being jammed,
and I'm sure you don't mean that.

That is exactly the same thinking that says:
"It wasn't the rapist's fault. The girl was wearing
sexy clothes so she was asking for it."

This is misplacing the responsibility for law-breaking.
The people talking about government are not breaking the law.
The people doing the *jamming* are breaking the law.
It's politically popular and the herd will cheer you
for misplacing the blame, but it's still immoral.
Let's put the blame where it belongs.

Concerning your illustration of a man yelling insults in an airport-
There are limits to what a person can say or yell in public,
and radio is inherently public. The man yelling is guilty of
disturbing the peace and can be held accountable for it.
But the proper thing for the offended people to do is
let the authorities handle it. If they walk up and
belt him (jam), they are also guilty of a crime.
The yelling man's stupidity is no excuse for assault.

Now, however, we come to an important point-
Publicly stating a political opinion in a peaceful manner
is *NOT* disturbing the peace.
The Bill of Rights and scores of Civil Rights cases say so.
The talker doesn't follow you around and force you to listen.
Claiming that you are harmed when you freely stand there and listen
is again misplacing the responsibility.
It feels good to stand there and listen and get all rightous
and huffy, especailly when the herd behind bleets its approval.
But if I freely stand in the rain,
then it is vain to curse the weather.

It is the nature of human beings
to do everything possible to blame someone else
for their own foolish choices.
Our (mis)leaders encourage this dodging of personal responsibility-
blaming the Liberty Net people for the guys that jam them.

Maybe we should just leave the planet to the bees....

More fanciful and 'untrue' stories I'm afraid ...

Tesla - discovered 'resonance' and it's effects on all
manner of objects, both electrical and mechanical.

He may have shaken a building or two - the earth and it's
soil are somewhat plastic (ever note kids running across the
front yard in while in a quite house?) and noticable vibes
can be set up if the resonant freq is found ...

"Earthquale machine" - A distortion and old wives
tales on what Tesla 'really' did ...

Oh - you might try your own experiments with 17 to 20"
woofers, a 300 Watt DC coupled amp and an audio sweep
oscillator sometime ...

Slow sweep up in frequency noting when the walls of the
house begin to resonate ..

Now *that* is an eathquake machine ...

5615. 444.250 Plano Tx emissions: Have you heard it on YOUR output?

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-30 00:00:00 UTC
From: Jim <jvpoll@dallas.net>
Message-ID: <37517077.7425B022@dallas.net>
Source record: 141219

If I had not heard it myself on my old, bullet
proof front-end Yaesu FT-727R I would not
have beleived it either ..

But - there is was, plain as day, while I was tuned
to 443.275, the ID of the K5VOU machine as it
slowly sweeped through ... these emissions were from
the 444.250 MHz machine located on the HCA Hospital
located in Plano, Tx.

I had had reports from a friend who had heard it on
his Alinco and Yaesu mobile - but I reserved judgement
till I had 'witnessed' the same thing.

Some of the obvious warning signs are evident, too,
while listening to the output of the 444.250 Plano
machine - the tellltale audible feedback that sounds
kind of like a howl when the transmitter gets back
into the receiver of a repeater ...

So, if you're plagued by a mystery transmissions heard
on your system's output from time to time - check
for activity on 444.250 MHz.

I know someone who mentioned it to their club - but
I guess it's not in the plans to investigate or cure ...

Where else are emissions from this machine showing up?

I don't know ...

Jim

5616. Re: VOTER circuit

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-30 00:00:00 UTC
From: Jim <jvpoll@dallas.net>
Message-ID: <3751725E.7AB9B858@dallas.net>
Source record: 141220

Well - the orginal author of this post is referring to equipment
which picks the receiver with the strongest signal (or greatest
S/N ratio) in a multiple receiver site repeater system.

That central controller is referred to as a 'voter' or, more
specifically, a 'repeater receiver voter'.

Using this kind of technology, a 5 Watt 2-way hand-held
radio can be used all over, say the City of Dallas with
one central 250 Watt transmitter and multiple receivers
located in diverse locations throughout the city.

Such a scheme was in use on their VHF band fire system a
few years ago ..

This same technique has been used in some large amatuer radio
systems too - extending the range of 1 to 2 watt Japanese
made portables ...

5619. An Extra Supports Code Reform

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-30 00:00:00 UTC
From: David Stinson <arc5@ix.netcom.com>
Message-ID: <375188DB.CA23C522@ix.netcom.com>
Source record: 141223
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Everyone else has had their say about this, so I will too.
I have the call I was issued- I didn't buy it.
I rode a Greyhound bus 250 miles to the FCC field office
in Dallas to get my license.
I actually had to write down what I copied during the code test.
I actually had to send code with a straight key;
It was something about a 6V6 buffer, if I remember right.
So I get to pop-off, too ;-).

I think the code test speeds should be lowered.
I think the CW-only subbands are too big.

I'm a very big fan of CW. I'm almost never on 'phone.
I think CW should be allowed everywhere on any frequency
for many obvious reasons.
But the CW-only subbands are too large to be justified.

I spent a lot of time on the "LOWFER" band of 160-190 KC
back in the 80s. Dozens of signals were individually
copyable, even though 90% were crammed in the top 10 KCs
of that band. And we were all ultra-QRP with a huge
noise floor. In that situation, you learn to be
a good op and use spectrum efficiently or you die.
It's about time hams learned that there are other
usable frequencies for CW besides those that end in ".000".

CW is narrow spectrum and the usage
levels do not fill the allotted space efficiently.
3500-3725 KC is just a waste.
CW only from 3500-3525 and CW-Digital from 3525-3575 is a big plenty.
CW only from 14000-14025 and CW-Digital from 14025-14075, likewise.
Similar for the other bands.
Make the bottom 10 KC Extra only. That's plenty for any good op
and the contesters can squeeze in between the PSK31 boys.
With a 30 HZ bandwidth for PSK, those guys should have no complaint.

I believe learning the code to be important for several reasons.
But I also believe we need new blood and new ideas.
It doesn't have to be just one way or the other.
We can find a middle road.

I'm not addressing technical testing in this post- just code.
For CW testing, I'd support three levels:

No-Code with limited HF phone access including 10 meters
and some portions of 75 and 40.
I'd give access to 160 because it needs users.
Full access on these bands for digital and CW modes.
Power limited to 300 watts out (because of crowding).
Nothing on 20, 15 or WARC.
This will give some useful access to HF and
the crowding will provide incentive to upgrade.

5 WPM code-
It takes a certain amount of character to learn the code at all.
Speed is really irrelevant. There is a learning "plateau"
at 5 WPM so this is the logical goal.
Privileges similar to current Advanced Class.

10- WPM code- Next "plateau" is at 10 WPM, so this
is the next logical goal.
Privileges similar to current Extra Class,
for people willing to work extra hard.
Expand the Extra phone bands by some arguable amount.

That's one Extra's opinion--
With that and 50 cents.... ;-)

Hi Dave, the only "CW-only subbands" are on VHF. HF CW has to share the subbands with other digital modes. There will be a big fight if the FCC tries to take digital subbands and give them to phone (except maybe for the present relatively unused novice subbands). Digital is getting more popular every day. It's often difficult to find a clear digital frequency for PACTOR operation on 40m.

That's funny... this sounds almost word-for-word like something said in 1934. A Jewish discussion group was forcably disbanded by agents of the government -with the blessing of the neighbors around- because of it's "subversive" talk that threatened the "government." The person who said it? Joseph Goebbles. Remember him, Doc?

HY,

no philisophic point of view but have a look at the frequency analyzer at
http://www.relisoft.com/#freebie
They take a sound from mic, perform FFT and display the spectrum on screen
in real time.
Works well on win95/98, source in c++ is available and program (exe) size is
70 K yes 70K !!

If anyone write a soundblaster prg wich can decode navtex
please send it to me.
Thank's
All the best
Stephan

Is this some kind of sick joke????

I've checked the Michigan State Police website for Memorial Day weekend fatalities. NOT A THING.

I've also checked the obituaries for all of 1999 at The Kalamazoo Gazette website. A Mike Gursey passed away May 19th, but using the search engine with Geurnsey keyed in.....
NOTHING!

So what is this hoax all about????

5635. Urgent help needed re Emotator Rotator control box

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-31 00:00:00 UTC
From: steve <steve@g4uol.demon.co.uk>
Message-ID: <$N4CsQALdwU3Ewil@g4uol.demon.co.uk>
Source record: 140985

Hi There

A friend of mine is having a problem with his Emotator control box. We are unsure of the exact model, but it has a circular dial, three four inches across, 7 round pin's on rotator, takes 7 cables. The front of the box has four led's in a vertical line. On the box all it says are the words Solid State. It has 5 ic's and three enclosed relays on the circuit board. The box casing is black,

He urgently needs a copy of the circuit diagram for it, as, although it works okay, turning the rotator, is not showing which direction the antenna is pointing! It works fine on a three foot piece of wire, but not a long length.

Have you heard of the company ? Maybe you could send me the full name of the company and I could email them direct or do you know the model and can help with the circuit diagram? Any assistance would be gratefully received.

Please email me direct, or via the newsgroups.

Note: I have also tried several other newsgroups due to the urgency of the situation. All works other than the control box, after weeks of antenna work :(

What does that have to do with having more than one class of license?!
The ONE Ham license would require you know this information, and the
differences between using VHF and HF.

Twist, distort, twist, distort ... the typical JH/PCTA
tactic at play again.

Cecil didn't say any such thing as you implied. He did
not state that there should be a free-for-all stomp'em
contest of some sort. He just said that the better modes
would "win" (as in the popularity contest of what people
choose to use, as opposed to what they are restricted to
or from using).

The general rules WRT interfering with QSOs in progress,
etc. would still hold. Nobody (but you) has envisioned
a scenario where QRM would *necessarily* result.

And don't try to peddle the patently false idea that
there is no QRM between CW users ... the use of modes
other than CW bears no correlation to intentional
interference (or unintentional for that matter).

ALL that Cecil said was that, in his view, people should
be free to choose their mode. YOU took the leap to the
typical FUD reaction of the PCTA.

Without unnatural government life support, if Morse can't
"hold its own" in the free marketplace, people will choose
something better. It appears to me that that's EXACTLY
what you're afraid would happen if people weren't pushed
in the direction you want them to go in.

For someone who constantly extols the "overwhelming virtues"
of CW, you seem to have little real confidence in its ability
to stand on its own merits. (perhaps because those alleged
merits are a bunch of trumped-up mythology)

Now you've done it. Often thought to be a reasonably sane, rational personality,
poor radiosigs just got rubbed raw by something you said and HERE IT COMES! The
bug-eyed monster of the Jewish Messiah Paranoia in full bloom.

WE GAVE YOU THE ETHICS TO LIVE BY.

You can hear every Hebraic hound howling in sympathy as he breaks into
his Mantra of the Manifest Destiny of the Super Race, created to rule over
all others. Awrooooo!

WE

> GAVE YOU YOUR LORD AND SAVIOUR.

"Your" lord and savior, get it? Any old phony is good enough for the goyim,even a
false messiah. Meanwhile, the Jews teach their young that the Jews
themselves are born to rule the other races, to teach peace and brotherhood to
the lesser Earth peoples and to save them from ... being goyim?

Max Dimont quotes Israeli Prime Minister Ben Gurion: "My concept of the messianic idea is not a metaphysical but a social-cultural one ... I believe in our moral and intellectual superiority, in our capacity to serve as a model for the redemption of the human race ... The glory of the Divine Presence is within us, in our hearts, and not outside us." ("The Indestructible Jews, " New American Library, New York,1971, p. 337.)

> WE WERE NEVER DESTINED TO WORSHIP HIM AS GOD
> BECAUSE THE CREATOR FORBADE IT.

Oh, right. I remember the passage: "He shall come among you and you shall crucify Him by My commandment." The Jews were operating on Divine orders in crucifying a man who really wasn't the Messiah.

Isn't it an interesting, the weird shapes of denial? Not that this radiosigs denial
has anything to do with amateur radio, but what the hell? When you got Manifestia Destiniosis, it kind of infects everything you touch.

> GET THE MESSAGE CREEP? We're going nowhere and if you don't like it,stuff
> it.AF2Y,Doc>>>>>

Seems to me that if you want to have American citizenship, you should give up your allegiances to all other princes and nations. If you want to be a Jew and revel in their paranoid delusions, be my guest and move to Israel.

But for God's sake, don't try to turn this place into an Israeli province.

OK?

>your step:

False; this is just another example the extreme that
Eric June will go to discredit anyone who does not
agree with his "we opinion".

The true fact are:

1. Extra class licensee hold 4 out 11 positions on the
NCI Board of Directors, although the Extra class only
make up 1 out of 10 amateur radio licensees.

2. The Extra class licensee that responded to WT Docket
#98-143 gave 5.5% support to the NCI proposal and 4.2%
to the ARRL proposal.
The procode position got 19.5% support, which was their
largest supporter.

The NCI proposal was well support by Extra, Advance and
General licensees. No Code International and other
nocode testing advocates appreciate their support. We
could not have won without them.

> present relatively unused novice subbands).

I guess you are in for quite a fight then Cecil, since NCI is not
opposed to doing exactly that:

"Mr. Kane recommends that there be no regulatory distinction made
between modes of transmission. This point would likely gain mixed, but
significant support amongst NCI's membership, and it should be pointed
out that this is the norm in the rest of the world and no real harm
seems to have come from the lack of restrictive sub-band-by-mode
limitations such as those currently embodied in the Commision's Rules."
- NCI reply comments to docket 98-143, filed with the FCC

> Digital is
> getting more popular every day. It's often difficult to
> find a clear digital frequency for PACTOR operation on 40m.

That's probably because the foreign phone band on 40m extends into and
through your "digital frequencies". The "digital frequencies" on the
other bands were getting occupied by all of the CW users over the
weekend. I had to move up to a clear frequency at 14.090 and call CQ
TEST right in between two of those weird burpy sounding signals today.
Some other station started to burp right on top of me, I guess I
invaded his "territory" or something. Fortunately, engaging the 250 Hz
CW filter allowed me to carry on without really noticing his malicious
burping.

The CW guys were ranging up above 14.100 all weekend, there just wasn't
any clear spots down below.

> We can find a middle road.

I thought there should be a middle road as well. I can't even count the number of times I went round and round the "compromise tree" with these guys, but all to no avail. See our article called "It's Not About the Code, It's About the Hurdles" at http://www.KnowCode.Org Maybe you'll have some fresh ideas on the subject.

> That's one Extra's opinion--

You're certainly entitled to your opinion. As one Extra to another, let me just give you a quick heads-up on what you might expect if you ever wanted to join NCI. NCI directors have some kind of irrational grudge/prejudice/hatred against us Extras, so you might want to watch your step:

"Actually, Hans ... I have encountered numerous "extras" who couldn't find their ass with both hands, a map, and a flashlight, technically speaking, though they *could* beep real fast ... over the years. They were not friends of mine, nor the sort that I would seek to "hang out with" ... as a result, I can't recall their callsigns, but even if I did I would not be inclined to indulge in that sort of "outing" in this forum." - Carl Stevenson, NCI Director, 11/10/97

"That's complete bullshit and if you paid any attention, you'd know that I and virtually everyone else who advocates the elimination of the Morse test (not the mode, just the stupid test) also advocates making the written tests better so that we don't have more idiot extras who don't even know Ohm's law or how to cut a dipole to resonance." - Carl Stevenson, NCI Director, 11/06/97

I have Version 8 and have been asking for some of the things in 9 ever since
I got it. I looked at the ad and am singularly unimpressed. It is still a
dos program and still has no variable length or user configurable fields.

My opinion is

For contest use NOTHING beats Troll
For General Logging NOTHING beats Logic 5.

For me, that is what I will stick with.

5664. A Proposal

Newsgroup: rec.radio.amateur.misc
Date: 1999-05-31 00:00:00 UTC
From: Anonymous <nobody@replay.com>
Message-ID: <199905311321.PAA19550@mail.replay.com>
Source record: 141091
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

With all the discussion here about the Liberty Net and broadcasting and amateur restructuring, I would like to make a proposal.

1. Restructure the amateur bands to allow for commercial broadcasting and commercial communications on portions of the current HF, VHF and UHF amateur bands.

2. Allow current amateur licenses to be converted free of charge into commercial licenses. An amateur station could become a commercial station and broadcast and sell advertising, etc. etc. Operation would be limited to the new commercial sections fo the bands.

3. Allow these licenses to be sold/transferred to other parties for commercial use. This could make for a lot of happy amateurs who want nothing to do with the "new" commercial bands.

4. Brand new amateurs would be allowed access to the new amateur bands.

In essence, this proposal would give current amateurs "first refusal rights" for commercial operation. We all know our frequencies are going away, it's only a matter of time. This proposal would be "win-win"

We need to start thinking "out of the box"

Greg, there's supposed to be a Bicycle Hams organization - I think they
even had a forum at the Dayton Hamvention. Rather than re-invent, why
not try to contact them? I'm sure they've found what works.

Source record: 141099

Stubbornness is folly! If anyone really believes that a G5RV will beat out, on both transmit and receive, an NVIS Cloudwarmer on 20, it's because one is either too lazy or too stupid to experiment. I'm not saying that a Cloudwarmer is better than a beam ALL THE TIME,but it CAN give it a run for its money. The "Warmer" will snatch up the QSO first but the beam will hold it longer. If you think the "Warmer" is a joke, contact K3QAM in McKeesputz,PA. When the band was wide open to Europe in the morning, I'd clean Queenie's clock and he'd go berserk because he was using a beam and much more power than I. And so, before you condemn that Cloudwarmer,erect one, then COMPARE and you'll send me a thank you E. GUARANTEED! Doc,AF2Y

David Stinson <arc5@ix.netcom.com> wrote:

>Jim, you're making a case that jamming is caused by
>the discussion subject of the group being jammed,
>and I'm sure you don't mean that.

No, David, that's exactly what I mean. If the Libery Net goes away, then the jammers go away. It's illegal to cause malicious interference, and I think the jammers should be punished. But I think the root of the problem is the net. Nobody jams me, nobody jams traffic nets, nobody jams SDA Saturday afternoon chuch nets. Nobody jams 10-10 nets. The content of what's being discussed on the Liberty Net must be the cause of the jamming. Nobody's told me what that content is, but from the 'free thinkers' verb and the name of the net, I'm sure they aren't talking about about how to build 40 meter dipoles.

>That is exactly the same thinking that says:
>"It wasn't the rapist's fault. The girl was wearing
> sexy clothes so she was asking for it."

I don't excuse the jammers, or the rapist.

>The people talking about government are not breaking the law.
>The people doing the *jamming* are breaking the law.

Those are both correct. Ham radio isn't a political forum. It's a communications/electronics related hobby (or service).

>The yelling man's stupidity is no excuse for assault.

Yes, but I'm not saying the yelling man's stupidity is an EXCUSE for the assault. I'm saying it's the REASON for it.

>Our (mis)leaders encourage this dodging of personal responsibility-
>blaming the Liberty Net people for the guys that jam them.

No, I don't think they are blaming the Liberty Net for the guys that jam them. I think I just read that the FCC took one of the jammers off the air. They are questioning if the content of the Liberty Net meets goals and purpose of the Amateur Radio Service. Which is exactly what I'm wondering myself. I still haven't seen any messages detailing the content of the Libery Nets normal discussions.

This morning I heard this flake tell another flake,K2IVX, that HE corrected my spelling errors in a letter he intercepted. I've been on this USENET for 2.5 months and have yet to see one posting by KT4TR,Robert Youngblood, the Zero from Vero who collects warning letters from Riley Hollingsworth to cover holes in walls. And why hasn't Herbie's pet posted? Because the idiot can't think, spell and write, not necessarily in that order. Look, it's simple and so is he. Under the pretense of being an orange-growing maven, he is a fraudulent failure. I do not believe for a minute that he's responsible for his wealth if indeed he has it. Life is a bowl of cherries when one INHERITS or when one can rely on parents and I feel that Youngblood is such a leech. I only hope that his kid grows up to emulate his mother's ethics, morals and values instead of the corruptness exemplified by daddy. Imagine-KT4TR corrects MY English! What chutzpah! Listen up Bobby Boy....want to debate with me on this board? Let me know and I'll store my brain in the closet so we can start out even. Doc,AF2Y

Phil,you're right on target. How many of us wrongly think that passing a test is the key to on-the-air operations in perpetuity? All the FCC is doing is proving that to be incorrect and presumptuous. The 3.950 klan announces it's purpose is to discuss topical issues. I say B.S. The truth is that they're camouflaging the real intent which is to provide a forum for subversives who'd like to see nothing better than the overthrowal of our government. Need proof? When was the last time you heard anyone check into the Liberty Net with a moderate or liberal point of view? Never, you say? Right! Their credo is if you don't hate Clinton; if you don't hate immigrants; if you don't hate people of color; if you don't hate Jews and are not ready to fabricate the filthiest stories about them and their 5,000+ years of history, then YOU'RE NOT WANTED. The whole panorama of hate under the disguise of freedom of speech is now evident to Riley Hollingsworth and the man's doing something about it. In whose name you ask? IN THE NAME OF REAL FREEDOM OF SPEECH! Doc,AF2Y>>>>>>

Gentalmen lets clarify something here. The FCC has access to my station
anytime they like BUT they don't have access to my home! I spent over
10,000 dallors to protect my family from the garbage on ham radio and so
my wife and children can continue enjoying their privacy if the FCC were
ever going to inspect my station.
I spent the 10,000 dallors on a 16X12 concrete bock building, with 2X4
interior walls with R-19 insulation and sheetrock walls. This is what
houses my ham radio station and my computer shop.
I would sujest if you guys don't want a fedral offical snooping around
your home take the time and money to build yourself one of these
buildings for YOUR ham radio station.
73 from Oris
Save the Constitution and the Bill of Rights vote Libertarian!
-- <<<<<Save us from Oris! Oddly enough I operate my rig in the open, right in
my family room and if the FCC wants to inspect my setup, all they have to do is
to ring my bell, show ID and walk in. Why? I've nothing to hide; I've nothing
to fear nor am I paranoid about conspiracies and what not. Vote Libertartian?
Hell man, you're nuts. What's wrong with the good old Democrats and
Republicans? They've been doing a whale of job since God knows when.

I would not object to all modes being allowed on all frequencies.
That is not taking anything away. That would mean more frequencies
for any mode. That way, the mode that gets through when nothing
else will would win, whatever mode that turns out to be. It won't
be long before the distinction between phone and digital disappears
anyway. GSM, for instance, doesn't know the difference between data
and voice.

Personally, I think "all modes on all frequencies" makes as much sense as allowing "all vehicles anywhere on the road". Imagine no lanes on the interstate and a mix of bicycles, racing cars, 18 wheelers, and horses. It would be the equivalent of roadkill -- "bandkill".

Actually there are lanes that reverse the flow of traffic depending on
the time of day. The most traffic needs the most lanes. The most
popular RF modes need the most bandwidth. Since hams are prohibited
from transmiting on an already occupied frequency, that actually seems
to be a resonable analogy.

Boy I agree. Take the Morse subbands and do whatever with them (I do
not care one way or the other) but the Pactor/RTTY bands should not be
opened up to phone: i.e. 7.065-7.090; 14065-14090.

I have the new version 9. of Log-EQF. Best logging program I have ever used.
To get a complete working version only costs 35.00 and the complete Rig-EQF is
only 20.00. Well worth the really low price. Not fair to steal a man's
creation from him.

>interference, and I think the jammers should be punished. But
>I think the root of the problem is the net.
>

How absurd. The root of the problem is the
jamming. You are advocating a "shotgun" or
a "kill 'em all and let God sort 'em out" attitude in which both the criminals
and the victims are punished. There is NO excuse
for jamming .. NONE. There is NO ONE ELSE at fault for the jamming except THE
JAMMERS!!! Sheeessh!

>The content of what's
>being discussed on the Liberty Net must be the cause of the
>jamming. Nobody's told me what that content is, but from
>the 'free thinkers' verb and the name of the net, I'm sure they
>aren't talking about about how to build 40 meter dipoles.
>

You may be correct in that the content of the
Liberty Net causes those who can't stand
hearing the TRUTH to jam the net. But that's
not the Liberty Net's fault .. it's the fault of
the JAMMERS!! NO ONE IS HOLDING A GUN TO THEIR HEAD AND FORCING THEM TO LISTEN
TO THE LIBERTY NET. IF THEY DON'T LIKE WHAT THEY HEAR, THEY CAN EITHER TUNE
AWAY OR SHUT OFF THEIR RADIO.

hate speech, would you care to address the issue?<<<<Staggerlee you filthy
white trash. Go to hell with your revisionist garbage and take Carol Valentine
with you to play canasta. Doc,AF2Y>>>>>>>>
You did not refute the evidence of FCC and FBI
misconduct presented at the website,
http://www.atlcom.net/~geozim/index.htm

Personal attacks are not the business of this NG.
The title and text of your posting contributes
nothing to the NG. The last futile effort of a
weak-minded person is to attack the messenger.

The thread "CAROL VALENTINE IS A SICKO!" is what
generated your current posting. Her statements are
important to this NG because they pertain to
America Holocaust: the genocide of Christians
inside an amateur radio station. This makes
her contribution to the NG squarely on topic
for the NG.

Hi Everyone,

I am going to get the Yaesu VX-5, and I have a (theoretical) question about the antenna SWR. The HT will operate on the 440 band, but what would happen if someone who didn't know any better accidentally keyed up (on one that was modified to do so) on , say, 462.7125? Would it :
A.Transmit with full power and potentially damage the unit from reflected RF
B. Automatically reduce/limit the TX power to a safe level so that any reflected RF would not damage the unit
C. Not transmit at all.

Any help will be appreciated. The one I am going to get has been modified, and I want to ensure that I do not accidentally damage the unit while learning to use it. Thanks.

Paul

It would transmit just fine. I would choose answer B. myself. It wouldn't be like you were trying to work weak signal or moon bounce or something that required every db of signal that you could muster.

You will find that most stock antennas are/were resonant outside of the amateur bands anyway.

73 de,
Jim, WK1V

P.S. I am not an engineer but I'm sure there is one or two or three in here who will tell you precisely what will happen. I am not a know-it-all but I do have experience working with an Alinco DJ-580 since 1992 with a non-resonant UHF antenna and it's been working fine....and is still working fine. The antenna on my FT-530 is not resonant in the 440 band but it works just fine.

Steve,

For $49.95, you can check out version 9 all you want and you will not have to copy anyone registered disks.

I got version 9 at Dayton and like Tom's earlier versions, Version 9 is works great!

Yes, this applies in all walks of life, Jim, not just amateur radio. Those who follow the well-trodden path of convention and conformity seldom attract attention, either positive or negative.

It's partly a matter of different personalities and personal style. Looking at the big picture, society needs both conformists and non-conformists. If everyone was a non-conformist, society would disintegrate. If everyone was a conformist, there would be no innovations, no new paradigms.

Other types of amateur operations have been victims of intentional interference, too: SSB in the fifties; more recently, AM.

It's not so much the case now, since AM is part of the "nostalgia" kick and is therefore popular again, but back in the seventies and early eighties, AM operators were subject to quite a bit of intentional interference.

They were doing something "different," you see, and in the minds of those in which the herd mentality is particularly strong, that's a "sin."

So some among the conformity-worshipping crowd decided to "punish" the "sinners" by jamming them. (It wouldn't surprise me if some of the anti-SSB types of the fifties became haters of AM by the time it had become unpopular -- they're certainly the same personality type.) And, after a while, some inveterate jammers and congenital lunatics decided to join in the "fun."

Pretty much the same thing happened to 3950 in the last few years. But remember -- the 3950 operators had been having their free-swinging discussions for more than two decades before any of the trouble started.

> We have never been free to
> discuss business, and only recently have we been free to discuss

> ordering pizza with our local pizza parlor.
[...]

Business isn't the issue here.

But discussing business, and conducting business, are two different things. I've often discussed my broadcast engineering and production work on amateur radio, and violated no rules by doing so. Soliciting jobs or relaying field strength readings, via amateur radio, would have been a violation.

> I don't think religious beliefs, polictical
> beliefs, racial predjudices, or anything you would see on the Jerry
> Springer show should be discussed on the ham bands.
[...]

I've never seen the "Jerry Springer" show. I have watched almost no broadcast or cable television since 1991. Too crude for me, in the main.

At any rate, I enjoy discussing the important things in Life on amateur radio. I think it's OK to do that, and I'm mature enough to do it without becoming emotional or violating any rules.

Those who cannot handle that should just find another frequency where the conversation is more to their liking. That's what I do when I hear something not to my taste.

> I don't see
> how you can come from a busy day at work, turn on your radio, and

> different than mine.
>
> 73, Jim KH2D

As I've already told you, I never enjoyed the jamming. Why do you keep repeating that claim?

In fact, I've devoted many hours to documenting the malicious interference, and providing that documentation to appropriate enforcement authorities, in an attempt to put an end to it which has already borne fruit.

With all good wishes,

Kevin, WB4AIO.

Lord Dunsany wrote several most excellent stories on that
approximate subject. The titles are "Furrow Maker," "The Workman,"
and "The Prayer of the Flowers."

Faithfully,

Kevin, WB4AIO.

I hope you will re think your giving away the Extra sub bands. That would add a little more QRM to my DX'ing than I would like.

No doubt it's because of all the guns Paul has. ;-) ;-)

BTW, there is additional decoding software (including MDT) available
at http://www.eavsdropper.dabsol.co.uk/software.htm
